**PRINT FORM**

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Agency Use Only [If applicable]  
 Project : Z-2880  
 Date : 7/28/2025

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

***Full Environmental Assessment Form***  
***Part 3 - Evaluation of the Magnitude and Importance of Project Impacts***  
***and***  
***Determination of Significance***

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.

**REASONS SUPPORTING DETERMINATION OF SIGNIFICANCE**  
**ATTACHMENT TO FULL ENVIRONMENTAL ASSESSMENT FORM - PART 3**

In making its determination of significance, the City of Syracuse Planning Commission (the “Commission”) thoroughly analyzed the potential environmental impacts of the Action by utilizing the criteria specified in 6 NYCRR § 617.7(c). The Commission examined Part 1 of the Full Environmental Assessment Form (“FEAF”) for the Action and completed Part 2 of the FEAF to evaluate whether the proposed action will not or may result in one or more significant adverse environmental impacts.

The Action involves proposed amendments to the ReZone Syracuse Zoning Ordinance (to be renamed as Syracuse Zoning Ordinance) intended to: (1) correct typographical, grammar errors and omissions; (2) revise Dimensional Standards for specific zone districts (3) adopt regulations and definitions for new land use types; (4) clarify regulations concerning accessory uses; (5) revise and clarify parking standards and rules; (6) revise and clarify review procedures for Special Use Permit, Site Plan Review, Variance, Official Map Amendment; (7) establish a new procedure for text amendment, and (8) revise Rules of Measurement with additional terms definitions and measuring approach. Because the Action only involves the legislative enactment of amendments to the City’s existing Syracuse Zoning Ordinance, any environmental impacts resulting from the Action will be minimal.

The Action is intended to support the vision set forth in strategic plans developed by the City of Syracuse (the “City”), including the City of Syracuse Five-Year Consolidated Plan, the Syracuse Housing Plan, and the City of Syracuse Consolidated Plan 2040. The Action will not directly create any changes to the character or quality of important historical, archeological, architectural, or aesthetic resources or of existing community or neighborhood character, nor will it substantially change the use, or intensity of use, of land within the City. The proposed amendments are intended to promote the health, safety, and welfare of the residents of the City, and are narrowly tailored to avoid any changes in demand for other actions.

For the reasons set forth above, the Commission has determined that the Action will result in no significant adverse impacts on the environment. Accordingly, an environmental impact statement need not be prepared and the Commission issues a Negative Declaration for the Action.
