Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Semivolatile Organics

L2267177-05D: The sample has elevated detection limits due to the dilution required by the sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	SYRACUSE DEVELOPMENT CENTER	**Lab Number:**	L2267177
Project Number:	2224176	**Report Date:**	12/14/22

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	SYRACUSE DEVELOPMENT CENTER	**Lab Number:**	L2267177
Project Number:	2224176	**Report Date:**	12/14/22

Data Qualifiers

Identified Compounds (TICs).

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624/624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625/625.1: alpha-Terpineol
EPA 8260C/8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270D/8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS
EPA 8082A: NPW: PCB: 1, 5, 31, 87,101, 110, 141, 151, 153, 180, 183, 187.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water
EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B, SM4500NO2-B**

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Caitlin Walukevich

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	SYRACUSE DEVELOPMENT CENTER	**Lab Number:**	L2267178
Project Number:	2224176	**Report Date:**	12/14/22

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	SYRACUSE DEVELOPMENT CENTER	**Lab Number:**	L2267178
Project Number:	2224176	**Report Date:**	12/14/22

Data Qualifiers

Identified Compounds (TICs).

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624/624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625/625.1: alpha-Terpineol
EPA 8260C/8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270D/8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS
EPA 8082A: NPW: PCB: 1, 5, 31, 87,101, 110, 141, 151, 153, 180, 183, 187.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water
EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B, SM4500NO2-B**
EPA 332: Perchlorate; **EPA 524.2:** THMs and VOCs; **EPA 504.1:** EDB, DBCP.

1.0 INTRODUCTION

LaBella Associates, D.P.C. ("LaBella") was retained by Albanese Development Corporation (ADC/Client) to conduct a Supplemental Phase II Environmental Site Assessment (ESA) at the property located at 800-802 South Wilbur Avenue, Syracuse, New York, hereinafter referred to as the "Site" (see Figure 1). This Supplemental Phase II ESA has been performed in conformance with the scope and limitations of ASTM Practice E 1903-19.

The overall property addressed as 800-802 South Wilbur Avenue and historically utilized as the Syracuse Developmental Center comprises an approximately 47.8-acre area. However, for the purposes of this Supplemental Phase II ESA, the Site extent was limited to the Site boundaries as depicted on attached Figure 2. This area was selected based on a prior conceptual redevelopment plan.

1.1 Objective

The objectives of the Supplemental Phase II ESA were to:

- Evaluate subsurface soil and groundwater in the vicinity of redevelopment areas based on revised plans and not included in the Preliminary Phase II ESA;
- Assess subsurface impacts previously identified in the vicinity of SB-08; and,
- Install additional soil borings in the vicinity of the former oil house and carpentry shop.

1.2 Special Terms & Conditions

The findings of this Supplemental Phase II ESA are based on the scope of work and project objectives as stated in LaBella Proposal number P2301675 dated February 22, 2023.

1.3 Limitations & Exceptions

Work associated with this Supplemental Phase II ESA was performed in accordance with generally accepted environmental engineering and environmental contracting practices for this region. LaBella Associates, D.P.C., makes no other warranty or representation, either expressed or implied, nor is one intended to be included as part of its services, proposals, contracts or reports.

LaBella cannot provide guarantees, certifications or warranties that the property is or is not free of environmental impairment or other regulated solid wastes. The Client shall be aware that the data and representative samples from any given soil sampling point or monitoring well may represent conditions that apply only at that particular location, and such conditions may not necessarily apply to the general Site as a whole.

Due to the poor condition of the building interior and redevelopment plans to include demolition of the existing structure, sampling was not conducted inside the building as part of this Supplemental Phase II ESA.

2.0 BACKGROUND

2.1 Site Description & Features

The overall redevelopment project comprises a 47.8-acre area and is planned to be redeveloped for residential and manufacturing purposes. The Site consists of the approximately 29-acre area that is planned to be redeveloped with apartment buildings and townhomes, as depicted on Figure 2. The area immediately south and southwest of the property boundary is part of the greater property but not within the current Site footprint; as such, investigation was not conducted in this area as part of this Supplemental Phase II ESA.

The existing structure at the Site includes portions of a greater four-story, 628,808 square foot institutional building constructed between 1970 and 1971 that has most recently been used as offices and storage; this structure has been vacant for approximately 10 years.

2.2 Physical Setting

The Site is located in the City of Syracuse within a predominantly urban area; surrounding properties are utilized for residential, commercial, and educational purposes.

2.3 Adjacent Property Use

The Site is bordered by the following properties:

Direction	Land Use
North	Commercial (Arc of Onondaga - 600 South Wilbur Avenue) Commercial (Rosamond Gifford Zoo - 1 Conservation Place)
East	Residences (601-627 South Wilbur Avenue)
South	Southern portion of 800-802 Wilbur Avenue
West	Vacant commercial (410 Grand Avenue)

2.4 Site History & Land Use

Based on the historical records reviewed, the following information was obtained related to the Site:

- Between at least 1892 and 1967 the Site was developed with various former structures and utilized as a psychiatric facility including an oil house, paint/printing shop, greenhouses, and carpentry shop, which were present at various times between at least 1911 and 1967.

- From 1970-1971 through current the Site was developed with the current Site Building and utilized as a psychiatric facility through the early 2000s with later uses consisting of office space and storage. The Site has been vacant for approximately 10 years.

2.5 Summary of Preliminary Phase II ESA

LaBella recently completed a Preliminary Phase II ESA, draft report dated January 16, 2023, at the Site which included the advancement of fourteen (14) soil borings, installation of temporary groundwater monitoring wells and laboratory analysis of thirteen (13) soil and one (1) groundwater sample. This Preliminary Phase II ESA was performed to evaluate whether the RECs identified above had impacted the subsurface soil and groundwater at the Site and to evaluate current soil and

groundwater conditions for use in planning for redevelopment of the Site. The investigation was limited to an approximately 21.5-acre area from development plans at that the time and based on deteriorated building conditions, did not include sampling within building footprints. The results of the Preliminary Phase II ESA are summarized below.

- No visual or olfactory evidence of environmental impairment was identified within any of the soil borings advanced with the exception of SB-08 at 7.5 to 8 ft bgs. Black staining and petroleum odors were identified associated with these soils. PID readings of soils from SB-08 at 7.5 to 8 ft bgs were identified slightly above background conditions, at 0.4 ppm.

- VOCs were detected in soil borings at concentrations above laboratory MDLs; however, the concentrations detected do not exceed Unrestricted Use SCOs. Select metals and pesticides were identified in soil samples above Unrestricted Use SCOs; however, these compounds were not identified above Restricted Residential Use SCOs. Restricted Residential Use SCOs are the most appropriate comparison criteria based on the planned future use of the Site for multi-family housing.

- Numerous SVOCs were detected in one (1) soil sample (SB-08, 7.5-10 ft bgs) at concentrations exceeding Unrestricted and Restricted Residential Use SCOs. The SVOCs detected are polyaromatic hydrocarbons (PAHs) and are typically associated with asphalt pavement or partially combusted fossil fuels. Lead and pesticides were also identified above Unrestricted Use SCOs in this soil sample, but below Restricted Residential Use SCOs. As mentioned above, black staining and petroleum odors were noted in a portion of this sample interval during the investigation. While a temporary groundwater monitoring well was installed at this location, the well did not produce sufficient groundwater for development and sampling. Based on the preliminary nature of this assessment, the nature and extent of the impacts in SB-08 have not been delineated.

- SVOCs were detected in one (1) groundwater sample slightly exceeding TOGS 1.1.1 groundwater standards. However, based on elevated turbidity readings collected at the time of sampling, these results may not be representative of dissolved concentrations in groundwater. The Site is located in an urban area and groundwater is not a source of drinking water. Drinking water is supplied from a municipal source.

Based on the results of the Preliminary Phase II ESA, the following was recommended for the Site:

- Delineation of soil and groundwater should be completed in the vicinity of SB-08 to determine if additional subsurface impacts are present in this area which could warrant remediation.

- If the revised redevelopment plans expand the Site boundary beyond the current extent, additional investigation may be recommended.

ADC recently provided LaBella with revised redevelopment plans for the Site. These revised plans include a slight increase in land area and additional residential structures (apartment buildings and townhouses). Based on the revised redevelopment plans, and conversations with ADC, the purpose of the Supplemental Phase II ESA is to evaluate subsurface soil and groundwater in the vicinity of redevelopment areas based on revised plans and not included in the Preliminary Phase II ESA. In addition, to delineate subsurface impacts identified in the vicinity of SB-08 and install additional soil borings in the vicinity of the former oil house and carpentry shop.

3.0 FIELD INVESTIGATION

The following Scope of Work was performed:

3.1 Soil Boring Installation and Sampling

Prior to the initiation of subsurface work, an underground utility stake-out via *Dig Safely New York* was completed at the Site (ticket number 02223-001-056) to locate utilities in the areas where the subsurface assessment would take place.

In addition, LaBella retained the services of a geophysical survey sub-consultant to perform nonintrusive subsurface locating using a magnetometer and ground penetrating radar (GPR) capable of detecting and delineating metallic and buried objects in the subsurface. The geophysical work was conducted at the Site on February 27, 2023, by On The Mark Utility Locating Services, Inc. (OTM) under LaBella supervision. The work was performed specifically to clear all proposed soil boring and temporary well locations planned for sampling of any anomalies, utilities or buried objects.

The equipment utilized by OTM during the work included Pipehorn 800HL (Radio Frequency), Radiodetection CAT4 (Radio Frequency) and a Mala Ground Penetrating Radar (GPR) unit.

It should be noted that no geophysical anomalies or metallic or buried objects were identified in the proposed soil boring and temporary well locations utilized for sampling.

3.1.1 Soil Borings

A total of twenty (20) soil borings were advanced at the Site on March 1 and March 2, 2023, designated SB-15 through SB-34, under supervision of LaBella personnel. Soil borings were advanced at the Site to depths ranging from approximately 5 to 15-feet (ft) below ground surface (bgs) into the overburden with a track-mounted Geoprobe® Systems Model 6712DT direct-push sampling system. The use of direct-push technology allows for rapid sampling, observation, and characterization of overburden soils. The Geoprobe utilizes a 5-ft MacroCore® sampler with disposable polyethylene sleeves. Soil cores are retrieved in 5-ft sections and are cut from the polyethylene sleeves for observation and sampling. The MacroCore® sampler was decontaminated between boring locations using an Alconox® and potable water solution followed by a potable water rinse. Soil boring locations are depicted on Figure 2.

Soil samples were collected continuously from the ground surface to the bottom of each boring. Soil samples were visually and physically examined by LaBella personnel and observations made of the general lithology, visible layering, evidence of nonnative fill/historic fill materials, indications of chemical or other staining, odors, and other distinctive features. Soils from soil borings were field screened for the presence of Volatile Organic Compounds (VOCs) using a PID equipped with a 10.6 electronvolt (eV) lamp. Positive indications from any of these screening methods are collectively

referred to as “evidence of impairment”. PID data and observations from each boring are included on the soil boring logs presented in Appendix 1.

Samples were selected from the borings for laboratory analysis based upon depth, apparent depth of the top of the overburden groundwater table, field screening, and PID readings to address the potential environmental concerns identified at the Site. The soil samples submitted for laboratory analysis are listed in Section 3.3 and are summarized in Section 4.3. Investigation locations were located with a global positioning system.

3.2 Groundwater Monitoring Well Installation and Sampling

One (1) soil boring was converted into a temporary shallow overburden groundwater monitoring well (designated as TW-05 (SB-32). It should be noted that while up to five (5) temporary shallow overburden groundwater monitoring wells were planned, only one soil boring, SB-32, showed evidence of groundwater.

The well was constructed with 10-ft of 0.010-slot well screen of 1-inch inner diameter Schedule 40 polyvinyl chloride (PVC) screen attached to solid riser piping of the same material to complete the well. The well was installed as an overburden well that was intended to intersect the top of the overburden groundwater table. The annulus was sand packed with quartz sand to a nominal depth of 1-ft above the screen section and a bentonite seal was placed above the sand to near the ground surface. The groundwater monitoring well construction logs are included in Appendix 1.

In addition, the three (3) groundwater monitoring wells installed during the Preliminary Phase II ESA which did not produce groundwater initially, TW-01 (SB-01), TW-02 (SB-08) and TW-03 (SB-09), were reassessed on March 2, 2023 for evidence of groundwater. Evidence of groundwater in these wells was not identified. As such, these wells could not be developed or sampled.

On March 2, 2023, a static water level (SWL) was collected from TW-05 (SB-32) prior to development. The SWL was identified at 4.3 ft bgs. The well was developed using a peristaltic pump until three well volumes were removed. A peristaltic pump was used to collect a groundwater sample from TW-05 (SB-32) to limit turbidity. Immediately prior to sampling, a turbidity reading was collected in the field utilizing a Lamotte 2020we turbidity meter. Turbidity of groundwater in TW-05 (SB-32) was 141 NTU prior to sampling. Well development and turbidity are documented on the well construction logs.

The groundwater sample was submitted for laboratory analysis listed in Section 3.3 and is summarized in Section 4.3. Investigation locations were located with a global positioning system.

3.3 Laboratory Analytical Program

Samples selected for analysis were placed directly into laboratory-supplied containers, preserved as appropriate in a cooler, submitted under chain-of-custody protocol to Alpha Analytical in Westborough, Massachusetts, which is a New York State Department of Health (NYSDOH) Environmental Laboratory Accreditation Program (ELAP) certified laboratory. A laboratory courier was utilized to transport the samples to the lab.

LaBella submitted the following samples for laboratory analysis.

Sample ID	Sample Matrix	Sample Depth or Well Screen Interval (ft bgs)	Laboratory Analysis			
			VOCs	SVOCs	Metals	Pesticides
SB-15, 2.5-5.0	Soil	2.5-5.0	X	X	X	X
SB-16, 7.5-10.0	Soil	7.5-10	X	X	X	X
SB-19, 5.0-7.5	Soil	5.0-7.5		X		
SB-20, 5.0-7.5	Soil	5.0-7.5		X		
SB-25, 7.5-10.0	Soil	7.5-10.0	X	X		
SB-27, 2.5-5.0	Soil	2.5-5.0	X	X	X	
SB-31, 10.0-12.5	Soil	10.0-12.5	X	X	X	
SB-33, 5.0-7.5	Soil	5.0-7.5		X		
TW-05 (SB-32)	Groundwater	5.0-15.0	X	X		

Notes:

- VOCs - Volatile Organic Compounds analyzed for the Target Compound List (TCL) and NYSDEC Commissioner Policy (CP-51) lists using United States Environmental Protection Agency (USEPA) method 8260
- SVOCs - Semi-Volatile Organic Compounds analyzed for CP-51 list using USEPA method 8270
- Metals were analyzed for Resource Conservation and Recovery Act (RCRA) list of metals using USEPA method 6010 or 7471
- Pesticides were analyzed using USEPA Method 8081
- Sample locations are depicted on Figure 2

The laboratory analytical reports are included as Appendix 2.

3.4 Deviations to Objective

One (1) soil boring was converted into a temporary shallow overburden groundwater monitoring well (designated as TW-05 (SB-32). It should be noted that while up to five (5) temporary shallow overburden groundwater monitoring wells were planned, only one soil boring, SB-32, showed sufficient evidence of groundwater for well development and groundwater sampling purposes. As such, only one groundwater sample was collected for laboratory analysis.

4.0 RESULTS OF SUPPLEMENTAL PHASE II INVESTIGATION

4.1 Subsurface Conditions

Soils at the Site consisted generally of fine to medium brown/gray sands, some brown silt, little fine sub angular gravel. Urban fill material (i.e. brick, concrete, ash, coal, etc.) was not encountered during the work. Equipment refusal was encountered in eighteen (18) of the twenty (20) soil borings and consisted of weathered rock. Groundwater was encountered at approximately 4.3 ft bgs in TW-05 (SB-32).

4.2 Field Screening Results

All soil cores were continuously assessed by LaBella for evidence of impairment. No visual or olfactory evidence of impairment was identified within any of the soil borings advanced with the exception of SB-15 at 2.5-5 ft bgs, SB-16 at 7.5-10 ft bgs and SB-27 at 2.5-5 ft bgs. Black soils/staining was identified associated with these soils. In addition, slight petroleum odors were identified associated with soils at SB-15 at 2.5-5 ft bgs. PID readings were not identified above background condition in any of the soil samples.

Evidence of impairment was not identified in any of the other soil borings during the work. PID readings collected from the soil borings are included in the test boring field logs in Appendix 1.

4.3 Laboratory Analytical Results

The laboratory analytical results have been compared to the following standards:

Soil

- **Unrestricted Use Soil Cleanup Objectives (SCOs)** - 6 New York Code Rules and Regulations (NYCRR) Part 375-6.8(a) Unrestricted Use SCOs
- **Restricted Residential Use SCO** - 6 NYCRR Part 375-6.8(b) Restricted Use SCOs for a Residential Site

Based on the future use of the Site for multi-family housing, the Restricted Residential Use SCOs are the most appropriate comparison criteria for the Site.

Groundwater

- **TOGS 1.1.1** - NYSDEC document titled "Division of Water Technical and Operational Guidance Series 1.1.1; Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations" dated June 1998 as amended with April 2000 and June 2004 addendum tables

The results are summarized on the following attached tables:

- Table 1 – Summary of Volatile Organic Compounds in Soil Borings
- Table 2 – Summary of Semi-Volatile Organic Compounds in Soil Borings
- Table 3 – Summary of Metals in Soil Borings
- Table 4 – Summary of Pesticides in Soil Borings
- Table 5 - Summary of Volatile Organic Compounds in Groundwater
- Table 6 - Summary of Semi-Volatile Organic Compounds in Groundwater

4.3.1 Soil Boring Sample Results

VOCs:
A total of five (5) soil samples were analyzed for VOCs. VOCs were detected in two (2) of the five (5) soil samples at concentrations above laboratory method detection limits (MDLs); however, the concentrations detected do not exceed Unrestricted Use SCOs.

SVOCs:
A total of eight (8) soil samples were analyzed for SVOCs. Numerous SVOCs were detected in four (4) of the eight (8) soil samples, SB-15, SB-16, SB-27 and SB-33, at concentrations above laboratory MDLs. Of these detections, four (4) SVOC compounds were identified exceeding Unrestricted Use and Restricted Residential Use SCOs in SB-33, 5.0-7.5 ft bgs. In addition, one (1) SVOC compound was identified exceeding Unrestricted Use SCOs in SB-33, 5.0-7.5 ft bgs.

Metals:
A total of four (4) soil samples were analyzed for RCRA Metals. Metals were detected in all four (4) soil samples at concentrations above laboratory MDLs. Of these detections, mercury was identified above the Unrestricted Use SCO in one (1) soil boring (SB-15, 2.5-5 ft bgs). In addition, lead was identified above the Unrestricted Use SCO in one (1) soil boring (SB-16, 7.5-10 ft bgs). However, both concentrations were below the Restricted Residential SCO for these metals.

Pesticides:
A total of two (2) soil samples were analyzed for Pesticides. Pesticides were detected in one (1) soil sample (SB-15, 2.5-5 ft bgs) at concentrations above laboratory MDLs; however, the concentration detected does not exceed the Unrestricted Use SCO.

4.3.2 Groundwater Sample Results

VOCs:
One (1) groundwater sample was analyzed for VOCs (TW-05). No VOCs were detected in the groundwater sample at concentrations above laboratory MDLs.

SVOCs:
One (1) groundwater sample was analyzed for SVOCs (TW-05). Eight (8) SVOCs were detected in the groundwater sample at concentrations above laboratory MDLs. Of these detections, five (5) SVOCs were identified exceeding TOGS 1.1.1 groundwater standards. It should be noted that elevated turbidity was measured in this well during groundwater sampling; as such, the elevated concentrations of SVOCs could be the result of sediment in the samples and not representative of dissolved concentrations in groundwater.

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

LaBella was retained by ADC to conduct a Supplemental Phase II ESA at the property located at 800-802 South Wilbur Avenue, Syracuse, New York. The Supplemental Phase II ESA consisted of the advancement of twenty (20) soil borings, installation of a temporary groundwater monitoring well and laboratory analysis of eight (8) soil and one (1) groundwater sample.

- No visual or olfactory evidence of impairment was identified within any of the soil borings advanced with the exception of SB-15 at 2.5-5 ft bgs, SB-16 at 7.5-10 ft bgs and SB-27 at 2.5-5 ft bgs. Black soils/staining was identified associated with these soils. In addition, slight petroleum odors were identified associated with soils at SB-15 at 2.5-5 ft bgs. PID readings were not identified above background condition in any of the above soil samples. Evidence of impairment or urban fill (i.e., ash or cinders) were not identified in any of the other soil borings during the work.

- Three (3) VOCs and one (1) pesticide were detected in soil borings at concentrations above laboratory MDLs; however, the concentrations detected do not exceed Unrestricted Use SCOs. Metals including mercury and lead were identified in soil samples above Unrestricted Use SCOs at SB-15 at 2.5-5 ft bgs and SB-16 at 7.5-10 ft, respectively; however, these compounds were not identified above Restricted Residential SCOs. Restricted Residential SCOs are the most appropriate comparison criteria based on the planned future use of the Site for multi-family housing.

- SVOCs were detected in one (1) soil sample (SB-33, 5.0-7.5 ft bgs) at concentrations exceeding Unrestricted and Restricted Residential SCOs. The SVOCs detected are polyaromatic hydrocarbons (PAHs) and are typically associated with asphalt pavement or partially combusted fossil fuels. Note that SVOCs were also detected above Restricted Residential SCOs in sample SB-08 collected during the Preliminary Phase II ESA in January 2023.

- SVOCs were detected in one (1) groundwater sample, TW-05 (SB-32) slightly exceeding TOGS 1.1.1 groundwater standards. However, based on elevated turbidity readings collected at the time of sampling, these results may not be representative of dissolved concentrations in groundwater. The Site is located in an urban area and groundwater is not a source of drinking water. Drinking water is supplied from a municipal source.

Based on data from the January 2023 Preliminary Phase II ESA and this Supplemental Phase II ESA, select metals, pesticides and SVOCs have been identified sporadically throughout the Site in soil at concentration exceeding Unrestricted Use SCOs. In addition, SVOCs have been detected in soil at concentrations exceeding Restricted Residential Use SCOs and in groundwater at concentrations exceeding TOGS 1.1.1 groundwater standards; however, based on the nature of these compounds, the elevated concentrations in groundwater are likely attributed to high turbidity and may not be representative of dissolved concentrations.

The heavy metal and pesticide impacts are generally limited to shallow soils and may be the result of atmospheric deposition and/or historical operations at the property. The SVOC impacts are generally deeper and may be the result of historical filling.

5.2 Recommendations

Based on the sporadic nature of the soil impacts discussed in Section 5.1, LaBella recommends completing one of the two following approaches as part of redevelopment.

Option 1: Remediation

This approach involves excavation and off-site disposal of SVOC impacts above Restricted Residential SCOs. The impacts identified are sporadic and appear to be the result of historical filling; as such, additional areas of similar impacts could be encountered during future earthwork. For this reason, Option 1 would include a design phase investigation to provide a more comprehensive understanding of the subsurface in the areas of planned earthwork during redevelopment. Laboratory analysis associated with the design phase investigation would be limited to SVOCs unless additional impacts are observed in the field.

The areas of known impacts above Restricted Residential SCOs and any additional areas identified during the design phase investigation would be excavated until confirmatory soil samples indicate contamination has been removed. Excavated material would be transported to a NYCRR Part 360 landfill for disposal.

Option 2: Management During Construction

Based on the potential for the identified impacts to be widely distributed at the Site and the relatively stable nature of these compounds (i.e., generally don't leach to groundwater and don't volatilize), Option 2 would not involve active remediation or further investigation. Rather, an Environmental Management Plan (EMP) would be drafted to provide procedures for the identification, management and proper disposal of any impacted materials which could be encountered during construction. The EMP would include implementation of a Community Air Monitoring Program (CAMP) and environmental oversight during earthwork and guidance for the segregation of excavated materials.

Option 2 could result in less overall cost to the project while providing more comprehensive exposure prevention measures during earthwork and as part of the end use of the Site.

A copy of all information collected during this assessment, including maps, notes, analytical data and other material will be kept on file at the offices of LaBella Associates, D.P.C. This information is available upon request.

NOTES:

All values displayed in milligrams per kilograms (mg/kg) or parts per million (ppm)

"<" - Indicates compound was not detected above the indicated laboratory method detection limit (MDL).

Bold font indicates the concentration exceeds the method detection limit (MDL).

Underlined font indicates that the compound was detected at a concentration above its respective NYCRR Part 375-6.8(a) Unrestricted Use Soil Cleanup Objective (SCO)

Red font indicates that the compound was detected at a concentration above its respective NYCRR Part 375-6.8(b) Restricted Residential Use SCO

Metals analyzed by USEPA Method 6010/7471

NL indicates Not Listed

J indicates an estimated value

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Caitlin Walukevich

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	SYRACUSE DEVELOPMENT CENTER	**Lab Number:**	L2310842
Project Number:	2224176.1	**Report Date:**	03/06/23

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Number:	2224176.1	**Report Date:**	03/06/23

Data Qualifiers

Identified Compounds (TICs).

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624/624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625/625.1: alpha-Terpineol
EPA 8260C/8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270D/8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS
EPA 8082A: NPW: PCB: 1, 5, 31, 87,101, 110, 141, 151, 153, 180, 183, 187.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Biological Tissue Matrix: EPA 3050B

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Semivolatile Organics by SIM

The WG1750625-1 Method Blank, associated with L2311134-01, has a concentration above the reporting limit for Benzo(a)anthracene. Since the associated sample concentration is non-detect to the RL for this target analyte, no corrective action is required. Any results detected below the reporting limit are qualified with a "B".

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Kelly O'Neill

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	SYRACUSE DEVELOPMENT CENTER	**Lab Number:**	L2311134
Project Number:	2224176.1	**Report Date:**	03/06/23

Data Qualifiers

Identified Compounds (TICs).

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Report Format: DU Report with 'J' Qualifiers

Project Name:	SYRACUSE DEVELOPMENT CENTER	**Lab Number:**	L2311134

Garden City, New York 11530

Re: Professional Engineering and Management Services
Post Demolition - Phase II Environmental Site Assessment
Portion of 800-802 South Wilbur Avenue, Syracuse, New York 13204
LaBella Project No. 2224176

Dear Mr. Dettling:

LaBella Associates, D.P.C. (LaBella) completed a Post Demolition Phase II Environmental Site Assessment (ESA) on behalf of Albanese Development Corporation (ADC/Client) for the property addressed as 800-802 South Wilbur Avenue, Syracuse, New York, hereinafter referred to as the "Site." The Site is depicted on attached Figure 1. The Phase II ESA was performed in conformance with the Scope of Work outlined in LaBella's Proposal (P2503574) dated May 14, 2025.

INTRODUCTION

LaBella completed a Phase I ESA, Preliminary Phase II ESA and Supplemental Phase II ESAs for the Site. Based on the prior environmental reports, soil samples from two (2) of thirty-four (34) soil borings identified concentrations of semi-volatile organic compounds (SVOCs) slightly above Restricted Residential Soil Cleanup Objectives (SCOs). As the buildings previously located at the Site have been recently demolished, LaBella was authorized to complete this Post Demolition Phase II ESA to further investigate soil and groundwater conditions in the area of the former building footprints.

FIELD INVESTIGATION

Prior to the initiation of subsurface work, an underground utility stake-out via *Dig Safely New York* was completed at the Site to locate utilities in the areas where the subsurface assessment would take place.

In addition, a geophysical survey was conducted in the areas of the planned soil boring locations at the Site, prior to soil boring installation. The geophysical work was conducted at the Site on July 1, 2025 by LaBella. The equipment utilized included a Ground Penetrating Radar (GPR) unit, GSSI Utility Scan DF combined with an ML-1 Magnetic Locater and RD8000 Pipe and Cable Locater. The work was performed specifically to clear all proposed soil boring and temporary well locations planned for sampling of any anomalies, utilities or buried objects.

It should be noted that no geophysical anomalies, metallic or buried objects were identified during the clearing of boring locations.

A total of six (6) soil borings were advanced at the Site on July 8, 2025, designated SB-35 through SB-40, under supervision of LaBella personnel. All soil borings were advanced at the Site to depths between 3 and 20-feet (ft) below ground surface (bgs) into the overburden with a track-mounted Geoprobe® Systems Model 6620 direct-push sampling system. The use of direct-push technology allows for rapid sampling, observation, and characterization of overburden soils. The Geoprobe utilizes a 5-ft MacroCore® sampler with disposable polyethylene sleeves. Soil cores are retrieved in 5-ft sections and are cut from polyethylene sleeves for observation and sampling. The MacroCore® sampler was decontaminated between boring locations using an Alconox® and potable water solution followed by a potable water rinse. Soil boring locations are depicted on attached Figure 2.

Soil samples were collected continuously from the ground surface to the bottom of each boring. Soil samples were visually and physically examined by LaBella personnel and observations made of the general lithology, visible layering, evidence of nonnative fill/urban fill materials, indications of chemical or other staining, odors, and other distinctive features. Soils from soil borings were field screened for the presence of Volatile Organic Compounds (VOCs) using a photoionization detector (PID) equipped with a 10.6 electronvolt (eV) lamp.

No visual or olfactory evidence of environmental impairment was identified within any of the soil borings advanced. In addition, significantly elevated PID) readings (i.e., greater than background conditions or 3.2 parts per million (ppm)) were not observed during the work. In addition, urban fill material was not identified in any of the soil borings. PID readings collected from the soil borings are included in the test boring field logs in Attachment 1.

One (1) soil boring was converted into a temporary shallow overburden groundwater monitoring well, designated as TW-06 (SB-36). While Labella planned to install an additional temporary well during the work, two additional attempts at SB-39 and SB-40, including well material installation, showed no evidence of groundwater at these locations.

Temporary well TW-06 was constructed with 10-ft of 0.010-slot well screen of 1-inch inner diameter Schedule 40 polyvinyl chloride (PVC) screen attached to solid riser piping of the same material to complete the well. The well was installed as an overburden well designed to intersect the top of the overburden groundwater table. The annulus was sand packed with quartz sand to a nominal depth of 1-ft above the screen section and a bentonite seal was placed above the sand to near the ground surface.

The table below provides additional information regarding groundwater monitoring well.

Sample ID	Soil Boring Location	Well Depth (ft bgs)	Well Screen Interval (ft bgs)	Depth to Water (ft bgs)
TW-06	SB-36	14.0	4-14	11.94

LaBella personnel developed TW-06 by removing three well volumes from the well using a dedicated bailer. Representative groundwater samples were also obtained using a dedicated bailer. It should be noted that the groundwater samples collected remained turbid after development.

A total of two (2) soil samples and one (1) groundwater sample was selected for laboratory analysis. The following table provides additional information regarding the soil borings and temporary wells and laboratory analysis.

Sample ID	Sample Matrix	PID (ppm)	Sample Depth or Well Screen Interval (ft bgs)	Laboratory Analysis		
				VOCs	SVOCs	RCRA Metals
SB-39, 10-12.5	Soil	2.2	10-12.5	X	X	X
SB-40, 10-12.5	Soil	3.2	10-12.5	X	X	X
TW-06 (SB-36)	Groundwater	--	4.8-14.8	X	X	--

Notes:

- VOCs - analyzed for the Target Compound List (TCL) and NYSDEC Commissioner Policy (CP-51) list using USEPA method 8260.
- SVOCs - Semi-Volatile Organic Compounds analyzed for CP-51 list using USEPA method 8270.
- Metals were analyzed for Resource Conservation and Recovery Act (RCRA) list of metals using USEPA method 6010 & 7471.
- Sample locations are depicted on Figure 2.

LABORATORY RESULTS

The laboratory analytical results have been compared to the following standards:

Soil

- **Unrestricted Use Soil Cleanup Objectives (SCOs)** - 6 New York Code Rules and Regulations (NYCRR) Part 375-6.8(a) Unrestricted Use SCOs
- **Restricted Residential Use SCO** - 6 NYCRR Part 375-6.8(b) Restricted Use SCOs for a Residential Site

Based on the future use of the Site for multi-family housing, the Restricted Residential Use SCOs are the most appropriate comparison criteria for the Site.

Groundwater

- **TOGS 1.1.1** - NYSDEC document titled "Division of Water Technical and Operational Guidance Series 1.1.1; Ambient Water Quality Standards (AWQS) and Guidance Values and Groundwater Effluent Limitations" dated June 1998 as amended with April 2000 and June 2004 addendum tables

The results are summarized on the following attached tables:

- Table 1 – Summary of Volatile Organic Compounds in Soil Borings
- Table 2 – Summary of Semi-Volatile Organic Compounds in Soil Borings
- Table 3 – Summary of Metals in Soil Borings
- Table 4 - Summary of Volatile Organic Compounds in Groundwater
- Table 5 - Summary of Semi-Volatile Organic Compounds in Groundwater

A copy of the laboratory report is included in Attachment 2. Below is a summary of the laboratory results.

SOIL BORINGS - VOCs:

Two (2) soil samples were analyzed for VOCs. No VOCs were detected above laboratory method detection limits (MDLs).

SOIL BORINGS - SVOCs:

Two (2) soil samples were analyzed for SVOCs. SVOCs were detected in soils at concentrations above laboratory MDLs in one (1) of the soil sample collected, SB-40 (10-12.5 ft bgs); however, the concentrations detected were all below Unrestricted Use SCOs.

SOIL BORINGS - Metals:

Two (2) soil samples were analyzed for metals. Metals were detected in both soil samples above laboratory MDLs; however, the concentrations detected were all below Unrestricted Use SCOs.

GROUNDWATER - VOCs:

One (1) groundwater sample was analyzed for VOCs. One VOC, acetone, was identified in the groundwater sample exceeding laboratory MDLs; however, the concentrations detected did not exceed AWQS Standards.

GROUNDWATER - SVOCs:

One (1) groundwater sample was analyzed for SVOCs. One SVOC, fluoranthene, was detected in the groundwater samples above laboratory MDLs; however, the concentration detected did not exceed AWQS Standards.

CONCLUSIONS & RECOMMENDATIONS

LaBella was retained by ADC to conduct a Post Demolition Phase II ESA at the property located at 800-802 South Wilbur Avenue, Syracuse, New York. The Post Demolition Phase II ESA consisted of the advancement of six (6) soil borings, installation of a temporary groundwater monitoring well and laboratory analysis of two (2) soil and one (1) groundwater sample, as summarized below.

- No field evidence of impact (i.e. elevated PID readings, odors, staining, sheen, etc.) was observed within any of the soil borings installed. In addition, urban fill material was not identified in any of the soil borings.
- No VOCs, SVOCs or metals were detected above Unrestricted Use SCOs in soil.
- No VOCs or SVOCs were detected above NYSDEC AWQS in groundwater.

Based on the results of this Post Demolition Phase II ESA, no field evidence of environmental impairment or urban fill material was observed within any of the soil borings or soil samples collected. In addition, laboratory results for soil or groundwater samples did not identify any VOCs, SVOCs or metals above applicable NYSDEC criteria.

Based on this information, additional soil and groundwater investigation and/or remediation does not appear warranted at the Site at this time.

Based on the result of the Preliminary Phase II ESA, Supplemental Phase II ESA and Post Demolition Phase II ESA the potential for encountering impacts appears very limited and not widely distributed throughout the Site. As such, future planned development and excavations may encounter limited impacts that may require excavated material to be handled/managed in accordance with NYSDEC Part 360 regulations as urban fill is considered by the NYSDEC to be a solid waste that cannot be treated as Construction and Demolition solid waste.

In addition, as previously identified in the Supplemental Phase II ESA, the development of an Environmental Management Plan (EMP) would be required. The EMP would outline procedures for the proper identification and management of known or unknown impacted materials which could be encountered during future earthwork and construction at the Site (e.g., utility maintenance, redevelopment, etc.).

The EMP would include implementation and environmental oversight on an as needed basis during earthwork as suspect materials or impacts are identified and include guidance for the segregation of excavated materials, if needed.

We appreciate the opportunity to serve your professional environmental engineering needs. If you have any questions, please do not hesitate to contact me at (315) 243-8441.

Respectfully submitted,

LABELLA ASSOCIATES, D.P.C

BORING LOG

Boring No.	SB-35
Sheet	1 of 1
Project No.:	2224176

Project Name:	Post-Demolition Phase II ESA	**CHKD BY:**	
Location:	800-802 South Wilbur Avenue, Syracuse, NY	**Start Date:**	7/8/2025
Client:	Albanese Development Corporation	**Finish Date:**	7/8/2025
Drilling Firm:	LaBella LLC	**Driller:**	KT & Kaseem

Key:
- Geologic Strata Change
- Gradation Change Within Strata
- End of Boring or Overpacked

Drill Rig:	Geoprobe® 7822DT	**Core Type:**	Soil
Casing:	--	**Time Start:**	
Sampler:	Macro-Core - 5ft length, 2 in diameter	**Time End:**	
Sampling Method:	Direct Push	**LaBella Rep.**	Chris Putzer
Hammer:	--	**Other**	

Boring Location:

Depth (ft)	Sample ID	Depth of Change (ft)	VISUAL-MANUAL MATERIAL DESCRIPTION	PID (parts per million)	COMMENTS (e.g., Native, core run, RQD, % recovered)
1			Brown fine to medium SAND, some Gravel, trace silt	3.1	REC 23"/60" moist
2

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Pace Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments and solids are reported on a dry weight basis unless otherwise noted. Tissues are reported "as received" or on a wet weight basis, unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Pace's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Pace Project Manager and made arrangements for Pace to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

L2542542-03: The sample was received in the proper acid-preserved containers. Upon analysis the pH was determined to be greater than 2 and the method required holding time was exceeded.

Total Metals

L2542542-01 and -02: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by the sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature:  Cristin Walker

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	POST-DEMOLITION PHASE II ESA	**Lab Number:**	L2542542
Project Number:	2224176	**Report Date:**	07/28/25

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	POST-DEMOLITION PHASE II ESA	**Lab Number:**	L2542542
Project Number:	2224176	**Report Date:**	07/28/25

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Project Name: POST-DEMOLITION PHASE II ESA **Lab Number:** L2542542

Project Number: 2224176 **Report Date:** 07/28/25

LIMITATION OF LIABILITIES

Pace Analytical Services performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Pace Analytical Services shall be to re-perform the work at it's own expense. In no event shall Pace Analytical Services be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Pace Analytical Services.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility – 8 Walkup Dr. Westborough, MA 01581
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility – 320 Forbes Blvd. Mansfield, MA 02048
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
MADEP-APH.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

Mansfield Facility – 120 Forbes Blvd. Mansfield, MA 02048
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases

UUSCO - Unrestricted Use Soil Cleanup Objectives
VOC - Volatile Organic Compound

1.0 INTRODUCTION

This Environmental Management Plan (hereinafter "EMP" or "Plan") was developed on behalf of Albanese Development Corporation (ADC) to address environmental considerations associated with the planned redevelopment at 800-802 South Wilbur Avenue, Syracuse, Onondaga County, New York, hereinafter referred to as the "Project" and "Site" (see Figures 1 and 2).

The utilization of an EMP is intended to allow ADC and their contractors to complete the Project efficiently while maintaining compliance with applicable Rules and Regulations. The EMP is designed to allow both known and unknown areas of concern to be addressed during construction without significant delays to the Project.

The ADC Project consists of the redevelopment and construction of a 5-story building and a 4-story building for families, with a total of 261 residential units, on a 21.5- acre site at 800-802 South Wilbur Avenue in the City of Syracuse, Onondaga County, New York. The existing parcels include a portion of 098.2-01-05.2 and 098.2-01-05.4. The project is the first phase of a two-phase project. Building A will include a lower level at the front of the building that will include a lower-level lobby, two elevators, community room, a playroom, central laundry room, maintenance and management offices and mechanical rooms. The first floor, or main level, will include a main lobby, mail and package rooms, leasing office, maintenance rooms and residential units. Building B will include a lobby, two elevators, mail and package rooms, fitness room, maintenance areas and residential units. Site work will include clearing, grading and excavation, construction of driveways, parking areas and sidewalks, finish grading and landscaping.

Refer to Figure 3 for the planned Site Layout. The proposed ground disturbance is approximately 8.00 acres.

LaBella Associates, D.P.C (LaBella) will assist in the implementation of the EMP on behalf of ADC, if necessary and on an as needed basis. LaBella will provide appropriately trained and experienced staff to be present on-site during earthwork and redevelopment activities that disturb or have the potential to disturb fill materials and impacted media (if encountered). LaBella will provide the necessary reporting and closure documents to memorialize the construction activities as detailed in Section 11.0 of this Plan, if required.

2.0 OBJECTIVE AND APPLICABILITY

The objective and purpose of this EMP includes the following:

- Summarize the history of environmental investigations at the Site and compile that information into a single document for ease of reference.
- Provide guidance concerning the characterization and management of subsurface impacted soil, groundwater, urban fill, and other materials (construction and demolition debris such as concrete or large pieces of metal) generated during upcoming redevelopment activities planned at the Site.

2.1 Applicability of Environmental Management Plan

This EMP applies to any Developer, Contractor, Utility Contractor, or Municipal Agency that disturbs the subsurface at the Site.

2.2 Roles and Responsibilities

The following table outlines the roles and responsibilities for environmental management and oversight triggered by earthwork involving impacted media:

Company / Role	Personnel / Title	Responsibilities
Albanese Development Corporation (Development Consultant)	Jim Wanser/ Development Manager	Provide Project information during pre-development and planning process. Key contact throughout Project for updates, etc.
	TBD	Immersed in Project as development occurs. Often on-site and available for applicable questions/concerns.
LaBella Associates, D.P.C (Environmental Engineer / Consultant)	William Sisco/ Regional Environmental Manager	Provide regulatory agency interface and guidance to field personnel throughout project. Provide a final report verifying compliance with this EMP and documenting all excavation, reuse, and waste disposal activities.
	TBD	Provide on-site oversight to observe and document the implementation of the EMP. Daily discussion with contractor and/or Construction Manager. Provide guidance on the segregation, staging, and sampling of excavated materials and conduct community air monitoring.
TBD (Contractor)	TBD	Excavate, segregate, and stage materials in accordance with the EMP and alert LaBella in the event that unknown evidence of impairment is encountered. Responsible for arranging appropriate handling/transportation and reuse or disposal of material going off-site.
	NYSDEC Spill Hotline 1-800-457-7362	The NYSDEC Spill Hotline must be contacted to report contamination that is previously unknown and discovered during the Project, or that occurs as part of project activities (for example, a hydraulic oil leak from excavation equipment). Any spill reporting situation must be immediately reported to LaBella and the Owner so that the need for NYSDEC notification can be assessed and joint reporting decisions can be made.

3.0 SITE DESCRIPTION AND BACKGROUND

3.1 Site Location and Description

The Site measures approximately 21.5 acres and consists of two tax parcels (portion of 098.2-01-05.2 and 098.2-01-05.4). The former buildings at the Site were recently demolished by the City of Syracuse and the Site is currently vacant land.

3.2 Physical Setting

The Site is located in the City of Syracuse within a predominantly urban commercial/residential area (see Figures 1 and 2).

3.3 Site & Project Background

The ADC Project will consist of the construction of a 5-story building and a 4-story building for families, with a total of 261 residential units. The project is the first phase of a two-phase project. Building A will include a lower level at the front of the building that will include a lower-level lobby, two elevators, community room, a playroom, central laundry room, maintenance and management offices and mechanical rooms. The first floor, or main level, will include a main lobby, mail and package rooms, leasing office, maintenance rooms and residential units. Building B will include a lobby, two elevators, mail and package rooms, fitness room, maintenance areas and residential units.

Attached Figure 3, Site Layout Plan completed by TDK Engineering Associates dated October 14, 2024, shows the planned redevelopment.

Based on the findings of previous assessments performed by LaBella (see Section 3.4 below), and the historical nature and urban setting of the property, it is anticipated that slightly impacted material and/or urban soil/fill may be encountered at the Site during earthwork that will require proper management in accordance with New York Codes, Rules and Regulations (NYCRR) Part 360.

3.4 Summary of Previous Studies

The following reports were previously prepared and reviewed by LaBella:

3.4.1 Phase I Environmental Site Assessment – 800-802 South Wilbur Avenue, Syracuse, NY, dated October 31, 2022 (LaBella Project No. 2224176)

This report included the review of a previous Phase I ESA completed by PSI and dated February 11, 2008 and a previous Limited Phase II ESA completed by B&K and dated March 14, 2008.

The following is a summary of the information obtained from the previous reports.

<u>2008 Phase I ESA</u>

The 2008 Phase I ESA included the Site and remaining portions of the greater tax parcel (totaling 48 acres). The Subject Property was developed with one structure and was utilized for office space and storage.

At the time of the site visit, various stored materials were observed on the Site including various drums and smaller containers, a 275-gallon diesel AST within the lowest level (associated with a backup generator), a 550-gallon chlorine AST on the second floor (associated with a swimming pool), and a 5,000-gallon diesel UST to the west of the garage area (off-site relative to the current Site) that was reportedly been decommissioned and closed-in-place in 1997.

Historical sources indicated that the Subject Property had been utilized as a mental institution since at least 1892, including the existing site building since 1970.

The Subject Property was identified as a RCRA Non-Generator, FINDS facility, UST/Historic UST facility, Manifest Site, and NY Spills site. The UST listings referenced the closed-in-place 5,000-gallon diesel UST along with a 2000-gallon gasoline UST that was removed in 1998; a NY Spill listing was identified in association with the gasoline UST closure and thus considered an HREC. An additional Spill included oil found in a drain and had been addressed to the satisfaction of the regulator.

A south adjacent property was identified as a gas station with associated UST and LTANK listings. The consultant considered such to be a REC for the greater property. *LaBella notes that based on the topographic location of this facility relative to the Subject Property currently being assessed, such is not considered to pose a potential environmental concern at this time.*

The following REC was identified as associated with the Subject Property:

- An oil house, paint/printing shop, hospital, and laundry area were indicated on the Subject Property at various times according to the 1911, 1951, 1953, and 1962 Sanborn Maps. It is likely that solvents, petroleum products, paints, cleaning chemicals, and other hazardous materials were utilized and stored at these areas and other areas of the Subject Property. The information available concerning hazardous material use and disposal at these buildings and the remainder of the Subject Property could not be determined during the assessment.

In addition, the following HREC was identified as associated with the Subject Property:

- According to the database report, the Subject Property is identified in the UST, Historic UST, NY Spills, and NY Historic Spills databases. The UST and Historic UST listings are due to two registered USTs on the Subject Property. In 1997, a 5,000-gallon gasoline UST was closed in place at the Subject Property. In 1998, a 2,000-gallon gasoline UST was closed and removed from the Subject Property. A NY Spills incident appears to be related to the 1998 tank removal. The information available indicated that soil contamination was discovered after the tank was removed the ground. The spill was closed in October 2003. The remaining NY Spills and NY Historic Spills incident occurred in October 1986 when a type of petroleum was found in a floor drain. A sample was analyzed and the material was found to contain less than 50 ppm PCBs. The material was collected and disposed of off-site. The incident was closed in July 1988. Given the regulatory closure of these past spills at the Subject Property, PSI does not consider these spills to represent a REC; however, they do represent a HREC. LaBella notes that no closure documentation was reviewed relative to the

closed in place 5,000-gallon UST. As such, environmental conditions relative to that tank are unknown. Nonetheless, given the location of this closed in place UST relative to the Subject Property currently being assessed, such is not considered to pose an environmental concern for the portion of the greater property being assessed by LaBella.

PSI recommended a Phase II ESA to address the historical use and storage of hazardous materials at the Subject Property. PSI also recommended that areas of indiscriminate dumping on the Subject Property be evaluated to determine if this dumping had impacted the Subject Property.

2008 Phase II ESA

On March 6 and 7, 2008, 11 borings were installed at the Subject Property in the vicinity of the former paint/printing shop, the former oil house, the former hospital, and the former laundry area, respectively. Six soil samples were collected and analyzed for VOCs, SVOCs, PCBs, and metals. Operations of potential concern on the current Subject Property, as identified through historical sources, do not appear to have been investigated as part of this study. .

Two surface soil samples were collected from a debris pile identified during the 2008 Phase I ESA and analyzed for SVOCs, PCBs, and metals. Seven SVOCs were identified exceeding NYSDEC guideline values in SS-1.

The detection of benzo(a)pyrene above NYSDEC guideline values in two soil samples was a low-level exceedance and did not appear to constitute an environmental concern. Metal concentrations only slightly exceeded background concentrations and did not appear to be of significant environmental concern. No VOCs or PCBs were detected above NYSDEC guideline values. The site investigation was limited to the subsurface soil borings and surface soil sample locations. To fully define the nature and extent of contamination identified, additional site investigation would be required in the indiscriminate dumping area. It should be noted that the area where further investigation was recommended (the indiscriminate dumping area) is located off-site and is not considered to pose a potential concern to the current Subject Property based on its distance from and downgradient location relative to the same.

In addition to the above, LaBella was provided with a Limited Regulated Building Material Survey Report for the Subject Property, completed by Lu Engineers and dated April 2022. As part of this report, a site inspection was completed and building material samples were collected and analyzed to determine whether asbestos, PCB-containing caulk, and/or lead paint was present within the structure.

At the time of this report, Lu Engineers had noted a 275-gallon diesel fuel tank (AST) within the lower level of the structure; the tank was observed to be partially filled with fluid. As part of Lu's survey, visual observations were also made to determine the extent of regulated materials present. Such materials were noted to include paints, unmarked drums (both partially full and empty), hydraulic oil containers, lubricant containers, PCBP ballasts, fluorescent light bulbs, mercury vapor lighting, HID light bulbs, mold growth, and refrigerant, along with general hazards including hypodermic needles, fire debris, and other various garbage and debris. Various asbestos (several hundred thousand square feet), PCB, and lead paint-containing materials were confirmed to be present on-site. In

addition, visible mold growth was observed and it was estimated that approximately 60% of the structure was contaminated with mercury vapor, fluorescent, and HID bulb debris.

2022 Phase I ESA

Based on this report, the Subject Property consisted of 21.5 acres and was developed with portions of a greater four-story, 628,808 square foot institutional building constructed between 1970 and 1971 that had most recently been used as offices and storage; this structure had been vacant for approximately 10 years.

According to historical sources, the Subject Property was developed with various former structures and utilized as a psychiatric facility between at least 1892 and 1967. Former structures indicative of storage and/or use of hazardous materials and/or petroleum products that could pose a potential environmental concern included an oil house, paint/printing shop, greenhouses, and carpentry shop, which were present at various times between at least 1911 and 1967. Between at least 1970 and 2022, the Subject Property was developed with the former structure, utilized as a psychiatric facility through the early 2000s with later uses consisting of office space and storage.

At the time of the site reconnaissance, the following was noted:

- Nine five-gallon buckets of emulsified asphalt and five 55-gallon drums of floor cleaning chemicals were observed stored within the building. Minor staining was observed proximate one five-gallon bucket, however, no floor drains were observed in the vicinity of the staining. LaBella recommended that all hazardous chemicals be removed from the building prior to demolition.
- Vent pipes were observed on the exterior of the building. Based on the location of the vent pipes, it was presumed that an AST was currently or was historically located in the building. Based on the condition of the building, LaBella was unable to access the entirety of the structure.
- Areas of solid waste disposal, including household debris, were observed on the Subject Property. LaBella recommended that these materials be collected and properly disposed of as a best management practice.
- Evidence of fill material, including areas of mounding and potential settling, were observed throughout exterior areas on the Subject Property. The nature of fill material present on-site is unknown. LaBella notes that fill material generated as part of Subject Property redevelopment/construction activities may be subject to chemical testing and/or proper handling requirements which may impact the overall project budget.

The Subject Property was identified in regulatory records as the following:

- UST facility associated with two former USTs that were closed and removed from the Subject Property.
- The Subject/Greater Property was identified as a RCRA Non-Generator with no unresolved violations and as a Manifest Facility. Wastes generated and/or transferred from the Subject

Property have included PCBs, various metals, PCE, TCE, corrosive, ignitable, and reactive wastes, and spent non-halogenated solvents. While there were no records of release reported, these listings are indicative of past use/storage/handling of various hazardous materials on the greater property.

Adjacent properties did not suggest a concern to the Subject Property.

LaBella identified the following RECs:

- An oil house, paint/printing shop, greenhouses, and carpentry shop were located on the Subject Property at various times between at least 1911 and 1967. It is likely that solvents, paints, cleaning chemicals, and other hazardous materials and/or petroleum products were utilized and stored at these areas and other areas of the Subject Property; material handling practices are unknown. While a Limited Phase II ESA was conducted at the Subject/Greater Property in 2008 to address historical uses, that scope did not include an investigation of each area of likely chemical use/storage. As such, there is the potential for impact to exist in areas not previously investigated based on the historical uses of the Subject Property.
- Evidence of fill material, including areas of mounding and potential settling, were observed throughout exterior areas on the Subject Property. The nature of fill material present on-site is unknown. LaBella notes that fill material generated as part of Subject Property redevelopment/construction activities may be subject to chemical testing and/or proper handling requirements which may impact the overall project budget.
- The Subject/Greater Property was identified as a RCRA Non-Generator with no unresolved violations and as a Manifest Facility. Wastes generated and/or transferred from the Subject Property have included PCBs, various metals, PCE, TCE, corrosive, ignitable, and reactive wastes, and spent non-halogenated solvents. While there were no records of release reported, these listings are indicative of past use/storage/handling of various hazardous materials on the greater property.

No CRECs, HRECs, de minimis conditions, or significant data gaps were identified in connection with the Subject Property.

An abbreviated copy of the 2022 Phase I ESA is included as Appendix 1 of this Plan.

3.4.2 Preliminary Phase II Environmental Site Assessment – 800-802 South Wilbur Avenue, Syracuse, NY, dated January 16, 2023 (LaBella Project No. 2224176)

According to the report, the overall property addressed as 800-802 South Wilbur Avenue and historically utilized as the Syracuse Developmental Center comprises an approximately 47.8-acre area. However, for the purposes of the Preliminary Phase II ESA, the extent was limited to the 21.5-acre area (Subject Property). This area was selected based on a prior conceptual redevelopment plan.

The Preliminary Phase II ESA consisted of the advancement of 14 soil borings, installation of temporary groundwater monitoring wells and laboratory analysis of 13 soil and one groundwater sample. This Preliminary Phase II ESA was performed to evaluate whether the RECs identified in the Phase I ESA report by LaBella dated October 31, 2022, including review of other previous environmental reports, have impacted the subsurface soil and groundwater at the Subject Property and to evaluate current soil and groundwater conditions for use in planning for redevelopment of the Subject Property. Investigation was limited to the approximately 21.5-acre area and based on deteriorated building conditions, did not include sampling within building footprints. The following conclusions were made based on the results of the Phase II ESA:

- No visual or olfactory evidence of environmental impairment was identified within any of the soil borings advanced with the exception of SB-08 at 7.5 to 8 ft bgs. Black staining and petroleum odors were identified associated with these soils. PID readings of soils from SB-08 at 7.5 to 8 ft bgs were identified slightly above background conditions, at 0.4 ppm.
- VOCs were detected in soil borings at concentrations above laboratory MDLs; however, the concentrations detected do not exceed Unrestricted Use SCOs. Select metals and pesticides were identified in soil samples above Unrestricted Use SCOs; however, these compounds were not identified above Restricted Residential SCOs. Restricted Residential SCOs are the most appropriate comparison criteria based on the planned future use of the Subject Property for multifamily housing.
- Numerous SVOCs were detected in one soil sample (SB-08, 7.5-10 ft bgs) at concentrations exceeding Unrestricted and Restricted Residential SCOs. The SVOCs detected are polyaromatic hydrocarbons (PAHs) and are typically associated with asphalt pavement or partially combusted fossil fuels. Lead and pesticides were also identified above Unrestricted Use SCOs in this soil sample, but below Restricted Residential SCOs. As mentioned above, black staining and petroleum odors were noted in a portion of this sample interval during the investigation. While a temporary groundwater monitoring well was installed at this location, the well did not produce sufficient groundwater for development and sampling. Based on the preliminary nature of this assessment, the nature and extent of the impacts in SB-08 have not been delineated.
- SVOCs were detected in one groundwater sample slightly exceeding TOGS 1.1.1 groundwater standards. However, based on elevated turbidity readings collected at the time of sampling, these results may not be representative of dissolved concentrations in groundwater. The Subject Property is located in an urban area and groundwater is not a source of drinking water. Drinking water is supplied from a municipal source.

Based on the conclusions above, LaBella recommended the following:

- Delineation of soil and groundwater should be completed in the vicinity of SB-08 to determine if additional subsurface impacts are present in this area which could warrant remediation.

- If the revised redevelopment plans expand the Subject Property boundary beyond the current extent, additional investigation may be recommended. Based on the historical presence of USTs and a historical boiler house which was demolished in the early 1970s, additional investigation may include a geophysical survey to assess for orphan USTs (primarily near the historical boiler house) and additional soil and groundwater sampling.

An abbreviated copy of the 2023 Preliminary Phase I! ESA is included as Appendix 2 of this Plan.

3.4.3 Supplemental Phase II Environmental Site Assessment – 800-802 South Wilbur Avenue, Syracuse, NY, dated March 16, 2023 (LaBella Project No. 2224176.1)

According to the report, the site consisted of approximately 29 acres (21.5 acres of which was the Subject Property). ADC provided LaBella with revised redevelopment plans for the Subject Property. These revised plans included a slight increase in land area and additional residential structures (apartment buildings and townhouses). Based on the revised redevelopment plans, and conversations with ADC, the purpose of the Supplemental Phase II ESA is to evaluate subsurface soil and groundwater in the vicinity of redevelopment areas based on revised plans and not included in the Preliminary Phase II ESA. In addition, to delineate subsurface impacts identified in the vicinity of SB-08 and install additional soil borings in the vicinity of the former oil house and carpentry shop.

The Supplemental Phase II ESA consisted of the advancement of 20 soil borings, installation of a temporary groundwater monitoring well and laboratory analysis of eight soil and one groundwater sample. The following conclusions were made based on the results of the Phase II ESA:

- No visual or olfactory evidence of impairment was identified within any of the soil borings advanced with the exception of SB-15 at 2.5-5 ft bgs, SB-16 at 7.5-10 ft bgs and SB-27 at 2.5-5 ft bgs. Black soils/staining was identified associated with these soils. In addition, slight petroleum odors were identified associated with soils at SB-15 at 2.5-5 ft bgs. PID readings were not identified above background conditions in any of the above soil samples. Evidence of impairment or urban fill (i.e., ash or cinders) were not identified in any of the other soil borings during the work.
- Three VOCs and one pesticide were detected in soil borings at concentrations above laboratory MDLs; however, the concentrations detected do not exceed Unrestricted Use SCOs. Metals including mercury and lead were identified in soil samples above Unrestricted Use SCOs at SB-15 at 2.5-5 ft bgs and SB-16 at 7.5-10 ft, respectively; however, these compounds were not identified above Restricted Residential SCOs. Restricted Residential SCOs are the most appropriate comparison criteria based on the planned future use of the Subject Property for multi-family housing.
- SVOCs were detected in one soil sample (SB-33, 5.0-7.5 ft bgs) at concentrations exceeding Unrestricted and Restricted Residential SCOs. The SVOCs detected are polyaromatic hydrocarbons (PAHs) and are typically associated with asphalt pavement or partially combusted fossil fuels. Note that SVOCs were also detected above Restricted Residential SCOs in sample SB-08 collected during the Preliminary Phase II ESA in January 2023.

- SVOCs were detected in one groundwater sample, TW-05 (SB-32) slightly exceeding TOGS 1.1.1 groundwater standards. However, based on elevated turbidity readings collected at the time of sampling, these results may not be representative of dissolved concentrations in groundwater. The Subject Property is located in an urban area and groundwater is not a source of drinking water. Drinking water is supplied from a municipal source.

Based on data from the January 2023 Preliminary Phase II ESA and this Supplemental Phase II ESA, select metals, pesticides and SVOCs had been identified sporadically throughout the Subject Property in soil at concentrations exceeding Unrestricted Use SCOs. In addition, SVOCs had been detected in soil at concentrations exceeding Restricted Residential Use SCOs and in groundwater at concentrations exceeding TOGS 1.1.1 groundwater standards; however, based on the nature of these compounds, the elevated concentrations in groundwater are likely attributed to high turbidity and may not be representative of dissolved concentrations.

The heavy metal and pesticide impacts are generally limited to shallow soils and may be the result of atmospheric deposition and/or historical operations at the property. The SVOC impacts are generally deeper and may be the result of historical filling.

Based on the sporadic nature of the soil impacts, LaBella recommended completing one of the two following approaches as part of redevelopment:

- Option 1: Remediation: This approach involves excavation and off-site disposal of SVOC impacts above Restricted Residential SCOs. The impacts identified are sporadic and appear to be the result of historical filling; as such, additional areas of similar impacts could be encountered during future earthwork. For this reason, Option 1 would include a design phase investigation to provide a more comprehensive understanding of the subsurface in the areas of planned earthwork during redevelopment. Laboratory analysis associated with the design phase investigation would be limited to SVOCs unless additional impacts are observed in the field.

The areas of known impacts above Restricted Residential SCOs and any additional areas identified during the design phase investigation would be excavated until confirmatory soil samples indicate contamination has been removed. Excavated material would be transported to a NYCRR Part 360 landfill for disposal.

- Option 2: Management During Construction: Based on the potential for the identified impacts to be widely distributed at the Subject Property and the relatively stable nature of these compounds (i.e., generally don't leach to groundwater and don't volatilize), Option 2 would not involve active remediation or further investigation. Rather, an Environmental Management Plan (EMP) would be drafted to provide procedures for the identification, management and proper disposal of any impacted materials which could be encountered during construction. The EMP would include implementation of a Community Air Monitoring Program (CAMP) and environmental oversight during earthwork and guidance for the segregation of excavated materials. Option 2 could result in less overall cost to the project while providing more comprehensive exposure prevention measures during earthwork and as part of the end use of the Subject Property.

An abbreviated copy of the 2023 Supplemental Phase I! ESA is included as Appendix 3 of this Plan.

3.4.4 Post Demolition - Phase II Environmental Site Assessment – 800-802 South Wilbur Avenue, Syracuse, NY, dated August 5, 2025 (LaBella Project No. 2224176)

According to the report, based on the prior environmental reports, soil samples from 2 of 34 soil borings identified concentrations of SVOCs slightly above Restricted Residential Soil Cleanup Objectives (SCOs). As the buildings previously located at the Subject Property have been recently demolished, LaBella was authorized to complete this Post Demolition Phase II ESA to further investigate soil and groundwater conditions in the area of the former building footprints.

The Post Demolition Phase II ESA consisted of the advancement of six soil borings, installation of a temporary groundwater monitoring well and laboratory analysis of two soil and one groundwater sample, as summarized below. The following conclusions were made based on the results of the Phase II ESA:

- No field evidence of impact (i.e. elevated PID readings, odors, staining, sheen, etc.) was observed within any of the soil borings installed. In addition, urban fill material was not identified in any of the soil borings.
- No VOCs, SVOCs or metals were detected above Unrestricted Use SCOs in soil.
- No VOCs or SVOCs were detected above NYSDEC AWQS in groundwater.

Based on the results of this Post Demolition Phase II ESA, no field evidence of environmental impairment or urban fill material was observed within any of the soil borings or soil samples collected. In addition, laboratory results for soil or groundwater samples did not identify any VOCs, SVOCs or metals above applicable NYSDEC criteria.

Based on this information, additional soil and groundwater investigation and/or remediation did not appear warranted at the Subject Property at the time.

Based on the result of the Preliminary Phase II ESA, Supplemental Phase II ESA and Post Demolition Phase II ESA the potential for encountering impacts appears very limited and not widely distributed throughout the Subject Property. As such, future planned development and excavations may encounter limited impacts that may require excavated material to be handled/managed in accordance with NYSDEC Part 360 regulations as urban fill is considered by the NYSDEC to be a solid waste that cannot be treated as Construction and Demolition solid waste.

In addition, as previously identified in the Supplemental Phase II ESA, the development of an Environmental Management Plan (EMP) would be required. The EMP would outline procedures for the proper identification and management of known or unknown impacted materials which could be encountered during future earthwork and construction at the Subject Property (e.g., utility maintenance, redevelopment, etc.).

The EMP would include implementation and environmental oversight on an as needed basis during earthwork as suspect materials or impacts are identified and include guidance for the segregation of excavated materials, if needed.

An abbreviated copy of the 2025 Post Demolition Phase II ESA is included as Appendix 4 of this Plan.

4.0 REGULATORY LIMITS, REGULATIONS AND GUIDANCE

Regulatory agency standards and guidelines relevant to the Site and Project are summarized below. These include Federal hazardous waste regulations, various soil reference values promulgated by New York State agencies, and New York State groundwater quality standards. These documents and standards should be utilized to effectively implement the EMP.

4.1 Solid Waste Regulations

In accordance with 6 NYCRR Part 360, discarded materials (i.e., in excess to the generator), including soil, sand, and/or gravel is considered by the NYSDEC to be a solid waste. Such soil, sand, and/or gravel that also contains one or more of the following: ash, cinders, brick, concrete, asphalt, wood, and/or metal) is commonly referred to as 'urban fill' (or other similar names such as 'historical fill materials').

The NYSDEC allows for soil and fill materials to be relocated to other areas within the same site (i.e., within same contiguous area) in accordance with 6 NYCRR Part 360.12 assuming the fill is appropriately capped. Due to the unique Site boundaries, relocation of excess materials (including soil, fill, etc.) cannot be transported across non-contiguous parcels without prior approval from the NYSDEC under a BUD (including a pre-determined BUD which does not require formal NYSDEC approval). These materials may also be transported to an approved third-party property only if suitable after characterization testing and meeting the requirements of a BUD or pre-determined BUD. Alternatively, these materials can be disposed off-site in a New York State (NYS) Part 360 permitted landfill, pending waste characterization.

4.2 Hazardous Waste Regulations

As defined by the Resource Conservation and Recovery Act (RCRA), waste (e.g., excavated soil, fill materials, or building materials removed during deconstruction/renovation activities) can be classified as "hazardous waste" if it is one of the Federal "listed wastes" or if it possesses one of the four hazardous characteristics ("D" listed wastes): (1) ignitability, (2) reactivity, (3) corrosivity, or (4) toxicity. The EPA has developed standard tests to measure these four characteristics.

The fourth characteristic, toxicity, which is most frequently exceeded by contaminated soils and fills, is tested using the Toxicity Characteristic Leaching Procedure (TCLP), which provides an estimate of the concentration of contaminants that would leach into groundwater if the materials were disposed of in an environmentally unsecured landfill. To assess whether materials are hazardous waste, representative composite samples of the material are collected and submitted to a laboratory for analysis.

Composite samples are representative samples of the material that are collected from multiple locations throughout the waste. The samples are analyzed by the laboratory in accordance with the United States Environmental Protection Agency (USEPA) test methods. If the results of the laboratory testing indicate that the physical or toxicity characteristics of the sample exceed the RCRA regulatory limits detailed in 40 CFR Part 261, the material is considered hazardous waste.

4.3 Reference Values

Reference values to assess environmental impacts will include the following documents and regulations:

4.3.1 Evaluation of Soil and Fills

- NYSDEC Commissioner Policy (CP-51) Guidance Document: NYSDEC's Division of Environmental Remediation (DER) issued CP-51, "Soil Cleanup Guidance", in October 2010. CP-51 provides the framework and procedures for the selection of soil cleanup levels appropriate for each of the remedial programs in the NYSDEC's DER. CP-51 replaces TAGM #4046, the Petroleum Site Inactivation and Closure Memorandum, and Sections III and IV of Spills Technology and Remediation Series (STARS) #1.
- NYSDEC DER-10: NYSDEC Division of Environmental Remediation: Technical Guidance for Site Investigation and Remediation dated May 2010 (DER-10) addresses guidance procedures applicable to site investigations and remediation activities. This document will be utilized to determine the appropriate sample frequency for any excavation closure sampling and all Quality Control / Quality Assurance (QC/QA) protocols set forth by the Department.
- 6 NYCRR Part 375-6.8: Regulations set for this section are typically used for NYSDEC remedial programs sites such as inactive hazardous waste disposal sites, brownfields, or environmental restoration sties. The regulatory values in this section can be used to assess unrestricted and restricted use soil cleanup objectives. The standards contained within Part 375 are the most current regulatory guidance available for use and are referenced in 6 NYCRR Part 360 for determining fill types. The NYSDEC typically utilizes this set of guidance for projects administered by the NYSDEC Hazardous Waste Group.

4.3.2 Groundwater Reference Values

Reference values to assess groundwater impacts are included in NYSDEC's Technical and Operational Guidance Series (TOGS) 1.1.1 Groundwater Standards, dated June 1998 (and subsequent addendums). Other reference values exist for drinking water and effluent standards for waste water discharges to state water bodies; however, this EMP is not intended to manage these subjects or discharges.

4.3.3 New York State Guidance on Petroleum Storage Tanks (if encountered)

Removal of certain types of petroleum storage tanks is regulated by NYSDEC under 6 NYCRR Part 613, which requires that tanks out of use for 12 months or longer be closed in place or removed. Tank decommissioning procedures are included in 6YNCRR Part 613.3. Contaminated soils surrounding the tanks (if present), separate phase products on the water table, or contaminants dissolved in the groundwater must be removed. Additional tank closure procedures include but are not limited to measuring for the presence of a release where contamination is most likely to be present, which may include the collection and laboratory analysis of soil and/or groundwater samples.

4.3.4 Guidance for Evaluation of Soil Vapor Intrusion

The NYSDOH provides guidance in the Guidance for Evaluating Soil Vapor Intrusion in the State of New York, dated October 2006 (and associated amendments), that presents the approach to identifying and addressing current and potential human exposures to contaminated subsurface vapors associated with known or suspected volatile chemical contamination. This guidance provides an overview of vapor intrusion issues, guidance on collecting data that can be used to identify current or potential human exposures, discusses data evaluation, and provides an overview of soil vapor

intrusion mitigation methods and recommendations pertaining to their selection for use, installation and design, post-mitigation testing, operation, maintenance and monitoring, termination of operation, and annual certification. The NYSDEC provides additional guidance in *DER-13*, *Strategy for Evaluating Soil Vapor Intrusion at Remedial Sites in New York*, and the Environmental Protection Agency (EPA) provides additional guidance in the *Indoor Air Vapor Intrusion Mitigation Approaches.*

Note that prior assessments *have not* identified the potential for Soil Vapor Intrusion at this Site.

4.3.5 Excavation of Asbestos Containing Materials

The New York State Department of Labor (NYSDOL) provides the Industrial Code Rule 56 for guidance relating to hazards to the public safety and health during the removal, encapsulation, enclosure, repair, or disturbance of friable and non-friable asbestos, or any handling of asbestos material that may result in the release of asbestos fiber. The USEPA also provides guidance in Part 763-Asbestos.

5.0 ENVIRONMENTAL MANAGEMENT PLAN (EMP)

This EMP has been designed for all earthwork related activities at the Site (excavation, grading, etc.). with the potential to disturb impacted media (i.e., urban fill, petroleum-contaminated soil (if encountered), etc.). It is anticipated based on historical environmental investigations at the Site that materials of environmental concern (i.e., urban fill) will be encountered during redevelopment activities. This EMP has included specific procedures and tasks to manage environmental concerns that include but are not limited to:

- identification of materials of environmental concern
- waste disposal
- health and safety plan
- relocation of soil/fill on-site
- execution of EMP
- regulated solid waste
- waste management (e.g., handling, storage, etc.)
- community air monitoring plan
- regulatory reporting requirements
- decontamination of equipment
- waste characterization

LaBella will work with the Client and the Contractor to implement this EMP. As noted previously, LaBella will be on-site full-time during Site construction activities concerning soil/fill disturbance and/or soil/fill removal activities. This EMP has been designed for redevelopment and construction activities at the Site.

5.1 Context and Key Issues

Contaminated materials that exist in different media such as structures, utilities, soil, soil gas, and/or groundwater can present health risks to workers, the public, and the environment during construction and/or operation, if not properly managed. The Contractor will need to manage these materials in accordance with the applicable Rules and Regulations and clearly understand the waste characterization and disposal process so as not to compromise construction/operation schedules, budgets, and long-term liability for the owner (Conifer Realty). Even if no contaminated materials are discovered, appropriate due diligence must be exercised so that the proper documentation can be secured to reduce long-term liability for the project and/or the Site.

On-site media within the Site may be contaminated by historical uses, particularly the presence of urban fill materials which often contain heavy metals and semi-volatile organic compounds (SVOCs).

In addition, this EMP outlines procedures for the removals of the known heating oil AST in the North Building, the known propane UST on the eastern portion of the Site and general procedures in the event that orphan USTs or associated subsurface structures are encountered during construction.

5.2 Potential Contaminants of Concern

Based on historical uses of the Site and prior assessments, the contaminants described in this section could be encountered at the Site. Refer to Section 3.0 for a summary of potential contaminants which are suspected of being present at the Site.

Certain background concentrations can be expected from both natural and human sources. When concentrations exceed regulatory thresholds, an analysis of potential environmental health effects and the need for mitigation measures may be necessary.

Heavy Metals

Heavy metals are used in metal works, plating operations and can be present in paint, ink, petroleum products, coal ash, and mechanical waste fluids. Certain heavy metals can be toxic to humans at elevated concentrations and are often found in historical urban fill material (e.g., cinders and ash, brick, etc.).

Semi-Volatile Organic Compounds (SVOCs)

These include poly-aromatic hydrocarbons (PAHs), which are common constituents of partially combusted coal or petroleum-derived products, such as waste oils, creosote, coal and coal ash, wood ash, and asphalt. These compounds are often found in urban fill and asphalt-covered areas. SVOCs and PAHs can pose a risk to human health.

Volatile Organic Compounds (VOCs)

Although prior assessments have not identified any suspect sources of VOC impacts to the subsurface, VOCs are discussed based on the presence of a heating oil AST in the North Building. VOCs include aromatic compounds such as benzene, toluene, ethylbenzene, and xylenes, which are found in petroleum products (gasoline and etc.), as well as chlorinated VOCs such as trichloroethene and tetrachloroethene, which are common ingredients in commercial cleaners. Naturally produced VOCs include methane and hydrogen sulfide, which are breakdown products of organic materials. Inhaling toxic VOC vapors can be a health hazard, and some VOCs can be flammable if the circumstances are suitable for combustion. In contrast to contaminants such as metals and PAHs, VOCs generate soil gas vapors that may be a source of exposure even if the source (e.g., VOC-impacted soil or groundwater) is not directly exposed.

5.3 Field Screening Methods

Visual, olfactory, and instrument-based (i.e., PID) soil screening will be performed by LaBella, when oversight is requested and when impacts are identified, during redevelopment activities that disturb the subsurface at the Site. Soil screening will be performed as requested during soil disturbance and/or removal work performed during redevelopment at the Site. The contractor will be responsible for alerting LaBella if evidence of impairment is encountered. In the event that evidence of impairment

is noted by the Contractor, a LaBella environmental professional will aid in the classification and management of the impacted material.

Soils will be segregated based upon previous environmental data and in-field soil screening results into material that requires off-site disposal, material that requires testing, material that can be returned to the subsurface, and material that can be used as "cover" soil.

5.4 Identification of Solid Waste Impacted Media

Based on the history and observations made as described in Section 3.0, urban fill materials were not identified; however, could be encountered at the Site during earthwork.

These fill materials, if encountered, as well as an excess soil requiring removal from the Site are considered by the NYSDEC to be a solid waste. In accordance with 6 NYCRR Part 360.12, urban fill materials may be managed and placed into similar filled areas within the same site under appropriate cover. Alternatively, these materials can be disposed off-site in a New York State (NYS) Part 360 permitted landfill. These materials may only be reused off-site when a pre-determined or case-specific Beneficial Use Determination (BUD) is obtained from the NYSDEC.

The presence of ash, cinders, brick, concrete, and other urban fill material can be visually identified during excavation. If questions arise during identification of the solid waste LaBella shall make the final determination, for the classification on how the spoils generated during the construction activities at the Site will be managed.

5.5 Identification of VOC Impacted Media

Although prior assessments have not identified any suspect sources of VOC impacts to the subsurface, soils will be screening periodically, if impacts are encountered, during earthwork for the presence of VOCs based on the presence of a heating oil AST in the North Building at the Site.

VOC Impacted Media can be identified by the media exhibiting a chemical or petroleum-like odor, gray to black staining, and/or elevated readings of total VOCs on a PID. Groundwater impacted by VOCs may exhibit petroleum or chemical odor or sheen. Although not expected to be encountered at this Site, the volatilization of contaminants present in VOC Impacted Media may represent a worker health and safety concern for construction workers at the Site.

5.6 On-Site Management of Solid Waste Impacted Media and VOC Impacted Media

Solid Waste Impacted Media that is excavated should not be used within two feet of the overburden groundwater table. Solid Waste Impacted Media may be relocated on-site as approved by the Engineer and in accordance with 6 NYCRR Part 360, legally disposed of off-site at a NYS Part 360 Landfill, or reused on a third-party site if a pre-determined or case-specific BUD is obtained from the NYSDEC.

The staging of Solid Waste and Impacted Media shall be performed in a manner where it is segregated from non-Solid Waste Impacted Media (i.e., clean soils). Staging locations of Solid Waste Impacted Media should be reviewed with LaBella prior to staging, to prevent potential concerns related to placement, run-off, and/or cross-contamination.

Prior to excavating in areas where solid waste is anticipated, the Contractor shall remove the top layer of non–Solid Waste Impacted Media (i.e., topsoil, asphalt, etc.) as practicable and keep the material segregated from any Solid Waste Impacted Media. If the material is to be relocated for re-use on-site,

the Solid Waste Impacted Media shall be directly placed in the fill area or placed on and covered with polyethylene sheeting pending final on-site placement.

Excess soil or fill materials (including Solid Waste Impacted Media) are not allowed to leave the Site without proper testing and approvals, per NYCRR Part 360 Solid Waste Regulations.

If encountered, Solid (non-aqueous) VOC Impacted Media will be segregated from non-VOC Impacted Media into separate stockpiles and staged on and covered with one layer of 6-mil thick polyethylene sheeting at the end of each workday. The Contractor shall implement reasonable care to secure sheeting and maintain such stockpiles' integrity. VOC Impacted Media will then be tested for USEPA Target Compound List (TCL) and NYSDEC CP-51 list VOCs as well as CP-51 list SVOCs. If concentrations of VOCs and SVOCs are below the CP-51 Soil Cleanup Levels (SCLs), then the VOC Impacted Media may be re-used on-site. Conversely, if concentrations of VOCs and SVOCs are above the NYSDEC CP-51 SCLS, then the VOC Impacted Media shall be disposed of at a NYCRR Part 360 Landfill (pending landfill approval). The 6 NYCRR Part 375-6.8(b) Restricted Use Soil Cleanup Objectives (RUSCO) for Restricted Residential Use may be used as guidance for petroleum and chemical compounds not included in CP-51 guidance document.

If necessary, liquid, or aqueous VOC Impacted Media (i.e., groundwater) shall be pumped into a holding tank approved by LaBella. LaBella will assist the contractor to obtain a temporary discharge permit from the Municipality (if acceptable). This will include preparing paperwork, coordination with the Municipality, collection and analysis of samples and the following:

- The contractor shall collect, handle, filter or otherwise treat as necessary and properly dispose of VOC-impacted groundwater removed as needed for project construction. The Contractor shall conduct all tasks associated with these items in accordance with all Federal, State, County, and local regulations.
- If additional analysis and testing is required as identified by the accepting Publicly Owned Treatment Works (POTW), LaBella will collect samples from final or batch product collection. LaBella shall perform all required analyses at a laboratory approved by the New York State Department of Health Environmental Laboratory Approval Program (ELAP) for the intended analyses. LaBella shall provide a copy of the analysis report to the Contractor. No disposal shall occur prior to LaBella's receipt and acceptance of any laboratory reports and approval from POTW.
- In the event that off-site transportation of wastewater is necessary, a valid 6 NYCRR Part 364 Waste Transporter Permit shall be required. The contractor will also be required to provide all disposal documentation at an approved treatment storage and disposal facility to LaBella prior to disposal.

VOC Impacted Media shall not leave the Site without expressed written consent from LaBella.

5.7 Management of Demolition and Solid Waste Material

Non-impacted demolition and solid waste material including any wood, metal scrap, drainage piping, masonry (e.g., concrete, block, bricks) or other miscellaneous solid waste, which are determined to be physically unacceptable for re-use shall be separately stockpiled for off-site disposal or recycling.

Impacted demolition and solid waste material that cannot be cleaned to the satisfaction of LaBella shall be staged on and covered with a minimum of one layer of 6-mil polyethylene sheeting pending waste characterization by LaBella. The Contractor shall secure the sheeting and maintain such

stockpiles' integrity to the satisfaction of LaBella. Stockpiling locations shall be approved by LaBella. Impacted demolition and solid waste material will be disposed off-site at a permitted 6 NYCRR Part 360 Permitted landfill.

Cleaning of impacted demolition and solid waste material shall be by physical methods such as scraping, shaking, brushing, etc. Should the Contractor utilize methods which generate liquid waste streams or if liquid waste streams (e.g., oily water, pipes or sumps filled with sludge) are present that require removal, the Contractor is responsible for proper containerization and disposal of each waste stream. The contractor shall segregate each waste stream to the satisfaction of LaBella. Once impacted demolition and solid waste material is determined to be clean to the satisfaction of LaBella, the material can be managed in accordance with the EMP.

5.8 Management of Buried Asbestos-Containing C&D Debris

If buried asbestos-containing debris is encountered, the Contractor will be required to remove and dispose of the ACM in accordance with all applicable federal, state, and local laws and regulations. The removal of any ACM shall be completed by a licensed Asbestos Contractor with appropriately certified workers.

5.9 Management of Excavation Derived Water

If impacted groundwater at the project location is required to be pumped to advance earthwork activities, the Contractor shall pump the impacted groundwater into a holding tank and stage on-site pending off-site disposal. LaBella shall perform all characterization testing. If the water is determined by characterization testing to be suitable for discharge to the sewer, the Contractor shall be responsible for obtaining all applicable permits from the municipality.

5.10 Management of Orphan Underground Storage Tanks and Sub-Grade Structures

If orphan UST(s) or sub-grade structures are encountered by the Contractor, work shall stop immediately in the vicinity of the tank or structure and LaBella must be notified. LaBella will assess the condition of the tank or structure, where practicable. LaBella shall determine when it is practicable to resume work in the vicinity of the tank or structure. Tanks shall be decommissioned in accordance with 6 NYCRR Part 613 and City of Albany regulations.

The Contractor shall immediately notify LaBella upon any known environmental release from and/or encountered but not limited to any tank or sub-grade structure. LaBella shall notify the Owner of any known release. The Owner and their legal attorney / consultant(s) shall make the determination of any spill reporting requirements with 6 NYCRR Part 613-2.4 and 6 NYCRR 597.4 or any other local, state, or federal agency laws and regulations.

If a tank or sub-grade structure is damaged during discovery such that the contents of the structure are released, the Contractor shall provide the appropriately trained personnel and equipment to address the release. Possible action items include sludges, non-aqueous liquids, or contaminated water shall be removed from the subsurface structure and the sludges or liquids shall be containerized by the Contractor, characterized by LaBella, and staged on-site pending off-site disposal.

Tanks and sub-grade structures may contain sludges, non-aqueous liquids, or contaminated water. To the extent feasible the Contractor shall avoid damaging such structures upon discovery. Based on the special nature of the work associated with the decommissioning and removal of tanks or sub-grade structures that contain regulated or hazardous wastes the removal of such structures will be

completed by others (e.g., Specialty Environmental Contractor) as determined by LaBella. The subsurface structures will be decontaminated, and the sludges or liquids containerized, characterized, and staged on-site pending off-site disposal. Coordination between the Contractor and Specialty Environmental Contractor will be completed by LaBella. The removal of any tank or sub-grade structures will be completed as soon as possible based on each discrete situation.

Demolition of non-suspect sub-grade structures (i.e., storm distribution boxes, etc.) will be the responsibility of the Contractor. During removal/decommissioning of the sub-grade structures LaBella shall evaluate the soils adjacent to each structure. All sub-grade structures shall be inspected by LaBella to determine suitability for reuse, recycling, or disposal in accordance with the Specifications.

LaBella shall be responsible for all testing and characterization of Impacted Media and demolition materials described in this Section.

5.11 Solid Waste and VOC Impacted Media Summary

The table below details requirements and re-use of anticipated materials (and certain non-anticipated but potentially present materials) at the Site during the Project. Note that unless grossly contaminated, *material can be re-used on-site without testing* if re-used in accordance with proper NYCRR Part 360 requirements (see below table).

Table A – Material Classification

LaBella Classification of Material	NYS Part 360 Fill Type	Description / Screening Parameter	End Use
Green	F1	Soil, gravel, and/or rock with no evidence of or potential for contamination (i.e., no historical releases/spills, no suspect historical uses, etc.). No non-soil constituents. Must not produce objectionable odor.	No Restrictions
Yellow	Pending analytical testing results, F2 or "higher" (F3, F4 etc.)	Soil, gravel, or rock with no petroleum/chemical odors, staining, product or PID readings greater than 5 ppm. No non-soil constituents.	On-Site Reuse: Dependent upon Part 360 Fill Type (determined by analytical testing results). Refer to Table B. Off-Site Reuse/Disposal: Dependent upon Part 360 Fill Type (determined by analytical testing results). Refer to Table B.
Blue	Pending analytical testing, F3 or "higher" (F4, F5, etc.)	Soil, gravel, and/or rock with *de minimis* brick, concrete, and/or asphalt. No petroleum/chemical odors, staining, product, or PID readings greater than 5 ppm.	On-Site Reuse: Dependent upon Part 360 Fill Type (determined by analytical testing results). Refer to Table B. Off-Site Reuse/Disposal: Dependent upon Part 360 Fill Type (determined by analytical testing results). Refer to Table B.

LaBella Classification of Material	NYS Part 360 Fill Type	Description / Screening Parameter	End Use
Orange	Pending analytical testing, F4 or "higher" (F5, etc.)	Material contains non-soil constituents (including material such as ash, cinders, slag, brick, asphalt/concrete fragments, etc.). Material does not exhibit characteristics of gross contamination (e.g., significant petroleum/chemical odors, staining, or product). No PID readings above 25 ppm.	On-Site Reuse: Dependent upon Part 360 Fill Type (determined by analytical testing results). Refer to Table B. Off-Site Reuse/Disposal: Dependent upon Part 360 Fill Type (determined by analytical testing results). Refer to Table B.
Red	Not Applicable (analytical testing determines the material is contaminated beyond the allowable limits of NYS Part 360.	Material contains non-soil constituents (including material such as ash, cinders, slag, brick, asphalt/concrete fragments, etc.). Material may exhibit characteristics of gross contamination (e.g., significant petroleum/chemical odors, staining, product, and or PID readings above 25 ppm.	On-Site Reuse: Not allowed. Off-Site Reuse/Disposal: Unless a case-specific BUD is obtained, off-site disposal at permitted facility (landfill) is required.
Purple	Not Applicable	Any material containing 1% or more asbestos	On-Site Reuse: Not allowed. Off-Site Reuse/Disposal: Shall be legally disposed of at a permitted NYS landfill in accordance with all applicable regulations for ACM.

Table B – NYCRR Part 360 Beneficial Use Fill Types – End Uses

NYS Part 360 Fill Type	Fill End Use
Fill Type 1 (F1)	Any end use (no restrictions).
Fill Type 2 (F2)	Any setting where the fill meets the engineering criteria for use, except: agricultural land used for raising livestock or producing animal products for human consumption. Fill Type 2 may also be used in the same manner as Fill Type 3, Fill Type 4 and Fill Type 5.
Fill Type 3 (F3)	Any setting where the fill meets the engineering criteria, for use, except: 1. Undeveloped land; and 2. Agricultural crop on land used for raising livestock or producing animal products for human consumption. If used on residential property, material must be under impermeable surface (i.e., parking lot or building foundation) or under a minimum three (3) inches of Fill Type 1, Fill Type 2 or commercial soil A person must not receive payment or other form of consideration for allowing beneficial use of Fill Type 3 on land under that person's control.

NYS Part 360 Fill Type	Fill End Use
	Fill Type 3 may also be used in the same manner as Fill Type 4 and Fill Type 5.
Fill Type 4 (F4)	Engineered use for embankments or subgrade: A) in transportation corridors, or B) on sites where in-situ materials contain higher levels of contaminants than Fill Type 4 or Fill Type 5 criteria. Must be placed above the seasonal highwater table. May also be used in the same manner as Fill Type 5, except in locations where using Fill Type 5 is prohibited in accordance with paragraph 360.13(g)(2). Placement of Fill Type 4 is prohibited within the following counties, with the exception that Fill Type 4 can be reused as described in this section within the same county in which it was generated: Putnam, Westchester, Nassau and Suffolk. Use of Fill Type 4 can only occur at a project that is authorized by an approved local building permit or other municipal authorization, if required. The material must be used within 30 days of arriving at the project site. A person must not receive payment or other form of consideration for allowing beneficial use of Fill Type 4 on land under that person's control. For Fill Type 4, the NYSDEC must be notified at least five (5) days before the first load greater than 10 cubic yards is planned to be transported directly from the site of excavation to the site of reuse. Notification must be made on forms acceptable to the NYSDEC and must include any information required by the NYSDEC, including the analytical data required by NYS Part 360. The department reserves the right to inspect any site receiving fill.
Fill Type 5 (F5)	Engineered use under foundations and pavements above the seasonal highwater table. If foundation or pavement is not installed within 365 days of fill placement, then the fill placement will constitute a prohibited disposal. Placement of Fill Type 5 is prohibited in the following counties: Putnam, Westchester, Nassau and Suffolk. Use of Fill Type 5 can only occur at a project that is authorized by an approved local building permit or other municipal authorization, if required. The material must be used within 30 days of arriving at the project site. A person must not receive payment or other form of consideration for allowing beneficial use of Fill Type 5 on land under that person's control. For Fill Type 5, the NYSDEC must be notified at least five (5) days before the first load greater than 10 cubic yards is planned to be transported directly from the site of excavation to the site of reuse. Notification must be made on forms acceptable to the NYSDEC and must include any information required by the NYSDEC, including the analytical data required by NYS Part 360. The department reserves the right to inspect any site receiving fill.

Reference: 6 NYCRR Part 360.13 - Table 2 and associated footnotes and definitions

An **Excavated Material Classification Flow Chart is included with this EMP as Figure 4** to provide further guidance for reuse and disposal requirements in accordance with this EMP. As noted throughout, LaBella shall make the final determination for the classification on how the spoils generated during the construction activities at the project location will be managed.

Upon disturbance of Impacted Media, the Contractor shall follow the procedures outlined in the following sections, as well as the Contractor's Site-Specific Health and Safety Plan.

5.12 Off-Site Disposal of Solid Waste and VOC Impacted Media

All Treatment, Storage and Disposal (TSD) facilities and waste transporters must provide evidence of applicable NYSDEC permits prior to handling, transporting, and/or receiving solid waste and VOC impacted media. Removal of any site materials shall be approved in writing by LaBella, including submission of completed Waste Profiles and Waste Manifests for signature by an authorized representative of the Site owner.

Copies of all waste disposal manifests, and landfill receipts **shall be submitted to LaBella** by the Contractor within five (5) business days from which time the Solid Waste and VOC Impacted Media was removed from the Site.

Solid Waste Impacted Media, and solid (non-aqueous) VOC Impacted Media that cannot be re-used on-site in accordance with the conditions in the waste summary table shall be transported off-site by a NYS Part 364 permitted vehicles to a NYS Part 360 Permitted Landfill approved by LaBella.

Liquid or non-aqueous VOC Impacted Media shall be legally disposed of at a location approved of by LaBella.

The Contractor shall not dispose of Solid Waste or VOC Impacted Media, or any on-site derived subsurface material without expressed written permission from the Site owner and LaBella.

5.13 Waste Disposal Tracking

LaBella shall track the off-site disposal of each waste stream on an appropriate spread sheet tracking log to allow for accurate material quantification. Contractors are required to **submit waste disposal receipts to LaBella** within five (5) business days upon disposal from the Site.

All operators necessary for the removal and disposal of contaminated and hazardous impacted media shall comply with the applicable Federal, State, and local laws and regulations and policies. Waste disposal material shall not leave the Site without permission of LaBella. The Contractor shall provide LaBella and the Site owner with documentation that the receiving facility is permitted to receive the accepted waste, and the waste transporter is permitted to haul such wastes. The Contractor shall be responsible for the safe and proper management of all wastes addressed herein in accordance with all State and Federal regulatory requirements, including, but not limited to:

- 6 NYCRR 360 – Solid Waste Management Facilities
- 6 NYCRR 364 – Waste Transporter Permits
- 6 NYCRR 370 – Hazardous Waste Management System: General
- 6 NYCRR 371 – Identification and Listing of Hazardous Wastes
- 29 CFR 1910.120 – Hazardous Operations and Emergency Response
- 40 CFR 260 – Hazardous Waste Management System: General
- 40 CFR 261 – Identification and Listing of Hazardous Wastes

- 40 CFR 100 to 179 – DOT Hazardous Materials Transport and Manifest System
- NYSDEC CP-51 – Soil Cleanup Guidance
- 6 NYCRR Part 375-6 – NYSDEC Remedial Program Soil Cleanup Objectives

Waste Disposal and off-site reuse procedures are categorized below.

LaBella Class Yellow Material (Non-Impacted Soil)

This material may be used off-site as clean soil and fill material in accordance with the end uses outlined in Table B and provided sample results are below the appropriate reuse guidelines per 6 NYCRR Part 360.13(f) Table 2 (Fill Type 2). Non-impacted soil material will be sampled in accordance with 6 NYCRR Part 360.13(e) Table 1. LaBella will provide the associated analytical data of the material being shipped and the relocation site to the Site Owner or authorized representative at least 48 hours prior to any non-impacted material being removed from the Site.

LaBella Class Blue Material (Non-Impacted Soil with de minimis brick, concrete, and/or asphalt)

This material may be used off-site as clean soil and fill material in accordance with the end uses outlined in Table B provided sample results are below the appropriate reuse guidelines per 6 NYCRR Part 360.13(f) Table 2 (Fill Type 3). Non-impacted soil and fill material will be sampled in accordance with 6 NYCRR Part 360.13(e) Table 1. LaBella will provide the associated analytical data of the material being shipped and the relocation site to the Site Owner or authorized representative at least 48 hours prior to any non-impacted material being removed from the Site.

LaBella Class Orange Material (Potentially Impacted Soil and Fill Material)

This material contains non-soil constituents (including material such as ash, cinders, slag, brick, asphalt/concrete fragments, etc.). Material does not exhibit characteristics of gross contamination (e.g., significant petroleum/chemical odors, staining, or product). The material does not exhibit PID readings above 25 ppm.

This material may be reused off-site in accordance with the end uses outlined in Table B provided sample results are below the appropriate reuse guidelines per 6 NYCRR Part 360.13(f) Table 2 (Fill Type 4). Potentially impacted fill material will be sampled in accordance with 6 NYCRR Part 360.13(e) Table 1. LaBella will provide the associated analytical data of the material being shipped and the relocation site to the Site Owner or authorized representative and the NYSDEC at least five (5) days prior to any Fill Type 4 (or higher) material being removed from the Site.

LaBella Class Red Material (Impacted Soil and Fill Material)

This material contains non-soil constituents (including material such as ash, cinders, slag, brick, asphalt/concrete fragments, etc.). The material may exhibit characteristics of gross contamination (e.g., significant petroleum/chemical odors, staining, product, and/or PID readings above 25 ppm).

Unless a case-specific BUD is obtained after sampling this material in accordance with 6 NYCRR Part 360.13(e) Table 1, it must be disposed of at a properly permitted facility (landfill). The material must be transported by a NYCRR Part 364 permitted waste hauler. This material must be removed from the Site within 60-days of being generated.

LaBella Class Purple Material (ACM Demolition Debris)

ACM demolition debris excavated during redevelopment must be disposed of in accordance with NYSDOL Code Rule 56 at an appropriately permitted landfill.

Hazardous Waste Impacted Media

If encountered, any hazardous waste shall be disposed of in accordance with applicable Federal, State, and local regulations and requirements. This material must be removed from the Site within 90-days of being generated.

Non-Impacted Demolition and Solid Waste Material

This material consists only of separable solid waste such as brick, concrete, or metal (i.e., no soil (silt, sand, gravel) present or the material is able to be cleaned/segregated from any soil).

This material may be disposed off-site at a recycling facility in accordance with 6 NYCRR Part 360, provided waste characterization sample results (if applicable) indicate the material is free of contaminants of concern or is below the 6NYCRR Part 375-6(a) Unrestricted Use Soil Cleanup Objectives for suspect contaminants of concern. Alternatively, this material can be disposed of at a NYCRR Part 360 Landfill.

Potentially Impacted Water

If water (i.e., groundwater or stormwater) is encountered during the Project and is required to be pumped out of the excavation, it must be containerized on site and characterized by LaBella.

Water from the Site cannot be discharged to the local sewer system unless all local and state requirements are met (including receipt of an approved permit).

If characterization of the water indicates it is contaminated, the water shall be disposed off-site at a permitted TSDF consistent with NYSDEC 6NYCRR Part 360, 364, and 370. The onsite discharge of groundwater with contaminants of concern at concentrations above the NYSDEC TOGS 1.1.1 Groundwater Standards is a direct violation of the General Stormwater Permit.

5.14 Waste Disposal Documentation

Removal or disposal of any site materials or items shall be approved in advance by LaBella, including submission of completed Waste Profiles and Waste Manifests for signature by the Site Owner or their designative representative. Copies of all waste disposal manifests, and receipts shall be submitted to LaBella by the Contractor within five (5) business days upon removal from the project location.

5.15 Follow-up / Confirmation Sampling

In the event that petroleum impacts or other grossly-contaminated material (not including typical urban fill material) are excavated, subsequent to removal of such impacts, post-excavation confirmatory soil samples should be collected in accordance with the requirements of NYSDEC DER-10 Section 5.4(b)(5).

5.16 Unknown Environmental Issues

If unknown subsurface environmental impacts are encountered, LaBella will determine procedures and protocols to manage any additional environmental impacts. It is the responsibility of the Contractor to alert LaBella if unknown subsurface environmental impacts are encountered, including the following:

- soils and/or groundwater with a VOC odor or sheen;
- soils containing solid waste including demolition debris, ash, or cinders in areas not previously identified; and,
- soils containing evidence of VOC staining.

6.0 IMPLEMENTATION OF THE EMP

The EMP applies to all earthwork associated with the redevelopment project. However, implementation of the EMP will vary based on the specific activity being conducted and the nature of soil/material encountered during earthwork. The EMP implementation guidelines associated with specific phases of the project are provided below.

6.1 Subsurface Excavations, Material Reuse, and Off-Site Disposal

LaBella will provide oversight of any subsurface disturbance, subsurface material reuse, and off-site disposal of subsurface materials on an as needed basis, upon notification from ADC or the Contractor. Oversight may not be required in the event the material being disturbed was previously imported to the Site under LaBella oversight or was previously screened by LaBella.

6.2 EMP Roles and Responsibilities

LaBella Associates:

The responsibilities of LaBella with regards to the EMP, if required and upon notification from ADC or the Contractor are as follows:

- Providing interpretation of laboratory data to the Contractor, Construction Manager (CM) and Site owner to assist them in determining off-site disposal locations.
- Working with CM and Site owner as necessary to characterize excavated material and to determine reuse and/or disposal of excavated material.
- Work with the Contractors to monitor excavations for evidence of environmental impairment.
- Assist the CM as to proper staging, covering, and containment of excavated materials as needed.
- Sampling, analysis, and any additional waste stream profiling as required by a receiving NYS Part 360 landfill.
- Assist the contractor to obtain a temporary discharge permit from the POTW, if needed. This will include preparing paperwork, coordination with the POTW, and collection and analysis of samples.
- Implementation of the Community Air Monitoring Plan (CAMP) for the Site during the disturbance or handling of subsurface impacted media or impacted solid waste (see Section 8.0).

- Implementation of the Health and Safety Plan (HASP) for LaBella personnel at the Site. Contractors and other personnel working at the Site are responsible for their own HASP (see Section 9.0).

Contractor:

The Contractor shall provide all labor, equipment, and materials necessary to perform the following work items as specified in this Section, including but not limited to:

- Coordination of utilities clearance (811 / *UDig NY* stakeout, etc.).
- Segregation of impacted media from non-impacted media.
- Dewatering of excavation, containerization of all removed wastewaters and discharge/disposal of said waters.
- Implementation of dust suppression measures as determined by LaBella or the CM.
- Loading, containerizing, and transportation of impacted media from the excavation area to an on-site staging area.
- The Contractor shall not remove any material from the project site without approval from LaBella.
- Decontamination of equipment in accordance with Section 7.0, if necessary.
- The Contractor shall be responsible for providing all necessary and legally required training for its workers, and if necessary, OSHA 40-hour HAZWOPER training and respirator fit testing.
- The Contractor shall attend a meeting with the CM and LaBella to discuss Impacted Media management concerns. The Contractor shall coordinate the meeting.
- The Contractor shall coordinate the planned staging of Impacted Media with LaBella. Specific areas shall be designated for the staging of each type of impacted media so as to allow for a smooth workflow and minimize exposure routes to the public and the environment.
- The Contractor shall rely on the judgment of LaBella regarding the implementation of the EMP.
- The Contractor is solely responsible for the means, methods, techniques, sequences, and procedures for all activities under the direct control of Contractor.
- The Contractor shall perform all work under this contract in accordance with all local, state, and federal laws, regulations, and requirements including but not limited to New York State Department of Environmental Conservation, United States Environmental Protection Agency, United States Department of Transportation, and Occupational Safety and Health Administration.

7.0 DECONTAMINATION OF EQUIPMENT

All equipment / tools used at the Site that come in contact with any urban fill / solid waste (i.e., C&D debris, coal ash, cinders, etc.) or other impacted media must be decontaminated prior to departing the Site. Bulk decontamination shall occur by the use of shovels and brooms. No equipment visibly covered by soil/fill shall be permitted to depart the Site.

If bulk removal using shovels and brooms are inadequate, the Contractor must construct a temporary decontamination pad suitable for decontaminating the applicable equipment.

A typical decontamination pad constructed of two layers of 6-mil reinforced polyethylene sheeting (or equivalent), with a sump (for the purposes of collecting wash water) would be considered adequate. Wash water must be stored in 55-gallon drums, storage tanks, or incorporated into tanks for treatment and proper disposal as determined by LaBella. Accumulated sediments shall be legally disposed of in accordance with all applicable regulations at a location approved by the Site owner and LaBella.

The Contractor shall be responsible for all costs relating to legally disposing of the decontamination pad materials at a facility approved by the Site owner and LaBella. All permits and waste disposal manifests shall be submitted to LaBella for review and signature prior to shipment. All permits, waste disposal manifest, and receipts associated with decontamination pad materials disposal shall be submitted to LaBella.

The Contractor shall provide potable water and high-pressure sprayers for decontamination activities, as needed.

Personal decontamination procedures shall follow the procedures set forth in the HASP and the Contractor shall supply a suitable container for disposal of personal protective equipment, such as a steel drum. Disposal of PPE is the responsibility of the Contractor.

8.0 COMMUNITY AIR MONITORING PLAN (CAMP)

The NYSDOH Generic Community Air Monitoring Plan (CAMP) and Fugitive Dust and Particulate Monitoring will be utilized for this EMP implementation, if required, and is included as Appendix 5. The CAMP describes required particulate monitoring that will be conducted during activities that disturb the subsurface at the Site unless the materials being disturbed were previously screened by LaBella or imported to the Site under LaBella oversight. VOC monitoring is not included based on the lack of suspect sources of VOCs impacts at the Site.

The intent of the CAMP, if required, is to provide for a measure of protection of the downwind communities from potential airborne releases of constituents of concern during activities that disturb the subsurface at the Site. As such, the CAMP specifies the potential air emissions, air monitoring procedures, and monitoring schedule.

If exceedances of the permissible exposure limits defined in the CAMP are identified by real-time monitoring, the Contractor will be required to implement dust suppression measures as directed by LaBella that may include the following methods:

- Apply water on exposed soil.
- Wetting equipment and excavation faces.
- Restricting vehicle speeds to <10 mph.
- Hauling material in properly tarped containers.
- Spraying water in buckets during excavation and dumping.
- Reducing the size of open excavation area and/or number of open excavations.

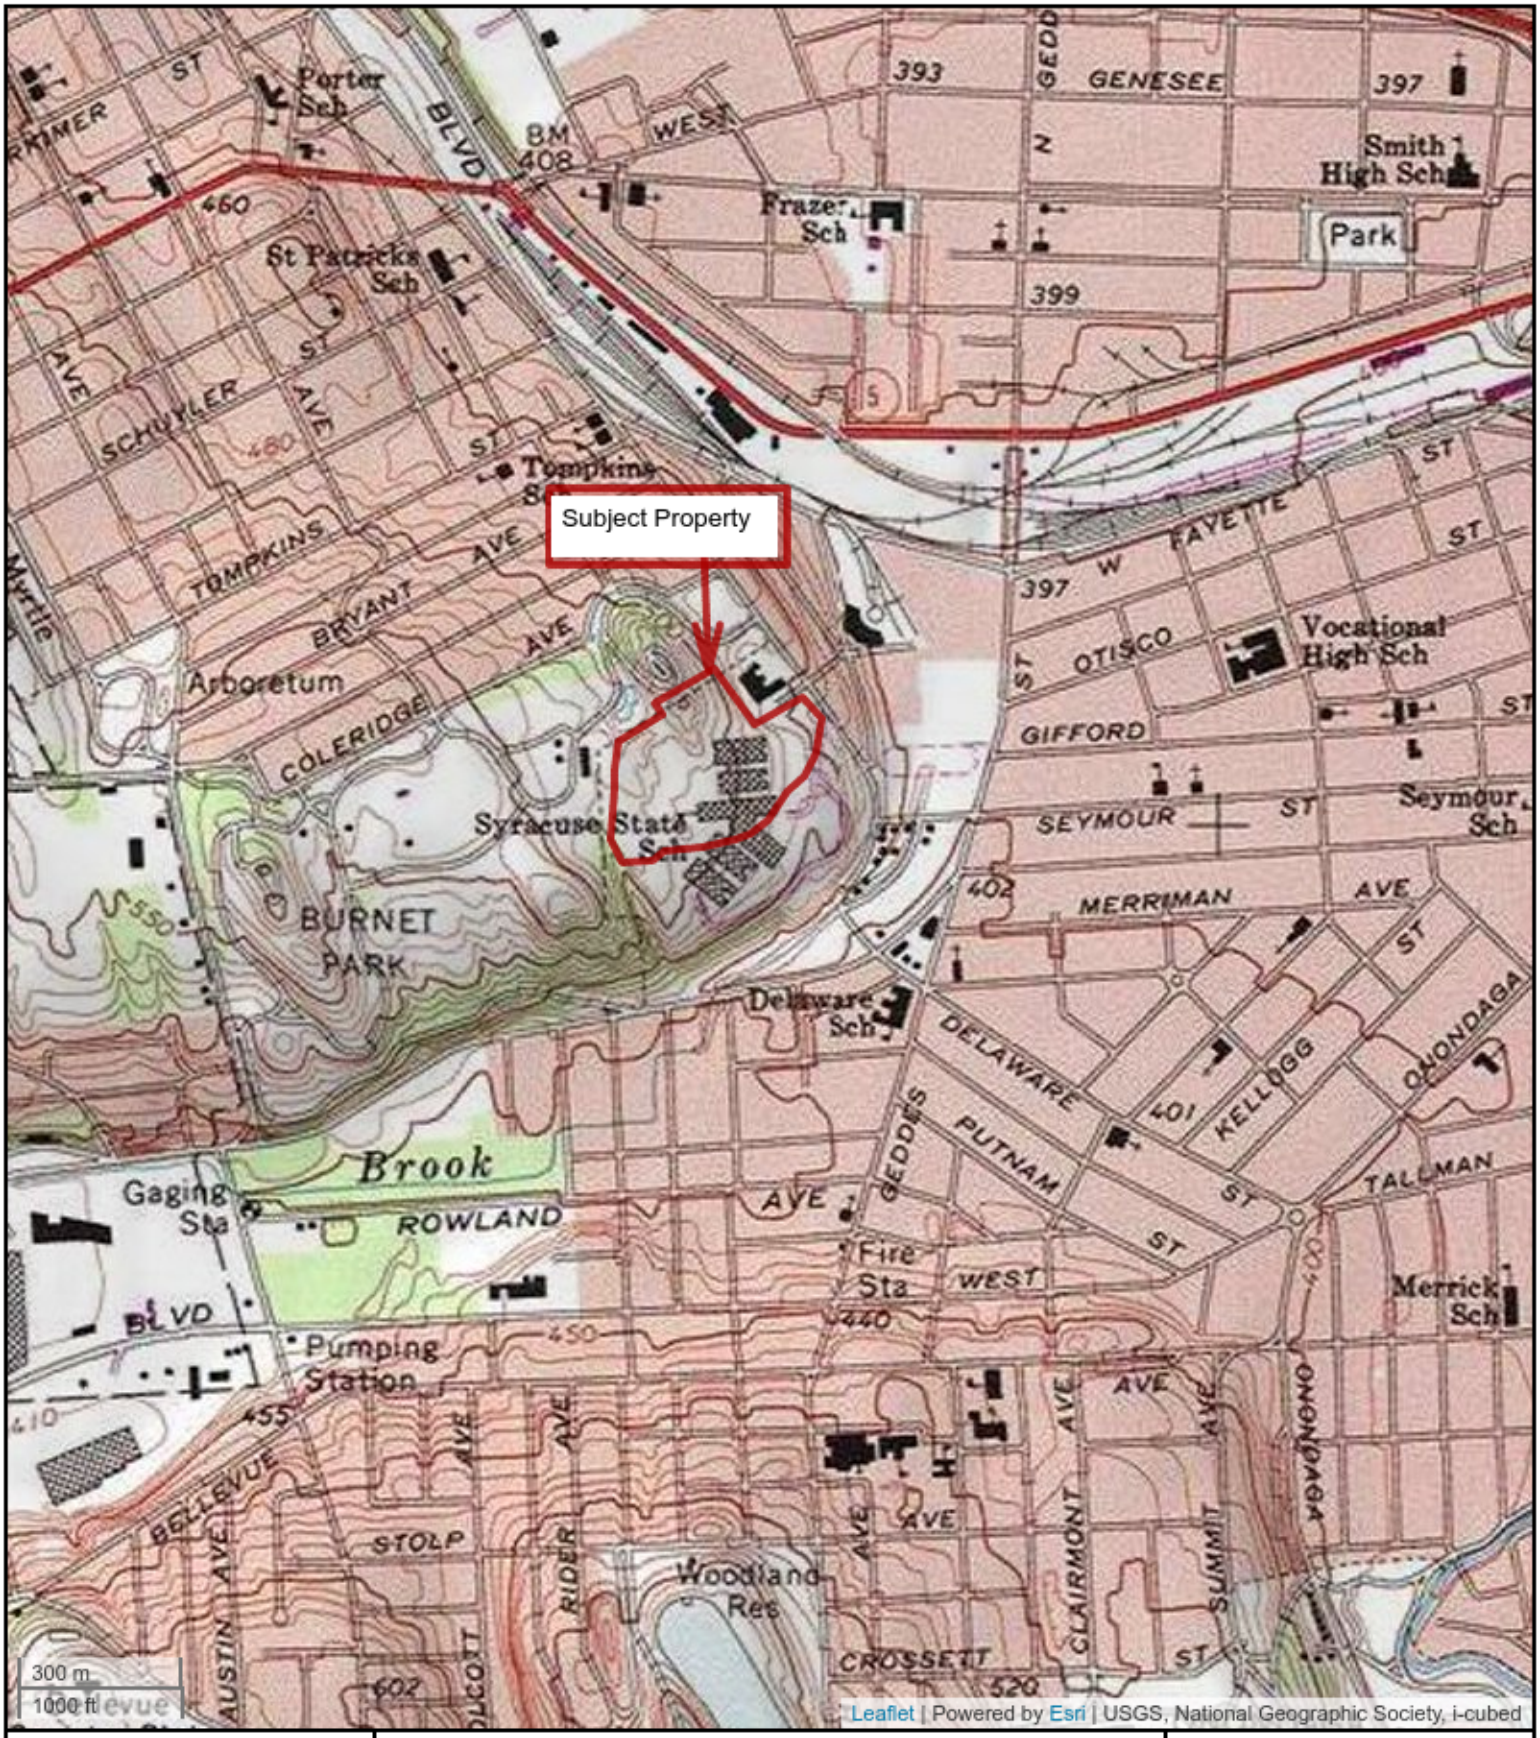
The Contractor shall have an onsite designated water truck or other dust suppression system. The Contractor shall obtain any necessary permits for hydrant usage, etc.

9.0 HEALTH AND SAFETY PLAN (HASP)

This EMP contains a Site-Specific HASP for the site developed by LaBella. This HASP is designated for LaBella personnel only. A copy of this HASP is included in Appendix 6.

The LaBella HASP is included as an example only. Each Contactor will need to develop and rely on their own HASP to manage health and safety issues associated with potential exposure to site chemicals of concern and any other potential issues.

10.0 LABORATORY TESTING



All samples collected during the Project and implementation of the EMP will be submitted under chain of custody procedures to a NYSDOH ELAP certified laboratory for testing. All samples will be placed in the laboratory supplied sample jars containing appropriate preservatives and placed in coolers with ice.

11.0 REPORTING

Following the completion of the earthwork-related portions of the project and if required, LaBella will develop a final Summary Report documenting all the excavation activities and waste disposal work completed. The Summary Report will document excavation materials generated, regulated solid waste, petroleum impacted soil and/or groundwater (if encountered), asbestos containing materials (if encountered), and any other impacted materials generated. The report will include mapping depicting the areas excavated, the extent of any regulated materials encountered, and any sampling completed. The report will also include waste disposal documentation (weight tickets, manifests), any laboratory data received, and updated waste stream tracking information/forms. It should be noted that the completion of the Summary Report will be heavily dependent on LaBella's actual involvement during earthwork activities and notifications from ADC and/or the Contractor for assistance and oversight during the Project.

Per NYCRR Part 360, the generator, processor, and receiver of fill subject to sampling under Part 360 must retain records of fill quantities, with analytical data, for a minimum of three (3) years after the fill is removed or received, as applicable. These records must be made available to the NYSDEC upon request.

EXECUTIVE SUMMARY

LaBella Associates, D.P.C. (LaBella) has been contracted by Albanese Development Corporation to perform a Phase I Environmental Site Assessment (ESA) report for the Former Syracuse Developmental Center, 800-802 South Wilbur Avenue, Syracuse, Onondaga County, New York (hereinafter referred to as the "Subject Property").

This assessment was prepared according to the ASTM E1527-13/21 as a portion of the User's requirements in the All Appropriate Inquiries process and to satisfy the due diligence requirements set for Albanese Development Corporation.

The Subject Property is further described as follows:

Subject Property Name	Former Syracuse Developmental Center
Subject Property Address	800-802 South Wilbur Avenue, Syracuse, Onondaga County, New York
Subject Property Acreage (approximate)	21.5-acre portion of a greater approximately 48-acre property
Parcel ID(s)	Portions of 098.2-01-05.2 and 098.2-01-05.4
Current Owner	City of Syracuse
Current Subject Property Use/ Development	The Subject Property includes portions of a greater four-story, 628,808 square foot institutional building constructed between 1970 and 1971 that has most recently been used as offices and storage; this structure has been vacant for approximately 10 years.
Public Thoroughfares and Access/Egress	South Wilbur Avenue to the east and Grand Avenue to the south (bounding the greater property)
Exterior Areas	Asphalt-paved parking areas, concrete walkways, and maintained landscaping
Surrounding Area	Urban
Subject Property Utilities	
Electric Source	Public available
Natural Gas Source (if provided)	Public available
Potable Water Source	Municipal
Sanitary Wastewater Disposal	Municipal
Non-Sanitary Wastewater Disposal	N/A; Non-sanitary wastewater does not appear to be generated or discharged at the Subject Property.

Based on LaBella's review of historical records, the history of the Subject Property is summarized as follows:

Time Period	Apparent Use/Development
Between at least 1892 and 1967	Developed with various former structures and utilized as a psychiatric facility. Former structures indicative of storage and/or use of hazardous materials and/or petroleum products that could pose a potential environmental concern included an oil house, paint/printing shop, greenhouses, and carpentry shop, which were present at various times between at least 1911 and 1967.
1970-1971 through present	Developed with the Site Building, utilized as a psychiatric facility through the early 2000s with later uses consisting of office space and storage. The Subject Property has been vacant for approximately 10 years.

Based on the results of this assessment, the following RECs have been identified in connection with the Subject Property:

- An oil house, paint/printing shop, greenhouses, and carpentry shop were located on the Subject Property at various times between at least 1911 and 1967. It is likely that solvents, paints, cleaning chemicals, and other hazardous materials and/or petroleum products were utilized and stored at these areas and other areas of the Subject Property; material handling practices are unknown. While a Limited Phase II ESA was conducted at the Subject/Greater Property in 2008 to address historical uses, that scope did not include an investigation of each area of likely chemical use/storage. As such, there is the potential for impact to exist in areas not previously investigated based on the historical uses of the Subject Property.
- Evidence of fill material, including areas of mounding and potential settling, were observed throughout exterior areas on the Subject Property. The nature of fill material present on-site is unknown. LaBella notes that fill material generated as part of Subject Property redevelopment/construction activities may be subject to chemical testing and/or proper handling requirements which may impact the overall project budget.
- The Subject/Greater Property was identified as a RCRA Non-Generator with no unresolved violations and as a Manifest Facility. Wastes generated and/or transferred from the Subject Property have included PCBs, various metals, PCE, TCE, corrosive, ignitable, and reactive wastes, and spent non-halogenated solvents. While there were no records of release reported, these listings are indicative of past use/storage/handling of various hazardous materials on the greater property.

Based on the results of this assessment, no CRECs, HRECs, de minimis conditions, or significant data gaps have been identified in connection with the Subject Property.

While not considered a REC, CREC, HREC, de minimis condition, or significant data gap at this time, LaBella also notes the following:

- Nine five-gallon buckets of emulsified asphalt and five 55-gallon drums of floor cleaning chemicals were observed stored within the Site Building. Minor staining was observed proximate one five-gallon bucket, however, no floor drains were observed in the vicinity of the staining. Given the nature and location of the staining such is not considered to pose a significant environmental concern at this time. However, as it is LaBella's understanding that the Site Building is to be demolished, it is recommended that all hazardous chemicals be removed from the Site Building prior to demolition.
- Vent pipes were observed on the exterior of the Site Building. Based on the location of the vent pipes, it is presumed that an AST is currently or was historically located in the Site Building, potentially a diesel AST associated with a backup generator or chlorine AST reported to have been located on-site based on reviewed previous studies. Based on the condition of the Site Building, LaBella was unable to access the entirety of the structure. The presence of ASTs within the Site Building are not considered to pose a significant environmental concern at this time. However, as it is LaBella's understanding that the Site Building is to be demolished, it is recommended that any inactive ASTs be emptied and properly removed from the Site Building prior to demolition.
- Areas of solid waste disposal, including household debris, were observed on the Subject Property. LaBella recommends that these materials be collected and properly disposed of as a best management practice.

Based on the findings of this assessment, further investigation appears warranted at this time.

1.0 INTRODUCTION

LaBella has been contracted by Albanese Development Corporation to perform a Phase I Environmental Site Assessment report for the Former Syracuse Developmental Center, 800-802 South Wilbur Avenue, Syracuse, Onondaga County, New York.

The findings of this report are based upon an assessment of the condition of the Subject Property within the Scope of Work and objective described below as of the date of the site observations and documentation review. This assessment was prepared according to the ASTM Standard Practices E1527-13/21 as a portion of the User's requirements in the All Appropriate Inquiries process and to satisfy the due diligence requirements set for Albanese Development Corporation. The information contained in this report is considered privileged and confidential and is intended solely for the use of the parties listed on the cover of this report, as it applies to the Subject Property.

1.1 Purpose

This investigation was requested to identify, to the extent feasible, RECs in connection with the Subject Property, including the identification of conditions indicative of releases and threatened releases of hazardous substances and petroleum products on, or in the vicinity of the Subject Property This Phase I ESA report was conducted in conformance with the Scope and Limitations of ASTM Standard Practice E1527-13/21.

The performance of ASTM Standard Practices E1527-13/21 is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs and the potential liability for contamination to be present in connection with the Subject Property recognizing reasonable limits of time and cost. It is also intended to satisfy one of the requirements to satisfy "all appropriate inquiry" as defined by 42 U.S.C §9601(35)(B), for the purposes of qualifying for innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA Liability. The User should understand that this practice does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for landowner liability protections; including (1) the continuing obligation not to impede the integrity and effectiveness of activity and use limitations, (2) the duty to take reasonable steps to prevent releases, or (3) the duty to comply with legally required release reporting obligations.

The objective of this Phase I ESA was to determine the following, using our professional judgment, by means of the Scope of Work hereafter described:

1. A general description of the Subject Property.
2. The current and historical usage of the Subject Property and adjoining properties.
3. Whether RECs exist or have the potential to exist at in, on, or at the Subject Property.
4. Whether Subject Property conditions suggest further evaluation based on the presence or probable presence of RECs.

5. Provide information which may assist the Client in evaluating the fair market value of the Subject Property.

A REC is defined by ASTM as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

A Controlled REC is defined by ASTM as a recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

A Historical REC is defined by ASTM as a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

A de minimis condition is defined by ASTM as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.

The term “data gap” means a lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.). A significant data gap is one that affects the ability of the environmental professional to identify a REC.

The term "data failure" means the failure to achieve the historical research objective as specified in ASTM E-1527-13/21 even after reviewing the standard historical resources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Migration refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

An Environmental Professional is a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors defined in the ASTM Standard Practice E1527-13/21 and §312.20 of 40 CFR §312. Specifically, an Environmental Professional is defined as a person having one of the following qualifications; (1) A state- or tribal-issued certification or license and three years of relevant, full-time work experience; (2) A bachelor's degree or higher in science or engineering and five years of relevant, full-time work experience; or, (3) 10 years of relevant, full-time work experience.

1.2 Scope of Work

This Phase I Environmental Site Assessment has been prepared in accordance with ASTM E1527-13/21, which has been devised to address the site assessment portion for 40 CFR 312 - Innocent Landowners, Standards for Conducting All Appropriate Inquiries. The Scope of Work performed in this assessment is intended to identify RECs, CRECs, HRECs, de minimis conditions, and Significant Data Gaps through the following tasks:

1. Review of information provided by the User related to environmental cleanup liens; specialized knowledge or experience regarding the Subject Property; the relationship of the purchase price to the fair market value of the property, if the property were not contaminated; and, commonly known or reasonably available information about the Subject Property.
2. Review of local, state, and federal environmental records.
3. Review of historical sources of information to identify the use of the Subject Property dating back to 1940 or first Subject Property development, whichever is earlier.
4. Review of physical and geological settings.
5. Interviews with current and past owners, operators, and occupants to evaluate the potential for environmental contamination to be present at the Subject Property.
6. Inspection of the Subject Property and adjacent properties (from public roadways and the Subject Property boundaries), to the extent possible, to visually identify areas of concern.
7. The preparation of this report documenting all appropriate inquiries.

The work for this report has been performed in accordance with generally accepted environmental engineering practices for this region. The conclusions and recommendations of this report are based upon the opinion and judgment of an Environmental Professional and are dependent upon LaBella's knowledge, the information supplied during the interviews, and data and information solicited from governmental agencies. LaBella makes no other warranty or representation, either expressed or implied, nor is one intended to be included as part of its services, proposals, contracts, or reports.

In addition, LaBella cannot provide guarantees, certifications, or warranties that the Subject Property is or is not free of contamination without a subsurface investigation involving drilling, vapor analysis, laboratory soil analysis, groundwater monitoring well installation, and laboratory groundwater analysis. Even with such a program, the data and samples from any given soil boring or monitoring

well will indicate conditions that apply only at that particular location, and such conditions may not necessarily apply to the general Subject Property as a whole.

1.2.1 Significant Assumptions

Significant assumptions made in the performance of this Phase I ESA are as follows:

- Regional groundwater flow follows major topographic gradients.
- Representations made during interviews are accurate.

1.3 Data Gaps

LaBella encountered the following data gaps through the completion of this Phase I Environmental Site Assessment:

Nature of Data Gap	Details/Description	Data Sources Consulted
Limitations to Site Inspection[1]	Observations were limited due to Subject Property size, vegetation, and material storage. In addition, LaBella was unaccompanied at the time of the site visit and due to unsafe building conditions (lack of utilities, water intrusion, and significant quantities of damaged materials), only representative portions of the structure were inspected.	N/A
Historical Use	Historical uses were not obtained for each five year period. A data failure was obtained regarding Subject Property uses/ development prior to 1892.	Aerial photographs, Sanborn maps, city directories, municipal records, and previous studies
Regulatory Records Review	LaBella has yet to receive complete responses from all regulatory information requests.	OCHD
Interviews	LaBella has not been able to identify and/or contact any historical owners, operators, or occupants. LaBella has yet to receive a completed Owner/Operator Questionnaire.	Current owners, municipal, and/or User-provided records to identify historical ownership information.
Any data gaps determined by the Environmental Professional to be significant are further discussed within the Findings and Opinions section of this report. [1] See Limitations and Exceptions of Assessment below for additional limitations of the site visit.		

1.4 Limitations and Exceptions of Assessment

ASTM E1527-13/21 expressly recognized the fact that no ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. LaBella's work is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the Subject Property, and its Scope of Work reflects recognition of the reasonable limits of time and cost.

The work for this report has been performed in accordance with the master service agreement signed with Albanese Development Corporation. The conclusion and recommendations of this report are based upon LaBella's opinion and judgment, and are necessarily dependent on information supplied by the individuals, entities, and agencies contacted through the course of this assessment. LaBella makes no other warranty or representation, either expressed or implied, nor is one intended to be included as part of its services, proposals, contracts, or reports.

The actual presence of asbestos, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, endangered species, indoor air quality, mold, substances not defined as hazardous substances, cultural and historical resources, archeological resources, ecological resources, industrial hygiene, health and safety, biological agents, and/or high voltage power lines, are not included in the Scope of Work of this assessment unless agreed to by Albanese Development Corporation and LaBella; in such a case, these additional services/ASTM Non-Scope Considerations are discussed in Section 8.0 below. Should Albanese Development Corporation desire any of these additional services, such can be completed by LaBella under separate cover; however, they are not included in the Scope of Work of the Phase I ESA.

The site reconnaissance was limited to visual observations of accessible areas only. No attempt was made to observe conditions in spaces not generally accessible, including but not limited to:

1. Entering crawlspaces and attics
2. Walking on roofs
3. Viewing the interior of pipe chases or plenum
4. Viewing spaces concealed by walls, floors, ceilings, interior finishes, etc.
5. Viewing areas inaccessible due to topographic features or locked doors, obscured by snow cover, vegetative growth, vehicles, etc.

The site reconnaissance was also limited to visual observations within the perimeter of the Subject Property and other accessible areas only. At the time of the site reconnaissance, a representative portion of the Subject Property and common areas were visually inspected.

1.5 Reliance

Albanese Development Corporation may rely upon the findings of this report and should be aware of the agreed upon Scope of Work and the limitations associated with this Scope of Work.

2.0 SUBJECT PROPERTY AND VICINITY DESCRIPTION

The Subject Property is summarized in the tables below. Property boundaries for the purpose of this assessment were determined based on provided survey mapping and/or tax maps obtained through municipal sources. Subject Property Location and Tax Parcel maps for the Subject Property are located in the Site Maps Appendix.

Subject Property Name	Former Syracuse Developmental Center
Subject Property Address	800-802 South Wilbur Avenue, Syracuse, Onondaga County, New York
Subject Property Acreage (approximate)	21.5-acre portion of a greater approximately 48-acre property
Parcel ID(s)	Portions of 098.2-01-05.2 and 098.2-01-05.4
Current Owner	City of Syracuse
Current Subject Property Use/ Development	The Subject Property includes portions of a greater four-story, 628,808 square foot institutional building constructed between 1970 and 1971 that has most recently been used as offices and storage; this structure has been vacant for approximately 10 years.
Public Thoroughfares and Access/Egress	South Wilbur Avenue to the east and Grand Avenue to the south (bounding the greater property)
Exterior Areas	Asphalt-paved parking areas, concrete walkways, and maintained landscaping
Surrounding Area	Urban
Subject Property Utilities	
Electric Source	Public available
Natural Gas Source (if provided)	Public available
Potable Water Source	Municipal
Sanitary Wastewater Disposal	Municipal
Non-Sanitary Wastewater Disposal	N/A; Non-sanitary wastewater does not appear to be generated or discharged at the Subject Property.

2.1 Building Summary

Structure(s) located on the Subject Property are summarized in the following table:

Building Name	Site Building
Square Footage	628,808
Foundation Type	Slab-on-grade
Number of Stories	Four
Construction Date	1970-1971
Heating/Cooling Source	Not currently heated
Current Use	Vacant for approximately 10 years; formerly an institutional building that had most recently included office uses

As noted above, only a portion of this structure is included as part of the Subject Property currently being assessed by LaBella.

2.2 Physical and Hydrogeological Setting

Based on a review of provided records, the following information was obtained regarding the physical and hydrogeological setting of the Subject Property:

Topography	Slightly sloping to the east/southeast; Subject Property is situated along the upper portions of an east facing hill
Elevation (feet above mean sea level)	Between 400 and 540
Subject Property Water Bodies	None
Nearest Water Body	Harbor Brook approximately 680 feet to the south
Apparent Groundwater Flow	East
Soil Map Unit(s)	Camillus silt loam - The Camillus series consists of moderately deep, well drained soils formed in till and an underlying weathered calcareous shale bedrock. Slopes range from 0 through 25 percent. Honeoye silt loam - The Honeoye series consists of very deep, well drained soils formed in loamy till. They are nearly level to very steep soils on till plains, hills, ridges, and drumlins. Slope ranges from 0 to 65 percent. Ontario and Madrid soils - The Ontario series consists of deep or very deep, well drained soils formed in loamy till which is strongly influenced by limestone and sandstone. They are nearly level to very steep soils on convex upland till plains and drumlins. Slope ranges from 0 to 60 percent. The Madrid series consists of very deep, well drained soils. They formed in loamy deposits derived mainly from sandstone, limestone

	and granite on till plains and moraines. Permeability is moderate or moderately slow in the solum and moderately slow in the substratum. Slope ranges from 3 to 50 percent.
Geological Information	Syracuse Formation; consists of dolostone and shale from the Upper Silurian Age

Refer to Figure 1 for a copy of the Subject Property Location/Topographic Map. Copies of the soil and geological maps and associated descriptions are summarized in the ERIS Physical Setting Report included in the Hydrogeologic Information Appendix. Groundwater flow was determined based on interpretation of the USGS topographic map and provided previous studies.

3.0 USER-PROVIDED INFORMATION

In accordance with the ASTM E1527-13/21, a "User" is defined as the party seeking to complete an environmental site assessment of the property. If the user is aware of any specialized knowledge or experience that is material to RECs in connection with the Subject Property, it is the user's responsibility to communicate any information based on such specialized knowledge or experience to the Environmental Professional. The User Questionnaire was completed by Martin Dettling of Albanese Development Corporation. A copy of the User Questionnaire is included in the User Provided Information Appendix.

ASTM Standard Practice E1527-13/21 User Questionnaire Questions	Reported by User
Land Title Records	
Are land title records available for review?	The User answered this question with an "unknown" response.
Environmental Liens or Activity Use Limitations	
Did a search of *recorded land title records* identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?	The User answered this question with an "unknown" response.
Did a search of *recorded land title records* identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?	The User answered this question with an "unknown" response.
Specialized Knowledge	
Does the *User* of this *ESA* have any specialized knowledge or experience related to the *property* or nearby properties? For example, is the *User* involved in the same line of business as the current or former *occupants* of the *property* or an *adjacent property* so that the *User* would have specialized knowledge of the chemicals and processes used by this type of business?	The User does not have any specialized knowledge or experiences related to the property or nearby properties.
Commonly Known or Reasonably Ascertainable Information	
Is the *User* aware of commonly known or *reasonably ascertainable* information about the	The User is aware of previous petroleum spills referenced within a prior Phase I ESA.

ASTM Standard Practice E1527-13/21 User Questionnaire Questions	Reported by User
property that would help identify conditions indicative of releases or threatened releases?	
Based on the *User's* knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *property*?	The User answered this question with an "unknown" response.
Valuation Reduction for Environmental Issues	
Does the purchase price being paid for the *property* reasonably reflect the fair market value of the *property*?	The User answered this question with an "unknown" response.
If the *User* concluded that there is a difference, has the *User* considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?	N/A

3.1 Reason For Performing Phase I ESA

According to ASTM 1527-13/21, either the User shall make known to the Environmental Professional the reason why the User wants to have the Phase I ESA performed or, if the User does not identify the purpose of the Phase I ESA, the Environmental Professional shall assume the purpose is to qualify for the Landowner Liability Protections under the Brownfields Amendments. The User indicated that the Phase I ESA is being conducted as part of a potential purchase.

4.0 SITE RECONNAISSANCE

LaBella conducted a site reconnaissance of the Subject Property and observation of adjacent properties from the Subject Property boundaries and public roadways, to the extent possible, to visually identify areas of concern. The site reconnaissance was conducted on October 14, 2022 by Michael Delaney , Environmental Analyst, and Dave Crandall, Phase I Program Manager, with LaBella. At the time of the site reconnaissance, LaBella was unaccompanied.

Observations discussed in this Section are noted on Figure 3. Copies of the field notes taken during the site visit are included in the Site Reconnaissance Worksheet Appendix. Representative photographs of the Subject Property at the time of the site reconnaissance are included in the Site Photographs Appendix.

Visual observations were limited at the time of the site visit due to size, vegetative growth, and material storage. It should be noted that due to unsafe building conditions (lack of utilities, water intrusion, and significant quantities of damaged materials), only representative portions of the structure were inspected. Additional site visit limitations are discussed in Section 1.4.

Past Uses of Subject Property

The Subject Property appears to have historically been occupied by a school.

Hazardous Substances and Petroleum Products

Hazardous substances and/or petroleum products were observed on the Subject Property as described below:

Amount/Capacity/Contents	Location	Use	Staining/Evidence of Release?
Nine five-gallon buckets of emulsified asphalt	First floor of Site Building	Construction	Minor staining proximate one five-gallon bucket
Five 55-gallon drums of floor cleaning chemicals	Second floor of Site Building	Cleaning	None

Unidentified Substance Containers

There were no unidentified substance containers (e.g., unlabeled drums or totes) observed at the time of the site reconnaissance.

Storage Tanks

Vent pipes were observed on the exterior of the Site Building. Based on the location of the vent pipes, it is presumed that an AST is currently or was historically located in the Site Building. As noted above, based on the condition of the Site Building, LaBella was unable to access the entirety of the structure.

Solid, Hazardous, and/or Regulated Wastes

Areas of solid waste disposal, including household debris, were observed on the Subject Property. LaBella recommends that these materials be collected and properly disposed of as a best management practice.

Evidence of fill material, including areas of mounding and potential settling, were observed throughout exterior areas on the Subject Property. The nature of fill material present on-site is unknown. LaBella notes that fill material generated as part of Subject Property redevelopment/ construction activities may be subject to chemical testing and/or proper handling requirements which may impact the overall project budget.

Odors

No apparent strong, pungent, or noxious odors were observed at the Subject Property at the time of the site reconnaissance.

Standing Water/Pools of Liquid

No apparent pools, sumps, or standing water containing liquids likely to be hazardous substances or petroleum products were observed at the Subject Property at the time of the site visit.

PCB-Containing Equipment

The following potential PCB-containing equipment was observed at the time of the site reconnaissance:

Potential PCB-Containing Equipment	Location	Evidence of Leaks
Elevators	Site Building	None
Fluorescent lighting	Site Building	N/A; various damaged/broken ballasts observed throughout. Such may require property handling prior to any demolition and/or redevelopment activities.

Stains and Corrosion

The following areas of staining and/or corrosion were identified at the time of the site reconnaissance:

- Proximate one five-gallon bucket of emulsified asphalt

Stressed Vegetation

No apparent stressed vegetation was observed at the time of the site reconnaissance.

Drains and Sumps

Storm drains were noted throughout the parking area and landscape areas. These drains reportedly discharge to the municipal sewer system. There were no stains, spills, or unusual odors noted in the vicinity of the storm drains at the time of the site reconnaissance.

Wastewater

Non-sanitary wastewater does not appear to be generated or discharged at the Subject Property.

Septic Systems and/or Cesspools

No apparent indications of septic systems or cesspools were observed at the time of the site reconnaissance or are reported to be located on the Subject Property.

Wells

No apparent potable, monitoring, irrigation, dry, or injection wells were observed at the time of the site reconnaissance or are reported to be located on the Subject Property.

Additional Information

There was no evidence of other potential concerns identified at the time of the site reconnaissance.

Adjacent Property Use

The Subject Property is bordered by the following properties:

Direction	Current Use/Occupant	Apparent Past Use	Potential Concerns Visible During Site Visit
North	Arc of Onondaga (600 South Wilbur Avenue), and Rosamond Gifford Zoo (1 Conservation Place)	Commercial	None
East	Residences (601-627 South Wilbur Avenue)	Residential	None
South	Southern portion of 800-802 Wilbur Avenue	Educational	None
West	Vacant commercial (410 Grand Avenue)	Vacant land	None

Refer to Regulatory Information below for additional information regarding the northern adjacent properties.

4.1 Site Reconnaissance Summary of Findings

Observations made by LaBella during the site reconnaissance identified the following features indicative of the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property:

- Nine five-gallon buckets of emulsified asphalt and five 55-gallon drums of floor cleaning chemicals were observed stored within the Site Building. Minor staining was observed proximate one five-gallon bucket, however, no floor drains were observed in the vicinity of the staining. It is LaBella's understanding that the Site Building is to be demolished. LaBella recommends that all hazardous chemicals be removed from the Site Building prior to demolition.
- Vent pipes were observed on the exterior of the Site Building. Based on the location of the vent pipes, it is presumed that an AST is currently or was historically located in the Site Building. Based on the condition of the Site Building, LaBella was unable to access the entirety of the structure.
- Areas of solid waste disposal, including household debris, were observed on the Subject Property. LaBella recommends that these materials be collected and properly disposed of as a best management practice.
- Evidence of fill material, including areas of mounding and potential settling, were observed throughout exterior areas on the Subject Property. The nature of fill material present on-site is unknown. LaBella notes that fill material generated as part of Subject Property redevelopment/construction activities may be subject to chemical testing and/or proper handling requirements which may impact the overall project budget.

5.0 SUBJECT PROPERTY HISTORY AND USE

LaBella attempted to review reasonably ascertainable and readily available standard sources of historical information as defined by the ASTM E1527-13/21 in order to identify all obvious uses of the Subject Property back to the first developed use or 1940, whichever is earlier (i.e., the historical research objective according to ASTM). Uses of the properties adjacent to the Subject Property are identified in this report only to the extent that this information was revealed in the course of researching the Subject Property itself and were determined at the discretion of the Environmental Professional. As such, LaBella reviewed only as many of these sources as necessary to achieve the historical research objective. Data failures and data gaps are identified, defined, and evaluated for their significance in Section 1.3 of this report.

5.1 Sanborn Fire Insurance Maps

The apparent historical use of the Subject/Greater Property and surrounding area, as depicted by the Sanborn maps, is summarized in the table below. A copy of the Sanborn maps is included in the Historical Information Appendix.

Year	Location	Occupant/Development
1892	Subject/Greater Property	Occupied by the New York State Asylum for Idiots and developed with an ice house, produce house, hot house, carpentry shop, farm house, dormitory, and educational building
	Surrounding Area	Utilized for education and residential purposes
1911	Subject/Greater Property	Occupied by the Syracuse State Institution for Feeble Minded Children and developed with an ice house, greenhouses, produce house, carpentry shop, farm house, dormitory, and educational building
	Surrounding Area	Utilized for commercial, educational, and residential purposes
1951, 1953, 1962, and 1967	Subject/Greater Property	Occupied by the Syracuse State School and developed with a carpentry shop, farm house, paint shop, ice house, meat market, milk house, oil house, greenhouses, dormitory, and educational building
	Surrounding Area	Utilized for commercial, educational, and residential purposes
1971	Subject/Greater Property	Developed with the Site Building (constructed 1970-1971) and an additional educational building and occupied by Syracuse State School for the Handicapped

Year	Location	Occupant/Development
	Surrounding Area	Utilized for commercial, educational, and residential purposes
1990	Subject/Greater Property	Developed with the Site Building and occupied by Syracuse Development Center
	Surrounding Area	Utilized for commercial, educational, and residential purposes

No adjacent property uses of potential concern were identified.

5.2 City Directories

City Directory research was completed by ERIS. Identified occupants associated with the Subject Property are detailed in the table below. Copies of street directories are included in the Historical Information Appendix.

Year	Occupant Listings
1925 and 1930	Syracuse State School for Mental Defectives
1935, 1939, 1944, 1949, 1954, 1959, 1964, 1968, and 1973	Syracuse State School
1977-78, 1983, 1988, and 1993	Syracuse Developmental Center
1998	Foster Grandparent Program, NY State of Housing & Community Renewal Division, Senior Companion Program, and Syracuse Developmental Day Care
2000	Central NY DDSO, CSEA Local 414, Foster Grandparent Program, Mental Retardation Offices, Senior Companion Program, and Syracuse Dev Day Care Center
2003	Central NY DDSO, CSEA Local 414, Developmental Center Res Gatehouse Apart Syracuse, Enable, Epilepsy Foundation, Peace Inc, Senior Companion Program, Syracuse Dev Day Care Center, and Syracuse Developmental Center
2008	Arc of Onondaga County, Central NY DDSO, Civil Services Employees Association Inc, CSEA Local 414, Enable, Epilepsy Foundation, Peer Networking Group, and Support Services

Year	Occupant Listings
2012	Arc of Onondaga County, Central NY Developmental Services, CSEA Local 414, Epilepsy Foundation, Medicaid Service Coordinators, PEF, Senior Companion Program, Special Olympics Onondaga County, Support Services, and Syracuse Developmental Center
2016	Central NY Developmental Services, CSEA Local 414, Epilepsy Foundation, Medicaid Service Coordinators, Southside Charter Academy, Special Olympics Onondaga County, Support Services, and Syracuse Developmental Center
2020	Central NY Developmental Services, Enable Inc, Epilepsy Foundation, Medicaid Service Coordinators, Special Olympics Onondaga County, Support Services, and Syracuse Developmental Day Care

It should be noted that several of the recent listings for the Subject Property may not have been present the Subject Property as LaBella understands that the Subject Property has been vacant for approximately 10 years.

Review of the city directories indicated that properties surrounding the Subject Property were historically utilized for commercial, educational, and residential purposes.

5.3 Aerial Photographs

The table below outlines observations of the Subject Property and surrounding area obtained from the review of aerial photographs. Copies of aerial photographs are included in the Historical Information Appendix.

Year	Location	Development
1956	Subject Property	Developed with several structures that appear consistent with an educational campus
	Surrounding Area	Utilized for apparent commercial and residential purposes
1972, 1985, 1995, 2003, 2008, 2013, and 2019	Subject Property	Appears to have been developed with the Site Building; extensive areas of land disturbance (presumably related to recent redevelopment work) present on the western, northern, and eastern portions of the Subject Property in at least 1972
	Surrounding Area	Utilized for apparent commercial and residential purposes

No adjacent property uses of potential concern were identified.

5.4 Topographic Maps

As sufficient information was obtained through a review of Sanborn maps, city directories, aerial photographs, previous reports, and municipal records, topographic maps were not reviewed as part of this assessment.

5.5 Municipal Records

LaBella obtained municipal records from the City of Syracuse on October 5, 2022. In addition, limited assessment information was obtained from the Landmax Data Systems, Inc. website. The following information was obtained from these records. Copies of municipal records are included in the Municipal Information Appendix.

	Findings/Details
Parcel ID(s)	Portions of 098.2-01-05.2 and 098.2-01-05.4
Subject Property Size (acres)	47.8 (greater property); LaBella understands that the Subject Property includes 21.5-acres of the greater property.
Current Owner	City of Syracuse
Former Owners	Syracuse Center LLC, Syracuse Resort Dev Inc, NYS Urban Dev Corp, NYS Housing Finance Agency
Square Footage of Building(s)/Date(s) of Construction	628,808/1970
Provided Utilities	All public

City of Syracuse records included a 2018 letter indicating various violations for the Subject Property, generally associated with failure to properly maintain the structure. No obvious records of environmental concern were reported based on this document.

In addition, LaBella was provided with various site maps including general layouts of the Site Building and sanitary sewer and water layouts for the greater property.

5.6 Recorded Land Title Records

According to the ASTM Standard Practice E1527-13/21, "the user should either engage a title company or title professional to undertake a review of reasonably ascertainable land title records and lien records for environmental liens or activity and use limitations currently recorded against or relating to the property or to negotiate such an engagement of a title company or title professional as an addition to the Scope of Work to be performed by the Environmental Professional."

Title records were not provided to LaBella for review.

5.7 Additional Sources

No additional historical sources were reviewed.

5.8 Review of Previous Reports

LaBella reviewed the following environmental reports. Copies of the reports are included in the Previous Reports Appendix.

- Phase I ESA report prepared by PSI dated February 11, 2008
- Limited Phase II ESA report prepared by B&L dated March 14, 2008

The following is a summary of the information obtained from the previous reports.

The 2008 Phase I ESA included the Subject Property and remaining portions of the greater (totalling 48 acres). The Subject Property was developed with the Site Building. The Subject Property was utilized for office space and storage.

At the time of the site visit, various stored materials were observed on the Subject Property including various drums and smaller containers, a 275-gallon diesel AST within the lowest level (associated with a backup generator), a 550-gallon chlorine AST on the second floor (associated with a swimming pool), and a 5,000-gallon diesel UST to the west of the garage area (off-site relative to the current Subject Property) that was reportedly been decommissioned and closed-in-place in 1997.

Historical sources indicated that the Subject Property had been utilized as a mental institution since at least 1892, including the existing site building since 1970.

The Subject Property was identified as a RCRA Non-Generator, FINDS facility, UST/Historic UST facility, Manifest Site, and NY Spills site. the UST listings referenced the closed-in-place 5,000-gallon diesel UST along with a 2000-gallon gasoline UST that was removed in 1998; a NY Spill listing was identified in association with the gasoline UST closure and thus considered an HREC. An additional Spill included oil found in a drain and had been addressed to the satisfaction of the regulator.

A south adjacent property was identified as a gas station with associated UST and LTANK listings. The consultant considered such to be a REC for the greater property. *LaBella notes that based on the topographic location of this facility relative to the Subject Property currently being assessed, such is not considered to pose a potential environmental concern at this time.*

The following REC was identified as associated with the Subject Property:

- An oil house, paint/printing shop, hospital, and laundry area were indicated on the Subject Property at various times according to the 1911, 1951, 1953, and 1962 Sanborn Maps. It is likely that solvents, petroleum products, paints, cleaning chemicals, and other hazardous materials were utilized and stored at these areas and other areas of the Subject Property. The

information available concerning hazardous material use and disposal at these buildings and the remainder of the Subject Property could not be determined during the assessment.

In addition, the following HREC was identified as associated with the Subject Property:

- According to the database report, the Subject Property is identified in the UST, Historic UST, NY Spills, and NY Historic Spills databases. The UST and Historic UST listings are due to two registered USTs on the Subject Property. In 1997, a 5,000-gallon gasoline UST was closed in place at the Subject Property. In 1998, a 2,000-gallon gasoline UST was closed and removed from the Subject Property. A NY Spills incident appears to be related to the 1998 tank removal. The information available indicated that soil contamination was discovered after the tank was removed the ground. The spill was closed in October 2003. The remaining NY Spills and NY Historic Spills incident occurred in October 1986 when a type of petroleum was found in a floor drain. A sample was analyzed and the material was found to contain less than 50 ppm PCBs. The material was collected and disposed of off-site. The incident was closed in July 1988. Given the regulatory closure of these past spills at the Subject Property, PSI does not consider these spills to represent a REC; however, they do represent a HREC. LaBella notes that no closure documentation was reviewed relative to the closed in place 5,000-gallon UST. As such, environmental conditions relative to that tank are unknown. Nonetheless, given the location of this closed in place UST relative to the Subject Property currently being assessed, such is not considered to pose an environmental concern the portion of the greater property being assessed by LaBella.

PSI recommended a Phase II ESA to address the historical use and storage of hazardous materials at the Subject Property. PSI also recommended that areas of indiscriminate dumping on the Subject Property be evaluated to determine if this dumping had impacted the Subject Property.

On March 6 and 7, 2008, 11 borings were installed at the Subject Property in the vicinity of the former paint/printing shop, the former oil house, the former hospital, and the former laundry area, respectively. Six soil samples were collected and analyzed for VOCs, SVOCs, PCBs, and metals. Operations of potential concern on the current Subject Property, as identified through historical sources, do not appear to have been investigated as part of this study.

Two surface soil samples were collected from a debris pile identified during the 2008 Phase I ESA and analyzed for SVOCs, PCBs, and metals. Seven SVOCs were identified exceeding NYSDEC guideline values in SS-1.

The detection of benzo(a)pyrene above NYSDEC guideline values in two soil samples was a low-level exceedance and did not appear to constitute an environmental concern. Metal concentrations only slightly exceeded background concentrations and did not appear to be of significant environmental concern. No VOCs or PCBs were detected above NYSDEC guideline values. The site investigation was limited to the subsurface soil borings and surface soil sample locations. To fully define the nature and extent of contamination identified, additional site investigation would be required in the indiscriminate

dumping area. It should be noted that the area where further investigation was recommended (the indiscriminate dumping area) is located off-site and is not considered to pose a potential concern to the current Subject Property based on its distance from and downgradient location relative to the same.

In addition to the above, LaBella was provided with a Limited Regulated Building Material Survey Report for the Subject Property, completed by Lu Engineers and dated April 2022. As part of this report, a site inspection was completed and building material samples were collected and analyzed to determine whether asbestos, PCB-containing caulk, and/or lead paint was present within the structure.

At the time of this report, Lu Engineers had noted a 275-gallon diesel fuel tank (AST) within the lower level of the Structure; the tank was observed to be partially filled with fluid. As part of Lu's survey, visual observations were also made to determine the extent of regulated materials present. Such materials were noted to include paints, unmarked drums (both partially full and empty), hydraulic oil containers, lubricant containers, PCBP ballasts, fluorescent light bulbs, mercury vapor lighting, HID light bulbs, mold growth, and refrigerant, along with general hazards including hypodermic needles, fire debris, and other various garbage and debris. Various asbestos (several hundred thousand square feet), PCB, and lead paint-containing materials were confirmed to be present on-site. In addition, visible mold growth was observed and it was estimated that approximately 60% of the structure was contaminated with mercury vapor, fluorescent, and HID bulb debris.

5.9 Historical Summary of Findings

Based on LaBella's review of historical sources, the history of the Subject Property is as follows:

Time Period	Apparent Use/Development
Between at least 1892 and 1967	Developed with various former structures and utilized as a psychiatric facility. Former structures indicative of storage and/or use of hazardous materials and/or petroleum products that could pose a potential environmental concern included an oil house, paint/printing shop, greenhouses, and carpentry shop, which were present at various times between at least 1911 and 1967.
1970-1971 through present	Developed with the Site Building, utilized as a psychiatric facility through the early 2000s with later uses consisting of office space and storage. The Subject Property has been vacant for approximately 10 years.

Based on LaBella's review of historical information, the adjacent properties were historically utilized for commercial, educational, and residential purposes.

LaBella's historical research identified the following conditions indicative of the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property:

- An oil house, paint/printing shop, greenhouses, and carpentry shop were located on the Subject Property at various times between at least 1911 and 1967. It is likely that solvents, paints, cleaning chemicals, and other hazardous materials and/or petroleum products were utilized and stored at these areas and other areas of the Subject Property; material handling practices are unknown. While a Limited Phase II ESA was conducted at the Subject/ Greater Property in 2008 to address historical uses, that scope did not include an investigation of each area of likely chemical use/storage.

6.0 REGULATORY INFORMATION

Federal, state, and tribal environmental regulatory information was provided by ERIS, an independent research firm, which completed an ASTM-compliant regulatory records search. This search was completed to ASTM-defined search distances; however, it should be noted that the distances searched may have been modified based on LaBella's experience due to the geology or nature of the area, as permitted under ASTM E-1527-13/21. Additionally, ERIS conducted a search of supplemental Federal, state, tribal, and local databases to augment the ASTM-specified search; any relevant listings from these supplemental searches are summarized in the following sections. The ERIS report, dated September 30, 2022 is included in the Regulatory Information Appendix.

The review of regulatory information was completed to evaluate the potential for environmental impact to the Subject Property, including contaminant migration from off-Subject Property locations. This evaluation included a review of regulatory records along with geologic/ hydrogeologic information, topographical information, and/or distance relative to the Subject Property.

6.1 Regulatory Report Summary

A complete list of the databases reviewed is included within the ERIS report. Below is a summary of the identified listings within their respective search distance:

Regulatory Report Summary

Database	Search Radius	Target Property	Within 0.12mi	0.12mi to 0.25mi	0.25mi to 0.50mi	0.50mi to 1.00mi	Total
ALT FUELS	0.25	0	0	1	-	-	1
AST	0.25	0	2	0	-	-	2
COOLING TOWERS	0.125	0	2	-	-	-	2
DELISTED DRYCLEANERS	0.25	0	0	1	-	-	1
FINDS/FRS	0.02	1	1	-	-	-	2
GEN MANIFEST	0.125	2	2	-	-	-	4
HIST GAS STATIONS	0.25	0	0	1	-	-	1
LST	0.5	0	2	0	8	-	10

Database	Search Radius	Target Property	Within 0.12mi	0.12mi to 0.25mi	0.25mi to 0.50mi	0.50mi to 1.00mi	Total
NY SPILLS	0.25	2	23	20	-	-	45
PFAS	0.5	0	0	0	2	-	2
RCRA NON GEN	0.25	1	3	11	-	-	15
RCRA VSQG	0.25	0	1	0	-	-	1
SHWS	1.0	0	0	0	2	4	6
SWF/LF	0.5	0	0	0	2	-	2
UST	0.25	1	5	0	-	-	6

6.1.1 Subject/Greater Property Listings

The Subject/Greater Property was identified as follows:

- UST Facility (PBS No. 7-447072):

The following table summarizes the NYSDEC PBS Facility Information listing associated with the Subject Property.

Tank No.	Location	Capacity (gallons)	Product Stored	Tank Type	Secondary Containment	Date Installed	Status
001	Underground	2,000	Gasoline	Steel/Carbon Steel/Iron	Double-Walled (Underground)	February 1, 1986	Closed - Removed (September 1, 1998)
002	Underground	5,000	Diesel	Steel/Carbon Steel/Iron	None	December 1, 1970	Closed - In Place (September 1, 1997)

It should be noted that the USTs were located on the greater property and would be considered south adjacent.

- NY Spills:
  - Spill #8604795 involved petroleum found in a storm drain. A confirmatory sample indicated levels were less than 50 ppm PCBs. The material was taken to a landfill for disposal and the NYSDEC closed the spill on July 22, 1988.

- Spill #9807337 involved soil contamination encountered during the removal of Tank 001. Approximately ten yards of pea stone were removed. Further testing was to be done upon completion of the tank removal. The spill was classified as inactive by the NYSDEC on October 31, 2003.

- RCRA (ID No. NYD120538020) Non-Generator with violations that were returned to compliance on May 19, 2011. Wastes generated are listed as ignitable waste, reactive waste, and spent nonhalogenated solvents.
- FRS listing associated with inclusion in the RCRA and NCDB Programs
- Manifest listing associated with the RCRA generator. The facility transported ignitable waste, wastes containing PCBs, corrosive waste, chromium, mercury, barium, methyl ethyl ketone, PCE, TCE, cadmium, lead, benzene, and spent nonhalogenated solvents between 1986 and 2010.

Based on the return to compliance of the violations, the status of the spills, and/or the location of the USTs on the southern adjacent property, there does not appear to be a REC in association with the regulatory record attached to the Subject Property.

6.1.2 Adjacent Property Listings

The following regulatory listings associated with the northern adjacent property was identified:

Rosamond Gifford Zoo - 1 Conservation Place (north)

- AST Facility (PBS No. 7-601179): Three in-service ASTs
- NY Spills:
  - Spill #0106351 involved soil that found to have low level concentrations of fuel oil and gasoline compounds and is classified as inactive by the NYSDEC.
  - Spill #0212724 involved an equipment failure causing approximately five gallons of hydraulic oil to spill to the ground and is classified as inactive by the NYSDEC.
  - Spill #0910395 involved a contractor hitting a UST. The UST had been filled with stone and gravel. The UST was removed from the ground and a closure report was received by the NYSDEC on January 13, 2010. The spill is classified as inactive by the NYSDEC.
- Cooling Towers (ID #4088): The property has cooling towers registered with the NYSDEC associated with air conditioning.

Based on the nature and status of the spill listings, there does not appear to be a REC for the Subject Property in association with the adjacent regulatory listings at this time.

6.1.3 Additional Listings

Based on distance and presumed direction of groundwater flow, none of the other sites listed within the database report are considered likely to have current or former releases of hazardous substances and/or petroleum products with the potential to migrate to the Subject Property.

6.1.4 Unmappable Listings

Unmapped facilities were identified within the ERIS report. The specific location of these listings could not be determined due to incomplete or inaccurate address information. Based on the limited address information available for the listings, they do not appear to be associated with the Subject Property or adjacent properties.

6.2 Enforcement Action/Permitted Activities/Institutional Controls

No recorded enforcement actions or institutional controls were identified for the Subject Property during this Phase I ESA.

Provided Information indicates that the Subject Property is subject to PBS and RCRA environmental permit activities.

6.3 Regulatory Agency File and Records Review

The purpose of the regulatory file review is to obtain sufficient information to assist the Environmental Professional in determining if a recognized environmental condition, controlled recognized environmental condition, historical recognized environmental condition, de minimis condition, or significant data gap exists at the Subject Property in connection with the identified listings. Regulatory listings identified in the database report for the Subject Property and adjacent properties were evaluated in order to determine the need for a regulatory file review. Based on this evaluation, the following was concluded:

- As sufficient information was included within the ERIS report, no file review was warranted.

6.4 Regulatory Information Summary

Labella's review of regulatory information identified the following conditions indicative of the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property.

- The Subject/Greater Property was identified as a RCRA Non-Generator with no unresolved violations and as a Manifest Facility. Wastes generated and/or transferred from the Subject Property have included PCBs, various metals, PCE, TCE, corrosive, ignitable, and reactive wastes, and spent non-halogenated solvents. While there were no records of release

reported, these listings are indicative of past use/storage/handling of various hazardous materials on the greater property.

7.0 INTERVIEWS

Interviews were completed with representatives of the owner/operator of the Subject Property, Subject Property occupants, neighbors, and/or former owners/operators, to the extent possible, to further assess Subject Property operations and/or potential environmental concerns.

Additional information was obtained through federal, state, tribal, and/or local agencies or via the submission of Records Requests, as documented below.

7.1 Owner/Subject Property Representative

As of the date of this report, LaBella has not received a completed owner interview form.

7.2 Current Occupants

There are no currant occupants of the Subject Property; as such, no occupant interviews could be completed.

7.3 Former Owners/Operators/Occupants

No past owners/occupants were contacted because no contact information was provided through available municipal records or through a focused online search.

7.4 Neighbors

While vacant, the Subject Property is not an abandoned property; such is routinely assessed by the City of Syracuse and Syracuse Police Department to deter unauthorized access. As such, interviews with the neighboring property owners were not conducted.

7.5 Local Government Official

A FOIL request was submitted to the City of Syracuse Clerk, Patricia McBride on September 29, 2022 requesting copies of building department, assessment, and fire marshal records on file for the Subject Property. Records were received from the City of Syracuse on October 5, 2022. Relevant records are discussed in Section 5.5 above. A copy of the FOIL request and the records obtained from the City of Syracuse are included in the Municipal Information Appendix.

7.6 State Regulator

A FOIL request was submitted to the NYSDEC on September 29, 2022. Records were obtained from the NYSDEC and are discussed in further detail in Sections 6.1.1, above. A copy of the documents

obtained are included in the Regulatory Information Appendix. A copy of the FOIL request is included in the Municipal Information Appendix.

7.7 State and/or County Health Department

A FOIL request was submitted to the OCHD on September 29, 2022. As of the date of this report submission, a complete response has not been received from the OCHD. A copy of the FOIL request is included in the Municipal Information Appendix.

7.8 Summary of Interviews

LaBella's interviews and/or review of provided records did not identify conditions indicative of the presence or likely presence of hazardous substances or petroleum products in, on, or at the Subject Property other than as noted elsewhere in this report.

8.0 ADDITIONAL SERVICES/ASTM NON-SCOPE CONSIDERATIONS

No additional services were provided or agreed upon as part of this assessment.

9.0 FINDINGS AND OPINIONS

The Subject Property, 800-802 South Wilbur Avenue, Syracuse, New York, includes 21.5-acres of a greater 47.8-acre parcel of land. The Subject Property is developed with portions of a four-story, 628,808 square foot institutional building constructed in 1970-1971 that has most recently been used as offices and storage; this structure has been vacant for approximately 10 years. The greater structure was initially utilized as the Syracuse State School for the Handicapped. Prior to development with the existing greater structure, the Subject Property was developed with portions of various structures (main building, meat market, bakery, ice house, paint shop, stables, farmhouse, carpenter shop, greenhouse, private garages, oil house, ice house, residential areas, etc.) associated with a previous state school/mental health facility.

Based on the results of this assessment, the following RECs have been identified in connection with the Subject Property:

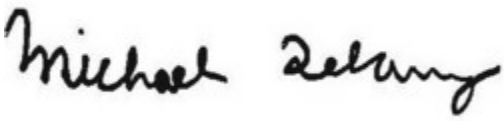
- An oil house, paint/printing shop, greenhouses, and carpentry shop were located on the Subject Property at various times between at least 1911 and 1967. It is likely that solvents, paints, cleaning chemicals, and other hazardous materials and/or petroleum products were utilized and stored at these areas and other areas of the Subject Property; material handling practices are unknown. While a Limited Phase II ESA was conducted at the Subject/Greater Property in 2008 to address historical uses, that scope did not include an investigation of each area of likely chemical use/storage. As such, there is the potential for impact to exist in areas not previously investigated based on the historical uses of the Subject Property.
- Evidence of fill material, including areas of mounding and potential settling, were observed throughout exterior areas on the Subject Property. The nature of fill material present on-site is unknown. LaBella notes that fill material generated as part of Subject Property redevelopment/construction activities may be subject to chemical testing and/or proper handling requirements which may impact the overall project budget.
- The Subject/Greater Property was identified as a RCRA Non-Generator with no unresolved violations and as a Manifest Facility. Wastes generated and/or transferred from the Subject Property have included PCBs, various metals, PCE, TCE, corrosive, ignitable, and reactive wastes, and spent non-halogenated solvents. While there were no records of release reported, these listings are indicative of past use/storage/handling of various hazardous materials on the greater property.

Based on the results of this assessment, no CRECs, HRECs, de minimis conditions, or significant data gaps have been identified in connection with the Subject Property.
While not considered a REC, CREC, HREC, de minimis condition, or significant data gap at this time, LaBella also notes the following:

- Nine five-gallon buckets of emulsified asphalt and five 55-gallon drums of floor cleaning chemicals were observed stored within the Site Building. Minor staining was observed proximate one five-gallon bucket, however, no floor drains were observed in the vicinity of the staining. Given the nature and location of the staining such is not considered to pose a significant environmental concern at this time. However, as it is LaBella's understanding that the Site Building is to be demolished, it is recommended that all hazardous chemicals be removed from the Site Building prior to demolition.
- Vent pipes were observed on the exterior of the Site Building. Based on the location of the vent pipes, it is presumed that an AST is currently or was historically located in the Site Building, potentially a diesel AST associated with a backup generator or chlorine AST reported to have been located on-site based on reviewed previous studies. Based on the condition of the Site Building, LaBella was unable to access the entirety of the structure. The presence of ASTs within the Site Building are not considered to pose a significant environmental concern at this time. However, as it is LaBella's understanding that the Site Building is to be demolished, it is recommended that any inactive ASTs be emptied and properly removed from the Site Building prior to demolition.
- Areas of solid waste disposal, including household debris, were observed on the Subject Property. LaBella recommends that these materials be collected and properly disposed of as a best management practice.

9.1 Recommendations

Based on the findings of this assessment, further investigation appears warranted at this time.



10.0 CONCLUSIONS

LaBella has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13/21 for 800-802 South Wilbur Avenue, Syracuse, New York, the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

This assessment has revealed the following recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the Subject Property:

- REC associated with historical presence of an oil house, paint/printing shop, greenhouses, and carpentry shop on the Subject Property at various times between at least 1911 and 1967
- REC associated with apparent fill material observed throughout the Subject Property
- REC associated with past generation/transportation of various regulated wastes, including metals and spent nonhalogenated solvents.

This report constitutes the findings and recommendations of LaBella's investigation conducted for the Subject Property as written and reviewed by the following personnel:

Michael Delaney

Dave Crandall
Phase I Program Manager

11.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. § 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

1.0 INTRODUCTION

LaBella Associates, D.P.C. ("LaBella") was retained by Albanese Development Corporation (ADC/Client) to conduct a Preliminary Phase II Environmental Site Assessment (ESA) at the property located at 800-802 South Wilbur Avenue, Syracuse, New York, hereinafter referred to as the "Site" (see Figure 1). This Preliminary Phase II ESA has been performed in conformance with the scope and limitations of ASTM Practice E 1903-19.

The overall property addressed as 800-802 South Wilbur Avenue and historically utilized as the Syracuse Developmental Center comprises an approximately 47.8-acre area. However, for the purposes of this Preliminary Phase II ESA, the Site extent was limited to the 21.5-acre area depicted on attached Figure 2. This area was selected based on a prior conceptual redevelopment plan.

1.1 Objective

The objective for the Preliminary Phase II ESA was to assess whether the RECs identified in the Phase I ESA report by LaBella dated October 31, 2022, including review of other previous environmental reports, have impacted the subsurface soil and groundwater at the Site and to evaluate current soil and groundwater conditions for use in planning for redevelopment of the Site. These potential areas of concern include the following and are depicted on Figure 2.

- Former greenhouses in the central and northern portions of the Site.
- A former oil house in the central portion of the Site.
- A former paint shop and former carpenter shop in the northern portion of the Site.

In addition to the above, based on the prior history of structures at the property, urban fill consisting of ash, cinders, etc. may be present at the Site. These materials are considered a regulated solid waste in New York State. In addition, the objective was to fill in data gaps from prior investigations and assess for NYSDEC Brownfield Cleanup Program (BCP) eligibility.

1.2 Special Terms & Conditions

The findings of this Preliminary Phase II ESA are based on the scope of work and project objectives as stated in LaBella Proposal number P2203643 dated October 31, 2022.

1.3 Limitations & Exceptions

Work associated with this Preliminary Phase II ESA was performed in accordance with generally accepted environmental engineering and environmental contracting practices for this region. LaBella Associates, D.P.C., makes no other warranty or representation, either expressed or implied, nor is one intended to be included as part of its services, proposals, contracts or reports.

Preliminary Phase II ESAs do not generally require an exhaustive assessment of environmental conditions on a property and are generally intended to assess specific potential environmental concerns identified at a site from a Preliminary Phase I ESA, Transaction Screen, or similar assessment. The Phase II ESA is not intended to delineate the nature and extent of contamination at the site, nor address complex geological settings, the fate and transport characteristics of certain hazardous substances. physical limitations imposed by the location of utilities and other man-made objects, and the limitations of assessment technologies.

In addition, LaBella cannot provide guarantees, certifications or warranties that the property is or is not free of environmental impairment or other regulated solid wastes. The Client shall be aware that the data and representative samples from any given soil sampling point or monitoring well may represent conditions that apply only at that particular location, and such conditions may not necessarily apply to the general Site as a whole.

Due to the poor condition of the building interior and redevelopment plans to include demolition of the existing structure, sampling was not conducted inside the building as part of this Preliminary Phase II ESA.

2.0 BACKGROUND

2.1 Site Description & Features

The overall redevelopment project comprises a 47.8-acre area and is planned to be redeveloped for residential and manufacturing purposes. The Site consists of the approximately 21.5-acre area that is planned to be redeveloped for multi-family residential purposes, as depicted on Figure 2. The area immediately south and southwest of the property boundary is part of the greater property but not within the current Site footprint; as such, investigation was not conducted in this area as part of this Preliminary Phase II ESA.

The existing structure at the Site includes portions of a greater four-story, 628,808 square foot institutional building constructed between 1970 and 1971 that has most recently been used as offices and storage; this structure has been vacant for approximately 10 years.

2.2 Physical Setting

The Site is located in the City of Syracuse within a predominantly urban area; surrounding properties are utilized for residential, commercial, and educational purposes.

2.3 Adjacent Property Use

The Site is bordered by the following properties:

Direction	Land Use
North	Commercial (Arc of Onondaga - 600 South Wilbur Avenue) Commercial (Rosamond Gifford Zoo - 1 Conservation Place)
East	Residences (601-627 South Wilbur Avenue)
South	Southern portion of 800-802 Wilbur Avenue
West	Vacant commercial (410 Grand Avenue)

2.4 Site History & Land Use

Based on the historical records reviewed, the following information was obtained related to the Site:

- Between at least 1892 and 1967 the Site was developed with various former structures and utilized as a psychiatric facility including an oil house, paint/printing shop, greenhouses, and carpentry shop, which were present at various times between at least 1911 and 1967.

- From 1970-1971 through current the Site was developed with the current Site Building and utilized as a psychiatric facility through the early 2000s with later uses consisting of office space and storage. The Site has been vacant for approximately 10 years.

2.5 Summary of Previous Studies

LaBella recently completed a Phase I ESA (October 31, 2022) which included the review of the following prior environmental reports.

- Phase I ESA report prepared by PSI dated February 11, 2008
- Limited Phase II ESA report prepared by B&L dated March 14, 2008

The following RECs were identified in connection with the Site:

- An oil house, paint/printing shop, greenhouses, and carpentry shop were located on the Subject Property at various times between at least 1911 and 1967. It is likely that solvents, paints, cleaning chemicals, and other hazardous materials and/or petroleum products were utilized and stored at these areas and other areas of the Subject Property; material handling practices are unknown. While a Limited Phase II ESA was conducted at the Subject/Greater Property in 2008 to address historical uses, that scope did not include an investigation of each area of likely chemical use/storage. As such, there is the potential for impact to exist in areas not previously investigated based on the historical uses of the Subject Property.
- Evidence of fill material, including areas of mounding and potential settling, were observed throughout exterior areas on the Subject Property. The nature of fill material present on-site is unknown. LaBella notes that fill material generated as part of Subject Property redevelopment/construction activities may be subject to chemical testing and/or proper handling requirements which may impact the overall project budget.
- The Subject/Greater Property was identified as a RCRA Non-Generator with no unresolved violations and as a Manifest Facility. Wastes generated and/or transferred from the Subject Property have included PCBs, various metals, PCE, TCE, corrosive, ignitable, and reactive wastes, and spent non-halogenated solvents. While there were no records of release reported, these listings are indicative of past use/storage/handling of various hazardous materials on the greater property.

No CRECs, HRECs, de minimis conditions, or significant data gaps were identified in connection with the Subject Property.

While not considered a REC, CREC, HREC, de minimis condition, or significant data gap at this time, LaBella also noted the following:

- Nine five-gallon buckets of emulsified asphalt and five 55-gallon drums of floor cleaning chemicals were observed stored within the Site Building. Minor staining was observed proximate one five-gallon bucket, however, no floor drains were observed in the vicinity of the staining. Given the nature and location of the staining such is not considered to pose a significant environmental concern at this time. However, as it is LaBella's understanding that the Site Building is to be demolished, it is recommended that all hazardous chemicals be removed from the Site Building prior to demolition.
- Vent pipes were observed on the exterior of the Site Building. Based on the location of the vent pipes, it is presumed that an AST is currently or was historically located in the Site

Building, potentially a diesel AST associated with a backup generator or chlorine AST reported to have been located on-site based on reviewed previous studies. Based on the condition of the Site Building, LaBella was unable to access the entirety of the structure. The presence of ASTs within the Site Building are not considered to pose a significant environmental concern at this time. However, as it is LaBella's understanding that the Site Building is to be demolished, it is recommended that any inactive ASTs be emptied and properly removed from the Site Building prior to demolition.

- Areas of solid waste disposal, including household debris, were observed on the Subject Property. LaBella recommends that these materials be collected and properly disposed of as a best management practice.

3.0 FIELD INVESTIGATION

The following Scope of Work was performed:

3.1 Soil Boring Installation and Sampling

Prior to the initiation of subsurface work, an underground utility stake-out via *Dig Safely New York* was completed at the Site (ticket number 11252-000-004) to locate utilities in the areas where the subsurface assessment would take place.

In addition, LaBella retained the services of a geophysical survey sub-consultant to perform nonintrusive subsurface locating using a magnetometer and ground penetrating radar (GPR) capable of detecting and delineating metallic and buried objects in the subsurface. The geophysical work was conducted at the Site on November 22, 2022, by On The Mark Utility Locating Services, Inc. (OTM) under LaBella supervision. The work was performed specifically to clear all proposed soil boring and temporary well locations planned for sampling of any anomalies, utilities or buried objects.

The equipment utilized by OTM during the work included, Pipehorn 800HL (Radio Frequency), Radiodetection CAT4 (Radio Frequency) and a Mala Ground Penetrating Radar (GPR) unit.

It should be noted that no geophysical anomalies or metallic or buried objects were identified in the proposed soil boring and temporary well locations utilized for sampling.

3.1.1 Soil Borings

A total of ten (10) soil borings were advanced at the Site on November 29 and November 30, 2022, designated SB-01 through SB-10, under supervision of LaBella personnel. Soil borings were advanced at the Site to depths ranging from approximately 12.5 to 25-feet (ft) below ground surface (bgs) into the overburden with a track-mounted Geoprobe® Systems Model 6620 direct-push sampling system. The use of direct-push technology allows for rapid sampling, observation, and characterization of overburden soils. The Geoprobe utilizes a 5-ft MacroCore® sampler with disposable polyethylene sleeves. Soil cores are retrieved in 5-ft sections and are cut from the polyethylene sleeves for observation and sampling. The MacroCore® sampler was decontaminated between boring locations using an Alconox® and potable water solution followed by a potable water rinse. Soil boring locations are depicted on Figure 2.

Soil samples were collected continuously from the ground surface to the bottom of each boring. Soil samples were visually and physically examined by LaBella personnel and observations made of the general lithology, visible layering, evidence of nonnative fill/historic fill materials, indications of chemical or other staining, odors, and other distinctive features. Soils from soil borings were field screened for the presence of Volatile Organic Compounds (VOCs) using a PID equipped with a 10.6 electronvolt (eV) lamp. Positive indications from any of these screening methods are collectively referred to as "evidence of impairment". PID data and observations from each boring are included on the soil boring logs presented in Appendix 1.

Samples were selected from the borings for laboratory analysis based upon depth, apparent depth of the top of the overburden groundwater table, field screening, and PID readings to address the potential environmental concerns identified at the Site. The soil samples submitted for laboratory analysis are listed in Section 3.3 and are summarized in Section 4.3. Investigation locations were located with a global positioning system.

3.1.2 Shallow Soil Borings

A total of four (4) shallow soil borings were advanced at the Site on November 30, 2022, designated SB-11 through SB-14, under supervision of LaBella personnel. Soil borings were advanced at the Site to depths ranging from approximately 0 to 2-ft bgs utilizing the direct-push sampling system and methods described above. Soil boring locations are depicted on Figure 2.

Soil samples were collected from a depth of 0-1 ft bgs and 1-2 ft bgs from each boring (eight (8) total samples). Soil was field screened for evidence of impairment as described above. Soil was also placed soil into a Ziploc® bag and screened using a Delta handheld x-ray fluorescence (XRF) meter by placing the XRF meter in front of the sample for a duration that allows the instrument to analyze the chemical composition of the soil sample for lead. XRF readings are provided in a results table in Section 4.

All eight (8) shallow soil samples were submitted for laboratory analysis listed in Section 3.3 and are summarized in Section 4.3. Investigation locations were located with a global positioning system.

3.2 Groundwater Monitoring Well Installation and Sampling

Four (4) soil borings were converted into temporary shallow overburden groundwater monitoring wells (designated as TW-01 (SB-01), TW-02 (SB-08), TW-03 (SB-09) and TW-04 (SB-04). Each well was constructed with 10-ft of 0.010-slot well screen of 1-inch inner diameter Schedule 40 polyvinyl chloride (PVC) screen attached to solid riser piping of the same material to complete the well. The wells were installed as an overburden well that was intended to intersect the top of the overburden groundwater table. The annulus was sand packed with quartz sand to a nominal depth of 1-ft above the screen section and a bentonite seal was placed above the sand to near the ground surface. The groundwater monitoring well construction logs are included in Appendix 1.

It should be noted that while four (4) temporary shallow overburden groundwater monitoring wells were installed, only one well, TW-04 (SB-04), produced sufficient groundwater for well development and sampling.

The three remaining wells which did not produce groundwater initially, TW-01 (SB-01), TW-02 (SB-08) and TW-03 (SB-09), were reassessed on December 2, 2022 and December 5, 2022 for evidence of groundwater. Evidence of groundwater in these wells was not identified. As such, these wells could not be developed or sampled.

On November 30, 2022, a static water level (SWL) was collected from TW-04 (SB-04) prior to development. The SWL was identified at 4.6 ft bgs. The well was developed using a peristaltic pump until three well volumes were removed. A peristaltic pump was used to collect a groundwater sample from TW-04 (SB-04) to limit turbidity. Immediately prior to sampling, a turbidity reading was collected in the field utilizing a Lamotte 2020we turbidity meter. Turbidity of groundwater in TW-04 (SB-04) was 17.4 NTU prior to sampling. Well development and turbidity are documented on the well construction logs.

The groundwater sample was submitted for laboratory analysis listed in Section 3.3 and is summarized in Section 4.3. Investigation locations were located with a global positioning system.

3.3 Laboratory Analytical Program

Samples selected for analysis were placed directly into laboratory-supplied containers, preserved as appropriate in a cooler, submitted under chain-of-custody protocol to Alpha Analytical in Westborough, Massachusetts, which is a New York State Department of Health (NYSDOH) Environmental Laboratory Accreditation Program (ELAP) certified laboratory. A laboratory courier was utilized to transport the samples to the lab.

LaBella submitted the following samples for laboratory analysis.

Sample ID	Sample Matrix	Sample Depth or Well Screen Interval (ft bgs)	Laboratory Analysis			
			VOCs	SVOCs	Metals	Pesticides
SB-02, 10-12.5	Soil	10-12.5	X			
SB-03, 5-7.5	Soil	5-7.5	X	X	X	
SB-06, 7.5-10	Soil	7.5-10	X	X	X	X
SB-08, 7.5-10	Soil	7.5-10	X	X	X	X
SB-09, 10-12.5	Soil	10-12.5	X	X	X	
SB-11, 0-1	Soil	0-1			X	X
SB-11, 1-2	Soil	1-2			X	X
SB-12, 0-1	Soil	0-1			X	X
SB-12, 1-2	Soil	1-2			X	X
SB-13, 0-1	Soil	0-1			X	X
SB-13, 1-2	Soil	1-2			X	X
SB-14, 0-1	Soil	0-1			X	X
SB-14, 1-2	Soil	1-2			X	X
TW-04 (SB-04)	Groundwater	9.7-19.7	X	X		

Notes:

- VOCs - Volatile Organic Compounds analyzed for the Target Compound List (TCL) and NYSDEC Commissioner Policy (CP-51) lists using United States Environmental Protection Agency (USEPA) method 8260
- SVOCs - Semi-Volatile Organic Compounds analyzed for CP-51 list using USEPA method 8270
- Metals were analyzed for Resource Conservation and Recovery Act (RCRA) list of metals using USEPA method 6010 or 7471
- Pesticides were analyzed using USEPA Method 8081
- Sample locations are depicted on Figure 2

The laboratory analytical reports are included as Appendix 2.

3.4 Deviations to Objective

Four (4) soil borings were converted into temporary shallow overburden groundwater monitoring wells (designated as TW-01 (SB-01), TW-02 (SB-08), TW-03 (SB-09) and TW-04 (SB-04). While groundwater sampling of each of these wells was planned, only one well, TW-04 (SB-04), produced sufficient groundwater for well development and groundwater sampling. As such, only one groundwater sample was collected for laboratory analysis.

Screening of shallow soil samples for lead was attempted utilizing a Delta handheld x-ray fluorescence (XRF) meter; however, LaBella encountered calibration issues with the XRF unit during numerous calibration attempts. Based on poor calibration results, XRF screening was not completed on shallow soils.

4.0 RESULTS OF PRELIMINARY PHASE II INVESTIGATION

4.1 Subsurface Conditions

Soils at the Site consisted generally of fine to medium brown/gray sands, some brown silt, little fine sub angular gravel. Urban fill material (i.e. brick, concrete, ash, coal, etc.) was not encountered during the work. Equipment refusal was encountered in seven (7) of the soil borings and consisted of weathered rock. Groundwater was encountered at approximately 15 ft bgs in TW-04 (SB-04).

4.2 Field Screening Results

All soil cores were continuously assessed by LaBella for evidence of impairment. No visual or olfactory evidence of impairment was identified within any of the soil borings advanced with the exception of SB-08 at 7.5 to 8 ft bgs. Black staining and petroleum odors were identified associated with these soils. PID readings of soils from SB-08 at 7.5 to 8 ft bgs were identified slightly above background conditions, at 0.4 ppm.

Evidence of impairment was not identified in any of the other soil borings or shallow soil borings during the work. PID readings collected from the soil borings are included in the test boring field logs in Appendix 1.

Screening of shallow soil samples for lead was attempted utilizing a Delta handheld XRF meter; however, LaBella encountered calibration issues with the XRF unit during numerous calibration attempts. Based on poor calibration results, XRF screening was not completed on shallow soils.

4.3 Laboratory Analytical Results

The laboratory analytical results have been compared to the following standards:

Soil

- **Unrestricted Use Soil Cleanup Objectives (SCOs)** - 6 New York Code Rules and Regulations (NYCRR) Part 375-6.8(a) Unrestricted Use SCOs
- **Restricted Residential Use SCO** - 6 NYCRR Part 375-6.8(b) Restricted Use SCOs for a Residential Site

Based on the future use of the Site for multi-family housing, the Restricted Residential Use SCOs are the most appropriate comparison criteria for the Site.

Groundwater

- **TOGS 1.1.1** - NYSDEC document titled "Division of Water Technical and Operational Guidance Series 1.1.1; Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations" dated June 1998 as amended with April 2000 and June 2004 addendum tables

The results are summarized on the following attached tables:

- Table 1 – Summary of Volatile Organic Compounds in Soil Borings
- Table 2 – Summary of Semi-Volatile Organic Compounds in Soil Borings
- Table 3 – Summary of Metals in Soil Borings
- Table 4 – Summary of Pesticides in Soil Borings
- Table 5 – Summary of Metals in Shallow Soil Borings
- Table 6 – Summary of Pesticides in Shallow Soil Borings
- Table 7 - Summary of Volatile Organic Compounds in Groundwater
- Table 8 - Summary of Semi-Volatile Organic Compounds in Groundwater

4.3.1 Soil Boring Sample Results

VOCs:
A total of five (5) soil samples were analyzed for VOCs. VOCs were detected in four (4) of the five (5) soil samples at concentrations above laboratory method detection limits (MDLs); however, the concentrations detected do not exceed Unrestricted Use SCOs.

SVOCs:
A total of four (4) soil samples were analyzed for SVOCs. Numerous SVOCs were detected in one (1) soil sample (SB-08, 7.5-10 ft bgs) at concentrations above laboratory MDLs. Of these detections, seven (7) SVOC compounds were identified exceeding Unrestricted and Restricted Residential Use SCOs.

Metals:
A total of four (4) soil samples were analyzed for RCRA Metals. Metals were detected in all four (4) soil samples at concentrations above laboratory MDLs. Of these detections, only lead was identified above the Unrestricted Use SCO in one (1) soil boring (SB-08, 7.5-10 ft bgs). However, the concentration is below the Restricted Residential SCO for this compound.

Pesticides:
A total of two (2) soil samples were analyzed for Pesticides. Pesticides were detected in one (1) soil sample (SB-08, 7.5-10 ft bgs) at concentrations above laboratory MDLs. Of these detections, two (2) pesticides (4,4'-DDT and 4,4'-DDD) were identified exceeding their respective Unrestricted Use SCOs. Concentrations did not exceed Restricted Residential SCOs.

4.3.2 Shallow Soil Boring Sample Results

Metals:
A total of eight (8) shallow soil samples were analyzed for RCRA Metals. Metals were detected in all eight (8) shallow soil samples at concentrations above laboratory MDLs. Of these detections, lead was identified above Unrestricted Use SCOs in SB-11, 1-2 ft bgs; SB-12, 1-2 ft bgs; SB-14, 0-1 ft bgs; and, SB-14, 1-2 ft bgs. However, these concentrations are below Restricted Residential SCOs.

Pesticides:
A total of eight (8) shallow soil samples were analyzed for Pesticides. Pesticides were detected in all eight (8) soil samples at concentrations above laboratory MDLs. Of these detections, pesticides were identified exceeding Unrestricted Use SCOs in seven (7) of the shallow soil samples. However, these concentrations are below Restricted Residential SCOs.

4.3.3 Groundwater Sample Results

VOCs:
One (1) groundwater sample was analyzed for VOCs (TW-04). Two VOCs were detected in the groundwater sample at concentrations above laboratory MDLs; however, the concentrations detected do not exceed the TOGS 1.1.1 groundwater standards.

SVOCs:
One (1) groundwater sample was analyzed for SVOCs (TW-04). Fifteen SVOCs were detected in the groundwater sample at concentrations above laboratory MDLs. Of these detections, six (6) SVOCs were identified exceeding TOGS 1.1.1 groundwater standards. It should be noted that elevated turbidity was measured in this well during groundwater sampling; as such, the elevated concentrations of SVOCs could be the result of sediment in the samples and not representative of dissolved concentrations in groundwater.

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

LaBella was retained by ADC to conduct a Preliminary Phase II ESA at the property located at 800-802 South Wilbur Avenue, Syracuse, New York. The Preliminary Phase II ESA consisted of the advancement of fourteen (14) soil borings, installation of temporary groundwater monitoring wells and laboratory analysis of thirteen (13) soil and one (1) groundwater sample. This Preliminary Phase II ESA was performed to evaluate whether the RECs identified in the Phase I ESA report by LaBella dated October 31, 2022, including review of other previous environmental reports, have impacted the subsurface soil and groundwater at the Site and to evaluate current soil and groundwater conditions for use in planning for redevelopment of the Site. Investigation was limited to the approximately 21.5-acre area depicted on Figure 2 and based on deteriorated building conditions, did not include sampling within building footprints.

- No visual or olfactory evidence of environmental impairment was identified within any of the soil borings advanced with the exception of SB-08 at 7.5 to 8 ft bgs. Black staining and petroleum odors were identified associated with these soils. PID readings of soils from SB-08 at 7.5 to 8 ft bgs were identified slightly above background conditions, at 0.4 ppm.

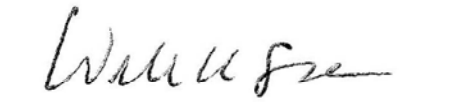
- VOCs were detected in soil borings at concentrations above laboratory MDLs; however, the concentrations detected do not exceed Unrestricted Use SCOs. Select metals and pesticides were identified in soil samples above Unrestricted Use SCOs; however, these compounds were not identified above Restricted Residential SCOs. Restricted Residential SCOs are the most appropriate comparison criteria based on the planned future use of the Site for multi-family housing.

- Numerous SVOCs were detected in one (1) soil sample (SB-08, 7.5-10 ft bgs) at concentrations exceeding Unrestricted and Restricted Residential SCOs. The SVOCs detected are polyaromatic hydrocarbons (PAHs) and are typically associated with asphalt pavement or partially combusted fossil fuels. Lead and pesticides were also identified above Unrestricted Use SCOs in this soil sample, but below Restricted Residential SCOs. As mentioned above, black staining and petroleum odors were noted in a portion of this sample interval during the investigation. While a temporary groundwater monitoring well was installed at this location, the well did not produce sufficient groundwater for development and sampling. Based on the preliminary nature of this assessment, the nature and extent of the impacts in SB-08 have not been delineated.

- SVOCs were detected in one (1) groundwater sample slightly exceeding TOGS 1.1.1 groundwater standards. However, based on elevated turbidity readings collected at the time of sampling, these results may not be representative of dissolved concentrations in groundwater. The Site is located in an urban area and groundwater is not a source of drinking water. Drinking water is supplied from a municipal source.

As noted in Section 1.0, the 21.5-acre Site extent was based on a prior conceptual redevelopment plan. However, LaBella understands that the redevelopment plan is being modified and may propose redevelopment in areas not included as part of this Preliminary Phase II ESA or the Phase I ESA dated October 31, 2022. Based on this information, additional subsurface soil and groundwater investigation should be completed to determine soil and groundwater conditions in these areas.

5.2 Recommendations



Based on the Conclusions above, the following is recommended for the Site:

- Delineation of soil and groundwater should be completed in the vicinity of SB-08 to determine if additional subsurface impacts are present in this area which could warrant remediation.
- If the revised redevelopment plans expand the Site boundary beyond the current extent, additional investigation may be recommended. Based on the historical presence of underground storage tanks and a historical boiler house which was demolished in the early 1970s, additional investigation may include a geophysical survey to assess for orphan USTs (primarily near the historical boiler house) and additional soil and groundwater sampling.

A copy of all information collected during this assessment, including maps, notes, analytical data and other material will be kept on file at the offices of LaBella Associates, D.P.C. This information is available upon request.

1.0 INTRODUCTION

LaBella Associates, D.P.C. ("LaBella") was retained by Albanese Development Corporation (ADC/Client) to conduct a Supplemental Phase II Environmental Site Assessment (ESA) at the property located at 800-802 South Wilbur Avenue, Syracuse, New York, hereinafter referred to as the "Site" (see Figure 1). This Supplemental Phase II ESA has been performed in conformance with the scope and limitations of ASTM Practice E 1903-19.

The overall property addressed as 800-802 South Wilbur Avenue and historically utilized as the Syracuse Developmental Center comprises an approximately 47.8-acre area. However, for the purposes of this Supplemental Phase II ESA, the Site extent was limited to the Site boundaries as depicted on attached Figure 2. This area was selected based on a prior conceptual redevelopment plan.

1.1 Objective

The objectives of the Supplemental Phase II ESA were to:

- Evaluate subsurface soil and groundwater in the vicinity of redevelopment areas based on revised plans and not included in the Preliminary Phase II ESA;
- Assess subsurface impacts previously identified in the vicinity of SB-08; and,
- Install additional soil borings in the vicinity of the former oil house and carpentry shop.

1.2 Special Terms & Conditions

The findings of this Supplemental Phase II ESA are based on the scope of work and project objectives as stated in LaBella Proposal number P2301675 dated February 22, 2023.

1.3 Limitations & Exceptions

Work associated with this Supplemental Phase II ESA was performed in accordance with generally accepted environmental engineering and environmental contracting practices for this region. LaBella Associates, D.P.C., makes no other warranty or representation, either expressed or implied, nor is one intended to be included as part of its services, proposals, contracts or reports.

LaBella cannot provide guarantees, certifications or warranties that the property is or is not free of environmental impairment or other regulated solid wastes. The Client shall be aware that the data and representative samples from any given soil sampling point or monitoring well may represent conditions that apply only at that particular location, and such conditions may not necessarily apply to the general Site as a whole.

Due to the poor condition of the building interior and redevelopment plans to include demolition of the existing structure, sampling was not conducted inside the building as part of this Supplemental Phase II ESA.

2.0 BACKGROUND

2.1 Site Description & Features

The overall redevelopment project comprises a 47.8-acre area and is planned to be redeveloped for residential and manufacturing purposes. The Site consists of the approximately 29-acre area that is planned to be redeveloped with apartment buildings and townhomes, as depicted on Figure 2. The area immediately south and southwest of the property boundary is part of the greater property but not within the current Site footprint; as such, investigation was not conducted in this area as part of this Supplemental Phase II ESA.

The existing structure at the Site includes portions of a greater four-story, 628,808 square foot institutional building constructed between 1970 and 1971 that has most recently been used as offices and storage; this structure has been vacant for approximately 10 years.

2.2 Physical Setting

The Site is located in the City of Syracuse within a predominantly urban area; surrounding properties are utilized for residential, commercial, and educational purposes.

2.3 Adjacent Property Use

The Site is bordered by the following properties:

Direction	Land Use
North	Commercial (Arc of Onondaga - 600 South Wilbur Avenue) Commercial (Rosamond Gifford Zoo - 1 Conservation Place)
East	Residences (601-627 South Wilbur Avenue)
South	Southern portion of 800-802 Wilbur Avenue
West	Vacant commercial (410 Grand Avenue)

2.4 Site History & Land Use

Based on the historical records reviewed, the following information was obtained related to the Site:

- Between at least 1892 and 1967 the Site was developed with various former structures and utilized as a psychiatric facility including an oil house, paint/printing shop, greenhouses, and carpentry shop, which were present at various times between at least 1911 and 1967.

- From 1970-1971 through current the Site was developed with the current Site Building and utilized as a psychiatric facility through the early 2000s with later uses consisting of office space and storage. The Site has been vacant for approximately 10 years.

2.5 Summary of Preliminary Phase II ESA

LaBella recently completed a Preliminary Phase II ESA, draft report dated January 16, 2023, at the Site which included the advancement of fourteen (14) soil borings, installation of temporary groundwater monitoring wells and laboratory analysis of thirteen (13) soil and one (1) groundwater sample. This Preliminary Phase II ESA was performed to evaluate whether the RECs identified above had impacted the subsurface soil and groundwater at the Site and to evaluate current soil and

groundwater conditions for use in planning for redevelopment of the Site. The investigation was limited to an approximately 21.5-acre area from development plans at that the time and based on deteriorated building conditions, did not include sampling within building footprints. The results of the Preliminary Phase II ESA are summarized below.

- No visual or olfactory evidence of environmental impairment was identified within any of the soil borings advanced with the exception of SB-08 at 7.5 to 8 ft bgs. Black staining and petroleum odors were identified associated with these soils. PID readings of soils from SB-08 at 7.5 to 8 ft bgs were identified slightly above background conditions, at 0.4 ppm.

- VOCs were detected in soil borings at concentrations above laboratory MDLs; however, the concentrations detected do not exceed Unrestricted Use SCOs. Select metals and pesticides were identified in soil samples above Unrestricted Use SCOs; however, these compounds were not identified above Restricted Residential Use SCOs. Restricted Residential Use SCOs are the most appropriate comparison criteria based on the planned future use of the Site for multi-family housing.

- Numerous SVOCs were detected in one (1) soil sample (SB-08, 7.5-10 ft bgs) at concentrations exceeding Unrestricted and Restricted Residential Use SCOs. The SVOCs detected are polyaromatic hydrocarbons (PAHs) and are typically associated with asphalt pavement or partially combusted fossil fuels. Lead and pesticides were also identified above Unrestricted Use SCOs in this soil sample, but below Restricted Residential Use SCOs. As mentioned above, black staining and petroleum odors were noted in a portion of this sample interval during the investigation. While a temporary groundwater monitoring well was installed at this location, the well did not produce sufficient groundwater for development and sampling. Based on the preliminary nature of this assessment, the nature and extent of the impacts in SB-08 have not been delineated.

- SVOCs were detected in one (1) groundwater sample slightly exceeding TOGS 1.1.1 groundwater standards. However, based on elevated turbidity readings collected at the time of sampling, these results may not be representative of dissolved concentrations in groundwater. The Site is located in an urban area and groundwater is not a source of drinking water. Drinking water is supplied from a municipal source.

Based on the results of the Preliminary Phase II ESA, the following was recommended for the Site:

- Delineation of soil and groundwater should be completed in the vicinity of SB-08 to determine if additional subsurface impacts are present in this area which could warrant remediation.

- If the revised redevelopment plans expand the Site boundary beyond the current extent, additional investigation may be recommended.

ADC recently provided LaBella with revised redevelopment plans for the Site. These revised plans include a slight increase in land area and additional residential structures (apartment buildings and townhouses). Based on the revised redevelopment plans, and conversations with ADC, the purpose of the Supplemental Phase II ESA is to evaluate subsurface soil and groundwater in the vicinity of redevelopment areas based on revised plans and not included in the Preliminary Phase II ESA. In addition, to delineate subsurface impacts identified in the vicinity of SB-08 and install additional soil borings in the vicinity of the former oil house and carpentry shop.

3.0 FIELD INVESTIGATION

The following Scope of Work was performed:

3.1 Soil Boring Installation and Sampling

Prior to the initiation of subsurface work, an underground utility stake-out via *Dig Safely New York* was completed at the Site (ticket number 02223-001-056) to locate utilities in the areas where the subsurface assessment would take place.

In addition, LaBella retained the services of a geophysical survey sub-consultant to perform nonintrusive subsurface locating using a magnetometer and ground penetrating radar (GPR) capable of detecting and delineating metallic and buried objects in the subsurface. The geophysical work was conducted at the Site on February 27, 2023, by On The Mark Utility Locating Services, Inc. (OTM) under LaBella supervision. The work was performed specifically to clear all proposed soil boring and temporary well locations planned for sampling of any anomalies, utilities or buried objects.

The equipment utilized by OTM during the work included Pipehorn 800HL (Radio Frequency), Radiodetection CAT4 (Radio Frequency) and a Mala Ground Penetrating Radar (GPR) unit.

It should be noted that no geophysical anomalies or metallic or buried objects were identified in the proposed soil boring and temporary well locations utilized for sampling.

3.1.1 Soil Borings

A total of twenty (20) soil borings were advanced at the Site on March 1 and March 2, 2023, designated SB-15 through SB-34, under supervision of LaBella personnel. Soil borings were advanced at the Site to depths ranging from approximately 5 to 15-feet (ft) below ground surface (bgs) into the overburden with a track-mounted Geoprobe® Systems Model 6712DT direct-push sampling system. The use of direct-push technology allows for rapid sampling, observation, and characterization of overburden soils. The Geoprobe utilizes a 5-ft MacroCore® sampler with disposable polyethylene sleeves. Soil cores are retrieved in 5-ft sections and are cut from the polyethylene sleeves for observation and sampling. The MacroCore® sampler was decontaminated between boring locations using an Alconox® and potable water solution followed by a potable water rinse. Soil boring locations are depicted on Figure 2.

Soil samples were collected continuously from the ground surface to the bottom of each boring. Soil samples were visually and physically examined by LaBella personnel and observations made of the general lithology, visible layering, evidence of nonnative fill/historic fill materials, indications of chemical or other staining, odors, and other distinctive features. Soils from soil borings were field screened for the presence of Volatile Organic Compounds (VOCs) using a PID equipped with a 10.6 electronvolt (eV) lamp. Positive indications from any of these screening methods are collectively

referred to as “evidence of impairment”. PID data and observations from each boring are included on the soil boring logs presented in Appendix 1.

Samples were selected from the borings for laboratory analysis based upon depth, apparent depth of the top of the overburden groundwater table, field screening, and PID readings to address the potential environmental concerns identified at the Site. The soil samples submitted for laboratory analysis are listed in Section 3.3 and are summarized in Section 4.3. Investigation locations were located with a global positioning system.

3.2 Groundwater Monitoring Well Installation and Sampling

One (1) soil boring was converted into a temporary shallow overburden groundwater monitoring well (designated as TW-05 (SB-32). It should be noted that while up to five (5) temporary shallow overburden groundwater monitoring wells were planned, only one soil boring, SB-32, showed evidence of groundwater.

The well was constructed with 10-ft of 0.010-slot well screen of 1-inch inner diameter Schedule 40 polyvinyl chloride (PVC) screen attached to solid riser piping of the same material to complete the well. The well was installed as an overburden well that was intended to intersect the top of the overburden groundwater table. The annulus was sand packed with quartz sand to a nominal depth of 1-ft above the screen section and a bentonite seal was placed above the sand to near the ground surface. The groundwater monitoring well construction logs are included in Appendix 1.

In addition, the three (3) groundwater monitoring wells installed during the Preliminary Phase II ESA which did not produce groundwater initially, TW-01 (SB-01), TW-02 (SB-08) and TW-03 (SB-09), were reassessed on March 2, 2023 for evidence of groundwater. Evidence of groundwater in these wells was not identified. As such, these wells could not be developed or sampled.

On March 2, 2023, a static water level (SWL) was collected from TW-05 (SB-32) prior to development. The SWL was identified at 4.3 ft bgs. The well was developed using a peristaltic pump until three well volumes were removed. A peristaltic pump was used to collect a groundwater sample from TW-05 (SB-32) to limit turbidity. Immediately prior to sampling, a turbidity reading was collected in the field utilizing a Lamotte 2020we turbidity meter. Turbidity of groundwater in TW-05 (SB-32) was 141 NTU prior to sampling. Well development and turbidity are documented on the well construction logs.

The groundwater sample was submitted for laboratory analysis listed in Section 3.3 and is summarized in Section 4.3. Investigation locations were located with a global positioning system.

3.3 Laboratory Analytical Program

Samples selected for analysis were placed directly into laboratory-supplied containers, preserved as appropriate in a cooler, submitted under chain-of-custody protocol to Alpha Analytical in Westborough, Massachusetts, which is a New York State Department of Health (NYSDOH) Environmental Laboratory Accreditation Program (ELAP) certified laboratory. A laboratory courier was utilized to transport the samples to the lab.

LaBella submitted the following samples for laboratory analysis.

Sample ID	Sample Matrix	Sample Depth or Well Screen Interval (ft bgs)	Laboratory Analysis			
			VOCs	SVOCs	Metals	Pesticides
SB-15, 2.5-5.0	Soil	2.5-5.0	X	X	X	X
SB-16, 7.5-10.0	Soil	7.5-10	X	X	X	X
SB-19, 5.0-7.5	Soil	5.0-7.5		X		
SB-20, 5.0-7.5	Soil	5.0-7.5		X		
SB-25, 7.5-10.0	Soil	7.5-10.0	X	X		
SB-27, 2.5-5.0	Soil	2.5-5.0	X	X	X	
SB-31, 10.0-12.5	Soil	10.0-12.5	X	X	X	
SB-33, 5.0-7.5	Soil	5.0-7.5		X		
TW-05 (SB-32)	Groundwater	5.0-15.0	X	X		

Notes:

- VOCs - Volatile Organic Compounds analyzed for the Target Compound List (TCL) and NYSDEC Commissioner Policy (CP-51) lists using United States Environmental Protection Agency (USEPA) method 8260
- SVOCs - Semi-Volatile Organic Compounds analyzed for CP-51 list using USEPA method 8270
- Metals were analyzed for Resource Conservation and Recovery Act (RCRA) list of metals using USEPA method 6010 or 7471
- Pesticides were analyzed using USEPA Method 8081
- Sample locations are depicted on Figure 2

The laboratory analytical reports are included as Appendix 2.

3.4 Deviations to Objective

One (1) soil boring was converted into a temporary shallow overburden groundwater monitoring well (designated as TW-05 (SB-32). It should be noted that while up to five (5) temporary shallow overburden groundwater monitoring wells were planned, only one soil boring, SB-32, showed sufficient evidence of groundwater for well development and groundwater sampling purposes. As such, only one groundwater sample was collected for laboratory analysis.

4.0 RESULTS OF SUPPLEMENTAL PHASE II INVESTIGATION

4.1 Subsurface Conditions

Soils at the Site consisted generally of fine to medium brown/gray sands, some brown silt, little fine sub angular gravel. Urban fill material (i.e. brick, concrete, ash, coal, etc.) was not encountered during the work. Equipment refusal was encountered in eighteen (18) of the twenty (20) soil borings and consisted of weathered rock. Groundwater was encountered at approximately 4.3 ft bgs in TW-05 (SB-32).

4.2 Field Screening Results

All soil cores were continuously assessed by LaBella for evidence of impairment. No visual or olfactory evidence of impairment was identified within any of the soil borings advanced with the exception of SB-15 at 2.5-5 ft bgs, SB-16 at 7.5-10 ft bgs and SB-27 at 2.5-5 ft bgs. Black soils/staining was identified associated with these soils. In addition, slight petroleum odors were identified associated with soils at SB-15 at 2.5-5 ft bgs. PID readings were not identified above background condition in any of the soil samples.

Evidence of impairment was not identified in any of the other soil borings during the work. PID readings collected from the soil borings are included in the test boring field logs in Appendix 1.

4.3 Laboratory Analytical Results

The laboratory analytical results have been compared to the following standards:

Soil

- **Unrestricted Use Soil Cleanup Objectives (SCOs)** - 6 New York Code Rules and Regulations (NYCRR) Part 375-6.8(a) Unrestricted Use SCOs
- **Restricted Residential Use SCO** - 6 NYCRR Part 375-6.8(b) Restricted Use SCOs for a Residential Site

Based on the future use of the Site for multi-family housing, the Restricted Residential Use SCOs are the most appropriate comparison criteria for the Site.

Groundwater

- **TOGS 1.1.1** - NYSDEC document titled "Division of Water Technical and Operational Guidance Series 1.1.1; Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations" dated June 1998 as amended with April 2000 and June 2004 addendum tables

The results are summarized on the following attached tables:

- Table 1 – Summary of Volatile Organic Compounds in Soil Borings
- Table 2 – Summary of Semi-Volatile Organic Compounds in Soil Borings
- Table 3 – Summary of Metals in Soil Borings
- Table 4 – Summary of Pesticides in Soil Borings
- Table 5 - Summary of Volatile Organic Compounds in Groundwater
- Table 6 - Summary of Semi-Volatile Organic Compounds in Groundwater

4.3.1 Soil Boring Sample Results

VOCs:
A total of five (5) soil samples were analyzed for VOCs. VOCs were detected in two (2) of the five (5) soil samples at concentrations above laboratory method detection limits (MDLs); however, the concentrations detected do not exceed Unrestricted Use SCOs.

SVOCs:
A total of eight (8) soil samples were analyzed for SVOCs. Numerous SVOCs were detected in four (4) of the eight (8) soil samples, SB-15, SB-16, SB-27 and SB-33, at concentrations above laboratory MDLs. Of these detections, four (4) SVOC compounds were identified exceeding Unrestricted Use and Restricted Residential Use SCOs in SB-33, 5.0-7.5 ft bgs. In addition, one (1) SVOC compound was identified exceeding Unrestricted Use SCOs in SB-33, 5.0-7.5 ft bgs.

Metals:
A total of four (4) soil samples were analyzed for RCRA Metals. Metals were detected in all four (4) soil samples at concentrations above laboratory MDLs. Of these detections, mercury was identified above the Unrestricted Use SCO in one (1) soil boring (SB-15, 2.5-5 ft bgs). In addition, lead was identified above the Unrestricted Use SCO in one (1) soil boring (SB-16, 7.5-10 ft bgs). However, both concentrations were below the Restricted Residential SCO for these metals.

Pesticides:
A total of two (2) soil samples were analyzed for Pesticides. Pesticides were detected in one (1) soil sample (SB-15, 2.5-5 ft bgs) at concentrations above laboratory MDLs; however, the concentration detected does not exceed the Unrestricted Use SCO.

4.3.2 Groundwater Sample Results

VOCs:
One (1) groundwater sample was analyzed for VOCs (TW-05). No VOCs were detected in the groundwater sample at concentrations above laboratory MDLs.

SVOCs:
One (1) groundwater sample was analyzed for SVOCs (TW-05). Eight (8) SVOCs were detected in the groundwater sample at concentrations above laboratory MDLs. Of these detections, five (5) SVOCs were identified exceeding TOGS 1.1.1 groundwater standards. It should be noted that elevated turbidity was measured in this well during groundwater sampling; as such, the elevated concentrations of SVOCs could be the result of sediment in the samples and not representative of dissolved concentrations in groundwater.

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

LaBella was retained by ADC to conduct a Supplemental Phase II ESA at the property located at 800-802 South Wilbur Avenue, Syracuse, New York. The Supplemental Phase II ESA consisted of the advancement of twenty (20) soil borings, installation of a temporary groundwater monitoring well and laboratory analysis of eight (8) soil and one (1) groundwater sample.

- No visual or olfactory evidence of impairment was identified within any of the soil borings advanced with the exception of SB-15 at 2.5-5 ft bgs, SB-16 at 7.5-10 ft bgs and SB-27 at 2.5-5 ft bgs. Black soils/staining was identified associated with these soils. In addition, slight petroleum odors were identified associated with soils at SB-15 at 2.5-5 ft bgs. PID readings were not identified above background condition in any of the above soil samples. Evidence of impairment or urban fill (i.e., ash or cinders) were not identified in any of the other soil borings during the work.

- Three (3) VOCs and one (1) pesticide were detected in soil borings at concentrations above laboratory MDLs; however, the concentrations detected do not exceed Unrestricted Use SCOs. Metals including mercury and lead were identified in soil samples above Unrestricted Use SCOs at SB-15 at 2.5-5 ft bgs and SB-16 at 7.5-10 ft, respectively; however, these compounds were not identified above Restricted Residential SCOs. Restricted Residential SCOs are the most appropriate comparison criteria based on the planned future use of the Site for multi-family housing.

- SVOCs were detected in one (1) soil sample (SB-33, 5.0-7.5 ft bgs) at concentrations exceeding Unrestricted and Restricted Residential SCOs. The SVOCs detected are polyaromatic hydrocarbons (PAHs) and are typically associated with asphalt pavement or partially combusted fossil fuels. Note that SVOCs were also detected above Restricted Residential SCOs in sample SB-08 collected during the Preliminary Phase II ESA in January 2023.

- SVOCs were detected in one (1) groundwater sample, TW-05 (SB-32) slightly exceeding TOGS 1.1.1 groundwater standards. However, based on elevated turbidity readings collected at the time of sampling, these results may not be representative of dissolved concentrations in groundwater. The Site is located in an urban area and groundwater is not a source of drinking water. Drinking water is supplied from a municipal source.

Based on data from the January 2023 Preliminary Phase II ESA and this Supplemental Phase II ESA, select metals, pesticides and SVOCs have been identified sporadically throughout the Site in soil at concentration exceeding Unrestricted Use SCOs. In addition, SVOCs have been detected in soil at concentrations exceeding Restricted Residential Use SCOs and in groundwater at concentrations exceeding TOGS 1.1.1 groundwater standards; however, based on the nature of these compounds, the elevated concentrations in groundwater are likely attributed to high turbidity and may not be representative of dissolved concentrations.

The heavy metal and pesticide impacts are generally limited to shallow soils and may be the result of atmospheric deposition and/or historical operations at the property. The SVOC impacts are generally deeper and may be the result of historical filling.

5.2 Recommendations

Based on the sporadic nature of the soil impacts discussed in Section 5.1, LaBella recommends completing one of the two following approaches as part of redevelopment.

Option 1: Remediation

This approach involves excavation and off-site disposal of SVOC impacts above Restricted Residential SCOs. The impacts identified are sporadic and appear to be the result of historical filling; as such, additional areas of similar impacts could be encountered during future earthwork. For this reason, Option 1 would include a design phase investigation to provide a more comprehensive understanding of the subsurface in the areas of planned earthwork during redevelopment. Laboratory analysis associated with the design phase investigation would be limited to SVOCs unless additional impacts are observed in the field.

The areas of known impacts above Restricted Residential SCOs and any additional areas identified during the design phase investigation would be excavated until confirmatory soil samples indicate contamination has been removed. Excavated material would be transported to a NYCRR Part 360 landfill for disposal.

Option 2: Management During Construction

Based on the potential for the identified impacts to be widely distributed at the Site and the relatively stable nature of these compounds (i.e., generally don't leach to groundwater and don't volatilize), Option 2 would not involve active remediation or further investigation. Rather, an Environmental Management Plan (EMP) would be drafted to provide procedures for the identification, management and proper disposal of any impacted materials which could be encountered during construction. The EMP would include implementation of a Community Air Monitoring Program (CAMP) and environmental oversight during earthwork and guidance for the segregation of excavated materials.

Option 2 could result in less overall cost to the project while providing more comprehensive exposure prevention measures during earthwork and as part of the end use of the Site.

A copy of all information collected during this assessment, including maps, notes, analytical data and other material will be kept on file at the offices of LaBella Associates, D.P.C. This information is available upon request.

Garden City, New York 11530

Re: Professional Engineering and Management Services
Post Demolition - Phase II Environmental Site Assessment
Portion of 800-802 South Wilbur Avenue, Syracuse, New York 13204
LaBella Project No. 2224176

Dear Mr. Dettling:

LaBella Associates, D.P.C. (LaBella) completed a Post Demolition Phase II Environmental Site Assessment (ESA) on behalf of Albanese Development Corporation (ADC/Client) for the property addressed as 800-802 South Wilbur Avenue, Syracuse, New York, hereinafter referred to as the "Site." The Site is depicted on attached Figure 1. The Phase II ESA was performed in conformance with the Scope of Work outlined in LaBella's Proposal (P2503574) dated May 14, 2025.

INTRODUCTION

LaBella completed a Phase I ESA, Preliminary Phase II ESA and Supplemental Phase II ESAs for the Site. Based on the prior environmental reports, soil samples from two (2) of thirty-four (34) soil borings identified concentrations of semi-volatile organic compounds (SVOCs) slightly above Restricted Residential Soil Cleanup Objectives (SCOs). As the buildings previously located at the Site have been recently demolished, LaBella was authorized to complete this Post Demolition Phase II ESA to further investigate soil and groundwater conditions in the area of the former building footprints.

FIELD INVESTIGATION

Prior to the initiation of subsurface work, an underground utility stake-out via *Dig Safely New York* was completed at the Site to locate utilities in the areas where the subsurface assessment would take place.

In addition, a geophysical survey was conducted in the areas of the planned soil boring locations at the Site, prior to soil boring installation. The geophysical work was conducted at the Site on July 1, 2025 by LaBella. The equipment utilized included a Ground Penetrating Radar (GPR) unit, GSSI Utility Scan DF combined with an ML-1 Magnetic Locater and RD8000 Pipe and Cable Locater. The work was performed specifically to clear all proposed soil boring and temporary well locations planned for sampling of any anomalies, utilities or buried objects.

It should be noted that no geophysical anomalies, metallic or buried objects were identified during the clearing of boring locations.

A total of six (6) soil borings were advanced at the Site on July 8, 2025, designated SB-35 through SB-40, under supervision of LaBella personnel. All soil borings were advanced at the Site to depths between 3 and 20-feet (ft) below ground surface (bgs) into the overburden with a track-mounted Geoprobe® Systems Model 6620 direct-push sampling system. The use of direct-push technology allows for rapid sampling, observation, and characterization of overburden soils. The Geoprobe utilizes a 5-ft MacroCore® sampler with disposable polyethylene sleeves. Soil cores are retrieved in 5-ft sections and are cut from polyethylene sleeves for observation and sampling. The MacroCore® sampler was decontaminated between boring locations using an Alconox® and potable water solution followed by a potable water rinse. Soil boring locations are depicted on attached Figure 2.

Soil samples were collected continuously from the ground surface to the bottom of each boring. Soil samples were visually and physically examined by LaBella personnel and observations made of the general lithology, visible layering, evidence of nonnative fill/urban fill materials, indications of chemical or other staining, odors, and other distinctive features. Soils from soil borings were field screened for the presence of Volatile Organic Compounds (VOCs) using a photoionization detector (PID) equipped with a 10.6 electronvolt (eV) lamp.

No visual or olfactory evidence of environmental impairment was identified within any of the soil borings advanced. In addition, significantly elevated PID) readings (i.e., greater than background conditions or 3.2 parts per million (ppm)) were not observed during the work. In addition, urban fill material was not identified in any of the soil borings. PID readings collected from the soil borings are included in the test boring field logs in Attachment 1.

One (1) soil boring was converted into a temporary shallow overburden groundwater monitoring well, designated as TW-06 (SB-36). While Labella planned to install an additional temporary well during the work, two additional attempts at SB-39 and SB-40, including well material installation, showed no evidence of groundwater at these locations.

Temporary well TW-06 was constructed with 10-ft of 0.010-slot well screen of 1-inch inner diameter Schedule 40 polyvinyl chloride (PVC) screen attached to solid riser piping of the same material to complete the well. The well was installed as an overburden well designed to intersect the top of the overburden groundwater table. The annulus was sand packed with quartz sand to a nominal depth of 1-ft above the screen section and a bentonite seal was placed above the sand to near the ground surface.

The table below provides additional information regarding groundwater monitoring well.

Sample ID	Soil Boring Location	Well Depth (ft bgs)	Well Screen Interval (ft bgs)	Depth to Water (ft bgs)
TW-06	SB-36	14.0	4-14	11.94

LaBella personnel developed TW-06 by removing three well volumes from the well using a dedicated bailer. Representative groundwater samples were also obtained using a dedicated bailer. It should be noted that the groundwater samples collected remained turbid after development.

A total of two (2) soil samples and one (1) groundwater sample was selected for laboratory analysis. The following table provides additional information regarding the soil borings and temporary wells and laboratory analysis.

Sample ID	Sample Matrix	PID (ppm)	Sample Depth or Well Screen Interval (ft bgs)	Laboratory Analysis		
				VOCs	SVOCs	RCRA Metals
SB-39, 10-12.5	Soil	2.2	10-12.5	X	X	X
SB-40, 10-12.5	Soil	3.2	10-12.5	X	X	X
TW-06 (SB-36)	Groundwater	--	4.8-14.8	X	X	--

Notes:

- VOCs - analyzed for the Target Compound List (TCL) and NYSDEC Commissioner Policy (CP-51) list using USEPA method 8260.
- SVOCs - Semi-Volatile Organic Compounds analyzed for CP-51 list using USEPA method 8270.
- Metals were analyzed for Resource Conservation and Recovery Act (RCRA) list of metals using USEPA method 6010 & 7471.
- Sample locations are depicted on Figure 2.

LABORATORY RESULTS

The laboratory analytical results have been compared to the following standards:

Soil

- **Unrestricted Use Soil Cleanup Objectives (SCOs)** - 6 New York Code Rules and Regulations (NYCRR) Part 375-6.8(a) Unrestricted Use SCOs
- **Restricted Residential Use SCO** - 6 NYCRR Part 375-6.8(b) Restricted Use SCOs for a Residential Site

Based on the future use of the Site for multi-family housing, the Restricted Residential Use SCOs are the most appropriate comparison criteria for the Site.

Groundwater

- **TOGS 1.1.1** - NYSDEC document titled "Division of Water Technical and Operational Guidance Series 1.1.1; Ambient Water Quality Standards (AWQS) and Guidance Values and Groundwater Effluent Limitations" dated June 1998 as amended with April 2000 and June 2004 addendum tables

The results are summarized on the following attached tables:

- Table 1 – Summary of Volatile Organic Compounds in Soil Borings
- Table 2 – Summary of Semi-Volatile Organic Compounds in Soil Borings
- Table 3 – Summary of Metals in Soil Borings
- Table 4 - Summary of Volatile Organic Compounds in Groundwater
- Table 5 - Summary of Semi-Volatile Organic Compounds in Groundwater

A copy of the laboratory report is included in Attachment 2. Below is a summary of the laboratory results.

SOIL BORINGS - VOCs:

Two (2) soil samples were analyzed for VOCs. No VOCs were detected above laboratory method detection limits (MDLs).

SOIL BORINGS - SVOCs:

Two (2) soil samples were analyzed for SVOCs. SVOCs were detected in soils at concentrations above laboratory MDLs in one (1) of the soil sample collected, SB-40 (10-12.5 ft bgs); however, the concentrations detected were all below Unrestricted Use SCOs.

SOIL BORINGS - Metals:

Two (2) soil samples were analyzed for metals. Metals were detected in both soil samples above laboratory MDLs; however, the concentrations detected were all below Unrestricted Use SCOs.

GROUNDWATER - VOCs:

One (1) groundwater sample was analyzed for VOCs. One VOC, acetone, was identified in the groundwater sample exceeding laboratory MDLs; however, the concentrations detected did not exceed AWQS Standards.

GROUNDWATER - SVOCs:

One (1) groundwater sample was analyzed for SVOCs. One SVOC, fluoranthene, was detected in the groundwater samples above laboratory MDLs; however, the concentration detected did not exceed AWQS Standards.

CONCLUSIONS & RECOMMENDATIONS

LaBella was retained by ADC to conduct a Post Demolition Phase II ESA at the property located at 800-802 South Wilbur Avenue, Syracuse, New York. The Post Demolition Phase II ESA consisted of the advancement of six (6) soil borings, installation of a temporary groundwater monitoring well and laboratory analysis of two (2) soil and one (1) groundwater sample, as summarized below.

- No field evidence of impact (i.e. elevated PID readings, odors, staining, sheen, etc.) was observed within any of the soil borings installed. In addition, urban fill material was not identified in any of the soil borings.
- No VOCs, SVOCs or metals were detected above Unrestricted Use SCOs in soil.
- No VOCs or SVOCs were detected above NYSDEC AWQS in groundwater.

Based on the results of this Post Demolition Phase II ESA, no field evidence of environmental impairment or urban fill material was observed within any of the soil borings or soil samples collected. In addition, laboratory results for soil or groundwater samples did not identify any VOCs, SVOCs or metals above applicable NYSDEC criteria.

Based on this information, additional soil and groundwater investigation and/or remediation does not appear warranted at the Site at this time.

Based on the result of the Preliminary Phase II ESA, Supplemental Phase II ESA and Post Demolition Phase II ESA the potential for encountering impacts appears very limited and not widely distributed throughout the Site. As such, future planned development and excavations may encounter limited impacts that may require excavated material to be handled/managed in accordance with NYSDEC Part 360 regulations as urban fill is considered by the NYSDEC to be a solid waste that cannot be treated as Construction and Demolition solid waste.

In addition, as previously identified in the Supplemental Phase II ESA, the development of an Environmental Management Plan (EMP) would be required. The EMP would outline procedures for the proper identification and management of known or unknown impacted materials which could be encountered during future earthwork and construction at the Site (e.g., utility maintenance, redevelopment, etc.).

The EMP would include implementation and environmental oversight on an as needed basis during earthwork as suspect materials or impacts are identified and include guidance for the segregation of excavated materials, if needed.

We appreciate the opportunity to serve your professional environmental engineering needs. If you have any questions, please do not hesitate to contact me at (315) 243-8441.

Respectfully submitted,

LABELLA ASSOCIATES, D.P.C

APPENDIX 5

Community Air Monitoring Plan (CAMP)

Appendix 1A
New York State Department of Health
Modified Generic Community Air
Monitoring Plan

Overview

A Community Air Monitoring Plan (CAMP) requires real-time monitoring for particulates (i.e., dust) at the downwind perimeter of each designated work area when certain activities are in progress at contaminated sites. The CAMP is not intended for use in establishing action levels for worker respiratory protection. Rather, its intent is to provide a measure of protection for the downwind community (i.e., off-site receptors including residences and businesses and on-site workers not directly involved with the subject work activities) from potential airborne contaminant releases as a direct result of investigative and remedial work activities. The action levels specified herein require increased monitoring, corrective actions to abate emissions, and/or work shutdown. Additionally, the CAMP helps to confirm that work activities did not spread contamination off-site through the air.

The generic CAMP presented below will be sufficient to cover many, if not most, sites. Specific requirements should be reviewed for each situation in consultation with NYSDOH to ensure proper applicability. In some cases, a separate site-specific CAMP or supplement may be required. Depending upon the nature of contamination, chemical- specific monitoring with appropriately sensitive methods may be required. Depending upon the proximity of potentially exposed individuals, more stringent monitoring or response levels than those presented below may be required. Special requirements will be necessary for work within 20 feet of potentially exposed individuals or structures and for indoor work with co-located residences or facilities. These requirements should be determined in consultation with NYSDOH.

Reliance on the CAMP should not preclude simple, common-sense measures to keep dust at a minimum around the work areas.

Community Air Monitoring Plan

Depending upon the nature of known or potential contaminants at each site, real-time air monitoring for particulate levels at the perimeter of the exclusion zone or work area will be necessary. Most sites will involve particulate monitoring; sites known to be contaminated with heavy metals alone may only require particulate monitoring. If radiological contamination is a concern, additional monitoring requirements may be necessary per consultation with appropriate DEC/NYSDOH staff.

Continuous monitoring will be required for all ground intrusive activities and during the demolition of contaminated or potentially contaminated structures. Ground intrusive activities include, but are not limited to, soil/waste excavation and handling, test pitting or trenching, and the installation of soil borings or monitoring wells.

Particulate Monitoring, Response Levels, and Actions

Particulate concentrations should be monitored continuously at the upwind and downwind perimeters of the exclusion zone at temporary particulate monitoring stations. The particulate monitoring should be performed using real-time monitoring equipment capable of measuring particulate matter less than 10 micrometers in size (PM-10) and capable of integrating over a period of 15 minutes (or less) for comparison to the airborne particulate action level. The equipment must be equipped with an audible alarm to indicate exceedance of the action level. In addition, fugitive dust migration should be visually assessed during all work activities.

1. If the downwind PM-10 particulate level is 100 micrograms per cubic meter (mcg/m^3) greater than background (upwind perimeter) for the 15-minute period or if airborne dust is observed leaving the work area, then dust suppression techniques must be employed. Work may continue with dust suppression techniques provided that downwind PM-10 particulate levels do not exceed 150 mcg/m^3 above the upwind level and provided that no visible dust is migrating from the work area.

2. If, after implementation of dust suppression techniques, downwind PM-10 particulate levels are greater than 150 mcg/m^3 above the upwind level, work must be stopped and a re-evaluation of activities initiated. Work can resume provided that dust suppression measures and other controls are successful in reducing the downwind PM-10 particulate concentration to within 150 mcg/m^3 of the upwind level and in preventing visible dust migration.

3. All readings must be recorded and be available for State (DEC and NYSDOH) and County Health personnel to review.

December 2009

Special Requirements CAMP

1. When work areas are within 20 feet of potentially exposed populations or occupied structures, the continuous monitoring locations for particulates must reflect the nearest potentially exposed individuals and the location of ventilation system intakes for nearby structures. The use of engineering controls such as vapor/dust barriers, temporary negative- pressure enclosures, or special ventilation devices should be considered to prevent exposures related to the work activities and to control dust and odors. Consideration should be given to implementing the planned activities when potentially exposed populations are at a minimum, such as during weekends or evening hours in non-residential settings.

2. If total particulate concentrations opposite the walls of occupied structures or next to intake vents exceed 150 mcg/mz, work activities should be suspended until controls are implemented and are successful in reducing the total particulate concentration to 150 mcg/mz or less at the monitoring point.

3. Unless a self-contained, negative-pressure enclosure with proper emission controls will encompass the work area, all individuals not directly involved with the planned work must be absent from the room in which the work will occur. Monitoring requirements shall be as stated above under “Special Requirements for Work Within 20 Feet of Potentially Exposed Individuals or Structures“ except that in this instance “nearby/occupied structures" would be adjacent occupied rooms. Additionally, the location of all exhaust vents in the room and their discharge points, as well as potential vapor pathways (openings, conduits, etc.) relative to adjoining rooms, should be understood and the monitoring locations established accordingly. In these situations, it is strongly recommended that exhaust fans or other engineering controls be used to create negative air pressure within the work area during remedial activities. Additionally, it is strongly recommended that the planned work be implemented during hours (e.g. weekends or evenings) when building occupancy is at a minimum.

0.0 HASP Acknowledgment

All LaBella project personnel are required to sign the following agreement prior to conducting work:

1. I have read and fully understand the requirements of this site-specific HASP including my individual responsibilities listed above.

2. I agree to abide by the provisions of the HASP and participate in any health and safety meetings or modifications to the HASP criteria during the implementation of work.

Name	Company	Date

1.0 Introduction

The purpose of this Health and Safety Plan (HASP) is to provide guidelines for responding to potential health and safety issues that may be encountered at the project site, located at 800-802 South Wilbur Avenue, Syracuse, NY This HASP only reflects the policies of LaBella Associates D.P.C. and its affiliated company, LaBella Environmental, LLC, collectively referred to as "LaBella". The requirements of this HASP are applicable to all approved LaBella personnel at the work site. This document's project specifications are to be consulted for guidance in preventing and quickly abating any threat to human safety or the environment. The provisions of the HASP do not replace or supersede any federal, state or local regulatory requirements.

2.0 Responsibilities

This HASP presents guidelines to minimize the risk of injury to project personnel, and to provide rapid response in the event of injury. The HASP is applicable only to activities of approved LaBella personnel and their authorized visitors specific to this project. The Project Manager shall implement the provisions of this HASP for the duration of the project. It is the responsibility of LaBella employees to follow the requirements of this HASP, and all applicable company safety procedures.

3.0 Daily Pre-Job Safety Meetings

Prior to the beginning of work each day the Field Supervisor/Foreman or on-site Project Manager will review upcoming daily job requirements, anticipated hazards and hazard control measures with the project team members. At this meeting information such as personal protective equipment, site conditions, emergency procedures, and other applicable topics may be addressed. A copy of the **Daily Pre-Job Safety Tailgate/Toolbox Meeting Form** is attached to this HASP.

4.0 Site Information

Project Name:	800-802 South Wilbur Avenue, Syracuse, NY
LaBella Project No.:	2224176
Project Location:	800-802 South Wilbur Avenue, Syracuse, NY
Current Use of Project Location:	Redevelopment Project
Uses of Surrounding Areas (Res Vacant Land, Commercial, etc.):	Residential and Commercial

Proposed Date(s) of Field Activity - Start:	2025-11-03
Proposed Date(s) of Field Activity - End:	2026-11-02

5.0 Scope of Work

The proposed field work covered under this HASP includes the following:

- Earthwork and Construction Oversight. Hand sampling equipment, CAMP equipment, PID

6.0 Emergency Information

The personnel and emergency response contacts associated with the proposed scope of work are presented below and are to be posted onsite during all field activities. The Site Safety Officer (SSO) is the primary authority for directing site operations and relaying communications under emergency conditions. During the SSO's absence, the Project Manager or Site Supervisor will lead emergency operations.

First Aid

A First Aid Kit will be located as follows: None The injured person may be transported to a trained medical center for further examination and treatment. The preferred transport method is a professional emergency transportation service; however, if this option is not readily available or would result in excessive delay, other transport is authorized.

Under no circumstances should an injured person transport themselves to a medical facility for treatment, no matter how minor the injury may appear.

Incident Reporting

Employees shall report all incidents and injuries to their supervisor as soon as possible, including those involving employees operating vehicles and other equipment. All reporting procedures contained in LaBella Safety Policy 1.22 must be followed.

During emergencies employees should seek medical care immediately. When contacting their Supervisor/Safety Manager/HR, employees should discuss medical care options. If an employee is asked by medical personnel for a worker's compensation number they should tell them that LaBella should be billed directly.

When emergency medical care is not imminent, employees shall immediately report events to their immediate Supervisor, the Safety Manager and Human Resources, and participate in the investigation process as well as the corrective action process, as needed. An Accident-Incident-Near Miss-Hazard Form must be submitted online or by e-mail to the Supervisor, Safety Manager and HR as soon as possible but no later than 24 hours after the event. The Form can be found on LaBella's intranet under "Operations".

7.0 Potential Health and Safety Hazards and Controls

This section lists potential health and safety hazards that project personnel may encounter at the project site and actions to be implemented by approved personnel to control and reduce the associated risk to health and safety. This is not intended to be a complete listing of any and all potential health and safety hazards. New or different hazards may be encountered as site environmental and site work conditions change. The suggested actions to be taken under this plan are not to be substituted for good judgment on the part of project personnel. At all times, the Site Safety Officer has responsibility for site safety and their instructions must be followed.

Physical Hazards		
Work Action or Condition	**Potential Safety Hazard**	**Controls (including PPE)**
Blades and Sharp Objects	Injury	Blades and Sharp objects are likely to be present on site, presenting risk of physical injury. The following hazard control measures will be applied: • Only use tools designed for the task. Do not improvise. • Inspect the tool before sure; do not use dull or damaged blades. • Carry blades with tip sheathed or pointed down and away from the body. • Cut on a stable surface with sufficient lighting. • Wear appropriate PPE (gloves, safety glasses, etc.).
Cold Weather	Frost nip, Frost bite, Hypothermia	Engineering: • Basic wind block • Heated shelter • Barriers or insulation placed on metal surfaces to reduce heat loss from extremities Administrative: It is recommended that multiple vehicles be utilized during periods of extreme cold unless a warm shelter is within reasonable proximity to the work site. Number of vehicles depends on number of employees. Warm liquids should be considered to combat dehydration and to manage core temperatures. Note that caffeinated beverages will lessen circulation and are discouraged. Adequate Breaks - Break periods will be at least ten (10) minutes long. While on break personnel should remove outer layers of clothing to ensure adequate warming of the core and extremities. Individuals should assess their physical condition during breaks. Do not return to work in the cold until adequately warmed. If engineering controls, such as shelters are used, the ambient temperature/wind chill where the work is taking place will be used to determine the work / warm–up schedule. Personal Protective Equipment: The outer layer of clothing must be fire retardant. • The outer most layers should consist of winter clothing (i.e. bibs, bomber or parka,

		head sock, winter /arctic boots). • Under layers (insulation) should consist of one or more thin garments. Outer winter layers should be removed prior to insulation layers becoming wet with perspiration. • Wet clothing should not be worn. A best practice is to bring extra insulating clothing and change clothes if they become wet. • PPE that is in direct contact with the skin should be changed if it becomes wet. • Exposed skin shall be avoided in extreme cold temperatures to minimize the risk of frostbite. • Hand / foot warmers are available on all sites.
Excavations and Trenches	Injury from fall into or cave-in of trench/excavation. Asphyxiation, engulfment, or explosion (if pipe bursts)	An open excavation or trench may be present during site activity, or could be present during demolition or remediation activities. No Labella employees should enter a trench or excavation unless authorized to by the designated Competent Person. During heavy precipitation, excessive runoff may create slippery surfaces and also weaken the excavation sidewalls making the excavation more susceptible to collapse. The following hazard control measures will be applied: • All materials must be placed greater than 2 feet from the edge of the trench and LaBella employees should remain at least 2-feet from the edge of any excavation or trench. • LaBella employees are not to enter excavations greater than 4-feet in depth unless they have received appropriate training, stabilization measures are in place and a competent person has determined that the conditions are safe. • Any samples must be collected from the equipment bucket or from the spoils pile.
Flammable Liquids	Burns from ignited flammable liquids	• Do not keep flammable liquids in anything other than an approved safety can and properly bond or ground container during transfers. • Consult safety data sheet before use to understand hazards. • Wear appropriate PPE. • Maintain adequate ventilation while using and elminate all potential ignition sources, including static electricity.
Hand Tools	Physical injury	• Do not use a tool if you have not been trained. Inspect tool before use and do not use

		damaged tools. • Maintain tools in good condition and follow manufacturers' instructions. • Wear gloves, safety glasses and and appropriate PPE /apparel, avoiding loose clothing; secure long hair. • When using a cutting tool hold its handly firmly and cut away from your body, never towards it. • If working on a ladder or scaffold raise and lower tools using a bucket and hand line; never carry tools in a way that prevents using both hands on a ladder (maintain three poits of contact)
Hazardous or Explosive Gases	Health effects and physical injury from exposure.	• No smoking is permitted. • Reduced sparking tools should be used when hammering or digging any test holes. • Work should proceed slowly to minimize heat content and reduce friction that could generate sparks. • Continuous monitoring performed for explosive gases (LEL and H2S) with a 4-gas meter. Methane is colorless and odorless. • If action levels are reached activity should cease and personnel should immediately evacuate the site. These action levels are: >10% LEL for FLAMMABLE gases, (10) ppm for hydrogen sulfide, <19.5% or >23% for oxygen. • When work ceases employees will be directed away from the operations and the situation assessed with the Health and Safety Officer.
Heavy Equipment - Working Near	Struck by, Caught in between, Causing an obstruction on existing roadway, Rollaway, and hearing damage.	Working near heavy equipment presents struck-by and caught-in or in-between risks. Heavy equipment can also rollaway or obstruct roadways, limiting visibility. The following hazard control measures will be applied: • Maintain 360 degrees of awareness of your surroundings. • Meet the Operator, discuss work operations, and stay in line of sight. • Wear high visibility clothing (outer layer), hard hat, safety glasses, work boots. • Stand in safe zone away from blind areas. Never walk behind or to the side of heavy equipment without the operator's knowledge. Have an escape plan. • Stay out of the swing zone of heavy equipment such as excavators or traditional auger rigs. The swing zone is defined as an entire 360 degree

		circle equipment may move within as measured from a central location point. • Only approach drill rig after auger has stopped rotating and the operator has given the OK for you to approach to collect a sample. • Wear hearing protection when working near heavy or moving equipment.
High Crime Area	Potential theft or risk of safety	Working in high crime areas requires vigilance to protect personnel and project assets. The following hazard control measures will be applied: • Workers will be accompanied by a site representative or another employee. • Workers should stay in well-lit areas and maintain awareness of their surroundings. • If significant risk is evident, vacate the area.
Hot Weather & Sun, Other Heat Hazards	Prickly Heat (Heat rash), Heat Cramps, Heat Exhaustion Heat Fatigue, Heat Collapse, Heat Stroke, Sunburn	Environmental heat hazards, whether indoors or outdoors, present physical injury risks. Exercise caution when working in hot temperatures or around hot tar or other materials, hot ovens or other equipment, heat absorbing surfaces such as roofs and roads, and reflective surfaces such as water or metal. The following hazard control measures will be applied: • Have sunscreen available for ultraviolet protection on sunny days. • Have water or electrolyte drinks for dehydration. • Check the weather and adjust work schedules if heat is excessive. Work early or later in day. • Perform work during cooler hours of the day or at night if adequate lighting can be provided. • Utilize shelter (air-conditioned, if possible) or shaded areas to protect personnel during rest periods. • Use cooling devices such as fans and water misters. • Allow workers to take breaks in air-conditioned vehicles.
Parking Vehicle	Struck by, caught in between, casing an obstruction on existing roadway. Fire from plants under hot exhaust	• Workers will park far enough off the edge of the road to stay well clear of traffic. • Put on hi-visibility vest before exiting parked car. • Leave Field Card on dashboard. • Use appropriate number of cones to mark for oncoming traffic as needed. • Do not park on/in flammable vegetation. • Keys stay on field person.

Roads/Traffic - Near/On	Getting struck by vehicle	• If working in or around traffic (including in parking lots), workers will wear an ANSI Level 2 high visibility clothing (vest). An ANSI Level 3 vest (with sleeves) is required when working near traffic exceeding 50 mph. Additional reflective gear is also required for night work. • Maintain 360 degrees of awareness of your surroundings. • Face traffic, stay in a safe zone, and have an escape route. • Do not wear a headset or talk on your cell phone. • DOT aproved Traffic Cones and all Traffic Cobtral Devices must be designed and placed according to Uniform Traffic Contral Devices (MUTCD) standards (See 3.13 WORK ZONE SAFETY in Labella's Safety Manual for more information) • If possible, close the entrance/exit to ensure the worker's safety, and use a spotter if the worker will not have the ability to keep their attention on vehicles maneuvering in the area. • Workers should NOT sit down or turn their back to traffic when working. If they must do either of these things to complete the work scope, use a spotter or consider alternate ways or tools to do the work.
Slip-Trip-Fall	Injury	• Reduce and avoid slippery (wet, icy, oily, muddy, etc.) surfaces. • Workers will watch where they step and wear proper footwear. • Keep work areas free of obstructions and debris.
Uneven or Wet Terrain (Slopes, Leaves, Holes, etc.)	Slip, Trip, Fall	• Wear appropriate footwear for the site and conditions: steel toe or composite boots for construction sites, skid-resistant, hiking boots for other field work if indicated. • Use walking stick or other object for additional support/balance and to check for animal burrows/holes. • Watch for trip hazards such as uneven terrain, holes, ditches, puddles (if raining) stretched wires or ropes, or other materials or pieces of equipment in path.
Working on Wet, Icy, and Slippery Surfaces	Bodily harm (e.g. high falls, impalement) Bodily injury (e.g.	Administrative: • Report unsafe conditions. Help identify areas where accidents are likely to occur so we can take steps to keep sit safe.

	strain muscles, broken bones)	*Note: The routine application of salt on icy surface on a project is commonly cover in contract but not always utilized. Personal Protective Equipment and work practice: Wear slip-resistant footwear that has good traction. Avoid shoes with smooth soles. Take shorter steps at a slower pace on icy pavement. Hold onto the handrails when using stairs. Keep your hands free to catch yourself if you start to fall. Use a cart and take the elevator when carrying large items. Avoid walking while distracted; put away your mobile device. Use caution when stepping off curbs and walking up or down steep slopes. • Don't rush! Give yourself extra time to get to your destination. • Wipe your feet on a mat when you enter a building to remove excess water.

Biological and Environmental Hazards		
Work Action or Condition	**Potential Safety Hazard**	**Controls (including PPE)**
Allergens	Allergic reaction	Common workplace allergens like dust mites, mold, pollen, fungi, and metal can trigger a dangerous reaction. The following hazard control measures will be applied: • Take medication (i.e. anti-histamine) to minimize allergic reaction to pollen or other allergen as directed by your medical care practitioner, and bring it with you in the field. • Wear a dust mask, if necessary.
Thunderstorms, Lightning	Lightning, Severe Thunderstorms, Tornados	• Check the weather and adjust work schedules. • Do not begin or continue work until lightning subsides for 20 minutes. • Take shelter immediately, 360 degrees of awareness. • Thunderstorms - do not stand under a tree, near water or in the middle of a field. • Tornado: lie flat on the ground, preferably a low shallow space (ditch)

Ergonomic Hazards		
Work Action or Condition	**Potential Safety Hazard**	**Controls (including PPE)**
Lifting Heavy Objects	Injury from Improper Lifting/Lifting weights that are too heavy	• When lifting heavy objects, keep the load close to the body and use the leg muscles instead of the back muscles to perform lifting tasks. • Do not attempt to lift large, heavy (especially over 50-lbs), or awkwardly shaped objects without assistance from another employee or from a manual lifting devise.
Noise (Loud, Sustained)	Hearing Damage	• Ear protection will be worn at all times when personnel are within 20-feet of operating equipment or when noise level becomes consistently loud enough to have to raise voice to communicate with someone. • Hearing protection will also be worn in the vicinity of generators, concrete cutters, and any other high noise emitting equipment.

Chemical Hazards (General)		
Work Action or Condition	**Potential Safety Hazard**	**Controls (including PPE)**
Chemical Exposure - Heavy Metals	*Contaminants identified in testing locations at the Site include low-level heavy metals, primarily associated with Site contamination. Heavy metal-impacted media including fill material may be encountered during subsurface activities at the project work site.*	The presence of heavy metals in site media may be difficult to ascertain in the field. Heavy metal concentrations at this site are not anticipated to exceed PELs. The following hazard control measures will be applied, however: • Workers shall wear appropriate PPE and follow listed decontamination procedures to prevent exposures. Refer to the relevant sections of this HASP for more detail regarding PPE and decontamination procedures.
Chemical Exposure - Semi-Volatile Organic	*Contaminants identified in testing locations at the*	The presence of SVOCs in site media may be detected by their odor and monitoring instrumentation. SVOC concentrations at this Site

Compounds (SVOC)	*Site include SVOCs. SVOC-impacted media including fill material may be encountered during subsurface activities at the project work site.*	are not anticipated to exceed PELs. The following hazard control measures will be applied, however: • Workers should be wearing appropriate PPE and following listed decontamination procedures to prevent exposures. Refer to the relevant sections of this HASP for more detail regarding PPE and decontamination procedures.
Chemical Exposure - Volatile Organic Compounds (VOC)	*Contaminants identified in testing locations at the Site include various volatile organic compounds (VOCs), primarily VOCs associated with Site contamination. Volatile organic vapors may be encountered during subsurface activities at the project work site. Inhalation of high concentrations of volatile organic vapors can cause headache, stupor, drowsiness, confusion and other health effects. Skin contact can cause irritation, chemical burn, or dermatitis. Relevant Safety Data Sheets are included as Appendix 1.*	Volatile Organic Compound (VOC) gases may be emitted from a number of materials and products. The presence of organic vapors may be detected by their odor and by monitoring instrumentation and can lead to physical harm. VOC concentrations at this Site are not anticipated to exceed PELs. The following hazard control measures will be applied, however: • Workers should be wearing appropriate PPE, following listed decontamination procedures and be periodically screening the work zone to prevent against and evaluate for unexpected exposures. Refer to the relevant sections of this HASP for more detail regarding PPE, decontamination procedures and work zone screening.
Sample Collection - Soil or Groundwater	*Exposure to contaminants. Hand injury from cutting, crushing, tool or glass breakage. Back*	• When collecting samples, workers will utilize nitrile gloves, safety glasses or goggles. If material being sampled potentially contains fill or other sharp material, use a stainless steel spoon (or similar) as a tool to collect the sample. Any such tools should be dedicated or properly

	strain from lifting cooler.	decontaminated between samples. • When lifting sample coolers, workers will use proper lifting techniques and get assistance when possible, especially for containers heavier than 50 lbs.

Individual Contaminant Hazards			
Chemical	**OSHA Permissible Exposure Limit (PEL)/ NIOSH Recommended Exposure Limit (REL) or Immediately dangerous to life or health air concentration values (IDLH)**	**Routes of Exposure**	**Symptoms of Overexposure**

8.0 Personal Protective Equipment (PPE)

All site workers will have appropriate training as identified in Section 7.0. Training includes the identification of PPE necessary for various tasks; how to don, doff, adjust, and wear PPE; limitations of PPE; and proper care, inspection, testing, maintenance, useful life, storage, and disposal of the PPE. PPE will be inspected on a regular basis.

Level D: A work uniform affording minimal protection, used for nuisance contamination, only.	• Coveralls or long-sleeves and pants • Gloves • Nitrile sampling gloves (as needed) • Boots/shoes, chemical-resistant steel toe and shank • Safety glasses or chemical splash goggles • Hard hat

9.0 Employee Training

All workers and other personnel shall receive appropriate training prior to engaging in site activities. All workers must recognize and understand the potential hazards to health and

safety that are associated with the proposed scope of work and must be thoroughly familiar with programs and procedures contained in this Safety Plan.

The following training levels were determined to be needed:

- OSHA 40 Hour - HAZWOPER

10.0 Recordkeeping

An electronic or hardcopy version of this HASP will be present at the Site during all field work activities. Copies of field logs, including daily pre-job safety meeting logs, will be filed by LaBella and available for the duration of the project.

Employees will be able to provide physical or electronic copies of required training certificates.

Incident reporting will be completed in accordance with LaBella policies.

CLOSING RECEIPT

CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY
LEASE/SUBLEASE TRANSACTION
WILBUR AVE A/B, LLC PROJECT

CLOSING RECEIPT executed December 18, 2025 by the City of Syracuse Industrial Development Agency (the "***Agency***") and Wilbur Ave A/B, LLC (the "***Company***") in connection with a certain project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two 4-story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

W I T N E S S E T H :

(1) The Agency has executed, delivered, sealed and acknowledged, where appropriate, the documents to which it is a party, and acknowledges receipt from the Company of its administrative fee.

(2) The Company has executed, delivered, sealed and acknowledged, where appropriate, the documents to which it is a party. The Company acknowledges that it is responsible for remitting, at closing, all of the Agency's legal fees associated with the Project and the Company Documents to date.

Re: City of Syracuse Industrial Development Agency
800 South Wilbur Ave, Syracuse, LLC Project

Dear Mayor and County Executive,

We are counsel to the City of Syracuse Industrial Development Agency (the "***Agency***"). On November 25, 2024 we sent correspondence (the "***Correspondence***") notifying you that on December 9, 2024, the Agency will consider whether to approve the request by 800 South Wilbur Ave, Syracuse, LLC (the "***Company***") for deviation from the Agency's Uniform Tax Exemption Policy with respect to the above-referenced project to be located at 800 S. Wilbur Ave. Rear and 802 S. Wilbur Ave. which parcels are located in the City of Syracuse. Unfortunately, there was an error in Schedule "B" attached as an exhibit to the Correspondence detailing the proposed payment in lieu of tax schedule ("***PILOT Schedule***").

Attached hereto at Schedule "A" is a corrected PILOT Schedule. If approved on December 9, 2024, the Agency and the Company will enter into a Payment in Lieu of Tax Agreement to evidence the proposed PILOT Schedule attached hereto.

As previously advised, the Agency will review and consider any correspondence received from any affected tax jurisdiction regarding the proposed deviation and allow any representative of an affected tax jurisdiction present at such meeting to address the Agency regarding the proposed deviation.

Should you have any questions please feel free to contact me at (315) 701-6303.

Very truly yours,

/s/ Susan R. Katzoff

CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY

and

WILBUR AVE A/B, LLC

PAYMENT IN LIEU OF TAX AGREEMENT

Dated as of: December 18, 2025

Wilbur Ave A/B, LLC
Federal Tax ID #: [redacted]

THIS PAYMENT IN LIEU OF TAX AGREEMENT, (this "***Agreement***") dated as of December 18, 2025 by and among the **CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY**, a corporate governmental agency constituting a body corporate and politic and a public benefit corporation organized and existing under the laws of the State of New York (hereinafter referred to as the "***Agency***"), having an office at One Park Place, 300 South State Street, Suite 700, Syracuse, New York 13202 and **WILBUR AVE A/B, LLC,** a limited liability company organized under the laws of the State of New York, with offices at 1001 Franklin Avenue, Suite 300, Garden City, New York 11530 (hereinafter referred to as the "***Company***").

W I T N E S S E T H:

WHEREAS, the New York State Industrial Development Agency Act, being Title 1 of Article 18-A of the General Municipal Law, Chapter 24 of the Consolidated Laws of the State of New York, as amended (hereinafter referred to as the "***Enabling Act***") authorizes the creation of industrial development agencies for the benefit of the several counties, cities, villages and towns in the State of New York and empowers such agencies, among other things, to acquire, construct, reconstruct, lease, improve, maintain, equip and furnish real and personal property, whether or not now in existence or under construction, which shall be suitable for, among others, manufacturing, warehousing, research, commercial or industrial purposes, in order to advance the job opportunities, health, general prosperity and economic welfare of the people of the State of New York and to improve their recreation opportunities, prosperity and standard of living; and

WHEREAS, the Enabling Act further authorizes each such agency to lease and to sell its projects, to charge and collect rent therefor, to issue its bonds or notes for the purpose of carrying out any of its corporate purposes and, as security for the payment of the principal and redemption price of, and interest on, any such bonds or notes, to mortgage any or all of its facilities and to pledge the revenues and receipts therefrom to the payment of such bonds or notes; and

WHEREAS, pursuant to and in accordance with the provisions of the Enabling Act, Chapter 641 of the 1979 Laws of the State of New York, as amended (said chapter and the Enabling Act being hereinafter collectively referred to as the "***Act***") created the Agency for the benefit of the City of Syracuse (hereinafter referred to as the "***Municipality***") and the inhabitants thereof; and

WHEREAS, the Agency, by resolutions adopted on December 9, 2024 and November 18, 2025 (collectively, the "***Resolution***"), resolved to undertake the "***Project***" (as hereinafter defined); and

WHEREAS, the Project will consist of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two 4-story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design

requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement; and

WHEREAS, the Company, individually or as an assignee of its affiliate, 800 South Wilbur Ave. Syracuse, LLC, is party to a binding purchase and sale agreement ("***PSA***") with the City of Syracuse (the "***City***") that provides the Company the right to purchase additional property adjacent to the Land from the City ("***Condo Land***") that will accommodate and house approximately 27 condominiums for single family ownership (the "***Condominiums")***. The Company currently has no fee or leasehold interest in the Condo Land and no party is conferring or accepting a fee or leasehold interest in the Condo Land as part of this Agreement; and

WHEREAS, the parties hereto recognize and understand that the Company, as an inducement to the Agency for the Financial Assistance being provided to the Project Facility, has agreed to work diligently to undertake and complete, or cause to be undertaken and completed, the Condominiums; and

WHEREAS, the City, with the support of the Agency, caused a City-wide housing study to be completed which identified the breadth and scope of the housing crisis, spanning both affordability and conditions, in the City. In recognition of the housing crisis, the Agency and the City continue to coordinate investments, as and when applicable, to leverage resources, as intentionally as possible, to maximize impact, and help to achieve our mutual goal of improving the overall housing market and conditions within the City; and

WHEREAS, under the Act, the Agency is tasked, in part, with improving the health, general prosperity and economic welfare of the people it serves and improves their recreation opportunities, prosperity and standard of living (collectively, "***Factors***"); and

WHEREAS, the Agency has identified housing as a basic need that improves these Factors; and

WHEREAS, the Company's commitment to ensure the construction and completion of the Condominiums as set forth in the Agency Lease Agreement (as defined herein) was and is an important component to the Agency's consideration in granting the Financial Assistance to the Project

Facility, including this PILOT Agreement and its term. The Agency acknowledges that the construction and completion of the Condominiums may be done directly by the Company or the Company may work with another developer, as agreed upon by the Agency, to undertake and complete the Condominiums; and

WHEREAS, as part of the Financial Assistance, the Company requested the Agency consider a 30-year abatement schedule for payments in lieu of taxes, (the "***PILOT***"), as more fully described on **Exhibit** "**A**" attached hereto (the "***PILOT Abatement Schedule***"), which abatement schedule deviates from the Agency's Uniform Tax Exemption Policy ("***UTEP***") established pursuant to General Municipal Law Section 874(4); and

WHEREAS, the Project is being funded in part through NYS Homes and Community Renewal ("***HFA***") which will provide tax credits for the Project (the "***HFA Financing***"). The HFA Financing requires the Project enter into a thirty year regulatory agreement and for the PILOT Abatement Schedule to run coterminous with the HFA regulatory agreement; and

WHEREAS, by correspondence dated November 25, 2024 and December 4, 2024, in accordance with Section 874(4)(c) of the General Municipal Law of the State of New York, notice of the deviation from the Agency's Uniform Tax Exemption Policy with respect to the Project was sent to the affected tax jurisdictions; and

WHEREAS, the Agency will lease the Land and Facility from the Company pursuant to that certain Company Lease Agreement dated as of December 18, 2025 (the "***Company Lease Agreement***"), between the Company and the Agency, obtain an interest in the Equipment pursuant to a bill of sale dated as of December 18, 2025 from the Company (the "***Bill of Sale***"), and sublease the Project Facility back to the Company pursuant to that certain Agency Lease Agreement dated as of December 18, 2025 (the "***Agency Lease Agreement***"), between the Agency and the Company (the Company Lease Agreement, the Bill of Sale and the Agency Lease Agreement are hereinafter collectively referred to as the "***Lease Agreements***"); and

WHEREAS, under the present provisions of the Act and Section 412-a of the Real Property Tax Law of the State of New York, the Agency is required to pay no taxes or assessments upon any of the property acquired by it or under its jurisdiction or supervision or control; and

NOW, THEREFORE, in consideration of the matters above recited, the parties hereto formally covenant, agree and bind themselves as follows, to wit:

ARTICLE I
REPRESENTATIONS AND WARRANTIES

Section 1.00 Recitals.

The foregoing recitals are incorporated herein by reference as if fully set forth hereinbelow.

Section 1.01. Representations and Warranties by Agency

The Agency does hereby represent and warrant as follows:

(a) Existence and Power. The Agency has been duly established under the provisions of the Act and has the power to enter into the transactions contemplated by this Agreement and to carry out its obligations hereunder.

(b) Intentions. The Agency intends to acquire a leasehold interest in the Project Facility from the Company and to sublease the Project Facility back to the Company, all pursuant to the provisions of the Lease Agreements.

(c) Authorization. The Agency is authorized and has the corporate power under the Act, its by-laws and the laws of the State of New York to enter into this Agreement and the transactions contemplated hereby and to perform and carry out all the covenants and obligations on its part to be performed under and pursuant to this Agreement. By proper corporate action on the part of its members, the Agency has duly authorized the execution, delivery and performance of this Agreement and the consummation of the transactions herein contemplated.

(d) Validity. The Agency is not prohibited from entering into this Agreement and performing all covenants and obligations on its part to be performed under and pursuant to this Agreement by the terms, conditions or provisions of the Act, any other law, any order of any court or other agency or authority of government, or any agreement or instrument to which the Agency is a party or by which the Agency is bound, and this Agreement is a legal, valid and binding obligation of the Agency enforceable in accordance with its terms.

Section 1.02. Representations and Warranties by Company

The Company does hereby represent and warrant as follows:

(a) Existence. The Company is a New York limited liability company duly organized, validly existing and in good standing under the laws of the State of New York.

(b) Authorization. The Company is authorized and has the power under the laws of the State of New York to enter into this Agreement and the transactions contemplated hereby and to perform and carry out all covenants and obligations on its part to be performed under and pursuant to this Agreement. The Company has duly authorized the execution, delivery and performance of the Lease Agreements, this Agreement, and the other Company Documents (as that term is defined in the Agency Lease Agreement), and the consummation of the transactions therein and herein contemplated. The Company is not prohibited from entering into this Agreement and discharging and performing all covenants and obligations on its part to be performed under and pursuant to this Agreement by (and the execution, delivery and performance of this Agreement, the consummation of the transactions contemplated hereby and the fulfillment of and compliance with the provisions of this Agreement will not conflict with or violate or constitute a breach of or a default under) the terms,

conditions or provisions of its Articles of Organization, Operating Agreement or any other restriction or any law, rule, regulation or order of any court or other agency or authority of government, or any contractual limitation, restriction or outstanding indenture, deed of trust, mortgage, loan agreement, other evidence of indebtedness or any other agreement or instrument to which the Company is a party or by which it or any of its property is bound, and the Company's discharging and performing all covenants and obligations on its part to be performed under and pursuant to this Agreement will neither be in conflict with or result in a breach of or constitute (with due notice and/or lapse of time) a default under any of the foregoing, nor result in the creation or imposition of any lien of any nature upon any of the property of the Company under the terms of any of the foregoing, and this Agreement is a legal, valid and binding obligation of the Company enforceable in accordance with its terms.

(c) Title. The Company has valid and marketable fee title to the Project Facility, free and clear of all liens and encumbrances except for Permitted Encumbrances (as defined in the Lease Agreements).

(d) Governmental Consent. No further consent, approval or authorization of, or filing, registration or qualification with, any governmental or public authority on the part of the Company is required as a condition to the execution, delivery or performance of this Agreement by the Company or as a condition to the validity of this Agreement.

ARTICLE II
COVENANTS AND AGREEMENTS

Section 2.01. Tax-Exempt Status of the Project Facility

(a) Assessment of the Project Facility. Pursuant to the Act and Section 412-a of the Real Property Tax Law, the parties hereto understand that, upon acquisition of ownership or control of the Project Facility by the Agency, and for so long thereafter as the Agency shall own or control the Project Facility, the Project Facility shall be entitled to an exemption upon the first available assessment roll of the Municipality prepared subsequent to the acquisition by the Agency of ownership or control of the Project Facility. The time of commencement of the Agency's exemption shall be controlled by the Municipality's taxable status date, in conformity with Section 412-a of the Real Property Tax Law. The Company will be required to pay to the Municipality all taxes and assessments lawfully levied and/or assessed against the Project Facility, in spite of the Agency's actual ownership or control of the Project Facility, until the Project Facility shall be entitled to exempt status on the tax roll of the Municipality.

(b) Special Assessments. The parties hereto understand that the tax exemption extended to the Agency by the Act and Section 412-a of the Real Property Tax Law does not entitle the Agency to exemption from special assessments and special ad valorem levies. The Company will be required at all times to pay all special assessments and special ad valorem levies lawfully levied and/or assessed against the Project Facility.

Section 2.02. Payments in Lieu of Taxes

(a) Agreement to Make Payments. The Company agrees that it shall make periodic

payments in lieu of real property taxes in the amounts hereinafter provided. The said payments due to the Agency hereunder shall be paid by the Company, to the Municipality, on behalf of the Agency, by check made payable to "*Commissioner of Finance*". The Company obligation shall exist for so long as the Agency retains an interest in the Project Facility. Upon receipt of the Company's payment, the Municipality, on behalf of the Agency, will disburse the pro rata portion of each payment to the County of Onondaga and the Municipality, or such other taxing jurisdiction, pursuant to the Act in proportion to the amount of real property tax and other taxes which would have been received by each affected taxing jurisdiction had the Project not been tax exempt due to the involvement of the Agency in the Project. The obligation to make the year 1 payment under **Exhibit "A"** shall commence on July 1, 2026. Notwithstanding the appearance of the Agency's exemption on the Municipality's tax roll for some or all of the 2025/2026 City and School portion of the real property tax due on the Land and Facility, the pro rata portion of the year 1 payment due for the City and School under **Exhibit "A"** shall be applied to amounts due for the 2026/2027 City and School tax year. The portion of the year 1 payment due for the County and Water District under **Exhibit "A"** shall be made, and remitted, at the same time as the year 1 payment for the City and School portion but shall be applied to amounts due to the County and Water District for the January 1, 2027 County tax year. Without regard to the Agency exemption, or any payments due hereunder, the Company shall continue paying real property tax through June 30, 2026 with respect to the City and School portion of the real property tax and through December 31, 2026 with respect to the County and Water District portion of the real property tax, based upon the assessment and the combined real property tax rate in effect for that period as if the Project Facility were privately owned and the Agency had no interest in the same. Exhibit "A" contains full payment of taxes, as if the Agency's interest and exemption were inapplicable during the three year construction period, with the actual 30-year *abatement* period starting with the July 1, 2029 City and School payment and January 1, 2030 County payment resulting in an actual abatement period of 30 years.

(b) Amount of Payments in Lieu of Taxes. Unless otherwise stated, the Company's agreed upon annual payment in lieu of tax hereunder shall be an amount determined by reference to **Exhibit "A"**, attached hereto and made a part hereof. The payments in lieu of tax due, as set forth in **Exhibit "A"**, include any real property tax exemptions that might be afforded to the Company if the Project Facility were owned by the Company and not the Agency. As consideration for the benefits conferred on the Company pursuant to this Agreement, the Company hereby agrees to be bound by any determination by the City of Syracuse Board of Assessment Review resulting from a review of the assessment pertaining to the Project Facility and/or Additional Property throughout the term of this Agreement. The Company hereby agrees to waive any and all right to challenge or contest in a court of law (a "***Legal Challenge***"), those payments or the basis for those payments due pursuant to Exhibit "A." It shall also be an event of default under Article IV of this Agreement should the Company bring a Legal Challenge on the Project Facility and/or Additional Property.

(c) Additional Amounts in Lieu of Taxes. Commencing on the first tax year following the date on which any structural addition shall be made to the Facilities, or any new or additional building shall be constructed on the real property described in **Exhibit "B"** that is in addition to the Facilities (such structural additions and additional buildings being hereinafter referred to as "***Additional Property***"), the Company agrees to make additional periodic payments in lieu of real property taxes (such additional payments being hereinafter collectively referred to as "***Additional Payments***") to the Municipality on behalf of the Agency with respect to such Additional Property.

Such Additional Payments shall be computed as follows:

By multiplying (1) the value placed on such Additional Property, as value is determined by the Municipality's assessor by (2) the tax rate or rates of the Municipality that would be applicable to such Additional Property if such Additional Property were owned or controlled by the Company and not the Agency; and (3) then reducing the amount so determined by the amounts of any properly acquired tax exemptions that would be afforded to the Company by the Municipality for such Additional Property as if it was owned or controlled by the Company and not the Agency.

(d) Revaluation. In the event of a real property assessment revaluation by the Municipality, the Company shall continue to make its payments in accordance with this Agreement; however, in the event that Exhibit "A" is no longer in effect, but payments are still being made hereunder for any reason, (including, but not limited to, the Agency still having an interest in the Project Facility), and would be effected by revaluation, each year's payments subsequent to such revaluation shall be adjusted to properly reflect revaluation, it being the intent of the parties that the level of payments following revaluation shall be equal to those payments contemplated by this Agreement.

(e) Damage or Destruction. In the event that all or substantially all of the Project Facility is damaged or destroyed, the Company shall continue to make the payments required by this Agreement for as long as the Agency shall own or control the Project Facility, without regard to such damage or destruction.

(f) Time of Payments. The Company agrees to pay the amounts due the Agency hereunder to the Municipality for each year of this Agreement, within the period that the Municipality allows payment of taxes levied in such calendar year without penalty. The Company shall be entitled to receive receipts from the Municipality for such payments.

(g) Method of Payment. All payments by the Company hereunder shall be paid to the Municipality in lawful money of the United States of America, cash, money order or check.

Section 2.03. PILOT Statements

The Municipality and/or the Agency shall submit to the Company written semi-annual statements specifying the amount and due date or dates of any payments due to the Agency hereunder. Each semi-annual PILOT statement shall be submitted to the Company at the same time that tax statements/bills are mailed by the Municipality to the owners of privately owned property. Failure to receive a PILOT statement shall not relieve the Company of its obligation to make all payments provided for hereunder. If, for any reason, the Company does not receive an appropriate PILOT Statement, the Company shall have the responsibility and obligation to make all reasonable inquiries to the Municipality and the Agency and to have such a statement issued, and thereafter to make payment of the same no later than the due dates provided herein.

Section 2.04. Obligations of Agency

Requirement that Mortgagees Subordinate to Payments. The Agency and the Company agree

that any mortgages on the Project Facility, given by either of them, shall provide that the rights of the mortgagees thereunder shall be subordinate to this Agreement and to the right of the Municipality to receive payments in lieu of taxes pursuant to Article II hereof.

Section 2.05. Company to Furnish Information

The Company agrees to promptly comply with the reporting and information requirements of the Agency and the Act, and to promptly furnish the applicable information required or requested by the Agency and/or the State of New York. The Company further agrees to assist the Agency with the preparation of any reports, or answer any inquiries, required by the State of New York in connection with the Act or the Agency's participation in the Project.

Section 2.06. Interest

(a) Agreement to Pay Interest on Missed Payments. If the Company shall fail to make any payment required by this Agreement when due, its obligation to make the payment so in default shall continue as an obligation of the Company until such payment in default shall have been made in full, and the Company shall pay the same together with interest thereon, to the extent permitted by law, at the greater of: **(i) eighteen per cent (18%) per annum; or (ii) the rate per annum which would be payable if such amounts were delinquent taxes, until so paid in full.**

(b) Maximum Legal Rate. It is the intent of the Agency, the Municipality, and Company that in no event shall interest be payable at a rate in excess of the maximum rate permitted by applicable law (the "***Maximum Legal Rate***"). Solely to the extent necessary to prevent interest under this Agreement from exceeding the Maximum Legal Rate, any amount that would be treated as excessive under a final judicial interpretation of applicable law shall be deemed to have been a mistake and automatically canceled, and, if received by the Agency or Municipality, shall be refunded to the Company.

ARTICLE III
LIMITED OBLIGATION OF THE AGENCY

Section 3.01. No Recourse; Limited Obligation of the Agency

(a) No Recourse. All covenants, stipulations, promises, agreements and obligations of the Agency contained in this Agreement shall be deemed to be the covenants, stipulations, promises, agreements and obligations of the Agency and not of any member, director, officer, agent, servant or employee of the Agency in his individual capacity, and no recourse under or upon any obligation, covenant or agreement contained in this Agreement, or otherwise based on or in respect of this Agreement, or for any claim based thereon or otherwise in respect thereof, shall be had against any past, present or future member, director, officer, agent, servant or employee, as such, of the Agency or any successor public benefit corporation or political subdivision or any person executing this Agreement on behalf of the Agency, either directly or through the Agency or any successor public benefit corporation or political subdivision or any person so executing this Agreement. It is expressly understood that this Agreement is a corporate obligation, and that no such personal liability whatever shall attach to, or is or shall be incurred by, any such member, director, officer, agent, servant or

employee of the Agency or of any successor public benefit corporation or political subdivision or any person so executing this Agreement under or by reason of the obligations, covenants or agreements contained in this Agreement or implied therefrom. Any and all such personal liability of, and any and all such rights and claims against, every such member, director, officer, agent, servant or employee under or by reason of the obligations, covenants or agreements contained in this Agreement or implied therefrom are, to the extent permitted by law, expressly waived and released as a condition of, and as a consideration for, the execution of this Agreement.

(b) Limited Obligation. The obligations and agreements of the Agency contained herein shall not constitute or give rise to an obligation of the State of New York or the Municipality, and neither the State of New York nor the Municipality shall be liable thereon. Furthermore, such obligations and agreements shall not constitute or give rise to a general obligation of the Agency, but rather shall constitute limited obligations of the Agency payable solely from the revenues of the Agency derived and to be derived from the lease, sale or other disposition of the Project.

(c) Further Limitation. Notwithstanding any provision of this Agreement to the contrary, the Agency shall not be obligated to take any action pursuant to any provision hereof unless (i) the Agency shall have been requested to do so in writing by the Company and (ii) if compliance with such request is expected to result in the incurrence by the Agency (or any of its members, directors, officers, agents, servants or employees) of any liability, fees, expenses or other costs, the Agency shall have received from the Company security or indemnity satisfactory to the Agency for protection against all such liability, however remote, and for the reimbursement of all such fees, expenses and other costs.

ARTICLE IV
EVENTS OF DEFAULT

Section 4.01. Events of Default

Any one or more of the following events shall constitute an event of default under this Agreement, and the terms ***"Event of Default"*** or ***"Default"*** shall mean, whenever they are used in this Agreement, any one or more of the following events:

(a) Failure of the Company to pay any amount due and payable by it pursuant to this Agreement, the Lease Agreements or the Company Documents, which default shall not constitute an Event of Default unless such failure continues unremedied for a period of ten (10) days after the date such payment is due.

(b) Commencement by the Company of a Legal Challenge, as defined in Section 2.02(b), to those payments or the basis for those payments due pursuant to Exhibit "A."

(c) Failure of the Company to observe and perform any other covenant, condition or agreement on its part to be observed and performed under this Agreement (other than as referred to in paragraph (a) above), and continuance of such failure for a period of thirty (30) days after written notice to the Company specifying the nature of such failure hereunder, or under the Lease Agreements, or any other Company Document, and the continuance of such failure for the duration

of any applicable cure period set forth therein after receipt of any required notice thereunder.

(d) Any warranty, representation or other statement by or on behalf of the Company contained in this Agreement or the Lease Agreements shall prove to have been false or incorrect in any material respect on the date when made or on the effective date of this Agreement or the Lease Agreements.

(e) The Company violates any federal, state or local environmental law or allows or causes any Hazardous Materials (as Hazardous Materials is defined and described in any federal, state or local law) to be released at, on, to, into or from the Project Facility, except as permitted by the Lease Agreements or within the terms and conditions of a permit, certificate, license or other written approval of an authorized governmental body, and fails to remedy such violation within thirty (30) days; or if such failure cannot be cured within thirty (30) days, fails to commence a cure within thirty (30) days and thereafter diligently prosecute the cure thereof.

(f) The occurrence of any Event of Default or Default under this Agreement, the Lease Agreements or any other Company Documents.

(g) Failure of the Company to commence and complete the Project Facility on or before the Completion Date as set forth in the Agency Lease Agreement.

Section 4.02. Remedies on Company Default

Whenever any Event of Default under Section 4.01 shall have occurred and be continuing with respect to this Agreement, and/or the Company shall be in default under the Lease Agreements or any Company Document, the Agency may take whatever action at law or in equity, including but not limited to recapture in accordance with the Agency's Recapture Policy dated June 21, 2016 or pursuant to the terms of any Company Document, following applicable notice, as may appear necessary or desirable to collect the amount then in default or to enforce the performance and observance of the obligations, agreements and covenants of the Company under this Agreement, the Lease Agreements and/or the Company Documents. Notwithstanding anything herein to the contrary, if the Lease Agreements are terminated for any reason, this Agreement shall automatically terminate without any further notice or action required hereunder and the Project Facility shall immediately become taxable and revert to the tax roll.

The payment schedule contained in Exhibit "A" is for the benefit of the Company and its Project Facility. In the event that the Company defaults hereunder, and the Lease Agreements cannot be terminated, and/or the Agency's participation in the Project and this Agreement is not or cannot be terminated, the Company, or any assignee, or successor shall no longer be entitled to make payments under this Agreement pursuant to Exhibit "A". In such an event, payments shall be made hereunder, for any remaining term of this Agreement, as if the Project Facility was privately owned and assessed and without any further regard to Exhibit "A".

Section 4.03. Recording of Lease Terminations and Other Documents

Whenever any Event of Default under Sections 4.01 shall have occurred and be continuing

with respect to this Agreement or the Lease Agreements, or upon termination of this Agreement and/or the Lease Agreements by their terms, the Agency may, upon notice to the Company provided for in this Agreement or the Lease Agreements, if any, terminate the Lease Agreements and record such termination or other necessary documents in the Onondaga County Clerk's Office, terminating the Agency's interest in the Project Facility thereby terminating this Agreement.

The recording of such a termination and any other documentation shall constitute delivery to, and acceptance of such, by the Company. In order to facilitate such a termination, the Company hereby appoints the Chair or the Vice Chair of the Agency as its agent for the purpose of executing and delivering all documents necessary to allow such termination by the Agency.

In the event that the Lease Agreements, for any reason, are extended by their terms, or for any reason this Agreement expires or terminates, but the Agency retains an interest or remains in title to the Project Facility, the Company shall make payments in lieu of taxes to the Municipality, on behalf of the Agency, for as long as the Agency retains an interest in, or remains in title to, the Project Facility in accordance with Exhibit "A". Those payments shall be treated as real property taxes by the City and be the equivalent of the real property taxes that would be due on the Project Facility if it were owned by the Company and the Agency had no interest therein. It is the intention of the parties hereto, that for so long as the Agency shall possess title to, or an interest in, the Property, the Company, or any permitted successors or assigns, shall make payments in lieu of taxes to the Municipality, on behalf of the Agency, that are either based upon Exhibit "A", or if Exhibit "A" is no longer applicable for any reason, are the equivalent of the real property taxes that would be due and owing if the Project Facility were privately owned and the Agency had no interest therein. It is further agreed, that if for any reason, following the termination of the Lease Agreements by their terms, and notwithstanding any formal termination of same with the County Clerk, the Office of Assessment for the City shall treat the Project as it were taxable for purposes of determining the appropriate taxable property base for the City.

Section 4.04. Payment of Attorney's Fees and Expenses

If the Company should default in performing any of its obligations, covenants and agreements under this Agreement and the Agency or the Municipality should employ attorneys (whether in-house or outside counsel) or incur other expenses for the collection of any amounts payable hereunder or for the enforcement of performance or observance of any obligation or agreement on the part of the Company herein contained, the Company agrees that it will, on demand therefor, pay to the Agency and/or the Municipality the reasonable fees and disbursements of such attorneys and such other reasonable expenses so incurred.

Furthermore, should the Company bring a Legal Challenge on the Project Facility and/or Additional Property during the term of this Agreement, and the Agency and/or the Municipality waives its right to declare a default under this Agreement in regard to such Legal Challenge, or such Legal Challenge is determined not to be a default of this Agreement by any Court of competent jurisdiction, the Company agrees that in the event that the Company is unsuccessful in its Legal Challenge, it will, on demand, pay to the Agency and/or the Municipality the reasonable fees and disbursements of any attorneys employed (whether in-house or outside counsel) for the defense of such Legal Challenge as well as such other reasonable expenses so incurred.

Section 4.05. Remedies; Waiver and Notice

(a) No Remedy Exclusive. No remedy herein conferred upon or reserved to the Agency is intended to be exclusive of any other available remedy or remedies, but each and every such remedy shall be cumulative and shall be in addition to every other remedy given under this Agreement or now or hereafter existing at law or in equity or by statute.

(b) Delay. No delay or omission in exercising any right or power accruing upon the occurrence of any Event of Default hereunder shall impair any such right or power or shall be construed to be a waiver thereof, but any such right or power may be exercised from time to time and as often as may be deemed expedient.

(c) Notice Not Required. In order to entitle the Agency to exercise any remedy reserved to it in this Agreement, it shall not be necessary to give any notice, other than such notice as may be expressly required in this Agreement.

(d) No Waiver. In the event any provision contained in this Agreement should be breached by any party and thereafter duly waived by the other party so empowered to act, such waiver shall be limited to the particular breach so waived and shall not be deemed to be a waiver of any other breach hereunder. No waiver, amendment, release or modification of this Agreement shall be established by conduct, custom or course of dealing.

(e) Recapture. Seek to recover all or some of the Recapture Amount in accordance with the Agency's Recapture Policy, the Agency Lease Agreement, the Project Agreement and this PILOT Agreement.

ARTICLE V
MISCELLANEOUS

Section 5.01. Term of Agreement

(a) General. This Agreement shall become effective and the obligations of the Agency and the Company shall arise absolutely and unconditionally upon the execution and delivery of this Agreement. This Agreement shall terminate on the earliest to occur of: (i) the same date that the Agency Lease Agreement terminates; (ii) on any earlier date permitted under the Agency Lease Agreement; or (iii) upon the expiration on **June 30, 2059**, of the PILOT Schedule set forth in **Exhibit "A"** hereto. In the event of a termination of the Agency's interest in the Project Facility, the Company's payments due hereunder shall be pro-rated to the extent necessary to allow the Municipality to issue a supplemental PILOT Statement based upon the Agency's transfer of ownership or control of the Project Facility to the Company, and the loss of the Agency's tax exemption on the said Project Facility.

(b) Conflict. In the event of a conflict between this Agreement or any of its terms on the one hand, and the Lease Agreements or any other Project documents on the other hand, the provisions most favorable to the Agency shall govern. The Agency and the Company agree that the Agency's

participation in this Agreement is for the benefit of the Company and that the Municipality must receive payments from the Company hereunder, during the entire term of this Agreement and/or the Agency's ownership or control of the Project Facility.

Section 5.02. Company Acts

Where the Company is required to do or accomplish any act or thing hereunder, the Company may cause the same to be done or accomplished with the same force and effect as if done or accomplished by the Company.

Section 5.03. Amendment of Agreement

This Agreement may not be amended, changed, modified or altered unless such amendment, change, modification or alteration is in writing and signed by the Agency and the Company.

Section 5.04. Notices

All notices, certificates or other communications hereunder shall be in writing, shall be sufficiently given, and shall be deemed given when (a) sent to the applicable address stated below by registered or certified mail, return receipt requested, and actually received by the intended recipient or by overnight courier or such other means as shall provide the sender with documentary evidence of such delivery, or (b) delivery is refused by the addressee as evidenced by the affidavit of the person who attempted to effect such delivery. The addresses to which notices, certificates, and other communications hereunder shall be delivered are as follows:

(a) To the Agency:
(b)

City of Syracuse Industrial Development Agency
One Park Place
300 South State Street, Suite 700
Syracuse, New York 13202
Attention: Chair

With a copy to:

Bousquet Holstein PLLC
110 West Fayette Street, Suite 1000
Syracuse, New York 13202
Attn: Susan R. Katzoff, Esq.

And to:

Corporation Counsel
City of Syracuse
233 East Washington Street, Room 300
Syracuse, New York 13202

(b) To the Company:

Wilbur Ave A/B, LLC
1001 Franklin Avenue, Suite 300
Garden City, New York 11530
Attn: Christopher V. Albanese

With a copy to:

Bond, Schoeneck & King PLLC
One Lincoln Center
110 West Fayette Street
Syracuse, New York 13202
Attn: Kevin M. Pole, Esq.

The Agency and Company may, by notice given hereunder to each of the others, designate any further or different addresses to which the subsequent notices, certificates or other communications to them shall be sent.

Section 5.05. Binding Effect

This Agreement shall inure to the benefit of, and shall be binding upon the Agency and the Company, and their respective successors and assigns.

Section 5.06. Severability

If any article, section, subdivision, paragraph, sentence, clause, phrase, provision or portion of this Agreement shall for any reason be held or adjudged to be invalid or illegal or unenforceable by any court of competent jurisdiction, such article, section, subdivision, paragraph, sentence, clause, phrase, provision or portion so adjudged invalid, illegal or unenforceable shall be deemed separate, distinct and independent and the remainder of this Agreement shall be and remain in full force and effect and shall not be invalidated or rendered illegal or unenforceable or otherwise affected by such holding or adjudication.

Section 5.07. Counterparts

This Agreement may be simultaneously executed in several counterparts, each of which shall be an original and all of which shall constitute but one and the same instrument.

Section 5.08. Applicable Law

This Agreement shall be governed by and construed in accordance with the laws of the State of New York. Venue of any action or proceeding brought hereunder shall be in the State or Federal Courts located in Onondaga County, New York.

Section 5.09. Assignment

This Agreement may not be assigned by the Company without the prior written consent of the Agency.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IN WITNESS WHEREOF, the Agency and Company have caused this Agreement to be executed in their respective names on the date first above written and the Company hereby acknowledges receipt and review of this Agreement, and consents to, and approves of, the terms and provisions contained herein.

Re: City of Syracuse Industrial Development Agency
Wilbur Ave A/B, LLC
Wilbur Ave A/B, LLC Project

Dear Matt:

Enclosed herewith please find an original RP-412-a form attendant with the above-referenced Project, as well as a fully executed original PILOT Agreement, to be filed with your office.

Also enclosed for your file are fully executed copies of the Company Lease Agreement and the Agency Lease Agreement regarding this Project.

We have enclosed an extra copy of the RP-412-a and ask that you return same, filed-stamped, in the enclosed envelope provided.

If you have any questions regarding the foregoing, or require anything additional from us, please do not hesitate to contact me.

Very truly yours,

/s/ Susan R. Katzoff

GENERAL CERTIFICATE OF THE

CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY

This certificate is made in connection with the execution by the City of Syracuse Industrial Development Agency (the "***Agency***") of the Project Agreement, the Company Lease, the Agency Lease, the PILOT Agreement and any other document now or hereafter executed by the Agency (collectively, the "***Agency Documents***") with respect to a project (the "***Project***") undertaken at the request of Wilbur Ave A/B, LLC (the "***Company***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two 4-story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

Capitalized terms used herein which are not otherwise defined herein and which are defined in the Agency Lease Agreement dated as of December 18, 2025 (the "***Agency Lease***"), between the Agency and the Company, and shall have the meanings ascribed to such terms in the Agency Lease except that, for purposes of this certificate: (A) all definitions with respect to any document shall be deemed to refer to such document only as it exists as of the date of this certificate and not as of any future date; and (B) all definitions with respect to any Person shall be deemed to refer to such Person only as it exists as of the date of this certificate and not as of any future date or to any successor or assign.

I, the undersigned Executive Director of the Agency, Do Hereby Certify:

1. I am an officer of the Agency and am duly authorized to execute and deliver this certificate in the name of the Agency.

2. The Agency is an industrial development agency duly established under Title 1 of Article 18-A of the General Municipal Law of the State of New York (the "***State***"), as amended (the "***Enabling Act***") and Chapter 641 of the Laws of 1979 of the State (said Chapter with the Enabling Act, the "***Act***") (a certified copy of Chapter 641 of the Laws of 1979 of the State is attached hereto as **Exhibit "A"**), and it is a corporate governmental agency constituting a public benefit corporation of the State.

3. The Act empowers the Agency, among other things, to acquire, construct reconstruct, lease, improve, maintain, equip, sell and dispose of land and any building or other improvement, and all real and personal property, including, but not limited to, machinery and equipment deemed necessary in connection therewith, whether or not now in existence or under construction, which shall be suitable for manufacturing, warehousing, research, commercial, recreation or industrial facilities, including industrial pollution control facilities, in order to advance job opportunities, health, general prosperity and the economic welfare of the people of the City of Syracuse and the State and to improve their standard of living. The Act further authorizes the Agency to lease any and all of its facilities on such terms and conditions as it deems advisable, to acquire, construct, lease, improve, and equip one or more projects as defined in the Act, to mortgage any or all of its facilities and to pledge the revenues and receipts from the sale or transfer of its facilities.

4. The Agency has full legal power and authority to own its property, conduct its business and execute, deliver, and perform its obligations under the Agency Documents and has taken all actions and obtained all approvals required in connection therewith by the Act and any other applicable laws and regulations, and no legislation has been enacted affecting the powers or authority of the Agency to execute and deliver the Agency Documents, affecting the financing of the Project, or affecting the validity thereof or of the Agency Documents, or contesting the existence and powers of the Agency or the appointment of the members and officers of the Agency to their respective offices.

5. Pursuant to the Act, the governing body of the City of Syracuse, New York, for whose benefit the Agency was established, duly filed or caused to be filed within six (6) months after the effective date of Chapter 641 of the Laws of 1979 of the State in the office of the Secretary of State of the State the Certificate of Establishment of the Agency pursuant to Section 926 of the New York General Municipal Law. The Certificate of Establishment of the Agency described in the preceding sentence also named the members and officers of the Agency as appointed by the Mayor of the City of Syracuse. Attached hereto as **Exhibit "B"** are certified copies of said Certificates of Establishment and copies of the Certificates of Appointment relating to all of the current members of the Agency, who are:

Kathleen Murphy, Chair
Steven Thompson, Vice Chair
Rickey T. Brown, Secretary
Kenneth Kinsey, Treasurer
Dirk Sonneborn, Member

6. Attached hereto as **Exhibit "C"** is a true, correct and complete copy of the by-laws of the Agency, together with all amendments thereto or modifications thereof; and said by-laws as so amended and modified are in full force and effect in accordance with their terms as of the date of this certificate.

7. That a resolution determining that the acquisition, construction and equipping of the Project constitutes a Project and describing the financial assistance in connection therewith and authorizing a public hearing (the "***Public Hearing Resolution***") was adopted by the Agency on November 22, 2024 and remains in full force and effect and has not been rescinded, repealed or modified. A copy of the Public Hearing Resolution is attached hereto at **Exhibit "D."**

8. Attached hereto as **Exhibit "E"** is proof of mailing of notice to the chief executive officers of the affected tax jurisdictions of the meeting at which the Agency considered the request of the Company for a schedule of payments in lieu of real property taxes which deviates from the Issuer's Uniform Tax Exemption Policy ("***UTEP***") pursuant to Section 874(4) of the Act.

9. Attached hereto as **Exhibit "F"** is proof of publication of a notice of the public hearing with respect to the Project (the "***Public Hearing Notice***"), required pursuant to Section 859-a of the Act and held on December 9, 2024, and proof of mailing of notice thereof pursuant to Section 859-a of the Act to the chief executive officers of the affected tax jurisdictions (as defined in Section 854(16) of the Act) on November 26, 2024.

10. That a resolution approving the undertaking of the acquisition, construction and equipping of the Project, appointing the Company as agent of the Agency for the purpose of the acquisition, construction and equipping of the Project, and authorizing the execution and delivery of an agreement between the Agency and the Company (the "***Inducement Resolution***") was adopted by the Agency on December 9, 2024 and remains in full force and effect and has not been rescinded, repealed or modified. A copy of the Inducement Resolution is attached hereto at **Exhibit "G."**

11. That a resolution approving a payment in lieu of tax schedule and authorizing the execution and delivery of certain documents by the Agency in connection with the Project was adopted by the Agency on December 9, 2024 (the "***PILOT Resolution***") and remained in full force and effect and has not been rescinded, repealed or modified. A copy of the PILOT Inducement Resolution is attached hereto to **Exhibit "H".**

12. That a resolution authorizing the execution and delivery of certain documents by the Agency in connection with the Project was adopted by the Agency on December 9, 2024 (the "***Final Approving Resolution***") and remains in full force and effect and has not been rescinded, repealed or modified. A copy of the Final Approving Resolution is attached hereto at **Exhibit "I".**

13. That a resolution authorizing a clarification to the project description in connection with a certain project previously undertaken by the Agency in connection with the Project was adopted by the Agency on November 18, 2025 (the "***Approving Resolution***") and remains in full force and effect and has not been rescinded, repealed or modified. A copy of the Approving Resolution is attached hereto at **Exhibit "J"**.

14. The execution, delivery and performance of all Agency Documents, certificates and documents required to be executed, delivered and performed by the Agency in order to carry out, give effect to and consummate the transactions contemplated by the Agency Documents have been duly authorized by all necessary action of the Agency, and the Agency Documents have been duly authorized, executed and delivered. The Agency Documents are in full force and effect on and as of the date hereof, and no authority or proceeding for the execution, delivery or performance of the Agency Documents has been materially amended, repealed, revoked or rescinded; and no event or circumstance has occurred or exists which constitutes, or with the giving of notice or the passage of time would constitute, a default on the part of the Agency under the Agency Documents.

15. The execution, delivery, and performance of the Agency Documents, the consummation of the transactions therein contemplated and compliance with the provisions of each do not and will not: (a) violate the Act or the by-laws of the Agency; (b) require consent (which has not heretofore been received) under or result in a breach or default of any credit agreement, purchase agreement, indenture, deed of trust, commitment, guaranty, lease, or other agreement or instrument to which the Agency is a party or by which the Agency may be bound or affected; or (c) conflict with or violate any existing law, rule, regulation, judgment, order, writ, injunction, or decree of any government, governmental instrumentality, or court, domestic or foreign, having jurisdiction over the Agency or any of its Property.

16. The Agency has not received written notice that any event of default has occurred and is continuing, or that any event has occurred which with the lapse of time or the giving of notice or both would constitute an event of default by any party to the Agency Documents.

17. There is no action, suit, proceeding or investigation at law or in equity, before or by any court, public board or body of the United States of America or the State of New York, pending or, to the best of my knowledge, threatened against or affecting the Agency (or to my knowledge any basis therefor): (a) wherein an unfavorable decision or finding would adversely affect: (i) the SEQRA Resolution, the Inducement Resolution, the PILOT Resolution, the Final Approving Resolution, the Project Agreement, the Company Lease, the Agency Lease, the PILOT Agreement or the other Agency Documents; or (ii) the existence or organization of the Agency; or (iii) restrain or enjoin the financing, acquisition or construction of the Project or the performance by the Agency of the Agency Documents; or (b) in any manner questioning the proceedings or authority of the financing of the Project, or affecting the validity thereof or of the Agency Documents, or contesting the existence and powers of the Agency or the appointment of the directors and officers of the Agency to their respective offices.

18. December 18, 2025 has been duly designated as the date for the Closing.

19. The Agency has complied with all agreements and satisfied all conditions on its part to be performed or satisfied at or prior to the Closing Date.

20. In accordance with the Act, the Agency has determined:

(a) to assist the Company's acquisition, construction, equipping and completion of the Project Facility;

(b) to grant the Financial Assistance to the Company;

(c) to designate the Company as the Agency's agent for the acquisition, construction, equipping and completion of the Project Facility and to authorize the Company to appoint additional agents;

(d) that the Project will promote employment opportunities and prevent economic deterioration in the City by the preservation and/or the creation of both full and part-time jobs; and

(e) to pledge its interest in the Company Lease and the Agency Lease (except the Agency's Unassigned Rights) to the Mortgagee and grant the Mortgagee a security interest in the Agency's leasehold interest in the Project Facility.

21. That I did officially cause all certificates necessary for the granting of the Financial Assistance and included in the official transcript of closing, to be executed, as required, in the name of the Agency by the signing of each of such certificates with the signature of the Executive Director of the Agency.

22. That I did officially cause the following Agency Documents to be executed in the name of the Agency by the signing of each of such Agency Documents with the signature of the Eric Ennis, Executive Director of the Agency:

(a) a Project Agreement between the Agency and the Company;

(b) a Company Lease from the Company to the Agency pursuant to which the Company agrees to lease the Land and the Facility to the Agency;

(c) an Agency Lease from the Agency to the Company pursuant to which the Agency agrees to sublease the Project Facility to the Company;

(d) a PILOT Agreement by and between the Agency and the Company.

23. No member, officer or employee of the Agency having power to: (i) negotiate, prepare, authorize or approve any of the Agency Documents; (ii) audit bills or claims under any of the Agency Documents; or (iii) appoint an officer or employee who has any of the powers or duties set forth in (i) or (ii):

(a) directly or indirectly owns any stock of the Company;

(b) is a partner, director or employee of the Company;

(c) is related to the Company within the meaning of Section 800.3(a) of the New York General Municipal Law.

No member, officer, or employee of the Agency has publicly disclosed, in a writing included as part of the official minutes of the Agency, any Interest (as defined in Section 800.3 of the New York General Municipal Law), direct or indirect, in the Company.

WITNESS, as of the 18th day of December, 2025.

CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY

By: _____
Eric Ennis, Executive Director

EXHIBIT "A"

CHAPTER 641 OF THE LAWS OF 1979
OF THE STATE OF NEW YORK

LAWS OF NEW YORK, 1979

CHAPTER 641

AN ACT to amend the general municipal law, in relation to creating and establishing for the city of Syracuse industrial development agency and, providing for its functions and duties

Became a law July 11, 1979, with the approval of the Governor. Passed on Home Rule request pursuant to Article IX, section 2 (b) (2) of the Constitution, by a majority vote, three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The general municipal law is amended by adding a new section nine hundred twenty-six to read as follows:

§ 926. City of Syracuse industrial development agency. (a) For the benefit of the city of Syracuse and the inhabitants thereof, an industrial development agency, to be known as the CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY, is hereby established for the accomplishment of any or all of the purposes specified in title one of article eighteen-A of this chapter. It shall constitute a body corporate and politic, and be perpetual in duration. It shall consist of five members who shall be appointed by the mayor of the city of Syracuse and its chairman shall be designated by such mayor. It shall have the powers and duties now or hereafter conferred by title one of article eighteen-A of this chapter upon industrial development agencies. It shall organize in a manner prescribed by and be subject to the provisions of title one of article eighteen-A of this chapter. The agency, its members, officers and employees, and its operations and activities shall in all respects be governed by the provisions of title one of article eighteen-A of this chapter.

(b) The city shall have the power to make, or contract to make grants or loans, including but not limited to grants or loans of money, to the agency in such amounts, upon such terms and conditions and for such period or periods of time as in the judgment of the city and the agency are necessary or appropriate for the accomplishment of any of the purposes of the agency.

§ 2. This act shall take effect immediately.

EXHIBIT "B"

AGENCY'S CERTIFICATE OF ESTABLISHMENT
AND
CERTIFICATES OF APPOINTMENT OF CURRENT MEMBERS

CERTIFICATE OF THE CITY OF SYRACUSE
INDUSTRIAL DEVELOPMENT AGENCY

Pursuant to Article 18-A of the General Municipal Law, Lee Alexander, Mayor of the City of Syracuse, certifies as follows:

1) The name of the industrial development agency herein is the City of Syracuse Industrial Development Agency.

2) Chapter 641 of the Laws of 1979, the special act of the New York State Legislature establishing the City of Syracuse Industrial Development Agency, was adopted by the New York State Legislature on June 16, 1979 and signed by the Governor on July ~~18~~ 11th, 1979.

3) The names of the Chairman and the Members, respectively, of the City of Syracuse Industrial Development Agency and their terms of office are as follows:

(a)	Frank L. Canino	Chairman
	David M. Garber	Member
	David S. Michel	Member
	Erwin G. Schultz	Member
	Irwin L. Davis	Member

(b) The term of office of the Chairman and of the Members of the City of Syracuse Industrial Development Agency is at the pleasure of the Mayor and continues until a successor is appointed and has qualified.

4) The facts establishing the need for the creation of a City of Syracuse Industrial Development Agency are as follows:

Expansion of its industrial-commercial base is essential to the City of Syracuse, especially in a time of mounting economic pressures. To achieve this goal of expansion, the City has designed a comprehensive economic development program, requiring an Industrial Development Agency.

The existing potential for economic development will be augmented by the financial incentives of an Industrial Development Agency. Various City agencies and departments, such as the Department of Community Development and the Office of Federal and State Aid Coordination will interface with the Syracuse Industrial Development Agency to strengthen the business and industrial climate of the community.

Access to the Department of Community Development will make available to the Syracuse Industrial Development Agency an array of staff assistance, technical expertise, and various other development services. The City's Office of Federal and State Aid Coordination will provide assistance to it in locating, analyzing, and obtaining various forms of federal and state assistance and participation.

STATE OF NEW YORK

EXHIBIT "C"

AGENCY'S BY-LAWS

BY-LAWS OF
THE CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY
(as amended August 18, 2009)

Article I

THE AGENCY

Section l. Name

The name of the agency shall be "City of Syracuse Industrial Development Agency", and it shall be referred to in these by-laws as the Agency.

Section 2. Seal

The seal of the Agency shall be in such form as may be determined by the members of the Agency.

Section 3. Office

The principal office of the Agency shall be located in the City of Syracuse, New York, County of Onondaga, and State of New York. The Agency may have such other offices at such other places as the members of the Agency may, from time to time, designate by resolution.

Article II

MEMBERS

Section l. Members

(a) There shall be five members of the Agency. All references in these by-laws to members shall be references to Members of the Agency. The persons designated in the certificates of appointment filed in the office of the Secretary of State as members of the Agency and their successors in office and such other persons as may, from time to time, be appointed as

Members of the Agency by the Mayor of the City of Syracuse, or by special act of the Legislature, shall constitute all the members.

(b) Members shall hold office at the pleasure of the Mayor and shall continue to hold office until his or her successor is appointed and has qualified. The Mayor may remove any Member at his discretion, with or without cause.

(c) Upon the resignation or removal of a Member, a successor shall be selected by the Mayor.

(d) Members may resign at any time by giving written notice to the Mayor and to the Chairman of the Agency. Unless otherwise specified in the notice the resignation shall take effect upon receipt of the notice by the Chairman or the Mayor. Acceptance of the resignation shall not be necessary to make it effective.

Section 2. Meeting of the Members

(a) The Annual Meeting of the members shall be held on such date or dates as shall be fixed, from time to time, by the Members of the Agency. The first Annual Meeting of Members shall be held on a date within twelve (12) months after the filing of the Certificate of the Agency with the Secretary of State as required by General Municipal Law §856 (l) (a). Each successive Annual Meeting of Members shall be held on a date not more than twelve (12) months following the preceding Annual Meeting of Members.

(b) Regular meetings of the Agency may be held at such time and place as, from time to time, may be determined by the Members.

(c) Upon the written request of the Mayor, the Chairman or two (2) Members of the Agency, the Chairman of the Agency shall call a special meeting of the Members. Special meetings may be held on such date or dates as may be fixed in the call for such special meetings.

The call for a special meeting may be personally delivered to each Member of the Agency or may be mailed to the business or home address of such Member. A waiver of notice may be signed by any Member failing to receive a proper notice.

Section 3. Procedure at Meetings of Members

(a) The Chairman shall preside over the meetings of the Agency. In the absence of the Chairman, the Vice-Chairman shall preside. In the absence of both the Chairman and Vice-Chairman, any Member directed by the Chairman may preside.

(b) At all meetings of Members, a majority of the Members of the Agency shall constitute a quorum for the purpose of transacting business. If less than a quorum is present for any meeting, the Members then present may adjourn the meeting to such other time or until a quorum is present. Except to the extent provided for by law, all actions shall be by a majority of the votes cast, provided that the majority of the votes cast shall be at least equal to a quorum.

(c) When determined by the Agency that a matter pending before it is confidential in nature, it may, upon motion, establish an executive session and exclude any non-member from such session.

(d) Order of business

At all meetings of the Agency, the following shall be the order of business:

(1) Roll Call;

(2) Proof of Notice of Meeting;

(3) Reading and approval of the minutes of the previous meeting;

(4) bills and communications;

(5) Report of the Treasurer;

(6) Reports of Committees;

(7) Unfinished business;

(8) New business;

(9) Adjournment.

The order of business may be altered or suspended at any meeting by the Members of the Agency.

(e) All resolutions shall be in writing and shall be recorded in the journal of the proceedings of the Agency.

Article III

OFFICERS AND PERSONNEL

Section 1. Officers

The officers of the Agency shall be Chairman or Co-Chairman, Vice-Chairman, Secretary and Treasurer and such other offices as may be prescribed, from time to time, by the Agency. The Chairman or Co-Chairman and other officers shall be appointed by the Mayor of the City of Syracuse and may be removed with or without cause at his discretion. Each officer shall be a Member of the Agency during his or her term of office.

Section 2. Chairman or Co-Chairmen

The Chairman shall be chief executive officer of the Agency, and shall serve as an ex officio member of all duly constituted committees, shall supervise the general management and the affairs of the Agency, and shall carry out the orders and resolutions of the Agency. Except as otherwise authorized by resolution of the Agency, the Chairman shall execute (manually and by facsimile signature) all agreements, contracts, deeds, bonds, notes or other evidence of indebtedness and any other instruments of the Agency on behalf of the Agency. The Mayor may from time to time appoint two Co-Chairmen in place of the Chairman. During their term of office the Co-

Chairmen shall share equally the duties, rights, powers and responsibilities of the Chairman. The action of either Co-Chairman or execution (manually or by facsimile signature) by either Co-Chairman of any agreement, contract, deed, bond, note or other evidence of indebtedness or any other instrument of the Agency on behalf of the Agency shall have the same force and effect as such action or execution by the Chairman.

Section 3. Vice-Chairman

The Vice-Chairman shall have all the powers and functions of the Chairman or Co-Chairmen in the absence or disability of the Chairman or Co-Chairmen, as the case may be. The Vice-Chairman shall perform such other duties as the Members of the Agency shall prescribe or as delegated by the Chairman or Co-Chairmen.

Section 4. Secretary

The Secretary shall keep the minutes of the Agency, shall have the custody of the seal of the Agency and shall affix and attest the same to documents when duly authorized by the Agency, shall attest to the giving or serving of all notices of the Agency, shall have charge of such books and papers as the Members of the Agency may order, shall attest to such correspondence as may be assigned, and shall perform all the duties incidental to his office.

Section 5. Treasurer

The Treasurer shall have the care and custody of all the funds and securities of the Agency, shall deposit such funds in the name of the Agency, in such bank or trust company as the members of the Agency may elect, shall sign such instrument as may require the Treasurer's signature, but only with the approval of the Chairman or Co-Chairman, as the case may be, shall at all reasonable times exhibit the books and accounts of the Agency to the Mayor or any Member of

the Agency, and at the end of each fiscal year shall present an annual report setting forth in full the financial condition of the Agency.

Section 6. Additional Personnel

The Agency, with the consent of the Mayor, may appoint an Administrative or Executive Director to supervise the administration of the business and affairs of the Agency, subject to the direction of the Agency. The Agency may, from time to time, employ such other personnel as it deems necessary to execute its powers, duties and functions as prescribed by the New York State Industrial Development Agency Act (General Municipal Law, Article 18-A), as amended, and all other laws of the State of New York applicable thereto.

Section 7. Compensation of Chairman, Co-Chairmen, Members, Officers, and Other Personnel

The Chairman, Co-Chairmen, Members and Officers shall receive no compensation for their services but shall be entitled to the necessary expenses, including traveling expenses, incurred in the discharge of their duties. The compensation of other personnel, including the Administrative Director, shall be determined by the Members of the Agency.

Article IV

AMENDMENTS

Section 1. Amendments to By-Laws

These by-laws may be amended or revised, from time to time, by a two-third (2/3) vote of the Agency, but no such amendment or revision shall be adopted unless written notice of the proposed action shall have been given by mail to each Member and the Mayor at least ten (10) days prior to the date of the meeting at which it is proposed that such action be taken; provided, however,

that this provision and other provisions relating to the appointment, renewal and terms of office of Members and officers may be amended only with the prior written approval of the Mayor.

Article V

MISCELLANEOUS

Section 1. Sureties and Bonds

In case the Agency shall so require, any officer, employee or agent of the Agency shall execute to the Agency a bond in such sum and with such surety or sureties as the Agency may direct, conditioned upon the faithful performance of his or her duties to the Agency and including responsibility for negligence and for the accounting for all property, funds or securities of the Agency which may come into the hands of the officer, employee or agent.

Section 2. Indemnification

(a) Upon compliance by a Member or Officer of the Agency (including a former Member or Officer, the estate of a Member or Officer or a judicially appointed personal representative thereof) (referred to in this Section 2 collectively as "Member") with the provisions of subdivision (i) of this Section 2, the Agency shall provide for the defense of the Member in any civil action or proceeding, state or federal, arising out of any alleged act or omission which occurred or allegedly occurred while the Member was acting within the scope of the public employment or duties of such Member. This duty to provide for a defense shall not arise where such civil action or proceeding is brought by or at the behest of the Agency.

(b) Subject to the conditions set forth in paragraph (a) of this subdivision, the Member shall be entitled to be represented by private counsel of the Member's choice in any civil action or proceeding whenever the chief legal officer of the Agency or other counsel designated by the

Agency determines that a conflict of interest exists, or whenever a court, upon appropriate motion or otherwise by a special proceeding, determines that a conflict of interest exists and that the Member is entitled to be represented by counsel of the Member's choice, provided, however, that the chief legal officer or other counsel designated by the Agency may require, as a condition to payment of the fees and expenses of such representation, that appropriate groups of such Members be represented by the same counsel. Reasonable attorneys' fees and litigation expenses shall be paid by the Agency to such private counsel from time to time during the pendency of the civil action or proceeding with the approval of a majority of the Members of the Agency eligible to vote thereon.

(c) Any dispute with respect to representation of multiple Members by a single counsel or the amount of litigation expenses or the reasonableness of attorneys' fees shall be resolved by the court upon motion or by way of a special proceeding.

(d) Where the Member delivers process and a written request for a defense to the Agency under subdivision (i) of this Section 2, the Agency shall take the necessary steps on behalf of the Member to avoid entry of a default judgment pending resolution of any question pertaining to the obligation to provide for a defense.

(e) The Agency shall indemnify and save harmless its Members in the amount of any judgment obtained against such Members in a State or Federal court, or in the amount of any settlement of a claim, provided that the act or omission from which such judgment or claim arose occurred while the Member was acting within the scope of the Member's public employment or duties; provided further that in the case of a settlement, the duty to indemnify and save harmless shall be conditioned upon the approval of the amount of settlement by a majority of the Members of the Agency eligible to vote thereon.

(f) Except as otherwise provided by law, the duty to indemnify and save harmless prescribed by this Section 2 shall not arise where the injury or damage resulted from intentional wrongdoing or recklessness on the part of the Member seeking indemnification.

(g) Nothing in this subdivision shall authorize the Agency to indemnify or save harmless any Member with respect to punitive or exemplary damages, fines or penalties; provided, however, that the Agency shall indemnify and save harmless its Members in the amount of any costs, attorneys' fees, damages, fines or penalties which may be imposed by reason of an adjudication that the Member, acting within the scope of the Member's public employment or duties, has, without willfulness or intent on the Member's part, violated a prior order, judgment, consent decree or stipulation of settlement entered in any court of the State or of the United States.

(h) Upon entry of a final judgment against the Member, or upon the settlement of the claim, the Member shall serve a copy of such judgment or settlement, personally or by certified or registered mail within thirty (30) days of the date of entry or settlement, upon the Chairman and the chief administrative officer of the Agency; and if not inconsistent with the provisions of this Section 2, the amount of such judgment or settlement shall be paid by the Agency.

(i) The duty to defend or indemnify and save harmless prescribed by this Section 2 shall be conditioned upon: (i) delivery by the Member to the Chairman of the Agency and the chief legal officer of the Agency or to its chief administrative officer of a written request to provide for such Member's defense together with the original or a copy of any summons, complaint, process, notice, demand or pleading within ten (10) days after the Member is served with such document, and (ii) the full cooperation of the Member in the defense of such action or

proceeding and in defense of any action or proceeding against the Agency based upon the same act or omission, and in the prosecution of any appeal.

(j) The benefits of this Section shall inure only to Members as defined in subdivision (a) of this Section 2 and shall not enlarge or diminish the rights of any other party.

(k) This Section 2 shall not in any way affect the obligation of any claimant to give notice to the Agency under Section 10 of the Court of Claims Act, Section 880 of the General Municipal Law, or any other provision of law.

(l) The Agency is hereby authorized and empowered to purchase insurance from any insurance company created by or under the laws of the State, or authorized by law to transact business in the State, against any liability imposed by the provisions of this Section 2, or to act as a self-insurer with respect thereto. The provisions of this Section 2 shall not be construed to impair, alter, limit or modify the rights and obligations of any insurer under any policy of insurance.

(m) All payments made under the terms of this Section 2, whether for insurance or otherwise, shall be deemed to be for a public purpose and shall be audited and paid in the same manner as other public charges.

(n) Except as otherwise specifically provided in this Section 2, the provisions of this Section 2 shall not be construed in any way to impair, alter, limit, modify, abrogate or restrict any immunity to liability available to or conferred upon any Member of the Agency by, in accordance with, or by reason of, any other provision of State or Federal statutory or common law. The benefits under this Section 2 shall supplement, and be available in addition to, defense or indemnification protection conferred by any law or enactment. This Section 2 is intended to confer upon Members of the Agency all of the benefits of Section 18 of the Public Officers Law

and to impose upon the Agency liability for costs incurred under the provisions hereof and thereof.

Section 3. Fiscal Year

The fiscal year of the Agency shall be fixed by the Members, subject to the applicable law.

Section 4. Powers of the Agency

The Agency shall have all the powers of an Industrial Development Agency authorized by Article 18-A of the General Municipal Law and shall have the power to do all things necessary or convenient to carry out its purposes and exercise the powers authorized herein.

PUBLIC HEARING RESOLUTION

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

RESOLUTION

A regular meeting of the City of Syracuse Industrial Development Agency was convened in public session on November 22, 2024 at 8:00 o'clock a.m., local time, in the Common Council Chambers, City Hall, 233 East Washington Street, Syracuse, New York.

The meeting was called to order by the Chair and upon the roll being duly called, the following members were:

PRESENT: Kathleen Murphy, Steven Thompson, Dirk Sonneborn, Rickey T. Brown, Kenneth Kinsey

THE FOLLOWING PERSONS WERE ALSO PRESENT: Staff Present: Eric Ennis, Susan Katzoff, Esq., Cole King, Lori McRobbie; Others Present: Paul Reichel, Esq., David Pida, Ellen Kackmann, Michelle Sczpanski, Tom Clifford, Brianca Hill, Barry Lentz

The following resolution was offered by Rickey T. Brown and seconded by Kenneth Kinsey:

RESOLUTION DETERMINING THAT THE ACQUISITION, RECONSTRUCTION, RENOVATION, EQUIPPING AND COMPLETION OF A COMMERCIAL FACILITY AT THE REQUEST OF THE COMPANY CONSTITUTES A PROJECT; DESCRIBING THE FINANCIAL ASSISTANCE IN CONNECTION THEREWITH; AND AUTHORIZING A PUBLIC HEARING

WHEREAS, the City of Syracuse Industrial Development Agency (the "***Agency***") is authorized and empowered by Title 1 of Article 18-A of the General Municipal Law of the State of New York (the "***State***"), as amended, together with Chapter 641 of the Laws of 1979 of the State of New York, as amended from time to time (collectively, the "***Act***"), to promote, develop, encourage and assist in the acquiring, constructing, reconstructing, improving, maintaining, equipping and furnishing of industrial, manufacturing, warehousing, commercial, research and recreation facilities, for the purpose of promoting economically sound commerce and industry to advance the job opportunities, health, general prosperity and economic welfare of the people of the State, to improve their recreation opportunities, prosperity and standard of living; and

WHEREAS, to accomplish its stated purposes, the Agency is authorized and empowered under the Act to grant "financial assistance" (as defined in the Act) in connection with the acquisition, reconstruction and equipping of one or more "projects" (as defined in the Act); and

WHEREAS, 800 South Wilbur Ave, Syracuse, LLC, a New York limited liability company, or an entity to be formed (the "***Company***"), by application dated November 5, 2024 (the "***Application***"), requested the Agency's assistance with a certain multi-faceted project the first phase of which (the "***Project***") consists of: (A)(i) the acquisition of an interest in

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots, from the larger parcel (the "***Land***"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (as well as a unit reserved for the on-site superintendent), all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the first phase of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "***Condominiums***"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement; and

WHERAS, pursuant to Article 8 of the Environmental Conservation Law of the State of New York, as amended, and the regulations of the Department of Environmental Conservation of the State of New York promulgated thereunder (collectively referred to hereinafter as "***SEQRA***"), the Agency is required to make a determination with respect to the environmental impact of any "action" (as said quoted term is defined in SEQRA) to be taken by the Agency and the approval of the Project constitutes such an action; and

WHEREAS, the Agency has not yet made a determination under SEQRA; and

WHEREAS, the Agency has not approved undertaking the Project or granting the Financial Assistance; and

WHEREAS, the grant of Financial Assistance to the Project is subject to, among other things, the Agency finding after a public hearing pursuant to Section 859-a of the Act that the Project will serve the public purposes of the Act by promoting economically sound commerce and industry to advance the job opportunities, health, general prosperity and economic welfare of the people of the State or increasing the overall number of permanent, private sector jobs in the

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

State.

NOW, THEREFORE, be it resolved by the members of the City of Syracuse Industrial Development Agency, as follows:

(1) Based upon the representations made by the Company to the Agency, the Agency makes the following findings and determinations:

(A) The Project constitutes a "project" within the meaning of the Act;

(B) The Financial Assistance contemplated with respect to the Project consists of assistance in the form of exemptions from real property taxes, mortgage recording tax and State and local sales and use taxation; and

(2) The Agency hereby directs that pursuant to Section 859-a of the Act, a public hearing with respect to the Project and Financial Assistance shall be scheduled with notice thereof published, and such notice, as applicable, shall further be sent to affected tax jurisdictions within which the Project is located.

(3) The Secretary or the Executive Director of the Agency is hereby authorized to and may distribute copies of this Resolution to the Company and to do such further things or perform such acts as may be necessary or convenient to implement the provisions of this Resolution.

(4) A copy of this Resolution shall be placed on file in the office of the Agency where the same shall be available for public inspection during business hours.

The question of the adoption of the foregoing resolution was duly put to vote on a roll call, which resulted as follows:

	AYE	NAY
Kathleen Murphy	X	
Steven Thompson	X	
Dirk Sonneborn	X	
Rickey T. Brown	X	
Kenneth Kinsey	X	

The foregoing Resolution was thereupon declared duly adopted.

Re: City of Syracuse Industrial Development Agency
800 South Wilbur Ave, Syracuse, LLC Project

Dear Mayor and County Executive,

We are counsel to the City of Syracuse Industrial Development Agency (the "***Agency***"). On behalf of the Agency, we hereby notify you that on December 9, 2024, the Agency will consider whether to approve the request by 800 South Wilbur Ave, Syracuse, LLC (the "***Company***") for deviation from the Agency's Uniform Tax Exemption Policy with respect to the above-referenced project to be located at 800 S. Wilbur Ave. Rear and 802 S. Wilbur Ave. which parcels are located in the City of Syracuse. Attached hereto at Schedule "A" is a description of the proposed deviation and the reasons therefor. If approved, the Agency and the Company will enter into a Payment in Lieu of Tax Agreement to evidence the proposed payment in lieu of tax abatement schedule.

We are providing this notice to you pursuant to Section 874(4)(c) of the General Municipal Law of the State of New York. The Agency will review and consider any correspondence received from any affected tax jurisdiction regarding the proposed deviation and allow any representative of an affected tax jurisdiction present at such meeting to address the Agency regarding the proposed deviation.

Should you desire to discuss this matter or the attached notice, please feel free to contact me at (315)701-6303.

Very truly yours,

/s/ Susan R. Katzoff

Susan R. Katzoff

Kathleen Murphy, Chair of the Agency, via email (with Enclosure)

Schedule A

The Agency, at the request of 800 South Wilbur Ave, Syracuse, LLC (the "***Company***") is considering undertaking a project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots, from the larger parcel (the "***Land***"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (as well as a unit reserved for the on-site superintendent), all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the first phase of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "***Condominiums***"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); and (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***").

As part of the Financial Assistance, the Company has requested the Agency consider a payment in lieu of tax ("***PILOT***") abatement schedule which deviates from the Agency's Uniform Tax Exemption Policy ("***UTEP***") pursuant to General Municipal Law Section 874(4). The Agency has not yet made a determination with respect to such request.

The requested PILOT schedule, attached as **Schedule "B"** hereto, varies from the schedule to which the Project would be subject under the Uniform Tax Exemption Policy of the Agency. Under the Agency's existing UTEP, the Project would qualify for a 15-year abatement period. The Property is currently off the tax roll and this Project will restore the Property to the taxable roll.

The Company has provided the following as justification for the requested deviation:

> The proposed Project, which will provide 261 units of affordable residential units, is only financially viable with the assistance of tax credits and related subsidies being provided by New York State.

As part of the State financing, the NYS Homes and Community Renewal ('***HFA***") will require a regulatory agreement to ensure the project's ongoing affordability. The HFA regulatory period is 30 years. HFA requires that the PILOT abatement period run conterminous with its regulatory period. As such, the Company is seeking a deviation from the Agency's UTEP.

The Company and Agency are proposing a 30-year abatement period which will provide for $975 per unit with a 2% escalator per annum for the term of the PILOT agreement.

This Project will be the first of its kind in decades and provides for the reimagination of a site that has been a historic blight on the community. When completed, the Project will provide affordable housing to residents facing a housing shortage while also providing opportunities for individual home ownership. In addition, the Project leverages the City's investment to demolish the existing structures and install infrastructure to allow for future growth and improvements. This is a generational project aimed at transforming the neighborhood and aligns with the City's housing strategy.

NOTICE OF PUBLIC HEARING WITH EVIDENCE OF PUBLICATION AND COPIES OF LETTERS TO AFFECTED TAX JURISDICTIONS PURSUANT TO SECTIONS 859-a OF THE ACT

NOTICE OF PUBLIC HEARING

NOTICE IS HEREBY GIVEN that a public hearing pursuant to Section 859-a of the New York General Municipal Law, will be held by the City of Syracuse Industrial Development Agency (the "Agency") on the 9th day of December, 2024, at 8:00 a.m., local time, at 233 East Washington Street, Common Council Chambers, City Hall, Syracuse, New York, in connection with the following matter:

800 South Wilbur Ave, Syracuse, LLC, or an entity to be formed (the "Company"), requested the Agency undertake a project (the "Project") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave. (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots, from the larger parcel (the "Land"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (as well as a unit reserved for the on-site superintendent), all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "Facility") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the first phase of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "Condominiums"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "Equipment" and together with the Land and the Facility, the "Project Facility"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "Financial Assistance"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement; and

The Company will be the initial owner or operator of the Project Facility.

The Agency will at the above-stated time and place hear all persons with views with respect to the proposed Financial Assistance to the Company, the proposed owner/operator, the location of the Project Facility and the nature of the Project.

A copy of the application filed by the Company with the Agency with respect to the Project, including an analysis of the costs and benefits of the Project, are available for public inspection during the business hours at the office of the Agency located at One Park Place, 300 South State Street, Suite 700, Syracuse, New York.

Re: City of Syracuse Industrial Development Agency (the "***Agency***")
800 South Wilbur Ave, Syracuse, LLC (the "***Company***")
800 South Wilbur Ave, Syracuse, LLC Project (the "***Project***")

Dear Mayor and County Executive:

Enclosed herewith please find a Notice of Public Hearing in relation to the above-referenced Project. The proposed Project consists of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave. (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots, from the larger parcel (the "***Land***"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (as well as a unit reserved for the on-site superintendent), all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257

vehicles (collectively, the "***Facility***") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the first phase of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "***Condominiums***"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "Equipment" and together with the Land and the Facility, the "***Project*** Facility"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

General Municipal Law Section 859-a requires that notice of the Public Hearing be given to the chief executive officer of each affected tax jurisdiction in which the Project is located.

As stated in the notice, the public hearing is scheduled for **December 9, 2024 at 8:00 a.m.** in the Common Council Chambers at City Hall.

Very truly yours,

/s/ Susan R. Katzoff

NOTICE OF PUBLIC HEARING

NOTICE IS HEREBY GIVEN that a public hearing pursuant to Section 859-a of the New York General Municipal Law, will be held by the City of Syracuse Industrial Development Agency (the "Agency") on the 9th day of December, 2024, at 8:00 a.m., local time, at 233 East Washington Street, Common Council Chambers, City Hall, Syracuse, New York, in connection with the following matter:

800 South Wilbur Ave, Syracuse, LLC, or an entity to be formed (the "Company"), requested the Agency undertake a project (the "Project") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave. (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots, from the larger parcel (the "Land"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (as well as a unit reserved for the on-site superintendent), all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "Facility") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the first phase of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "Condominiums"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "Equipment" and together with the Land and the Facility, the "Project Facility"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "Financial Assistance"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement; and

The Company will be the initial owner or operator of the Project Facility.

The Agency will at the above-stated time and place hear all persons with views with respect to the proposed Financial Assistance to the Company, the proposed owner/operator, the location of the Project Facility and the nature of the Project.

A copy of the application filed by the Company with the Agency with respect to the Project, including an analysis of the costs and benefits of the Project, are available for public inspection during the business hours at the office of the Agency located at One Park Place, 300 South State Street, Suite 700, Syracuse, New York.

INDUCEMENT RESOLUTION

A regular meeting of the City of Syracuse Industrial Development Agency was convened in public session on December 9, 2024 at 8:00 o'clock a.m., local time, in the Common Council Chambers, City Hall, 233 East Washington Street, Syracuse, New York.

The meeting was called to order by the Chair and upon the roll being duly called, the following members were:

PRESENT: Kathleen Murphy, Steven Thompson, Dirk Sonneborn, Rickey T. Brown, Kenneth Kinsey

THE FOLLOWING PERSONS WERE ALSO PRESENT: **Staff Present:** Eric Ennis, Susan Katzoff, Esq., Cole King, Lori McRobbie; **Others Present**: Paul Reichel, Esq., Janice McKenna, Joe McNinch, Eli Sands, Tom Clifford, Kerry Quaglia, Lowell Niemetz, Barry Lentz, Rick Moriarty

The following resolution was offered by Dirk Sonneborn and seconded by Rickey T. Brown:

RESOLUTION AUTHORIZING THE UNDERTAKING, ACQUISITION, CONSTRUCTION, EQUIPPING AND COMPLETION OF A PROJECT; APPOINTING THE COMPANY AS AGENT OF THE AGENCY FOR THE PURPOSE OF THE ACQUISITION, CONSTRUCTION, EQUIPPING AND COMPLETION OF THE PROJECT; AND AUTHORIZING THE EXECUTION AND DELIVERY OF AN AGREEMENT BETWEEN THE AGENCY AND THE COMPANY

WHEREAS, the City of Syracuse Industrial Development Agency (the "***Agency***") is authorized and empowered by Title 1 of Article 18-A of the General Municipal Law of the State of New York (the "***State***"), as amended, together with Chapter 641 of the Laws of 1979 of the State of New York, as amended from time to time (collectively, the "***Act***") to promote, develop, encourage and assist in the acquiring, constructing, improving, maintaining, equipping and furnishing of industrial, manufacturing, warehousing, commercial, research and recreation facilities, including industrial pollution control facilities, railroad facilities and certain horse racing facilities, for the purpose of promoting, attracting, encouraging and developing recreation and economically sound commerce and industry to advance the job opportunities, health, general prosperity and economic welfare of the people of the State, and to improve their recreation opportunities, prosperity and standard of living; and

WHEREAS, to accomplish its stated purposes, the Agency is authorized and empowered under the Act to acquire, lease and sell real property and grant financial assistance in connection with one or more "projects" (as defined in the Act); and

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

WHEREAS, 800 South Wilbur Ave, Syracuse, LLC, a New York limited liability company, or an entity to be formed (the "***Company***"), by application dated November 5, 2024 (the "***Application***"), requested the Agency undertake a project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "***Condominiums***"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement; and

WHEREAS, as part of the Financial Assistance, the Company requested the Agency consider a payment in lieu of tax ("***PILOT***") abatement schedule which deviates from with the Agency's Uniform Tax Exemption Policy ("***UTEP***") established pursuant to General Municipal Law Section 874(4); and

WHEREAS, by correspondence dated November 25, 2024 and December 4, 2024, in accordance with Section 874(4)(c) of the General Municipal Law of the State of New York, notice of the deviation from the Agency's Uniform Tax Exemption Policy with respect to the Project was sent to the affected tax jurisdictions; and

WHEREAS, the Land has been owned by the State of New York and/or the City of Syracuse (the "***City***") for more than one hundred years and has been vacant for at least the past 14 years before being seized through tax foreclosure by the City; and

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

WHEREAS, during that time, the Land generated zero dollars in ad valorem taxes to the taxing jurisdictions. The requested Financial Assistance will result in the receipt of over ten million ($10,000,000) in revenue for the benefit of the taxing jurisdictions over the course of the proposed payment in lieu of tax abatement schedule; and

WHEREAS, the Land had become a blight on the neighborhood and has experienced illegal trespassing, property damage, and other forms of vandalism that has led to further worsening of the physical condition of the Land and a drain on other City resources; and

WHEREAS, the City, with the support of the Agency, caused a City-wide housing study to be completed which identified the breadth and scope of the housing crisis, spanning both affordability and conditions, in the City. In recognition of the housing crisis, the Agency and the City continue to coordinate investments, as and when applicable, to leverage resources, as intentionally as possible, to maximize impact, and help to achieve our mutual goal of improving the overall housing market and conditions within the City; and

WHEREAS, the Project will result in hundreds of new affordable housing options for residents of the City at a time when the City is facing a housing crisis; and

WHEREAS, under the Act, the Agency is tasked, in part, with improving the health, general prosperity and economic welfare of the people it serves and improves their recreation opportunities, prosperity and standard of living; and

WHEREAS, the Agency adopted a resolution on November 22, 2024, describing the Project and the proposed Financial Assistance and authorizing a public hearing with respect thereto ("***Public Hearing Resolution***"); and

WHEREAS, the Agency conducted a public hearing with respect to the Project and the proposed Financial Assistance on December 9, 2024 pursuant to Section 859-a of the Act, notice of which was originally published on November 26, 2024, in the Post-Standard, a newspaper of general circulation in the City of Syracuse, New York and given to the chief executive officers of the affected tax jurisdictions by letters dated November 26, 2024; and

WHEREAS, pursuant to Article 8 of the Environmental Conservation Law of the State of New York, as amended, and the regulations of the Department of Environmental Conservation of the State of New York promulgated thereunder (collectively referred to hereinafter as "***SEQRA***"), the Agency is required to make a determination whether the "action" (as said quoted term is defined in SEQRA) to be taken by the Agency may have a "significant impact on the environment" (as said quoted term is utilized in SEQRA), and the preliminary agreement of the Agency to undertake the Project constitutes such an action; and

WHEREAS, the Company caused a Full Environmental Assessment Form ("***EAF***") to be prepared and submitted to the City of Syracuse Planning Commission (the "***Planning Commission***") to obtain approval for a project that includes, in substantial form, the Project being undertaken by the Agency; and

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

WHEREAS, the Planning Commission provided notice of its determination that the Project constitutes a Type I Action and its intent to act as Lead Agency for review of the Project; and

WHEREAS, on December 2, 2024, the Planning Commission, as lead agency, and consistent with the procedures and criteria set forth in 6 NYCRR 617.7, analyzed the relevant areas of environmental concern using the SEQRA standards and determined that the project will not have a significant environmental impact; and

WHEREAS, the Agency has given due consideration to the policy, purposes and requirements of the Act, the outcome of the housing study and the Application as well as the representations by the Company that the provision of Financial Assistance: (i) will induce the Company to develop the Project Facility in the City of Syracuse; (ii) will not result in the removal of a commercial, industrial or manufacturing plant or facility of the Company or any other proposed occupant of the Project Facility from one area of the State to another area of the State or in the abandonment of one or more plants or facilities of the Company or any other proposed occupant of the Project Facility located in the State, except as may be permitted by the Act; and (iii) the Project will serve the purposes of the Act by advancing, the standard of living, job opportunities and the economic welfare of the people of the State and the City and improve their standard of living.

NOW, THEREFORE, be it resolved by the members of the City of Syracuse Industrial Development Agency as follows:

Section 1. It is the policy of the State to promote the health, economic welfare, recreation opportunities and prosperity of its inhabitants and to actively promote, attract, encourage and develop recreation and economically sound commerce and industry for the purpose of preventing unemployment and economic deterioration. It is among the purposes of the Agency to promote, develop, encourage and assist in the acquiring, constructing, improving, maintaining, equipping and furnishing of certain facilities, including commercial facilities, and thereby advance the job opportunities, health, general prosperity and economic welfare of the people of the State and to improve their recreation opportunities, prosperity and standard of living.

Section 2. Based upon the representations and projections made by the Company to the Agency, as well as the factors set forth in the recitals hereof all of which are incorporated herein by reference, and considering the comments made or submitted at the public hearing, if any, the Agency hereby makes the following findings and determinations:

(A) The Project constitutes a "*project*" within the meaning of the Act;

(B) The acquisition of a controlling interest in the Project Facility by the Agency and the designation of the Company as the Agency's agent for completion of the Project will be an inducement to the Company to acquire, construct, equip and complete the Project Facility in the City, and will serve the purposes of the Act by, among other things, advancing job opportunities, the health, standard of living and economic welfare of the inhabitants of the City, by among other things, increasing housing options in the City;

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

(C) The Project will not result in the removal of a commercial, industrial or manufacturing plant or facility of the Company or any other proposed occupant of the Project Facility from one area of the State to another area of the State or result in the abandonment of one or more plants or facilities of the Company or any other proposed occupant of the Project Facility located in the State, except as may be permitted by the Act;

(D) The Financial Assistance approved hereby includes an exemption from State and local sales and use taxes in an amount not to exceed **$2,537,368. Such exemption shall not be used for the Condominiums.** The Agency shall separately consider the Company's request for exemptions from real property taxes; and

(E) To appointment the Company as agent of the Agency as further set forth herein.

Section 3. The Company shall execute and deliver a copy of the agreement attached hereto at **Exhibit "A"** to the Agency within **fourteen (14) business days** from the date of this Resolution (the "***Agreement***"). The Agency shall have no obligation to confer any approved benefits authorized herein or in any other resolution adopted by the Agency with respect to the Project, and all such approvals shall be subject to recission should the Company fail to execute and deliver the Agreement in accordance with the terms hereof.

Section 4. As a condition to the appointment of the Company as agent of the Agency, and the conference of any approved Financial Assistance (A) the Company and the Agency shall first execute and deliver: (i) the Agreement; (ii) a project agreement in substantially the same form used by the Agency in similar transactions (the "***Project Agreement***"); and (iii) the Lease Documents (as defined herein), unless otherwise authorized by the Agency; and (B), and the Company shall provide proof that (i) they have acquired title to the Land from the City; (ii) evidence satisfactory to the Agency providing for the timely construction and completion of the Condominiums; and (iii) all real estate taxes due and owing on the Project Facility are current. The Chair, Vice Chair or Executive Director of the Agency are each hereby authorized, on behalf of the Agency, to execute and deliver the Agreement, the Project Agreement and the Lease Documents (as defined herein), in form and substance similar to other such agreements and documents used by the Agency for similar transactions, with changes in terms and form as shall be consistent with this Resolution and as the Chair or Vice Chair shall approve. The execution thereof by the Chair, Vice Chair and/or Executive Director shall constitute conclusive evidence of such approval. Subject to the due execution and delivery by the Company of the Agreement, the Project Agreement and the Lease Documents, the satisfaction of the conditions of this Resolution, the Agreement, the Project Agreement, the Lease Documents and the payment by the Company of any attendant fees and costs of the Agency, the Company and its designees, are appointed the true and lawful agent of the Agency to proceed with the reconstruction, renovation, restoration, preservation, equipping and completion of the Project, all with the same powers and the same validity as if the Agency were acting in its own behalf.

Section 5. Subject to the terms of this Resolution and the execution and delivery of, and the conditions set forth in the Agreement and the Project Agreement, the Agency will:

(i) acquire an interest in the Land and Facility pursuant to a lease agreement (the "***Lease***") to be entered into between the Company and the Agency; accept an interest in the Equipment pursuant to a bill of sale from the Company (the "***Bill of Sale***"); (ii) sublease the Project Facility to the Company pursuant to a sublease agreement (the "***Sublease***" and with the Lease and the Bill of Sale, and all other documents required by the Agency for similar transactions, including but not limited to, an environmental compliance and indemnification agreement, collectively, the "***Lease Documents***") to be entered into between the Agency and the Company; (iii) grant the approved Financial Assistance, subject to the approval and execution of the PILOT Agreement; and (iv) provided that no default shall have occurred and be continuing under the Agreement and provided the Company has executed and delivered all documents and certificates required by the Agency in conjunction with the Agency's undertaking of the Project, execute and deliver all other certificates and documents necessary or appropriate for the grant of the approved Financial Assistance, in form and substance acceptable to the Agency.

Section 6. The terms and conditions of subdivision 3 of Section 875 of the Act are herein incorporated by reference and the Company shall agree to such terms as a condition precedent to receiving or benefiting from an exemption from State and local sales and use tax exemptions benefits.

Section 7. Subject to the terms of this Resolution, the Agreement and the Project Agreement, the Company may utilize, and is hereby authorized to appoint, a Project operator, contractors, agents, subagents, subcontractors, contractors and subcontractors of such agents and subagents (collectively, "***Additional Agents***") to proceed with the reconstruction, renovation, restoration, preservation, equipping and completion of the Project Facility, all with the same powers and the same validity as if the Agency were acting in its own behalf, provided the Company execute, deliver and comply with the Agreement. The Company shall provide, or cause its Additional Agents to provide, and the Agency shall maintain, records of the amount of State and local sales and use tax exemption benefits provided to the Project Facility and the Company shall, and cause each Additional Agent, to make such records available to the State Commissioner of Taxation and Finance (the "***Commissioner***") upon request. The Agency shall, within thirty (30) days of providing any State sales and use tax exemption benefits, report to the Commissioner the amount of such benefits for the Project Facility, identifying the Project Facility, along with any such other information and specificity as the Commissioner may prescribe. As a condition precedent to the Company or Project Facility's receipt of, or benefit from, any State or local sales and use tax exemptions, the Company must acknowledge and agree to make, or cause its Additional Agents to make, all records and information regarding State and local sales and use tax exemption benefits realized by the Project Facility available to the Agency or its designee upon request. for purposes of exemption from New York State (the "***State***") sales and use taxation as part of the Financial Assistance requested, "sales and use taxation" shall mean sales and compensating use taxes and fees imposed by article twenty-eight or twenty-eight-A of the New York State tax law but excluding such taxes imposed in a city by section eleven hundred seven or eleven hundred eight of such article twenty-eight.

Section 8. The Chair, Vice Chair and/or the Executive Director of the Agency, acting individually, are each hereby authorized and directed, for and in the name and on behalf of the Agency, to execute and deliver the documents and agreements identified herein and any such

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

additional certificates, instruments, documents or affidavits, to pay any such other fees, charges and expenses, to make such other changes, omissions, insertions, revisions, or amendments to the documents referred herein as the (Vice) Chair deems appropriate, and to do and cause to be done any such other acts and things, as they determine, on advice of counsel to the Agency, may be necessary or desirable to consummate the transactions contemplated by this Resolution, the Agreement and/or the Project Agreement.

Section 9. The obligation of the Agency to consummate any transaction contemplated herein or hereby is subject to and conditioned upon the Company's execution and delivery of the documents set forth in Sections 3, 4 and 5 hereof and in compliance with the terms of this Resolution.

Section 10. No covenant, stipulation, obligation or agreement contained in this resolution or any document referred to herein shall be deemed to be the covenant, stipulation, obligation or agreement of any member, officer, agent or employee of the Agency in his or her individual capacity. Neither the members nor officers of the Agency, nor any person executing any documents referred to above on behalf of the Agency, shall be liable thereon or be subject to any personal liability or accountability by reason of the execution or delivery thereof.

Section 11. Should the Agency's participation in the Project, or the appointments made in accordance herewith, be challenged by any party, in the courts or otherwise, the Company shall defend, indemnify and hold harmless the Agency and its members, officers and employees from any and all losses arising from any such challenge including, but not limited to, the fees and disbursement of the Agency's counsel. Should any court of competent jurisdiction determine that the Agency is not authorized under the Act to participate in the Project, this Resolution shall automatically become null, void and of no further force and effect, and the Agency shall have no liability to the Company hereunder or otherwise.

Section 12. Bousquet Holstein PLLC, as counsel to the Agency, is hereby authorized to work with the Company and others to prepare for submission to the Agency, all documents necessary to effect the grant of Financial Assistance and consummate the Lease Documents.

Section 13. The Secretary and/or the Executive Director of the Agency are hereby authorized and may distribute copies of this Resolution and do such further things or perform such acts as may be necessary or convenient to implement the provisions of this Resolution.

Section 14. This Resolution shall take effect immediately. A copy of this Resolution, together with the attachments hereto, shall be placed on file in the office of the Agency where the same shall be available for public inspection during business hours.

STATE OF NEW YORK)
) **SS.:**
COUNTY OF ONONDAGA)

I, the undersigned Secretary of the City of Syracuse Industrial Development Agency, **DO HEREBY CERTIFY** that I have compared the annexed extract of the minutes of the meeting of the City of Syracuse Industrial Development Agency (the "***Agency***") held on December 9, 2024, with the original thereof on file on file in the office of the Agency, and that the same (including all exhibits) is a true and correct copy of the proceedings of the Agency and of the whole of such original insofar as the same relates to the subject matters referred to therein.

I FURTHER CERTIFY that (i) all members of the Agency had due notice of such meeting, (ii) pursuant to Section 104 of the Public Officers Law (Open Meetings Law), such meeting was open to the general public and public notice of the time and place of such meeting was duly given in accordance with such Section 104, (iii) the meeting was in all respects duly held, and (iv) there was a quorum present throughout.

I FURTHER CERTIFY that, as of the date hereof, the attached resolution is in full force and effect and has not been amended, repealed or rescinded.

IN WITNESS WHEREOF, I have set my hand and affixed the seal of the Agency on 1/8/2025.

City of Syracuse Industrial Development Agency

EXHIBIT "A"

AGENCY/COMPANY AGREEMENT

THIS AGREEMENT is between **CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY** (the "***Agency***"), with an office at One Park Place, 300 South State Street, Suite 700, Syracuse, New York 13202 and 800 South Wilbur Ave, Syracuse, LLC, with a mailing address of 1001 Franklin Avenue, Suite 300, Garden City, New York 11530 (the "***Company***").

Article 1. Preliminary Statement. Among the matters of mutual inducement which have resulted in the execution of this agreement are the following:

1.01. The Agency is authorized and empowered by the provisions of Title 1 of Article 18-A of the General Municipal Law of the State of New York (the "***State***"), as amended, and Chapter 641 of the Laws of 1979 of the State (collectively, the "***Act***") to designate an agent for constructing, renovating and equipping "projects" (as defined in the Act).

1.02. The purposes of the Act are to promote, attract, encourage and develop recreation and economically sound commerce and industry in order to advance the job opportunities, health, general prosperity and economic welfare of the people of the State, to improve their recreation opportunities, prosperity and standard of living, and to prevent unemployment and economic deterioration. The Act vests the Agency with all powers necessary to enable it to accomplish such purposes, including the power to acquire and dispose of interests in real property and to appoint agents for the purpose of completion of projects undertaken by the Agency.

The Company, by application dated November 5, 2024 (the "***Application***"), requested the Agency undertake a project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "***Condominiums***"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

1.03(a). All documents necessary to effectuate the Agency's undertaking of the Project and the granting of the approved Financial Assistance between the Agency and the Company, including but not limited to, a project agreement, a company lease agreement, an agency lease agreement, a bill of sale and an environmental compliance and indemnification agreement, shall be collectively referred to herein as the "***Lease Documents***".

1.03. The Company hereby represents to the Agency that undertaking the Project, the designation of the Company as the Agency's agent for the construction, equipping and completion of the Project Facility, and the use and appointment, as necessary, by the Company of a Project operator, contractors, agents, subagents, subcontractors, contractors and subcontractors of such agents and subagents (collectively, "***Additional Agents***"): (i) will be an inducement to it to construct and equip the Project Facility in the City of Syracuse (the "***City***"); (ii) will not result in the removal of a commercial, industrial or manufacturing plant or facility of the Company or of any other proposed occupant of the Project Facility from one area of the State to another or in the abandonment of one or more plants or facilities of the Company or of any other proposed occupant of the Project Facility located in the State, except as may be permitted by the Act; and (iii) undertaking the Project Facility will promote, create and/or preserve private sector jobs in the State.

1.04. The Agency has determined that the acquisition of a controlling interest in, and the construction and equipping of the Project Facility and the subleasing of the same to the Company will promote and further the purposes of the Act.

1.05. On December 9, 2024, the Agency adopted a resolution (the "***Inducement Resolution***") agreeing, subject to the satisfaction of all conditions precedent set forth in such Resolution, to designate the Company as the Agency's agent for the acquisition, construction and equipping of the Project Facility and determining that the leasing of the same to the Company will promote further purposes of the Act. For purposes of that designation, the Agency authorized as part of the approved Financial Assistance, State and local sales and use tax exemption benefits in an amount not to exceed **$2,537,368. Such exemption shall not be used for the Condominiums.**

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

1.06. In the Resolution, subject to the execution of, and compliance with, this Agreement by the Company, the execution and delivery of a project agreement by the Company, and other conditions set forth in the Resolution and herein, the Agency appointed the Company as its agent for the purposes of construction and equipping the Project Facility, entering into contracts and doing all things requisite and proper for construction and equipping the Project Facility.

Article 2. Undertakings on the Part of the Agency. Based upon the statement, representations and undertakings of the Company and subject to the conditions set forth herein, the Agency agrees as follows:

2.01. The Agency confirms that it has authorized and designated, pursuant to the terms hereof, the Company as the Agency's agent for constructing and equipping the Project Facility.

2.02. The Agency will adopt such proceedings and authorize the execution of such Agency documents as may be necessary or advisable for: (i) acquisition of a controlling interest in the Project Facility; (ii) designation by the Company of Additional Agents for construction and equipping of the Project Facility subject to the terms hereof; and (iii) the leasing or subleasing of the Project Facility to the Company, all as shall be authorized by law and be mutually satisfactory to the Agency and the Company.

2.03. Nothing contained in this Agreement shall require the Agency to apply its funds to Project costs.

2.04. After satisfying the conditions precedent set forth in the Sections 2.05, 3.06 and 4.02 hereof and in the Inducement Resolution, the Company may proceed with the construction and equipping of the Project Facility and the utilization of and, as necessary the appointment of, Additional Agents.

2.05. Subject to the execution of the Lease Documents, the Inducement Resolution and Section 4.02 hereof, the Company is appointed the true and lawful agent of the Agency: (i) for the construction and equipping of the Project Facility; and (ii) to make, execute, acknowledge and deliver any contracts, orders, receipts, writings and instructions, as the stated agent for the Agency, and in general to do all things which may be requisite or proper for the construction and equipping of the Project Facility, all with the same powers and the same validity as if the Agency were acting in its own behalf.

2.06. The Agency will take or cause to be taken such other acts and adopt such further proceedings as may be required to implement the aforesaid undertakings or as it may deem appropriate in pursuance thereof. The Agency may in accordance with Article 8 of the Environmental Conservation Law of the State of New York, as amended, and the regulations of the Department of Environmental Conservation of the State of New York promulgated thereunder (collectively referred to hereinafter as "***SEQRA***"), undertake supplemental review of the Project. Such review to be limited to specific significant adverse environmental impacts not addressed or inadequately addressed in the Agency's review under SEQRA that arise from

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

changes in the proposed Project, newly discovered information or a change in the circumstances related to the Project.

Article 3. Undertakings on the Part of the Company. Based upon the statements, representations and undertakings of the Agency and subject to the conditions set forth herein the Company agrees as follows:

3.01. (a) The Company shall indemnify and hold the Agency harmless from all losses, expenses, claims, damages and liabilities arising out of or based on labor, services, materials and supplies, including but not limited to, equipment, ordered or used in connection with the acquisition of a controlling interest in, and construction and equipping of the Project Facility and/or the Condominiums (including any expenses incurred by the Agency in defending any claims, suits or actions which may arise as a result of any of the foregoing), whether such claims or liabilities arise as a result of the Company or Additional Agents acting as agent for the Agency pursuant to this Agreement or otherwise.

(b) The Company shall not permit to stand, and will, at its own expense, take all steps reasonably necessary to remove, any mechanics' or other liens against the Project Facility for labor or material furnished in connection with the acquisition, construction and equipping of the Project Facility.

(c) The Company shall indemnify and hold the Agency, its members, officers, employees and agents and anyone for whose acts or omissions the Agency or any one of them may be liable, harmless from all claims and liabilities for loss or damage to property or any injury to or death of any person that may be occasioned subsequent to the date hereof by any cause whatsoever in relation to the Project Facility and/or the Condominiums, including any expenses incurred by the Agency in defending any claims, suits or actions which may arise as a result of the foregoing.

(d) The Company shall defend, indemnify and hold the Agency harmless from all losses, expenses, claims, damages and liabilities arising out of or based on the non-disclosure of information, if any, requested by the Company in accordance with Section 4.05 hereof.

(e) The defense and indemnities provided for in this Article 3 shall survive expiration or termination of this Agreement and shall apply whether or not the claim, liability, cause of action or expense is caused or alleged to be caused, in whole or in part, by the activities, acts, fault or negligence of the Agency, its members, officers, employees and agents, anyone under the direction and control of any of them, or anyone for whose acts or omissions the Agency or any of them may be liable, and whether or not based upon the breach of a statutory duty or obligation or any theory or rule of comparative or apportioned liability, subject only to any specific prohibition relating to the scope of indemnities imposed by statutory law.

(f) The Company shall provide and carry: (i) worker's compensation and disability insurance as required by law; and (ii) comprehensive liability and property insurance with such coverages (including without limitation, owner's protective coverage for the benefit of the Agency, naming the Agency as an additional insured on all policies of coverage regarding the

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

Project; providing the coverage with respect to the Agency be primary and non-contributory; and contractual coverage covering the indemnities herein provided for), with such limits and which such companies as may be approved by the Agency. Upon the request of the Agency, the Company shall provide certificates, endorsements, binders and/or policies of insurance in form satisfactory to the Agency evidencing such insurance.

(g) The Company shall apply and diligently pursue all approvals, permits and consents from the State of New York, the City, the City Planning Commission and any other governmental authority which approvals, permits and consents are required under applicable law for the development, construction and equipping of the Project and any related site improvements. The Company acknowledges and agrees that the Agency's findings and determinations under SEQRA do not and shall not in and of themselves (except as specifically set forth in SEQRA) satisfy or be deemed to satisfy applicable laws, regulations, rules and procedural requirements applicable to such approvals, permits and consents.

(h) The Company shall complete a Local Access Agreement to be obtained from the City of Syracuse Industrial Development Agency and agrees to utilize, and cause its Additional Agents to utilize, local contractors and suppliers for the construction, equipping and completion of the Project unless a waiver is received from the Agency in writing. For purposes of this Agency Agreement, the term "***Local***" shall mean Onondaga, Oswego, Oneida, Madison, Cayuga and Cortland Counties. The Company agrees that such Local contractors shall be provided the opportunity to bid on contracts related to the Project Facility.

3.02. The Company agrees that, as agent for the Agency or otherwise, it will comply at the Company's sole cost and expense with all the requirements of all federal, state and local laws, rules and regulations of whatever kind and howsoever denominated applicable to the Agency and/or Company with respect to the Project, the acquisition of a controlling interest therein, construction and equipping thereof, the operation and maintenance of the Project, supplemental review of adverse environmental impacts in accordance with SEQRA and the financing of the Project. Every provision required by law to be inserted herein shall be deemed to be set forth herein as if set forth in full, including, but not limited to, Section 875 of the Act; and upon the request of either party, this Agreement shall be amended to specifically set forth any such provision or provisions.

3.03. The Company agrees that, as agent for the Agency or otherwise, to the extent that such provisions of law are in fact applicable (without creating an obligation by contract beyond that which is created by statute) it will comply with the requirements of Section 220 of the Labor Law of the State of New York, as amended.

3.04. The Company will take such further action and adopt such further proceedings as may be required to implement its aforesaid undertakings or as it may deem appropriate in pursuance thereof.

3.05. If it should be determined that any State or local sales or compensatory use taxes are payable with respect to the acquisition, purchase or rental or machinery or equipment, materials or supplies in connection with the Project Facility, or are in any manner otherwise

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

payable directly or indirectly in connection with the Project Facility, the Company shall pay the same and defend and indemnify the Agency from and against any liability, expenses and penalties arising out of, directly or indirectly, the imposition of any such taxes.

3.06 The Company shall proceed with the acquisition, construction, equipping and completion of the Project and advance such funds as may be necessary to accomplish such purposes. The Company may appoint Additional Agents as agents of the Agency in furtherance of the Project Facility. Any appointment of an Additional Agent is conditioned upon the Company first obtaining and providing the Agency the following:

(1) A written, executed agreement, in form and substance acceptable to the Agency, from each Additional Agent which provides for the assumption by the Additional Agent, for itself, certain of the obligations under this Agreement relative to the appointment, work and purchases done and made by each Additional Agent; (ii) a commitment to utilize local contractors and suppliers for the construction and equipping of the Project ("local" being defined in Section 3.01(h) hereof); (iii) an acknowledgement that the Additional Agent is obligated, to timely provide the Company with the necessary information to permit the Company, pursuant to General Municipal Law §874(8), to timely file an Annual Statement with the Agency and the New York State Department of Taxation and Finance on "Annual Report of Sales and Use Tax Exemptions" (Form ST-340) regarding the value of sales and use tax exemptions the Additional Agent claimed pursuant to the agency conferred on it by the Company with respect to this Project; (iv) an acknowledgment by the Additional Agent that the failure to comply with the foregoing will result in the loss of the exemption; and (v) such other terms and conditions as the Agency deems necessary; and

(2) A completed "IDA Appointment of Project Operator or Agent for Sales Tax Purposes" (Form ST-60) for each Additional Agent appointed within fifteen (15) days of the appointment of each Additional Agent such that the Agency can execute and deliver said form to the State Department of Taxation and Finance within thirty (30) days of appointment of each such Additional Agent.

Failure of the Company to comply with the foregoing shall nullify the appointment of any Additional Agent and may result in the loss of the Company's exemption with respect to the Project Facility at the sole discretion of the Agency.

The Company acknowledges that the assumption by the Additional Agent in accordance with Section 3.06(1) above, does not relieve the Company of its obligations under those provisions or any other provisions of this Agreement with respect to the Project.

For the avoidance of doubt, no exemptions from State or local sales and use taxes that forms the basis for the Financial Assistance provided by the Agency, shall be used or realized with respect to the Condominiums.

3.07 The Company ratifies and confirms its obligations to pay an annual administrative reporting fee in accordance with the Agency's fee schedule to cover administrative and reporting requirements to comply with New York State reporting regulations on Agency assisted projects.

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

In addition, the Company ratifies and confirms its absolute obligation **to pay on demand** all of the Agency's legal fees associated with the undertaking of the Project, including but not limited to, review of the application, preparation of resolutions and attendance at meetings and to correspondence and calls, regardless of whether benefits are ultimately conferred on the Project.

Article 4. General Provisions.

4.01. This Agreement shall take effect on the date of the execution hereof by the Agency and the Company and, subject to Section 4.04 hereof, shall remain in effect until the Lease Documents become effective. It is the intent of the Agency and the Company that, except as to those provisions that survive, this Agreement be superseded in its entirety by the Lease Documents.

4.02. (a) It is understood and agreed by the Agency and the Company that the grant of Financial Assistance and the execution of the Lease Documents and related documents are subject to: (i) payment by the Company of the Agency's fee and Agency's counsel fees; (ii) obtaining all necessary governmental approvals, permits and consents of any kind required in connection with the Project; (iii) approval by the members of the Agency; (iv) approval by the Company; and (v) the condition that there are no changes in New York State Law, including regulations, which prohibit or limit the Agency from fulfilling its obligations hereunder; and

(b) the Company, by executing this agreement, acknowledges and agrees to make, or cause its Additional Agents, to make, all records and information regarding State and local sales and use tax exemption benefits given to the Project Facility as part of the Financial Assistance available to the Agency upon request, including but not limited to the Form ST-340 for itself and each Additional Agent; and

(c) the Company, by executing this Agreement, acknowledges and agrees to the terms and conditions of the Agency's Recapture of Benefits Policy and Section 875(3) of the Act as if such section were fully set forth herein and further agrees to cause all of its Additional Agents to acknowledge, agree and consent to same. Without limiting the scope of the foregoing the Company acknowledges that pursuant to Section 875(3) of the Act, and in accordance with the Agency's Recapture of Benefits Policy, the Agency shall, and in some instances may, recover, recapture, receive or otherwise obtain from the Company some or all of the Financial Assistance (the "***Recapture Amount***") including, but not limited to: (1) (a) that portion of the State and local sales and use tax exemption to which the Company was not entitled, which is in excess of the amount of the State and local sales and use tax exemption authorized by the Agency or which is for property or services not authorized by the Agency; or (b) the full amount of such State and local sales and use tax exemption, if the Company fails to comply with a material term or condition regarding the use of the property or services as represented to the Agency in its Application or otherwise; or (c) the full amount of such State and local sales and use tax exemption in the event the Company fails to execute and deliver the Lease Documents in accordance herewith or fails to complete the Project; and (2) any interest or penalties thereon imposed by the Agency or by operation of law or by judicial order or otherwise; and (d) the failure of the Company to promptly pay such Recapture Amount to the Agency will be grounds for the Commissioner to collect sales and use taxes from the Company under Article 28 of the

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

State Tax Law, together with interest and penalties. In addition to the foregoing, the Company acknowledges and agrees that for purposes of exemption from New York State (the "***State***") sales and use taxation as part of the Financial Assistance requested, "sales and use taxation" shall mean sales and compensating use taxes and fees imposed by article twenty-eight or twenty-eight-A of the New York State tax law but excluding such taxes imposed in a city by section eleven hundred seven or eleven hundred eight of such article twenty-eight. In addition to the foregoing, the Agency may recapture other benefits comprising the Financial Assistance in accordance with the Agency's Recapture Policy (a copy of which is on the Agency's website).

4.03. The Company agrees that it will, within thirty (30) days of a written request for same, regardless of whether or not this matter closes or the Project is completed: (i) reimburse the Agency for all reasonable and necessary expenses, including without limitation the fees and expenses of counsel to the Agency arising from, out of or in connection with the Project, and/or any documents executed in connection therewith, including, but not limited to any claims or actions taken by the Agency against the Company, Additional Agents or third parties; and (ii) indemnify the Agency from all losses, claims, damages and liabilities, in each case which the Agency may incur as a consequence of executing this Agreement or performing its obligations hereunder, including but not limited to, any obligations related to Additional Agents.

4.04. If for any reason the Lease Documents are not executed and delivered by the Company and the Agency on or before **December 9, 2025**, the provisions of this Agreement (other than the provisions of Articles 1.04, 2.02, 2.04, 3.01, 3.02, 3.03, 3.05, 3.06, 4.02, 4.03, 4.04, 4.05 and 4.06, which shall survive) shall, unless extended by agreement of the Agency and the Company, terminate and be of no further force or effect, and following such termination neither party shall have any rights against the other party except:

(a) The Company shall pay the Agency for all expenses incurred by the Agency in connection with the acquisition, construction and equipping of the Project Facility;

(b) The Company shall assume and be responsible for any contracts for the construction or purchase of equipment entered into by the Agency at the request of or as agent for the Company in connection with the Project Facility; and

(c) The Company will pay the out-of-pocket expenses of members of the Agency and counsel for the Agency incurred in connection with the Project Facility and will pay the fees of counsel for the Agency for legal services relating to the Project Facility, Additional Agents or the proposed financing thereof.

4.05. **The Company acknowledges that Section 875(7) of the New York General Municipal Law ("*GML*") requires the Agency to post on its website all resolutions and agreements relating to the Company's appointment as an agent of the Agency or otherwise related to the Project, including this Agreement; and Article 6 of the New York Public Officers Law declares that all records in the possession of the Agency (with certain limited exceptions) are open to public inspection and copying. If the Company feels that there are elements of the Project or information about the Company in the Agency's possession**

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

which are in the nature of trade secrets or information, the nature of which is such that if disclosed to the public or otherwise widely disseminated would cause substantial injury to the Company's competitive position, the Company must identify such elements in writing, supply same to the Agency: (i) with respect to this Agreement, prior to or contemporaneously with the execution hereof; and (ii) with respect to all other agreements executed in connection with the Project, on or before the Closing Date, and request that such elements be kept confidential in accordance with Article 6 of the Public Officers Law. Failure to do so will result in the posting by the Agency of all information in accordance with Section 875 of the GML.

4.06 That every controversy, dispute or claim arising out of or relating to this Agreement shall be governed by the laws of the State of New York, without regard to its conflict-of-laws provisions that if applied might require the application of the laws of another jurisdiction; and that the Company irrevocably and expressly submits to the exclusive personal jurisdiction of the Supreme Court of the State of New York and the United States District Court for the Northern District of New York, to the exclusion of all other courts, for the purposes of litigating every controversy, dispute or claim arising out of or relating to this Agreement.

IN WITNESS WHEREOF, the parties hereto have entered into this Agreement as of the 9th day of December, 2024.

PILOT RESOLUTION

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

PILOT RESOLUTION

A regular meeting of the City of Syracuse Industrial Development Agency was convened in public session on December 9, 2024 at 8:00 o'clock a.m., local time, in the Common Council Chambers, City Hall, 233 East Washington Street, Syracuse, New York.

The meeting was called to order by the Chair and upon roll being called, the following members of the Agency were:

PRESENT: Kathleen Murphy, Steven Thompson, Dirk Sonneborn, Rickey T. Brown, Kenneth Kinsey

THE FOLLOWING PERSONS WERE ALSO PRESENT: **Staff Present:** Eric Ennis, Susan Katzoff, Esq., Cole King, Lori McRobbie; **Others Present**: Paul Reichel, Esq., Janice McKenna, Joe McNinch, Eli Sands, Tom Clifford, Kerry Quaglia, Lowell Niemetz, Barry Lentz, Rick Moriarty

The following resolution was offered by Rickey T. Brown and seconded by Dirk Sonneborn:

RESOLUTION APPROVING A PAYMENT IN LIEU OF TAX ABATEMENT SCHEDULE AND AUTHORIZING THE EXECUTION AND DELIVERY OF CERTAIN DOCUMENTS BY THE AGENCY IN CONNECTION THEREWITH

WHEREAS, the City of Syracuse Industrial Development Agency (the "***Agency***") is authorized and empowered by Title 1 of Article 18-A of the General Municipal Law of the State of New York (the "***State***"), as amended, together with Chapter 641 of the Laws of 1979 of the State of New York, as amended from time to time (collectively, the "***Act***") to promote, develop, encourage and assist in the acquiring, constructing, reconstructing, improving, maintaining, equipping and furnishing of industrial, manufacturing, warehousing, commercial, research and recreation facilities, including industrial pollution control facilities, railroad facilities and certain horse racing facilities, for the purpose of promoting, attracting, encouraging and developing recreation and economically sound commerce and industry to advance the job opportunities, health, general prosperity and economic welfare of the people of the State, to improve their recreation opportunities, prosperity and standard of living, and to prevent unemployment and economic deterioration; and

WHEREAS, to accomplish its stated purposes, the Agency is authorized and empowered under the Act to acquire, lease and sell real property and grant financial assistance in connection with one or more "projects" (as defined in the Act); and by application dated November 5, 2024 (the "***Application***"), 800 South Wilbur Ave, Syracuse, LLC, or an entity to formed (the "***Company***"), requested the Agency undertake a project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S.

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "***Condominiums***"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement; and

WHEREAS, the Land has been owned by the State of New York and/or the City of Syracuse (the "***City***") for more than one hundred years and has been vacant for at least the past 14 years before being seized through tax foreclosure by the City; and

WHEREAS, during that time, the Land generated zero dollars in ad valorem taxes to the taxing jurisdictions. The requested Financial Assistance will result in the receipt of over ten million ($10,000,000) in revenue for the benefit of the taxing jurisdictions over the course of the proposed payment in lieu of tax abatement schedule; and

WHEREAS, the Land had become a blight on the neighborhood and has experienced illegal trespassing, property damage, and other forms of vandalism that has led to further worsening of the physical condition of the Land and a drain on other City resources; and

WHEREAS, the City, with the support of the Agency, caused a City-wide housing study to be completed which identified the breadth and scope of the housing crisis, spanning both affordability and conditions, in the City. In recognition of the housing crisis, the Agency and the City continue to coordinate investments, as and when applicable, to leverage resources, as

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

intentionally as possible, to maximize impact, and help to achieve our mutual goal of improving the overall housing market and conditions within the City; and

WHEREAS, the Project will result in hundreds of new affordable housing options for residents of the City at a time when the City is facing a housing crisis; and

WHEREAS, under the Act, the Agency is tasked, in part, with improving the health, general prosperity and economic welfare of the people it serves and improves their recreation opportunities, prosperity and standard of living; and

WHEREAS, pursuant to Article 8 of the Environmental Conservation Law of the State of New York, as amended, and the regulations of the Department of Environmental Conservation of the State of New York promulgated thereunder (collectively referred to hereinafter as "***SEQRA***"), the Agency is required to make a determination whether the "action" (as said quoted term is defined in SEQRA) to be taken by the Agency may have a "significant impact on the environment" (as said quoted term is utilized in SEQRA), and the preliminary agreement of the Agency to undertake the Project constitutes such an action; and

WHEREAS, the Company caused a Full Environmental Assessment Form ("***EAF***") to be prepared and submitted to the City of Syracuse Planning Commission (the "***Planning Commission***") to obtain approval for a project that includes, in substantial form, the Project being undertaken by the Agency; and

WHEREAS, the Planning Commission provided notice of its determination that the Project constitutes a Type I Action and its intent to act as Lead Agency for review of the Project; and

WHEREAS, on December 2, 2024, the Planning Commission, as lead agency, and consistent with the procedures and criteria set forth in 6 NYCRR 617.7, analyzed the relevant areas of environmental concern using the SEQRA standards and determined that the project will not have a significant environmental impact; and

WHEREAS, on December 9, 2024, the Agency resolved to take official action toward the acquisition, construction, equipping and completion of the Project (the "***Inducement Resolution***"); and

WHEREAS, as part of the Financial Assistance, the Company requested the Agency consider a 30-year abatement schedule for payments in lieu of taxes, (the "***PILOT***"), as more fully described on **Exhibit "A"** attached hereto (the "***PILOT Abatement Schedule***"), which abatement schedule deviates from the Agency's Uniform Tax Exemption Policy ("***UTEP***") established pursuant to General Municipal Law Section 874(4); and

WHEREAS, the Project is being funded in part through NYS Homes and Community Renewal ("***HFA***") which will provide tax credits for the Project (the "***HFA Financing***"). The HFA Financing requires the Project enter into a thirty year regulatory agreement and for the PILOT Abatement Schedule to run coterminous with the HFA regulatory agreement; and

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

WHEREAS, by correspondence dated November 25, 2024 and December 4, 2024, in accordance with Section 874(4)(c) of the General Municipal Law of the State of New York, notice of the deviation from the Agency's Uniform Tax Exemption Policy with respect to the Project was sent to the affected tax jurisdictions; and

WHEREAS, the Agency has given due consideration to the Application, the housing study, any and all comments received with respect to the proposed deviation from the UTEP, and to representations by the Company that the proposed PILOT, as part of the Financial Assistance: (i) will induce the Company to develop the Project Facility in the City of Syracuse; (ii) will not result in the removal of a commercial, industrial or manufacturing plant or facility of the Company or any other proposed occupant of the Project Facility from one area of the State to another area of the State or in the abandonment of one or more plants or facilities of the Company or any other proposed occupant of the Project Facility located in the State, except as may be permitted by the Act; and (iii) undertaking the Project will advance job opportunities in the State and promote the general prosperity and economic welfare of the inhabitants of the City of Syracuse in furtherance of the purposes of the Act.

NOW, THEREFORE, be it resolved by the members of the City of Syracuse Industrial Development Agency, as follows:

(1) Based upon the representations made by the Company to the Agency in support of its request for the PILOT schedule, the HFA requirements, the housing study and any and all comments received with respect to the proposed deviation from the UTEP, the Agency hereby approves, and the (Vice) Chair and Executive Director, acting individually, are each authorized to execute and deliver a PILOT agreement (the "***PILOT Agreement***") providing for the 30-year PILOT Abatement Schedule attached as **Exhibit "A"** hereto, the PILOT Agreement to be in such form and substance as shall be substantially the same as approved by the Agency for other transactions and consistent with this Resolution and as approved by the Chair or Vice Chair of the Agency upon the advice of counsel to the Agency subject to paragraph (2) hereof and compliance with the terms hereof and the Inducement Resolution.

(2) To satisfy the requirements of HFA and secure the necessary tax credits to finance the Project, following the execution of the Lease Documents (as defined in the Inducement Resolution), the abatement schedule shall commence and run coterminous with the regulatory period required by the HFA Financing for the Project.

(2) In accordance with the Agency's UTEP, the deviation and the PILOT Abatement Schedule is subject to the approval of the Common Council for the City.

(3) The (Vice) Chair and/or Executive Director, acting individually, are each hereby authorized and directed, for and in the name and on behalf of the Agency, to execute and deliver the documents and agreements identified herein and any and all such additional certificates, instruments, documents or affidavits, to pay any such other fees, charges and expenses, to make such other changes, omissions, insertions, revisions, or amendments to the documents referred to

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

herein as the (Vice) Chair shall approve, and to do and cause to be done any such other acts and things, as they determine, on advice of counsel to the Agency, may be necessary or desirable to consummate the transactions contemplated by this Resolution.

(4) No covenant, stipulation, obligation or agreement contained in this resolution or any document referred to above shall be deemed to be the covenant, stipulation, obligation or agreement of any member, officer, agent or employee of the Agency in his or her individual capacity. Neither the members nor officers of the Agency, nor any person executing any documents referred to above on behalf of the Agency, shall be liable thereon or be subject to any personal liability or accountability by reason of the execution or delivery thereof.

(5) The Secretary and/or the Executive Director of the Agency are hereby authorized to distribute copies of this Resolution to the Company and to do such further things or perform such acts as may be necessary or convenient to implement the provisions of this Resolution.

(6) This Resolution shall take effect immediately, but is subject to the PILOT Abatement Schedule's approval by the Common Council for the City and the execution by the Company of the documents set forth in the Inducement Resolution, including but not limited to, the Lease Documents (as defined in the Inducement Resolution) and the PILOT Agreement and compliance with all other resolutions and other related documents adopted and/or approved by the Agency in conjunction with the Project and/or as set forth herein.

(7) Bousquet Holstein PLLC, as counsel to the Agency, is hereby authorized to work with the Company and others to prepare, for submission to the (Vice) Chair and/or Executive Director for execution and delivery, all documents necessary to effect the undertaking of the Project and the grant of Financial Assistance in connection with the Project.

(8) A copy of this Resolution, together with the attachments hereto, shall be placed on file in the office of the Agency where the same shall be available for public inspection during business hours.

The question of the adoption of the foregoing Resolution was duly put to vote on a roll call, which resulted as follows:

	AYE	**NAY**
Kathleen Murphy	X	
Steven Thompson	X	
Dirk Sonneborn	X	
Rickey T. Brown	X	
Kenneth Kinsey	X	

The foregoing Resolution was thereupon declared duly adopted.

FINAL APPROVING RESOLUTION

A regular meeting of the City of Syracuse Industrial Development Agency was convened in public session on December 9, 2024 at 8:00 o'clock a.m., local time, in the Common Council Chambers, City Hall, 233 East Washington Street, Syracuse, New York.

The meeting was called to order by the Chair and upon the roll being duly called, the following members were:

PRESENT: Kathleen Murphy, Steven Thompson, Dirk Sonneborn, Rickey T. Brown, Kenneth Kinsey

THE FOLLOWING PERSONS WERE ALSO PRESENT: **Staff Present:** Eric Ennis, Susan Katzoff, Esq., Cole King, Lori McRobbie; **Others Present**: Paul Reichel, Esq., Janice McKenna, Joe McNinch, Eli Sands, Tom Clifford, Kerry Quaglia, Lowell Niemetz, Barry Lentz, Rick Moriarty

The following resolution was offered by Dirk Sonneborn and seconded by Rickey T. Brown:

RESOLUTION AUTHORIZING THE EXECUTION AND DELIVERY OF CERTAIN DOCUMENTS BY THE AGENCY IN CONNECTION WITH A COMMERCIAL PROJECT UNDERTAKEN AT THE REQUEST OF THE COMPANY

WHEREAS, the City of Syracuse Industrial Development Agency (the "***Agency***") is authorized and empowered by Title 1 of Article 18-A of the General Municipal Law of the State of New York (the "***State***"), as amended, together with Chapter 641 of the Laws of 1979 of the State of New York, as amended from time to time (collectively, the "***Act***"), to promote, develop, encourage and assist in the acquiring, constructing, reconstructing, improving, maintaining, equipping and furnishing of industrial, manufacturing, warehousing, commercial, research and recreation facilities, for the purpose of promoting economically sound commerce and industry to advance the job opportunities, health, general prosperity and economic welfare of the people of the State, to improve their recreation opportunities, prosperity and standard of living; and

WHEREAS, 800 South Wilbur Ave, Syracuse, LLC, or an entity to be formed (the "***Company***"), by application dated November 5, 2024 (the "***Application***"), requested that the Agency undertake a project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the City of Syracuse's Zoning

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

Ordinance for affordability and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Company will, or will cause to be, constructed and completed as part of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "***Condominiums***"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement; and

WHEREAS, the Land has been owned by the State of New York and/or the City of Syracuse (the "***City***") for more than one hundred years and has been vacant for at least the past 14 years before being seized through tax foreclosure by the City; and

WHEREAS, during that time, the Land generated zero dollars in ad valorem taxes to the taxing jurisdictions. The requested Financial Assistance will result in the receipt of over ten million ($10,000,000) in revenue for the benefit of the taxing jurisdictions over the course of the proposed payment in lieu of tax abatement schedule; and

WHEREAS, the Land had become a blight on the neighborhood and has experienced illegal trespassing, property damage, and other forms of vandalism that has led to further worsening of the physical condition of the Land and a drain on other City resources; and

WHEREAS, the City, with the support of the Agency, caused a City-wide housing study to be completed which identified the breadth and scope of the housing crisis, spanning both affordability and conditions, in the City. In recognition of the housing crisis, the Agency and the City continue to coordinate investments, as and when applicable, to leverage resources, as intentionally as possible, to maximize impact, and help to achieve our mutual goal of improving the overall housing market and conditions within the City; and

WHEREAS, the Project will result in hundreds of new affordable housing options for residents of the City at a time when the City is facing a housing crisis; and

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

WHEREAS, under the Act, the Agency is tasked, in part, with improving the health, general prosperity and economic welfare of the people it serves and improves their recreation opportunities, prosperity and standard of living; and

WHEREAS, the Agency conducted a public hearing with respect to the Project and the proposed Financial Assistance on December 9, 2024 pursuant to Section 859-a of the Act, notice of which was originally published on November 26, 2024, in the Post-Standard, a newspaper of general circulation in the City of Syracuse, New York and given to the chief executive officers of the affected tax jurisdictions by letters dated November 26, 2024; and

WHEREAS, pursuant to Article 8 of the Environmental Conservation Law of the State of New York, as amended, and the regulations of the Department of Environmental Conservation of the State of New York promulgated thereunder (collectively referred to hereinafter as "***SEQRA***"), the Agency is required to make a determination whether the "action" (as said quoted term is defined in SEQRA) to be taken by the Agency may have a "significant impact on the environment" (as said quoted term is utilized in SEQRA), and the preliminary agreement of the Agency to undertake the Project constitutes such an action; and

WHEREAS, the Company caused a Full Environmental Assessment Form ("***EAF***") to be prepared and submitted to the City of Syracuse Planning Commission (the "***Planning Commission***") to obtain approval for a project that includes, in substantial form, the Project being undertaken by the Agency; and

WHEREAS, the Planning Commission provided notice of its determination that the Project constitutes a Type I Action and its intent to act as Lead Agency for review of the Project; and

WHEREAS, on December 2, 2024, the Planning Commission, as lead agency, and consistent with the procedures and criteria set forth in 6 NYCRR 617.7, analyzed the relevant areas of environmental concern using the SEQRA standards and determined that the project will not have a significant environmental impact; and

WHEREAS, the Agency adopted a resolution on December 9, 2024 (the "***Inducement Resolution***") entitled:

> **RESOLUTION AUTHORIZING THE UNDERTAKING, ACQUISITION, CONSTRUCTION, EQUIPPING AND COMPLETION OF A COMMERCIAL FACILITY; APPOINTING THE COMPANY AS AGENT OF THE AGENCY FOR THE PURPOSE OF THE ACQUISITION, CONSTRUCTION, EQUIPPING AND COMPLETION OF THE PROJECT; AND AUTHORIZING THE EXECUTION AND DELIVERY OF AN AGREEMENT BETWEEN THE AGENCY AND THE COMPANY**

which resolution is in full force and effect and has not been amended or modified; and

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

WHEREAS, the Agency adopted a resolution on December 9, 2024 (the "***PILOT Resolution***") entitled:

> **RESOLUTION APPROVING A PAYMENT IN LIEU OF TAX ABATEMENT SCHEDULE AND AUTHORIZING THE EXECUTION AND DELIVERY OF CERTAIN DOCUMENTS BY THE AGENCY IN CONNECTION WITH A PILOT AGREEMENT**

which resolution is in full force and effect and has not been amended or modified; and

NOW, THEREFORE, be it resolved by the members of the City of Syracuse Industrial Development Agency, as follows:

Section 1. Based upon the representations made by the Company to the Agency and after consideration of the comments received at the public hearing and other meetings, if any, the Agency hereby makes the following findings and determinations:

(a) The acquisition of a controlling interest in the Project by the Agency, the granting of the Financial Assistance and the designation of the Company as the Agency's agent for completion of the Project will be an inducement to, and permit, the Company to develop and operate the Project in the City of Syracuse, thus serving the public purposes of Article 18-A of the General Municipal Law of New York State by promoting and preserving the job opportunities, general prosperity, health and economic welfare of the inhabitants of the City of Syracuse, and in particular, by providing increased housing options to the City, all in furtherance of the purposes of the Act.

(b) The Project will not result in the removal of a commercial, industrial or manufacturing plant or facility of the Company or any other proposed occupant of the Project Facility from one area of the State to another area of the State or result in the abandonment of one or more plants or facilities of the Company or any other proposed occupant of the Project Facility located in the State, except as may be permitted by the Act.

(c) The commitment of the Agency to provide Financial Assistance to the Company will enable and induce the Company to construct, equip and complete the Project Facility which will help address the housing crisis within the City.

(d) The acquisition, construction, equipping and completion of the Project and the attendant promotion of the local economy will advance the job opportunities, health, prosperity and economic welfare of the people of the City and the granting of the Financial Assistance is a necessary component to the financing of the Project.

(e) The Project Facility constitutes a "project" within the meaning of the Act.

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

(f) It is desirable and in the public interest for the Agency to grant Financial Assistance in connection with the Project to remove blight and to provide for the construction of hundreds of new affordable housing units in the City.

Section 2. It is the policy of the State to promote the economic welfare, recreation opportunities and prosperity of its inhabitants and to actively promote, attract, encourage and develop recreation and economically sound commerce and industry for the purpose of preventing unemployment and economic deterioration. The Project will serve the public purposes of Article 18-A of the General Municipal Law of the State of New York by removing blight, advancing job opportunities and promoting economic development.

Section 3. It is among the purposes of the Agency to promote, develop, encourage and assist in the acquiring, constructing, reconstructing, renovating, improving, maintaining, equipping, furnishing and completing of certain facilities, including commercial facilities, and thereby advance the job opportunities, health, general prosperity and economic welfare of the people of the State and to improve their recreation opportunities, prosperity and standard of living.

Section 4. Subject to the conditions set forth in this and prior resolutions adopted by the Agency, the Agreement, and the Project Agreement (each as defined in the Inducement Resolution), and the adoption of a PILOT Resolution, the Agency will: (A) acquire a controlling interest in the Project Facility; (B) lease the Land and Facility from the Company pursuant to a lease agreement between the Agency and the Company (the "***Company Lease***"); acquire an interest in the Equipment pursuant to a bill of sale from the Company (the "***Bill of Sale***"); and sublease the Project Facility to the Company pursuant to a sublease agreement (the "***Agency Lease***"); (C) subject to the terms of the Agency Lease and other documents, secure the Company's borrowings with respect to the Project Facility by joining in one or more construction or permanent mortgages on the Project Facility in favor of the Company's lenders; (D) execute and deliver any and all necessary documents to confer the approved Financial Assistance, subject to approval and execution of the PILOT Agreement; and (E) execute and deliver any other documents necessary to effectuate the actions contemplated by and consistent with this Resolution upon the advice of counsel to the Agency.

Section 5. The Chair, Vice Chair and the Executive Director of the Agency, acting individually, are each hereby authorized and directed, for and in the name and on behalf of the Agency, to execute and deliver the documents and agreements identified in Section 4 of this Resolution as well as the Lease Documents (as defined in the Inducement Resolution) and any such additional certificates, instruments, documents or affidavits, to pay any such other fees, charges and expenses, to make such other changes, omissions, insertions, revisions, or amendments to the documents referred to in Section 4 of this Resolution, as approved by the Chair or Vice Chair, and to do and cause to be done any such other acts and things, as they determine, on advice of counsel to the Agency, may be necessary or desirable to consummate the transactions contemplated by this Resolution.

Section 6. No covenant, stipulation, obligation or agreement contained in this resolution or any document referred to herein shall be deemed to be the covenant, stipulation,

Docusign Envelope ID: C49DAD6E-D766-403B-8F05-3483AB9FFEA5

obligation or agreement of any member, officer, agent or employee of the Agency in his or her individual capacity. Neither the members nor officers of the Agency, nor any person executing any documents referred to above on behalf of the Agency, shall be liable thereon or be subject to any personal liability or accountability by reason of the execution or delivery thereof.

Section 7. Bousquet Holstein PLLC, as counsel to the Agency, is hereby authorized to work with the Company and others to prepare, for submission to the (Vice) Chair and/or Executive Director for execution and delivery, all documents necessary to effect the undertaking of the Project and the grant of Financial Assistance in connection with the Project.

Section 8. The approvals provided for herein are contingent upon the Company's payment of all of the Agency's fees and costs, including but not limited to attorneys' fees.

Section 9. The Secretary and/or Executive Director of the Agency is hereby authorized to distribute copies of this Resolution and do such further things or perform such acts as may be necessary or convenient to implement the provisions of this Resolution.

Section 10. This Resolution shall take effect immediately. A copy of this Resolution, together with the attachments hereto, shall be placed on file in the office of the Agency where the same shall be available for public inspection during business hours.

The question of the adoption of the foregoing resolution was duly put to vote on a roll call, which resulted as follows:

	AYE	NAY
Kathleen Murphy	X	
Steven Thompson	X	
Dirk Sonneborn	X	
Rickey T. Brown	X	
Kenneth Kinsey	X	

The foregoing Resolution was thereupon declared duly adopted.

APPROVING RESOLUTION

A regular meeting of the City of Syracuse Industrial Development Agency was convened in public session on November 18, 2025 at 8:00 o'clock a.m., local time, in the Common Council Chambers, City Hall, 233 East Washington Street, Syracuse, New York.

The meeting was called to order by the Chair and upon the roll being duly called, the following members were:

PRESENT: Kathleen Murphy, Steven Thompson, Dirk Sonneborn, Rickey T. Brown, Kenneth Kinsey

THE FOLLOWING PERSONS WERE ALSO PRESENT: Staff: Eric Ennis, Susan Katzoff, Esq., Lori McRobbie

The following resolution was offered by Steven Thompson and seconded by Rickey T. Brown:

RESOLUTION AUTHORIZING A CLARIFICATION TO THE PROJECT DESCRIPTION IN CONNECTION WITH A CERTAIN PROJECT PREVIOUSLY UNDERTAKEN BY THE AGENCY

WHEREAS, the City of Syracuse Industrial Development Agency (the "***Agency***") is authorized and empowered by Title 1 of Article 18-A of the General Municipal Law of the State of New York (the "***State***"), as amended, together with Chapter 641 of the Laws of 1979 of the State of New York, as amended from time to time (collectively, the "***Act***"), to promote, develop, encourage and assist in the acquiring, constructing, reconstructing, improving, maintaining, equipping and furnishing of industrial, manufacturing, warehousing, commercial, research and recreation facilities, for the purpose of promoting economically sound commerce and industry to advance the job opportunities, health, general prosperity and economic welfare of the people of the State, to improve their recreation opportunities, prosperity and standard of living; and

WHEREAS, 800 South Wilbur Ave, Syracuse, LLC, or an entity to be formed (the "***Applicant***"), by application dated November 5, 2024 (the "***Application***"), requested that the Agency undertake a project (the "***Original Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two five story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the City of Syracuse's Zoning Ordinance for affordability and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with

Docusign Envelope ID: E12F3CF8-0BCB-4371-86DF-68E9E483E603

individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility and the Condominiums (as defined herein); as well as approximately 27 condominiums for single family ownership which the Applicant will, or will cause to be, constructed and completed as part of the Project, but the costs of which are not subject to the Financial Assistance (as defined herein) being sought hereunder (the "***Condominiums***"); (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Original Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Applicant or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Applicant to the Agency; and the sublease of the Project Facility back to the Applicant pursuant to a sublease agreement; and

WHEREAS, by resolutions dated December 9, 2024, the Agency authorized the undertaking of the Original Project and the conference of the Financial Assistance (collectively, the "***Inducement Resolution***") No part of the approved Financial Assistance was to be allocated to the Condominiums; and

WHEREAS, the City of Syracuse, New York (the "***City***") is the current fee owner of the Land and is under a purchase and sale agreement (the "***Contract***") with the Applicant to sell the Property to the Applicant to undertake the Original Project; and

WHEREAS, in November, 2025, the City and the Applicant amended the Contract to clarify that the Condominiums would be undertaken by a separate entity; and

WHEREAS, in November 2025, the Company requested the Agency approve the removal of the Condominiums from the definition of Original Project to satisfy certain financing requirements with respect to the financing of the Facility through a newly formed single purpose entity; namely, Wilbur Ave A/B, LLC, and to align with the City's amendment to the Contract (the "***Amendment***"); and

WHEREAS, should the Agency approve the Amendment, the project (the "***Project***") will consist of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two 4-story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20

Docusign Envelope ID: E12F3CF8-0BCB-4371-86DF-68E9E483E603

units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement; and

WHEREAS, the Amendment does not alter the Agency's previous SEQRA analysis in which the Project was classified as a Type I Action and a Negative Declaration was issued by the City of Syracuse Planning Commission; and

WHEREAS, the Company is not seeking any additional financial assistance; and

WHEREAS, the Company is requesting the Agency's consent to the Amendment.

NOW, THEREFORE, be it resolved by the members of the City of Syracuse Industrial Development Agency, as follows:

Section 1. Based upon the representations made by the Company to the Agency and after consideration of the comments received at the public hearing, if any, the Agency hereby makes the following findings and determinations:

(a) The Amendment serves the public purposes of Article 18-A of the General Municipal Law of New York State by promoting and preserving the job opportunities, general prosperity, health and economic welfare of the inhabitants of the City of Syracuse (the "***City***") in furtherance of the purposes of the Act.

(b) The Amendment does not alter the Agency's prior SEQRA findings and remains consistent with the Agency's SEQRA analysis;

(b) The Amendment will not result in the removal of a commercial, industrial or manufacturing plant or facility of the Company or any other proposed occupant of the Project Facility from one area of the State to another area of the State or result in the abandonment of one or more plants or facilities of the Company or any other proposed occupant of the Project Facility located in the State, except as may be permitted by the Act.

Docusign Envelope ID: E12F3CF8-0BCB-4371-86DF-68E9E483E603

(c) The acquisition, construction, equipping and completion of the Project Facility, as amended by the Amendment, and the attendant promotion of the local economy will advance the job opportunities, health, prosperity and economic welfare of the people of the City and the granting of the Financial Assistance is a necessary component to the financing of the Project.

(d) The Project Facility, as amended by the Amendment, constitutes a "project" within the meaning of the Act.

Section 2. Subject to the conditions set forth herein, in the Inducement Resolution, the Agreement and the Project Agreement (each as defined in the Inducement Resolution previously adopted by the Agency), the Agency hereby authorizes the Amendment and the execution and delivery of all necessary documents to reflect the Amendment.

Section 3. The Chair, Vice Chair and the Executive Director of the Agency, acting individually, are each hereby authorized and directed, for and in the name and on behalf of the Agency, to execute and deliver any and all documents and agreements identified in the Inducement Resolution and any such additional certificates, instruments, documents or affidavits, to pay any such other fees, charges and expenses, to make such other changes, omissions, insertions, revisions, or amendments to the documents referred to herein and in the Inducement Resolution, to reflect the Amendment and to confer the Financial Assistance as approved by the Chair or Vice Chair, and to do and cause to be done any such other acts and things, as they determine, on advice of counsel to the Agency, may be necessary or desirable to consummate the transactions contemplated by this Resolution.

Section 4. No covenant, stipulation, obligation or agreement contained in this resolution or any document referred to herein shall be deemed to be the covenant, stipulation, obligation or agreement of any member, officer, agent or employee of the Agency in his or her individual capacity. Neither the members nor officers of the Agency, nor any person executing any documents referred to above on behalf of the Agency, shall be liable thereon or be subject to any personal liability or accountability by reason of the execution or delivery thereof.

Section 5. Bousquet Holstein, PLLC, as counsel to the Agency, is hereby authorized to work with the Company and others to prepare, for submission to the (Vice) Chair and/or Executive Director for execution and delivery, all documents necessary to effect the undertaking of the Project and the grant of Financial Assistance in connection with the Project.

Section 6. The approvals provided for herein are contingent upon the Company's payment of all of the Agency's fees and costs, including but not limited to attorneys' fees.

Section 7. The Secretary and/or Executive Director of the Agency is hereby authorized to distribute copies of this Resolution and do such further things or perform such acts as may be necessary or convenient to implement the provisions of this Resolution.

Docusign Envelope ID: E12F3CF8-0BCB-4371-86DF-68E9E483E603

Section 8. This Resolution shall take effect immediately. A copy of this Resolution, together with the attachments hereto, shall be placed on file in the office of the Agency where the same shall be available for public inspection during business hours.

The question of the adoption of the foregoing resolution was duly put to vote on a roll call, which resulted as follows:

	AYE	NAY
Kathleen Murphy	X	
Steven Thompson	X	
Dirk Sonneborn	X	
Rickey T. Brown	X	
Kenneth Kinsey	X	

The foregoing Resolution was thereupon declared duly adopted.

GENERAL CERTIFICATE OF

WILBUR AVE A/B, LLC

This certificate is made in connection with the execution by **Wilbur Ave A/B, LLC,** a limited liability company authorized to do business and in good standing in the State of New York (the "***Company***") of the Project Agreement, the Company Lease, the Agency Lease, the PILOT Agreement, the Environmental Compliance and Indemnification Agreement and any other document now or hereafter executed by the Company in connection with the City of Syracuse Industrial Development Agency (the "***Agency***") agreeing, at the Company's request, to undertake a project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two 4-story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

The Project Facility is owned by the Company. The Company will lease the Land and Facility to the Agency pursuant to a Company Lease Agreement dated as of December 18, 2025 (the "***Company Lease***") and transfer its interest in the Equipment to the Agency pursuant to a bill of sale dated as of December 18, 2025 (the "***Bill of Sale***") and the Agency will sublease the Project Facility back to the Company pursuant to an Agency Lease Agreement dated as of December 18, 2025 (the "***Agency Lease***").

Capitalized terms used herein which are not otherwise defined herein shall have the meanings ascribed to such terms in the Agency Lease, except that, for purposes of this certificate: (A) all definitions with respect to any document shall be deemed to refer to such document only as it exists as of the date of this Certificate and not as of any future date; and (B) all definitions with respect to

any Person shall be deemed to refer to such Person only as it exists as of the date of this certificate and not as of any future date or to any successor or assign.

The undersigned does hereby certify as follows:

1. Attached hereto as **Exhibit "A"** is a true, correct and complete copy of the Articles of Organization of the Company and any amendments thereto filed with the New York State Secretary of State with proof of publication thereof attached thereto, which Articles (including any amendments) are in full force and effect on the date hereof.

2. Attached hereto as **Exhibit "B"** is a true, correct and complete copy of the Company's Operating Agreement, and any amendments thereto, and such Operating Agreement, as may have been amended, is in full force and effect on the date hereof.

3. The Company is, and at all times will be, a limited liability company, duly organized, validly existing and in good standing under the laws of New York State and authorized and licensed under the laws of New York State to transact business as a limited liability company for the purpose of owning and operating the Project Facility in New York State. Attached hereto as **Exhibit "C"** is a true and correct copy of a Certificate of Good Standing of the Company issued by the New York State Secretary of State.

4. The Company has full legal right, power and authority to execute and deliver the Company Documents and to consummate the transactions on the part of the Company contemplated by the Company Documents. The Company Documents have been duly authorized, executed, and delivered by the Manager of Wilbur Ave A/B Manager, LLC, managing member of the Company on behalf of the Company and are in full force and effect as of the date hereof. Attached hereto as **Exhibit "D"** is a true, correct and complete copy of the authorizing resolution of the Company (the "***Resolution***") in respect of the execution, delivery and performance of the Company Documents.

5. The Company understands and agrees that, unless a written waiver is first obtained from the Agency, the Company and its Additional Agents shall utilize local labor, contractors and suppliers for the construction, renovation, reconstruction and equipping of the Project Facility. The term "***local***" shall mean Onondaga, Oswego, Madison, Cayuga, Oneida and Cortland Counties. The Company further understands and agrees that failure to comply with these local labor requirements may result in the revocation or recapture of benefits provided/approved to the Project by the Agency. In furtherance thereof, Appendix I to the Agency's Application entitled "Local Access Agreement" has been completed by the Company.

6. All consents, approvals, authorizations or orders of, notices to, or filings, registrations or declarations with, any court or governmental authority, board, agency, commission or body having jurisdiction which are required on behalf of the Company or for the execution and delivery by the Company of the Company Documents or the consummation on the part of the Company of the transactions contemplated thereby have been obtained.

7. Attached hereto as **Exhibit "E"** is a list of all material pending litigation relating to the Company. Notwithstanding those matters listed on Exhibit "E", after performing due diligence, there is no legal action, suit, proceeding, inquiry or investigation at law or in equity (before or by any court, agency, arbitrator, public board or body or other entity or person) pending or threatened against or affecting the Company or, to the knowledge of the Company, any basis therefor: (i) in any way affecting the organization, existence or good standing of the Company; (ii) contesting or materially affecting the validity or enforceability of the Company Documents; (iii) contesting the powers of the Company or its authority with respect to the Company Documents; (iv) contesting the authority of the Company to act on behalf of the Company or the authority of the representatives of the Company to act on behalf of the Company; (v) wherein an unfavorable decision, ruling or finding would have a material adverse effect on: (A) the financial condition or operations of the Company; or (B) the consummation on the part of the Company of the transactions contemplated by any Company Documents.

8. The execution and delivery by the Company of the Company Documents and the consummation by the Company of the transactions contemplated thereby are not prohibited by, do not violate any provision of, and will not result in a breach of or default under: (i) the organizational documents of the Company; (ii) any applicable law, rule, regulation, order, writ, injunction, judgment or decree of any court or governmental body or other requirement to which the Company is subject; or (iii) any contract, agreement, mortgage, lease, guaranty, commitment or other obligation or instrument to which the Company is a party or by which the Company or its properties is bound.

9. All information concerning the Project Facility and the Company submitted to the Agency and any Mortgagee by the Company is true and correct in all material respects and does not omit to state a material fact necessary to make the statements therein not misleading.

10. Assuming the valid authorization, execution and delivery of the Company Documents by the other parties thereto the Company Documents are the legal, valid and binding obligations of the Company, enforceable against the Company in accordance with their respective terms, except to the extent that enforcement thereof may be limited by bankruptcy, insolvency or other similar laws affecting creditors' rights generally or by the exercise of judicial discretion in accordance with general principles of equity. No default by the Company or, to the best of knowledge of the undersigned, no event of default on the part of any other party to the Company Documents has occurred or is continuing and no event has occurred which, with the giving of notice or passage of time or both, would be such an event of default. The Company has duly authorized the taking of and has taken all actions necessary to carry out and give effect to the transactions contemplated to be performed on its part by the Company Documents.

11. All permits (including building permits), licenses and authorizations necessary for the construction, ownership and operation of the Project in the manner contemplated by each of the Company Documents have been obtained or will be obtained, and said construction, ownership and operation will not, to the best knowledge of the Company, conflict with any zoning or similar ordinance applicable to the Project. To the best of the Company's knowledge, the Project conforms to all material environmental regulations.

12. There is no Event of Default on the part of the Company under the Project Agreement, the Company Lease, the Agency Lease, the PILOT Agreement, the Environmental Compliance and Indemnification Agreement or any other Company Document, and no event has occurred and is continuing which, after notice or passage of time or both, would give rise to a default under any thereof.

13. The Project Agreement, the Company Lease, the Agency Lease, the PILOT Agreement, the Environmental Compliance and Indemnification Agreement and the other Company Documents are in full force and effect and the Company has not assigned or pledged any of its rights under these documents.

14. The Company restates and affirms all of the obligations, representations and covenants in the Agency Lease and the Project Agreement and incorporates same herein by reference as if fully set forth herein.

15. The Company acknowledges its obligations to comply with all of the Agency's policies included but not limited to the **local hiring and MWBE** requirements under the Agency's Project Approval Policy.

16. The Company acknowledges its obligations to comply, as necessary, with Section 224-a of the New York State Labor Law.

17. The authorized representatives of the Company who, pursuant to the Resolution, are authorized to execute the Company Documents and the office held by each person are as set forth below. The signature set opposite the name of such officer, if any, is a genuine specimen of such officer's signature:

RESOLUTION

WRITTEN CONSENT OF WILBUR AVE A/B MANAGER, LLC, THE MANAGING MEMBER OF WILBUR AVE A/B, LLC, AUTHORIZING CERTAIN TRANSACTIONS WITH THE CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY.

WHEREAS, Wilbur Ave A/B, LLC (the "Company") intends to undertake a certain project (the "Project"), with the City of Syracuse Industrial Development Agency (the "Agency"), pursuant to which the Company, as agent of the Agency, will undertake (i) the acquisition of an interest in an approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "Land"); (ii) the construction of two four story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the Agency's AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "Facility") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "Equipment" and together with the Land and the Facility, the "Project Facility"); and

WHEREAS, in connection with the Project, the Company has requested, and the Agency has authorized, certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax (collectively the "Financial Assistance"); and

WHEREAS, in order to obtain the Financial Assistance, the Company will lease the Land and Facility to the Agency pursuant to a lease agreement, as same may be amended from time to time (the "Company Lease"), and will transfer an interest in the Equipment to the Agency pursuant to a bill of sale from the Company to the Agency (the "Bill of Sale"), and the Agency will simultaneously sublease the Project Facility back to the Company pursuant to a sublease agreement, as same may be amended from time to time (the "Agency Lease"); and

WHEREAS, the Agency and the Company will also enter into a Payment in Lieu of Tax Agreement, as same may be amended from time to time (the "PILOT Agreement") with respect to the Project Facility, pursuant to which the Company will make certain payments in lieu of real property taxes on the Project Facility; and

WHEREAS, the Company will enter into certain other agreements with the Agency in connection with the Agency's Financial Assistance for the Project, including but not limited to a Project Agreement, Environmental Compliance and Indemnification Agreement, and certain

other documents, each as may be amended from time to time (collectively with the Company Lease, the Bill of Sale, the Agency Lease, and the PILOT Agreement, the "Company Documents"); and

WHEREAS, the Company's managing member, Wilbur Ave A/B Manager, LLC (the "Managing Member") now desires to authorize the Company to undertake the Project and to authorize the execution, delivery and performance of the Company Documents.

NOW, THEREFORE, the Managing Member of the Company hereby consents and agrees as follows:

1. The Company is hereby authorized to undertake the Project and to execute, deliver and perform the Company Documents.

2. Christopher V. Albanese, as manager of the Managing Member, is hereby authorized, in the name and on behalf of the Managing Member and the Company, to negotiate, execute, amend, deliver and approve the Company Documents and all such further instruments, agreements, certificates and other documents, and to take all other actions on behalf of the Managing Member and the Company, as are necessary or appropriate to complete the Project and with respect to and to obtain the related Financial Assistance from the Agency; and upon such execution and delivery, and assuming due execution by all other parties, same shall be binding upon the Company.

3. The Managing Member hereby affirms all prior action taken by the Company with respect to the Project and the Agency may rely on same.

[signature page follows]

IN WITNESS WHEREOF, the undersigned, being the managers of the Managing Member of the Company, has caused this Written Consent to be executed effective as of the date set forth below.

GENERAL CERTIFICATE OF

WILBUR AVE A/B MANAGER, LLC

This certificate is made in connection with the execution by **Wilbur Ave A/B, LLC,** a limited liability company authorized to do business and in good standing in the State of New York (the "***Company***") of the Project Agreement, the Company Lease, the Agency Lease, the PILOT Agreement, the Environmental Compliance and Indemnification Agreement and any other document now or hereafter executed by the Company in connection with the City of Syracuse Industrial Development Agency (the "***Agency***") agreeing, at the Company's request, to undertake a project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two 4-story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

Wilbur Ave A/B Manager, LLC (the "***Manager***") is the Managing Member of the Company.

The Project Facility is owned by the Company. The Company will lease the Land and Facility to the Agency pursuant to a Company Lease Agreement dated as of December 18, 2025 (the "***Company Lease***") and transfer its interest in the Equipment to the Agency pursuant to a bill of sale dated as of December 18, 2025 (the "***Bill of Sale***") and the Agency will sublease the Project Facility back to the Company pursuant to an Agency Lease Agreement dated as of December 18, 2025 (the "***Agency Lease***").

Capitalized terms used herein which are not otherwise defined herein shall have the meanings

ascribed to such terms in the Agency Lease, except that, for purposes of this certificate: (A) all definitions with respect to any document shall be deemed to refer to such document only as it exists as of the date of this Certificate and not as of any future date; and (B) all definitions with respect to any Person shall be deemed to refer to such Person only as it exists as of the date of this certificate and not as of any future date or to any successor or assign.

The undersigned does hereby certify as follows:

1. Attached hereto as **Exhibit "A"** is a true, correct and complete copy of the Articles of Organization of the Manager and any amendments thereto filed with the New York State Secretary of State with proof of publication thereof attached thereto, which Articles (including any amendments) are in full force and effect on the date hereof.

2. Attached hereto as **Exhibit "B"** is a true, correct and complete copy of the Manager's Operating Agreement, and any amendments thereto, and such Operating Agreement, as may have been amended, is in full force and effect on the date hereof.

3. The Manager is, and at all times will be, a limited liability company, duly organized, validly existing and in good standing under the laws of New York State and authorized and licensed under the laws of New York State to transact business as a limited liability company for the purpose of owning and operating the Project Facility in New York State. Attached hereto as **Exhibit "C"** is a true and correct copy of a Certificate of Good Standing of the Manager issued by the New York State Secretary of State.

4. Pursuant to Company's Operating Agreement, the Company appointed the Manager as the member of the Company. Attached hereto as **Exhibit "D"** is a true and correct copy of the Company's Operating Agreement, which is and remains in full force and effect.

5. The Manager has the authority to act on behalf of, and bind the Company, to all of the Company Documents; and represents that upon execution of the Company Documents by the Manager, on behalf of the Company, and all other parties, such Company Documents shall be binding upon the Company.

6. All consents, approvals, authorizations or orders of, notices to, or filings, registrations or declarations with, any court or governmental authority, board, agency, commission or body having jurisdiction which are required on behalf of the Manager or for the execution and delivery by the Manager on behalf of the Company of the Company Documents or the consummation on the part of the Company of the transactions contemplated thereby have been obtained.

7. Attached hereto as **Exhibit "E"** is a list of all material pending litigation relating to the Manager. Notwithstanding those matters listed on Exhibit "E", after performing due diligence, there is no legal action, suit, proceeding, inquiry or investigation at law or in equity (before or by any court, agency, arbitrator, public board or body or other entity or person) pending or threatened against or affecting the Manager or, to the knowledge of the Manager, any basis therefor: (i) in any way affecting the organization, existence or good standing of the Manager; (ii) contesting or materially affecting the validity or enforceability of the Company Documents;

(iii) contesting the powers of the Manager or its authority with respect to the Company Documents; (iv) contesting the authority of the Manager to act on behalf of the Manager or the authority of the representatives of the Manager to act on behalf of the Manager; (v) wherein an unfavorable decision, ruling or finding would have a material adverse effect on: (A) the financial condition or operations of the Manager or the Company; or (B) the consummation on the part of the Company of the transactions contemplated by any Company Documents.

8. The execution and delivery by the Manager of the Company Documents and the consummation by the Company of the transactions contemplated thereby are not prohibited by, do not violate any provision of, and will not result in a breach of or default under: (i) the organizational documents of the Company or the Manager; (ii) any applicable law, rule, regulation, order, writ, injunction, judgment or decree of any court or governmental body or other requirement to which the Company or the Manager is subject; or (iii) any contract, agreement, mortgage, lease, guaranty, commitment or other obligation or instrument to which the Company or the Manager is a party or by which the Company or the Manager or its properties is bound.

9. All information concerning the Project Facility and the Company submitted to the Agency and any Mortgagee by the Company is true and correct in all material respects and does not omit to state a material fact necessary to make the statements therein not misleading.

10. Assuming the valid authorization, execution and delivery of the Company Documents by the other parties thereto the Company Documents are the legal, valid and binding obligations of the Company, enforceable against the Company in accordance with their respective terms, except to the extent that enforcement thereof may be limited by bankruptcy, insolvency or other similar laws affecting creditors' rights generally or by the exercise of judicial discretion in accordance with general principles of equity. No default by the Company or, to the best of knowledge of the undersigned, no event of default on the part of any other party to the Company Documents has occurred or is continuing and no event has occurred which, with the giving of notice or passage of time or both, would be such an event of default. The Company has duly authorized the taking of and has taken all actions necessary to carry out and give effect to the transactions contemplated to be performed on its part by the Company Documents.

11. There is no Event of Default on the part of the Company under the Company Documents, and no event has occurred and is continuing which, after notice or passage of time or both, would give rise to a default under any thereof.

12. The Manager acknowledges the Company's obligations to comply with all of the Agency's policies included but not limited to the **local hiring and MWBE** requirements under the Agency's Project Approval Policy.

13. The Manager acknowledges the Company's obligations to comply, as necessary, with Section 224-a of the New York State Labor Law.

14. The authorized representatives of the Manager who, pursuant to the _____, are authorized to execute the Company Documents and the office held by each person are as set forth below. The signature set opposite the name of such officer, if any, is a genuine specimen of such officer's signature:

Re: City of Syracuse Industrial Development Agency
Lease/Leaseback Transaction
Wilbur Ave A/B, LLC Project

Ladies and Gentlemen:

We have acted as counsel to the City of Syracuse Industrial Development Agency (the "***Agency***") in connection with a project (the "***Project***") undertaken by the Agency at the request of Wilbur Ave A/B, LLC (the "***Company***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two 4-story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively,

the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

The Company has also requested that the Agency grant "financial assistance" (as defined in Section 854(14) of the New York General Municipal Law) (the "***Financial Assistance***") to the Project in the form of exemptions from State and local sales and use taxes and real property tax which real property tax exemption is evidenced by a payment in lieu of taxes agreement (the "***PILOT Agreement***") dated as of December 18, 2025, between the Agency and the Company.

Capitalized terms used herein which are not otherwise defined shall have the meanings ascribed to them in that certain Agency Lease Agreement, dated December 18, 2025, between the Agency and the Company.

As counsel to the Agency, we have examined originals or copies, certified or otherwise identified to our satisfaction, of such instruments, certificates, and documents as we have deemed necessary or appropriate for the purposes of the opinion expressed below. In such examination, we have assumed the genuineness of all signatures, the authenticity of all documents submitted to us as originals, the conformity to the original documents of all documents submitted to us as copies, and have assumed the accuracy and truthfulness of the factual information, expectations, conclusions, representations, warranties, covenants and opinions of the Company and its counsel and representatives as set forth in the various documents executed and delivered by them or any of them and identified in the Closing Memorandum in connection with the Project.

We are of the opinion that:

1. The Agency is a duly organized and existing corporate governmental agency constituting a public benefit corporation of the State of New York.

2. The Agency is duly authorized and empowered by law to acquire, construct, reconstruct, renovate and equip the Project, to lease the Land and the Facility from the Company pursuant to the Company Lease; to accept an interest in the Equipment pursuant to the Bill of Sale; to sublease the Project Facility back to the Company pursuant to the Agency Lease, to provide the Financial Assistance and to appoint the Company as its agent for completion of the Project.

3. The Agency Documents have been authorized by and lawfully executed and delivered by the Agency and (assuming the authorization, execution, and delivery by the other

respective parties thereto) are valid and legally binding obligations enforceable against the Agency in accordance with their respective terms.

In rendering this opinion, we advise you of the following:

The enforceability of the Agency Documents may be limited by any applicable bankruptcy, insolvency, reorganization, moratorium, or similar law or enactment now or hereafter enacted by the State of New York or the Federal government affecting the enforcement of creditors' rights generally and the general principles of equity, including limitations on the availability of the remedy of specific performance which is subject to discretion of the court.

This opinion is rendered to the addressees named above and their successors and/or assigns, and may not be relied upon by any other person without our prior, express written consent.

Very truly yours,

BOUSQUET HOLSTEIN PLLC

Re: City of Syracuse Industrial Development Agency
Lease/Leaseback Transaction
Wilbur Ave A/B, LLC Project

Ladies and Gentlemen:

We have acted as counsel to Wilbur Ave A/B, LLC (the "***Company***") in connection with a certain project (the "***Project***") undertaken by the City of Syracuse Industrial Development Agency (the "***Agency***") at the Company's request. The Project consists of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two four story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill

of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

The Agency has acquired an interest in the Project Facility pursuant to that certain Company Lease Agreement dated as of December 18, 2025 (the "***Company Lease***") and an interest in the Equipment pursuant to a bill of sale dated as of December 18, 2025 (the "***Bill of Sale***") and the Agency will sublease the Project Facility back to the Company pursuant to an Agency Lease Agreement dated as of December 18, 2025 (the "***Agency Lease***"). Capitalized terms used herein and not otherwise defined shall have the meaning given to them in the Agency Lease.

The Company has also requested that the Agency grant the Financial Assistance to the Project. The Agency and the Company entered into a Payment in Lieu of Taxes Agreement dated December 18, 2025 (the "***PILOT Agreement***") with respect to the Project.

In that regard, we have examined the Project Agreement, the Company Lease, the Agency Lease, the Bill of Sale, the Environmental Compliance and Indemnification Agreement, the PILOT Agreement and all other documents both identified in the Closing Memorandum and as defined in the Agency Lease to which the Company is a party in connection with the Project (collectively, the "***Company Documents***").

We have also examined corporate documents and records of the Company and made such investigation of law and/or fact that we deem necessary or advisable in order to render this opinion. For purposes of such examination, we have assumed the genuineness of all certificates and the authenticity of all documents submitted to us as original counterparts or as certified or photostatic copies; the genuineness of all signatures of all parties to the Company Documents other than on behalf of the Company; and the due authorization, execution and delivery of the Company Documents by and the enforceability thereof against all parties thereto other than the Company.

As to questions of fact material to our opinion, we have relied upon the representations and warranties made by the Company in the Company Documents and upon one or more certificates of officers of the Company. Whenever the phrase "to the best of our knowledge" is used in this opinion, it refers to actual knowledge of members of this firm obtained from our representation of the Company and inquiries of responsible officers of the Company made in connection with this opinion, but no further investigation or review has been conducted.

Based upon the foregoing, it is our opinion that:

1. The Company is a duly formed and validly existing New York limited liability company and possesses full corporate power and authority to own its property, to conduct its business, to execute and deliver the Company Documents, and to carry out and perform its obligations thereunder.

2. The execution, delivery and performance of the Company Documents have been

duly authorized by the Company and the Company Documents have been duly executed and delivered by an Authorized Representative of the Company.

3. The Company Documents constitute the legal, valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, except as enforceability may be limited by applicable bankruptcy and insolvency laws and laws affecting creditors' rights generally and to the extent that the availability of the remedy of specific performance or injunctive relief or other equitable remedies is subject to the discretion of the court before which any proceeding therefor may be brought.

4. To the best of our knowledge, in reliance on the certificates and opinions specified herein, the execution and delivery by the Company of the Company Documents, the execution and compliance with the provisions of each and the consummation of the transactions contemplated therein do not and will not constitute a breach of, or default under the Company's Articles of Organization, Operating Agreement or any indenture, mortgage, deed of trust, bank loan or credit agreement or other agreement or instrument to which the Company or any of its Property may be bound, for which a valid consent has not been secured; nor is any approval or any action by any governmental authority required in connection with the execution, delivery and performance thereof by the Company.

5. To the best of our knowledge, in reliance on the certificates and opinions specified herein, there is no action, suit, proceeding or investigation at law or in equity before or by any court, public board or body, pending or threatened against, or affecting the Company wherein an unfavorable decision, ruling or finding would in any way adversely affect in a material fashion the validity or enforceability of the Company Documents.

Our examination of law relevant to matters herein is limited to the laws of the State of New York and also the Federal law, where appropriate, and we express no opinion as to matters governed by the laws of any other state or jurisdiction.

This opinion is only for the benefit of and may be relied upon only by the Agency, its successors and assigns. The opinions set forth in this letter are limited to those expressly stated and no other opinion may be inferred nor is any implied. No other use of this opinion may be made without prior written consent. This opinion is given as of the date hereof and we undertake no obligation, and hereby disclaim any obligation, to update or supplement this opinion in response to a subsequent change in the law or future events affecting the documents identified in this letter.

Very truly yours,

Barclay Damon LLP

CLOSING MEMORANDUM

CITY OF SYRACUSE INDUSTRIAL DEVELOPMENT AGENCY

WILBUR AVE A/B, LLC PROJECT

DATE OF CLOSING: December 18, 2025

I. Action Taken Prior to Closing

By application dated November 5, 2024, 800 South Wilbur Ave, Syracuse, LLC, the applicant (the "***Applicant***"), on behalf of a company to be formed, namely, Wilbur Ave A/B, LLC, a New York State limited liability company (the "***Company***"), requested the City of Syracuse Industrial Development Agency (the "***Agency***"), a public benefit corporation organized under the laws of the State of New York to undertake, and pursuant to resolutions adopted December 9, 2024, the Agency undertook a project (the "***Project***") consisting of: (A)(i) the acquisition of an interest in approximately 8.0 acres of a larger piece of land located at 800 S. Wilbur Ave. Rear, (tax map no.: 098.2-01-05.2); and 802 S. Wilbur Ave (tax map no. 098.2-01-05.4); which parcels are located in the City of Syracuse, New York, with such acreage to be re-subdivided, in one or more lots from the larger parcel (the "***Land***"); the construction of two 4-story buildings, each containing approximately 130 units for an aggregate of approximately 261 residential units consisting of approximately: (34) studios, (112) one-bedroom units, (86) two-bedroom units and (28) three-bedroom units (all of which will meet or exceed the AMI Restrictions) and which will include a unit for an on-site superintendent and 20 units designed and fully adapted to meet ADA design requirements for households with individuals who have hearing, vision or mobility disabilities; amenity space for residents including: lobby, fitness center, community room, playroom, central laundry room, maintenance and management office, mechanical room, mail and package room and leasing office; outdoor spaces, including but not necessarily limited to, a park, a playground and surface parking sufficient for approximately 257 vehicles (collectively, the "***Facility***") to support the Facility; (iii) the acquisition and installation in and on the Land and Facility of furniture, fixtures and equipment (the "***Equipment***" and together with the Land and the Facility, the "***Project Facility***"); (B) the granting of certain financial assistance in the form of exemptions from real property tax and State and local sales and use tax with respect to the Project Facility (collectively, the "***Financial Assistance***"); (C) the appointment of the Company or its designee as an agent of the Agency in connection with the acquisition, construction, equipping and completion of the Project Facility; and (D) the lease of the Land and Facility by the Agency pursuant to a lease agreement and the acquisition of an interest in the Equipment pursuant to a bill

of sale from the Company to the Agency; and the sublease of the Project Facility back to the Company pursuant to a sublease agreement.

The Company also requested the Agency appoint the Company as its agent for purposes of completing the Project and the granting of certain Financial Assistance.

The Company is, or will be at the time of closing, the owner of the Project Facility.

The Agency will acquire a leasehold interest in the Land and Facility from the Company pursuant to a Company Lease Agreement dated as of December 1, 2025 (the "***Company Lease***"), between the Company, as landlord and the Agency, as tenant; and an interest in the Equipment pursuant to a bill of sale from the Company dated as of December 1, 2025 (the "***Bill of Sale***"). The Agency will sublease the Project Facility back to the Company, pursuant to an Agency Lease Agreement dated as of December 1, 2025 (the "***Agency Lease***") between the Agency, as sublessor and the Company, as sublessee. Capitalized terms used herein and not otherwise defined shall have the meaning given to such terms in Exhibit "C" to the Agency Lease.

Among the actions taken by the Agency with respect to the Project prior to Closing were the following:

November 5, 2024	The Applicant submitted an application for financial assistance for the Project.
November 22, 2024	A resolution determining that the acquisition, construction, equipping and completion of a commercial facility constitutes a project; describing the financial assistance in connection therewith; and authorizing a public hearing (the "***Public Hearing Resolution***").
November 25, 2024	Notice of Deviation from the Agency's UTEP was mailed to the affected taxing jurisdictions.
November 26, 2024	Notice of the Public Hearing was mailed to the chief executive officers of the affected tax jurisdictions pursuant to Section 859-a of the Act.
November 26, 2024	Notice of the Public Hearing was published in the Post-Standard pursuant to Section 859-a of the Act.
December 4, 2024	Amended Notice of Deviation from the Agency's UTEP was mailed to the affected taxing jurisdictions.
December 4, 2024	Benefit Affirmation Letter received verified by the Applicant.
December 9, 2024	The Agency conducted the Public Hearing pursuant to Section 859-a of the Act.

December 9, 2024	A resolution authorizing the undertaking, acquisition, construction, equipping and completion of a project; appointing the Company agent of the Agency for the purpose of the acquisition, construction, equipping and completion of the Project and authorizing the execution and delivery of an agreement between the Agency and the Company (the "***Inducement Resolution***").
December 9, 2024	A resolution approving a payment in lieu of tax abatement schedule and authorizing the execution and delivery of certain documents by the Agency in connection with the Project (the "***PILOT Resolution***").
December 9, 2024	A resolution authorizing the execution and delivery of certain documents by the Agency at the request of the Company to confer the approved financial assistance (the "***Final Approving Resolution***").
November 18, 2025	A resolution authorizing a clarification to the project description in connection with a certain project previously undertaken by the Agency (the "***Approving Resolution***").
