Scan QR code or visit [solarsimplified.com/syracuse](https://solarsimplified.com/syracuse)

**Save 10% or 20%\* on your National Grid Electric Bill**

Income-eligible households may qualify for a 20% discount.

**Community Solar Provider: Solar Simplified**

Renters, homeowners, and businesses can all join!  
Questions? Contact the support line at 888-420-9831

**Turn over to learn how it works** 

Syracuse Community Solar is a partnership between the City of Syracuse and EnergySmart CNY, Central New York's Regional Clean Energy Hub. The program connects Syracuse residents and businesses to an official Community Solar provider, Solar Simplified, to subscribe to local solar farms and receive monthly savings on utility bills.

**NYSERDA**  
Regional Clean Energy Hub

SOLAR SIMPLIFIED.

# SYRACUSE COMMUNITY SOLAR

## HOW IT WORKS

Solar Credits = Share of energy produced by a solar farm

Solar panels are installed locally. New York State requires new solar farms to provide solar credits to subscribed participants at a discounted rate.

You access the clean, discounted energy through subscription to the solar farm. Your utility provider stays the same.

Clean energy from local solar farms is transferred through National Grid to your building.

Subscribers receive solar credits on their electric bill, then pay for those credits at a discounted value, lowering the total bill.

## HOW YOU SAVE MONEY

**You receive solar credits, reducing your electricity charges**

**You only pay for those credits at a set rate of 90% of their value, or 80% if you're income-qualified**

**You keep the remaining 10% or 20% of the savings, lowering your total bill**

**If there are no solar credits applied, there will be no payment of those credits on the bill**

Guaranteed savings on your electricity costs

No cost, no additional fees, and no long-term contracts

No installation or equipment required
